At Tasty Bite, we believe we are what we eat. In our consumer business, we are committed to the principle that any product that carries the Tasty Bite brand will necessarily be natural, perhaps organic, and will contain no chemical preservatives, additives, artificial colors or flavors.

Our Food service business has seen tremendous growth these last several years. But, growing demand for fast food need not mean we sacrifice nutrition in the pursuit of taste. We believe in convenience without compromise.

Our versatile product range comprises great ready-to-cook and ready-to-eat recipes, with a fine selection of natural ingredients and the mazaa of lip-smacking delicacies.

About Us

Tasty Bite Eatables Limited (TBEL) is the leading brand for Indian and Asian prepared foods. We had our humble beginning back in 1995 in the US, with five all-natural, ready-to-eat Indian entrées. It has only been two decades and TBEL has evolved as America's largest brand for prepared Indian food. Today, our products are available in the US, Canada, Australia, New Zealand, Japan, Germany and the UK.

Our product range comprises ready-to-eat and ready-to-cook Indian and Asian entrées, sauces and a versatile range of ready-to-eat organic rice and grains.

In 2006, we aimed at bringing the TBEL family home, as we launched the Tasty Bite Food Service business (TFS) in India. Under TFS, we make a range of specialty

formed frozen products, patties, sauces and gravies, and cater to several renowned players in India's food service industry.

While, the market for our consumer products continues to flourish entirely outside India through our parent company, Preferred Brands International Inc., in North America and through Mars, incorporated in other regions, TBEL caters to the local Indian markets via our food service products. These are marketed directly by the Company to major QSR (Quick Service Restaurants) and HORECA (Hotels, Restaurants and Caterers) players. Besides our presence in the aforementioned territories, the Company has also expanded its base in South East Asia, Middle East and Africa, for its food service products through the QSR channel.

We pride ourselves upon our commitment to only using high-quality vegetarian and natural products, with no preservatives and no GMO. The utmost quality of our products fares well on both taste as well as health—giving us a strong edge in the emerging food trends.

Chairman's Message

We ended the year up 17% with INR 3.6 Billion in revenues and INR 301 Million in PAT (up 14%). The consumer business grew 15% and crossed the INR 2 Billion mark.

Dear Shareholders,

We just completed the first year in our new avatar as a Mars, Incorporated subsidiary and I am pleased to report that the track record of profitable growth your company has witnessed these last several years continued through 2018-19.

We ended the year up 17% with INR 3.6 Billion in revenues and INR 301 Million in PAT (up 14%). The consumer business grew 15% and crossed the INR 2 Billion mark. The Food service business in both categories of sauces and frozen formed products each grew 34% pushing the TFS business across INR 1 billion in revenues.

Here are some quick highlights:

- In the consumer business both branded (21%) and private label (25%) saw robust growth
- With the help of our parent Mars, Incorporated we have begun geographic expansion in Australia, UK and Germany
- In the TFS business International markets grew from INR 18.4 Million to INR 28.7 Million in 2018-19

- The Tasty Bite foundation got underway and is now a section 8 company. It will lead the company's CSR efforts and will strive to become a catalyst for accelerating sustainable and inclusive rural development
- The US Government announced earlier this year that it would terminate GSP benefits for Indian exports to the US claiming India had a wide array of trade barriers that affected US commerce. We have constantly taken the view that GSP is beneficial to both US and India. It makes Indian exports competitive even as it creates American jobs. We will soon need to review its economic impact on our margins

It has been my tradition in the Annual Reports of the last 20 years to look around the industry and look ahead, so I can share my views on how we see the future and how your company is kitted out for the journey that lies ahead, the journey we called Tasty Bite 3.0, the journey we called *Wholesome Mazaa*. We spoke about it last year and we remain committed to continue on that journey for the foreseeable future.

