MANAGEMENT DISCUSSION AND ANALYSIS REPORT

Overview

i) Industry Structure and Developments

FOOTWEAR

There are two kinds of sports shoes cemented and injection moulded. The global business of sports shoes is dominated by the cemented variety. The sports shoes being retailed by Nike, Reebok, Adidas etc. is essentially of cemented kind. Till late 1980's, this industry was dominated by South Korea and to a lesser extent Taiwan. Busan, a port town on the southern tip of Korea was the manufacturing hub. There were companies in Korea with manufacturing capacity in excess of 60 million pairs. The large manufacturers had sales turnover varying between US\$ 150 and US\$ 600 million. The exodus of this industry from Korea started in early 90's and the major beneficiaries of this flight of capital have been China, Indonesia, Vietnam and Thailand. China is the leading destination for sourcing of sports shoes. It is this semi-monopolistic position of China as the leading manufacturer of sports shoes which has compelled leading international sports shoes companies like Nike, Reebok, Adidas, Converse etc. to develop an alternative to China. India, with its large reservoir of skilled labour can emerge as an alternative to China. Currently, a large quantity of the sports shoes sold in India are being sourced in CKD Kits from countries like China, Vietnam and Indonesia, and there is a huge opportunity for creating an integrated manufacturing facility which can serve the domestic requirements of these international brands.

**ii) Opportunities and threats
FOOTWEAR**

The footwear sector is a very significant segment of the Leather Industry in India. Footwear is the engine of growth for the entire Indian leather industry and India is the second largest global producer of footwear after China, accounting for 14% of global footwear production of 14.52 billion Pairs. India Produces 2065 million pairs of different categories of footwear (Leather Footwear 909 million pairs, Leather Shoe uppers 100 million pairs and Non-leather footwear 1056 million pairs) India exports about 115 million pairs. Thus, nearly 95% of its production goes to meet its own domestic demand. The major production centers in India are Chennai, Ranipet, Ambur in Tamil Nadu, Mumbai in Maharashtra, Kanpur in U.P., Jalandhar in Punjab, Agra, Delhi, Karnal, Ludhiana, Sonapat, Faridabad, Pune, Kolkata, Calicut and Ernakulam. Footwear exported from India are Dress Shoes, Casuals, Moccasins, Sport Shoes, Horrachies, Sandals, Balletinas, Boots, Sandals and Chappals made of rubber, plastic, P.V.C. and other materials.

The Company has implemented footwear project at Una, Himachal Pradesh where the unit will get Central Government incentives like excise duty concession, tax holiday for five years etc. Initially the Unit will go for Contract manufacturing for reputed MNC sports brand. At present the domestic requirement of these brands are being sourced in CKD (Completely Knocked Down) kits from countries like China, Vietnam and Indonesia. Therefore the Company feels that there is good opportunity for creating an integrated manufacturing facility which can serve the domestic requirements of these international brands to a large extent. Further, company has entered the domestic market.

NOTE 1

SIGNIFICANT ACCOUNTING POLICIES

1. BASIS OF PREPERATION OF FINANCIAL STATEMENTS

- a) The financial statements are prepared under the historical cost convention in accordance with the generally accepted accounting principles and the provisions of the Companies Act, 1956. Accounting policies not specifically referred to are consistent with generally accepted accounting policies.
- b) The company generally follows mercantile system of accounting and recognizes significant item of Income & Expenditure on accrual basis.

2. FIXED ASSETS

The fixed assets are recorded at the cost which includes freight, duties, levies and any directly attributable cost of bringing the assets to their working condition for their intended use. Adjustments arising from exchange rate fluctuations relating to outstanding liabilities attributable to the fixed assets are capitalized/ adjusted.

3. INVENTORIES

Inventories are valued on FIFO Method

- Raw materials- at lower of cost or net realizable value.
- Packing materials, consumable stores and spares-at cost.
- Stock-in-process- Material cost plus appropriate share of production overheads.
- Finished goods- at lower of cost or net realizable value.

4. EXPENDITURE ON EXPANSION

Expenditure directly relating to constructions/substantial expansion activity is capitalized. Indirect expenditure incurred during construction period is capitalized as a part of indirect construction cost to the extent to which the expenditure is indirectly related to construction or is incidental thereto. Income earned for during construction period is deducted from the total of indirect expenditure.

As regards indirect expenditure on expansion, only that portion is capitalized which represents the marginal increase in such expenditure involved as a result of capital expansion. Both direct and indirect expenditure are capitalized only, if they increase the value of the asset beyond its original standard of performance.

5. DEPRECIATION

Depreciation is provided on Straight Line Method on pro-rata basis on all the fixed assets at the rates prescribed in Schedule XIV of the Companies Act, 1956.

6. FOREIGN CURRENCY TRANSACTIONS

Export sales are accounted for at exchange rate prevailing on the date the documents are negotiated/ realized with/ through bank. In case of direct remittance from buyers the difference between the exchange rates on the dispatch date and actual exchange rate of foreign currency on receipt of payment is booked in sales.

The assets and liabilities at the year end are translated at the closing exchange rate and the difference between the transactions is taken into profit and loss account.

The foreign currency transactions in respect of payment towards cost of fixed assets, spares, traveling, commissions etc. are accounted for at the exchange rates prevailing on the date of transaction/ remittance.

