Meaning of Internal Financial Controls Over Financial Reporting

6) A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

7) Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

MANAGEMENT DISCUSSION AND ANALYSIS

The Management Discussion and Analysis presented in this Annual Report focuses on the theme of 'Faster, Higher and Stronger' which was the Company-wide initiative to continue on the path of profitable growth. The company has got the profit before tax Rs. 2.51 Crores during the year. The organization structure, various strategies followed and processes implemented, along with excellent team-work, a strong management and leadership has enabled the Company to move forward on the path of profitable growth.

Overall Business Review

Incap Limited is a 25-year-old focused Company, with interests in the Manufacturing and Production of Capacitors and Insulators. The costs of inputs in key raw materials continued to escalate, thereby affecting the material costs adversely. The industry witnessed intense competition for market share and significant pressures on margins and profits. The Company continued its focus on enhancing revenue growth. Various actions in terms of cost reduction, value engineering, competitive sourcing and improving credit discipline have been undertaken. There has been a significant progress in the Industry.

Industry structure and developments:

In India the demand for Electrolytic Capacitor is around 4 to 5 billion capacitors (approx) in all segments.

The total production in India for this component is negligible, since the market is either in the hands of Chinese or Japanese due to mass scale and quality product of Japanese. The output in the Indian Industry would be hardly 150 m pcs per annum.

The cost factor is also a major constraint in determining the sale since we are banking for all raw materials sources either from China or Japan and our raw materials are totally imported since there is hardly any supplier big enough to support even a small rubber bung in India. Backward Integration is negligible.

There is a hope that the Indian Industry has an upper hand to manufacture and support the local Industry and that too in segments like LED since this is going to have a market for the next, one decade is the analyst view further the cost of all things in China and Japan is likely to be high even the Labor. So India could be their next destination.

Anyhow progress and growth would be not less than 10% since there is umpteen area of vacuum by which we can improve our sale.

The competition like any other Industry we will face tough times on pricing from the Chinese but everything can be overcome with quality and faster delivery. Presently anyhow Chinese and Japanese have the maximum share in the Electrolytic Capacitor market.

Opportunities and threats:

We have been focusing on the Business to Business oriented businesses. After having established ourselves amongst the top few companies in the entire market Endeavour to establish ourselves with more growth and performance.

Due to the strong linkage of the manufacturing industry to the economy, such an event would adversely impact growth in the short term for the Company.

Competition: Competition whether domestic is always a challenge and transforming challenges into opportunities has been a practice at Incap.

Cost of Raw material: Aluminum Foil, Aluminum Cans, Lead Tabs, Electrolyte being a major raw material to our business, its cost may affect our contribution margins. Company had adopted various measures to minimize the effect of escalating prices of raw material.

The new initiatives will bring new challenges in near future. We believe that we have sufficient management bandwidth to pass through these cycles with past experiences.

Outlook:

Domestic economic indicators are expected to improve, led by positive prospects in Government Spending and several government schemes. Indian economic activity is expected to improve modestly, driven by global economic revival and moderation in inflation. Upside pressures on inflation and consumption, hinge on the vagaries of the monsoon and the pace of revival of the investment climate will determine to a very large extent India's economic performance, going forward.