The consumer business has long been on this road. The products that carry the Tasty Bite logo are necessarily natural and increasingly organic. The simple oath has always been that we will not put into Tasty Bite what we will not put into our mouths. Hence there is no place for chemicals, additives, synthetic preservatives, artificial colors and flavors or even GMOs in any pack of Tasty Bite.

The Tasty Bite Food Service (TFS) business represents our next journey. Its stated mission is to become the natural partner of choice to leaders in the food service industry. Hardly a decade old, it is today 35% of our company's revenues. The strategy of *Wholesome Mazaa*, if challenging in the consumer business, is even more so in the food service industry, as they increasingly face consumer pushback against excessive added sugars, salt and saturated fat. At TFS we remain committed to the idea that every new product launched will be natural. This is more than a technological commitment. It's a statement of purpose. What part can we play with our partners to remove junk out of junk food?

The food industry is witnessing an interesting global phenomenon of emerging trends and counter trends where opposites are true - a Dickensian tale of two cities. Here are three that I believe will influence our industry and your company's strategy going forward.

1. Eat In, Eat Out:

The Food Industry is broadly split evenly between retailing and food service (or eating in and eating out). The largest single market is the US where the \$1.5 trillion food industry is split evenly between Grocery and Foodservice.

Over the last 25 years the fastest growing segments of the grocery industry have been natural,

convenient and ethnic foods globally. Increasingly the perimeter inside the stores has become a large revenue generator for supermarkets worldwide. Perimeter products include fresh produce, fruits, meal, eggs, dairy and take away prepared foods largely consumed at home. Grocery has been the major market for Tasty Bite since its launch in 1995 and one that has seen 25 years of continuous growth.

Eating in is in.

The Global foodservice industry is a whopping US\$3.6 Trillion with 3/4th of the business in three major geographies: Asia (43%), N.America (22%) and Europe (13%). The amorphous segments in this mammoth space include the full service restaurants, QSRs, Street carts, HORECAs, PBCL (Pubs, Bars Clubs), HMRs (home meal replacement), OOH (out-of-home), dark/cloud kitchens, commissaries, institutions, corporate cafeterias, travel & leisure, non-commercial food service establishments, hospitals, etc. The list is long and presents both heady and confusing opportunities.

Eating out is in too.

At Tasty Bite, we recognize this dual opportunity and while we continue to make major strides in expanding grocery distribution in new markets we are also expanding TFS business in India and the region. The cover of this year's Annual report emphasizes this strategy.

2. Staying well, getting sick:

The wellness industry (there is even such a classification!) is estimated to be US \$4.2 Trillion this year. The awareness of everything we put in our body, on our body and do with our body is increasing at a dizzying pace. In our industry, the growth in nutri-label awareness, local sourcing,

Chairman's Message contd.

vegetarianism, veganism, gluten free, organic & super foods, just to name a few are all major drivers of wellness. This combined with a heightened awareness of climate change bodes well for consumer, plant and planet health.

The world is getting healthier.

Diet related diseases though, are a major cause of illness in the world not just out of hunger and malnourishment but also in prosperous countries due to unhealthy food choices. A recent Lancet study claimed 11 million deaths (One in five) worldwide was linked to poor food choices. Even the US ranks 43rd in diet related deaths. India scored even worse at 118.

The world is getting sicker.

The term consumer delight in our mission statement includes both taste and wellness. The Tasty Bite Research Center (TBRC) aims to create a center for excellence in prepared foods R&D. You've heard me use the expression "Convenience without compromise". TBRC measures effectiveness through a series of metrics we call Innovation Index. This is not just to measure revenue and margin growth attributable to Innovation but also to continuous improvement in nutritional density.

3. Connect, disconnect:

There is a new sense of connectedness that has emerged as a result of social media, upending a lifetime of entrenched behavior. Physical introverts are digital extroverts, privacy in the real world has turned to open season online and even the corporate supply chain has been transformed through transparency and traceability- all in search of some ephemeral connectedness.