7. BORROWING COST

Borrowing costs that are attributable to the acquisition on construction of qualifying assets are capitalized as a part of the cost of such assets. A qualifying asset is one that necessarily takes substantial period of time to get ready for intended use. All other borrowing costs are charged to revenue.

8. TAXES ON INCOME

Tax expenses comprises of current, deferred income tax and fringe benefit tax. Provision for current income tax and fringe benefits tax is made for the amount of tax payable in respect of taxable income for the year under The Income Tax Act, 1961. Deferred tax is recognized subject to the consideration of prudence, on timing difference, being the difference between the book profits and tax profits that originate in one period and are capable of reversal in one or more subsequent periods. The deferred tax assets and liabilities are measured using the tax rates and tax loss that have been enacted or substantively enacted at the balance sheet date. Deferred tax assets are recognized only to the extent that there is a reasonable certainty that sufficient further taxable income will be available against which such deferred tax assets can be realized. If the company has carry forward of unabsorbed depreciation and tax losses, deferred tax assets are recognized only where virtual certainty that such deferred tax assets can be realized against further taxable profits. Unrecognized deferred tax assets of earlier years are reassessed and recognized to the extent that it has become reasonably certain that further taxable income will be available against which such deferred tax assets can be realized.

9. RETIREMENT BENEFITS

The liability on account of Gratuity is covered by the Group Gratuity Policy taken from Life Insurance Corporation of India. Contribution to the Gratuity fund is charged to revenue. The liability of Leave Encashment is provided on actuarial basis. The contribution to the Provident Fund is made as per the provisions of The Employees Provident Fund and Miscellaneous Provisions Act, 1952.

10. USE OF ESTIMATES

The presentation of financial statements require estimates and assumptions to be made that effect the reported amount of assets and liabilities on the date of financial statements and the reported amount of revenue and expenses during the reporting period. Difference between the actual results and estimates are recognized in the period in which the results are known/ materialized.

11. EARNING PER SHARE

Basic earnings per share are calculated by dividing the net profit or loss for the period attributable to equity shareholders (after deducting preference dividend & taxes) by the weighted average number of equity shares outstanding

during the financial year. Equity shares that are partly paid up are treated as a fraction of an equity share to the extent they are entitled to participate in dividends. The weighted average numbers of equity shares outstanding during the year are adjusted for events such as bonus issue, bonus element in a right issue to the existing shareholders, share split and consolidation of shares.

For the purpose of calculating diluted EPS, the net profit or loss attributable to equity share holders and weighted average number of equity shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

12. INTANGIBLE ASSETS

An Intangible Asset is recognized if and only if

- a) It is probable that the future economic benefits that attributable to the assets will flow to the enterprises
- b) The cost of assets can be measured reliably.

An intangible asset is measured initially at cost.

The amortization method will be used to reflect the pattern in which asset's economic benefits are consumed by the enterprise. If that pattern cannot be determined reliably, the straight line method will be used.

13. IMPAIRMENT OF ASSETS

An asset is treated as impaired, when carrying cost of assets exceeds its recoverable amount. An impaired loss is charged to Profit & Loss Account in the year in which an asset is identified as impaired. The impairment loss recognized in prior accounting periods is reversed if there has been a change in the estimate of the recoverable amount.

14. PROVISIONS, CONTINGENT LIABILITIES AND CONTINGENT ASSETS

Provisions involving substantial degree of estimation in measurement are recognized when there is a present obligation as a result of past events and it is probable that there will be outflow of resources. Provisions are determined based on the best estimates required to fulfill the obligation on the balance sheet date. Provisions are reviewed at each balance sheet date and adjusted to reflect the current best estimates.

Contingent Liabilities are not recognized but are disclosed in the notes. Contingent Assets are neither recognized nor disclosed in the financial statements.

15. SEGMENT REPORTING

- a). Segment accounting policies are in line with the accounting policies of the company. In addition, the following specific accounting policies have been followed for segment reporting.
 - (1). Segment revenue includes sales and other income directly identifiable with/allocable to the segment including inter segment sales.

- (2) Expenses that are directly identifiable with/allocable to segment are considered for determining the *segment result*. Expenses which relate to the Company as a whole and not allocable to segment are included under un-allocable corporate expenditure.
- (3) Income which relates to the company as a whole and not allocable to segments is included in un-allocable corporate income.
- (4) Segment assets and liabilities include those directly identifiable with the respective segments. Un-allocable corporate assets and liabilities represent the assets and liabilities that relate to company as a whole and not allocable to any segment. Un-allocable assets mainly comprise corporate head office assets, investments and tax deposited with the Income Tax authorities. Un-allocable liabilities include mainly unsecured loans and tax payable to Income Tax Authorities.
 - b). Inter Segment transfer pricing
Segment revenue resulting from transactions with other business segments is accounted on the basis of cost of production.

16. GOVERNMENT GRANTS AND SUBSIDIES

Grants and subsidies from the government are recognized when there is reasonable assurance that the grant/subsidy will be received and all attaching conditions will be complied with.

When grant or subsidy relates to an expense item, it is recognized as income over the periods necessary to match them on a systematic basis the cost, which it is intended to compensate. Where grant/subsidy relates to an asset, its value is deducted in arriving at the carrying amount of the related asset against which grant/subsidy has been received and further where the grant/subsidy is in the nature of promoters contribution the amount of grant/subsidy is accounted for as a capital reserve.
