MANAGEMENT DISCUSSION AND ANALYSIS REPORT

a) Industry Structure and Development:

During the year, Industrial Output of the economy has been sluggish; primarily because of higher interest rates in macroeconomic concerns. However, your Company's approach of diversification of customer base has helped it to maintain steady growth.

b) Opportunities and Threats:

1) Strength:

Power Sector is growing by 30% every year and copper is in very high demand. All heavy electrical industries, electrical panel board manufactures electrical switch gears units and manufacturers, sub-miscible pumps needs copper tubes/ flakes/ rods which is the product of Baroda Extrusion.

2) Weaknesses:

Copper prices are increasing in the market; engineering units may find substitute material for copper. But as the conductivity of the copper is very good chances of the substitution are very less.

3) Opportunities:

The demand for the products is growing steadily as there is a considering gap between demand and supply of extrusion products. This prevailing scenario leaves an opportunity for the company to expand and thereby to utilize the existing manufacturing capacity to a great extent. Even the Export potential for the product manufactured by the company is also very bright provided certain improvement in the technology and the quality of the product is achieved.

4) Threats:

The copper being a high cost raw material as compared to other industries, the requirements for the working capital is comparatively more than the other segments and thereby heavy interest burden affects the desired net margin. Upward price revision in copper and brass, which is the basic raw material adversely affect the gross margin.

c) Segment wise performance or product wise performance

The segment wise report is not furnished as the company is presently engaged in one business segment i.e. copper extrusion.

d) Outlook:

As already mentioned that there is a considerable gap between demand and supply of extrusion products. Even the opportunities for exports is a bright which can be achieved by improving the technology and thereby quality of the product. The company is confident that, barring unforeseen circumstances, the profitability of the company would improve in the current financial year.

e) Risk and Concerns:

The operating profit is not being achieved due to fluctuation in copper prices coupled with heavy interest burden. Reduction in production cost as an economy measure and utilization of existing manufacturing capacity by undertaking job work activity would help the company in achieving desired level of profitability.

f) Internal Control Systems and Adequacy:

Your Company is in the process of implementing effective internal control procedures commensurate with the size and nature of business. These procedures would ensure efficient use and protection of the resources and compliance with policies, procedures and statutes. There is procedure of periodically review of the existing internal control system.

g) Discussion on Financial Performance:

During the year under review, the total income stood at Rs. 14520.51 lacs for the year as against Rs. 9059.82 lacs in the previous year. The increase in sales is mainly on account of low-cost and need-based finance and corresponding increase in orders due to effective marketing. The company could not achieve the desired level of net margin due to heavy interest burden as well as underutilization of the existing manufacturing capacity.

h) Human Resources:

Recognizing that people are an important part of the organization, a major exercise in training and development of employees has been undertaken at all levels. The Company gives a lot of importance to Human Resources activities. These activities have helped to retain and motivate employees of the company to face this difficult period.