What started as a safety and quality assurance mechanism, traceability has become a connector and with the intervention of AI and block chain technology promises to connect millions of consumers and farmers thousands of miles apart. We live in a connected world.

Today more than 2.5 billion people spend more than 2 hours everyday on their favorite social media platforms taking away a significant amount of real connectedness. This digital overload comes with a stiff price tag. People are awkward in face-to-face conversations, have difficulty running through daily checklists and we are witnessing an unforeseen increase in mental issues in 16-24 year olds, affecting relationships and pulling families apart. We are deeply disconnected.

“

The term consumer delight in our mission statement includes both taste and wellness. The Tasty Bite Research Center (TBRC) aims to create a center for excellence in prepared foods R&D.

”

“

Diet related diseases though, are a major cause of illness in the world not just out of hunger and malnourishment but also in prosperous countries due to unhealthy food choices.

”

We'd love to bring families together over a Tasty Bite dinner! Improving real connectedness should be in every brand's DNA. For us Wholesome Mazaa will now have an added dimension. We are increasing our efforts on traceability and provenance. This will not just provide comfort on safety and quality assurance but potentially enhance consumer connectivity with our farmers. Soon, I believe Tasty Bite consumers in N. America, EU or Australia will be able to connect with our farmers in Uttaranchal, Maharashtra or Gujarat. And in the not too distant future our farmers will be able to connect with our consumers 1,000 miles away!

Traditional CPG food companies know they must have the consumer at the heart of their business. Most believe they do. Some of the indices used to test this commitment are *share of mind*, *share of wallet* and *share of plate*. But are these real indicators of consumer focus or are they self-directed at the brand?

I believe it is time for us to ask the question: What is our *share of wellness*?

The theme of this year's Annual report addresses this issue head on. At Tasty Bite *Wholesome Mazaa* is more than a slogan, a tagline or even a brand or advertising positioning statement. For Tasty Bite, it is a commitment, indeed even a responsibility. The 2 words represent the essence of the company's mission statement that states its purpose to be a "*socially responsible company that will provide consumer delight*". But as I mentioned, this is a journey- not a destination and this is the road that we will travel forever.

Wholesome Mazaa

Tasty Bite prides its brand reputation with a unique blend of taste and nutrition – a strong USP maintained over the years.

Our products could be characterised as the finest quality of ready-to-eat and easy-to-cook. Our endeavour started out with a vision to present rich Indian and Asian delicacies to the world.

The richer a meal, the more its prep time! This is true for our rich and glorious Indian cuisine in particular. Our ready-to-cook solution paved a new path for millions to satiate their taste buds without a hassle. With years of commitment, we launched our 'Ready to Eat' range which would just take a minute of your hectic day to make it a little brighter. We have always been inclusive and thoughtful as innovators. Being food enthusiasts ourselves, we understand the joy of cooking. So for those who would rather soak themselves in the art of preparing a meal, we chose to make an exception. Our 'Spice & Simmer' sauces range is especially crafted to do away with the cumbersome and overwhelming pre-preparation processes, while leaving the best parts of cooking to our consumers.

With over two decades in action, Tasty Bite has become a hit among the markets of the US, Canada, Australia, New Zealand, Germany and the UK. While our territories and reach may be international, we keep our recipes and kitchen true to the desi standards with our state-of-the-art production facility in Pune. The rich Indian taste is combined with technological methods by our master chefs into creating an all-natural and preservative-free delicious meal.

Upon receiving a mass appreciation for our products across different countries, we knew the bar had to be raised. Thus, followed an array of bold flavours with exotic yet affordable new offerings, and there were a lot more

Our ready-to-cook solution paved a new path for millions to satiate their taste buds without a hassle.

additions to our already wholesome product range. As we continue with our stronghold on the global food markets, we have been ambitiously expanding across India with our food service business.

The Asian taste buds have long been pampered with a wide plethora of spicy, sweet, and everything in between. However, our local cuisines don't fall short on nutrition either. Maintaining the same aesthetic value of food, our TFS segment provides preservative-free, natural, quick and tasty solutions for modern India's cravings. We cater to top QSRs and HORECA brands with our formed frozen products and sauces. Moreover, the flourishing fast food culture and out-growing demand for fine dining options in India has increased the prospect for our TFS segment. The features of convenience, taste, and nutrition have led to our popularity among the country's top QSR brands as a highly innovative and reliable food supplier. Besides, we have also been serving some of the prominent names beyond India.

Be it our consumer business or our TFS segment, we harness only the best-in-market technology to develop food solutions. This coupled with our efficient team, methods and years of experience makes us a name rapidly making its way inside every kitchen and heart!

People Story

We, at Tasty Bite, are a pack of innovative people who stick together and nurture each other. At the heart of all good things is a unified sense of serving people well. Across our organisation, each individual strives to set the bars higher on a personal as well as an organisational level.

MANAGEMENT DISCUSSION AND ANALYSIS:

OVERVIEW

Tasty Bite is the leading brand of Ready to Eat (RTE) prepared foods and is also the partner of choice to leading brands in the food service industry. The consumer business has a range of ready-to-eat and ready-to-cook Indian and Asian entrées, sauces and a range of ready-to-eat organic rice and grains; while the Food Service business comprises a range of customized specialty formed frozen products, sauces and gravies. Our consumer products business is currently exports driven and the brand is marketed in North America by Preferred Brands Inc while Mars Food Corporation manages marketing and distribution for all markets outside of North America. Our food service products are marketed directly by your company to major QSR (Quick Service Restaurants) and HORECA (Hotels, Restaurants and Caterers) players in India, South East Asia and Middle East.

INDUSTRY MEGATRENDS

The vision of the Company, consistent for more than a decade, is to be a socially responsible company that will *delight consumers* by offering *great taste, good value and real convenience* achieved through manufacturing and marketing of *natural, convenient and specialty* foods. This vision is like a North Star guiding our strategy, operating plans and decision making. The company's vision continues to be a driving force for future growth and helps effectively navigate some of the industry megatrends mentioned below:

- **Better for you**

The trend towards healthy, natural, organic and better-for-you food isn't slowing down; in fact, its popularity is only increasing. Consumers are following healthier lifestyles and moving away from foods that contain additives to embrace simple natural ingredients that they use at home for daily cooking. They are also ready to pay a premium for organic food as they hate chemicals that destroy their body and the land on which their food is grown. This trend has been serving us well in our consumer business which has been necessarily natural and preferably organic. With introduction of five new organic products, your company launched the "fantastic fifteen" organic rice portfolio in the consumer business in North America. In addition, your company also started its foray into Organic Entrées by converting the iconic Madras Lentil into Organic. This journey of organic conversion will only increase in the near future. The 'better-for-you' trend is also on the rise in the food service industry with many global and local brands pledging to launch new products with clean label and have launched several initiatives to remove additives from their existing products. Your company is partnering with these customers to help create clean label products.

- **The adventurous consumer**

With increased globalization, consumers are exploring bolder flavors and seek multi-sensorial experiences. Consumers have become extremely experimental with flavors, are not afraid of hot spices and love to explore new seasonings. Jalapeno and Cayenne peppers are the rage in US, while there's increased consumption of Sweet Chili, Piquillo and Cayenne Peppers in Europe. Peri Peri has become a household name in India while Wasabi is moving beyond nuts and sushi to various forms of food like sauces, snacks and shakes. Chinese, Thai and Italian cuisines continue to grow in popularity while Indian has now become the second fastest growing cuisine across the world. Superfoods like Quinoa, Amaranth, Chia etc. are flying off the shelves because of their seemingly 'good for you' nutritional properties. Flexitarians are on the rise especially because of the growing popularity of plant-based foods. These plant-based foods attract not only vegetarians/vegans but also consumers concerned about personal health and food/environmental sustainability. All this bodes really well for your company which has been at the forefront of creating plant-based products with bold flavors and craving taste. Tasty Bite's existing range of Indian and Asian cuisine products are enjoying increasing popularity across all its markets. Several new products like 'Ancient Grains', 'Couscous & Quinoa', 'Smoky Chipotle Rice' launched to cater to the changing taste profiles are doing extremely well. We also launched a Hot and Spicy brand extension of our popular Madras Lentils. Within the food service segment, we partnered with QSRs to launch several innovative flavorful products in line with the customer expectations.

MANAGEMENT DISCUSSION AND ANALYSIS: (Contd.)

• Technology

Technology is changing the way people eat, cook and shop for food. Grocery shopping has become more fragmented for families with spontaneous “fill in” shopping trips supplanting the traditional weekly stock-up trip because of e-commerce. While Americans do dine out more than ever before, reports show that four out of five meals are still prepared at home. **Technology is helping the dramatic shift away from the traditional weekly stock-up grocery trip to immediate, needs-based replenishment, thanks to e-commerce. Consumer preferences for on-demand grocery delivery, within one to two hours, will only grow.** In line with this shifting trend, Tasty Bite is also seeing an increased demand from e-commerce companies like Amazon this share is only expected to go up in the future.

Technology is also playing a major role in disrupting the traditional food service industry. Not only online restaurant aggregators such as UberEats, Deliveroo, Swiggy but also companies that run cloud kitchens are changing the way consumers are ordering and eating food. On one side, these food tech companies are helping traditional QSR's by increasing their share of delivery business while on the other hand, they are competing with them through their cloud kitchens. The food delivery market in India is growing at more than 45% per annum and this is also helping drive same store sales growth for QSR's. Your company is partnering with leading food tech companies in standardizing their food supply chain and fast scaling of their cloud kitchens.

• Convenience continues to be king

The desire for convenience is not going away in the future, it is only on the rise. Consumers are looking for food options that are easy to prepare without sacrificing taste. The future of food will increasingly revolve around technology in an effort to address the need for convenience. While consumers gravitate towards natural ‘clean-label’ foods, they also have less time to prepare their foods and meals from scratch. The average cooking time in the US is down to 30 minutes per day. Tasty Bite range of Ready-to-Eat and Ready-to-Cook products helps this fast paced consumer meet his need to have a well-rounded diet without compromising on taste or health.

The food services industry in India is roughly \$60 billion today and is expected to grow to \$90 billion over the next 4-5 years. The number includes both organized and the unorganized sector. The growth would be on the back of a strong consumer demand for both ordering-in and eating out. In many South East Asian countries, apartments no longer have a kitchen. Every meal is outsourced. While a kitchen-free world is yet some time away for Indians, we are outsourcing food more frequently than before. Most of the large QSR's have been reporting double digit comparable sales while food tech companies have been scaling much faster. Tasty Bite's food service business partners with several QSR's as they battle to win an increased share of the Indian consumer's stomach.

• Transparency and Sustainability

Transparency has long been on the food industry's radar as a driver for building trust and boosting sales. Today's consumers want to know what's in their food, where it comes from, and how it's produced. Your company works with several farmers across the country and has put in strong systems to trace several of our incoming raw material like grains, fresh vegetables upto the farm level. Further, sustainability continues to have an enormous influence on customer buying decisions. When a consumer subscribes to a brand, they are also subscribing to the brand's ideology, their vision and the impact the brand has on the environment. Your company's vision for the past decade has been to be a “Socially Responsible Company” that provides consumer delight. This is matched with actions across several areas around soil and water conservation, increased use of renewable energy, reduction of carbon footprint. All of the company's steam is generated using compacted agricultural waste (Briquettes) and around 14% of energy is sourced from renewable sources like Wind and Bio-gas. By end of 2019, this number will increase to 25% after installation of solar panels across the entire factory. A brand that ‘walks-the-talk’ will always win the consumers heart and your company has been successfully doing that for the past several years.

MANAGEMENT DISCUSSION AND ANALYSIS:

(Contd.)

RESULT OF OPERATIONS

In terms of market share, Tasty Bite continued to maintain its strong position as the leading brand for shelf-stable Indian foods in North America.

Product wise performance

Product	Revenue*	Key market areas	Customers
Ready-to-eat food (natural, convenient, ethnic or specialty food)	INR 217.4 cr (64.5 % of the total revenue)	USA, Australia, Canada, New Zealand and UK	Marketed through FDI and Mars Foods who distributes the product in mainstream retail chains such as Costco, Kehe, Krogers, Woolworths and others
Formed frozen food and specialty sauces	INR 119.5 cr (35.5 % of the total revenue)	QSR chains and HORECA (hotels, restaurants and caterers) in India, South East Asia and Middle East	Dominos, Pizza Hut, Subway, Faasos, McDonalds, KFC, Burger King, Hindustan Unilever

*excludes other income

Your Company had a good year with revenues growing 17.2%. The export business grew 15% on account of increasing demand for our products, growth in distribution points as well as success of our new products like New Rice varieties, Thai Entrees and Ancient Grains.

The Tasty Bite Food Service (TFS) business has grown 34% over the previous year. This is on account of double-digit same store sales growth of QSR brands and addition of new customers including new age food tech companies that operate cloud kitchens. Several new products launched with customers helped not only drive additional sales for our customers but also helped us win awards like "Best Innovation", "Most Trusted Partner" from our customers.

Ready-To-Heat (RTH) business clocked INR 217.4 Crores of revenue while the Food Service segment comprising of Frozen Formed Products (FFP) and Sauces crossed the INR100 cr mark to end the year at INR 119.5 Crores. Overall revenue from both segments touched Rs 355.2 crores including income from export incentives on account of the export business.

Given the relatively high inflation in FY 2018-19, increase in our organic sourcing and long-term contracts for key commodities like Urad, Rice, Dairy and Tomato Paste our material cost increased by 1.4% to 58% of revenues.

Conversion costs were significantly lower at 10.1% compared to 14.1% of revenue in the previous year. This was mainly due to freight adjustment as per the new revenue standard (IND AS 115) applicable from 1st April 2018. Overall margin after direct costs (after all direct variable costs) increased by 250 bps to 31.9% of revenue. Manufacturing overhead costs increased to 6.2% of revenue compared to 5.8% in the previous year mainly because of increase in warehouse rental cost for storage of strategic raw material.

EBITDA grew in line with revenues by 17.8% and was at a stable 18% of revenue.

During FY'19 Profit before tax (PBT) increased to INR 47.1 crores from INR 41 crores in FY'18, an increase of 14.7%. Profit after tax increased to INR 30.1 crores from INR 26.5 crores in FY'18.

Other comprehensive income records the re-measurement gains/losses on our defined benefit plan (gratuity) and the mark to market gain/loss on the effective portion of cash flow hedges taken by the Company to hedge its forex exposures, net of taxes. There was an actuarial loss, net of taxes of INR 33.0 lakhs as compared to an actuarial loss of INR 30.3 lakhs in FY'18 and mark to market gain, net of taxes on effective portion of cashflow hedges of Rs 251.6 lakhs as compared to a loss of Rs 98.4 lakhs in FY'18.

MANAGEMENT DISCUSSION AND ANALYSIS: (Contd.)

Ratio

Various financial ratios are as follows:

Ratio	2018-19
i) Debtor Turnover	2.2
ii) Inventory Turnover	2.0
iii) Interest Coverage Ratio	11.8
iv) Current Ratio	2.1
v) Debt Equity Ratio	0.24
vi) Operating Profit Margin (%)	18.0%
vii) Net Profit Margin (%)	8.5%
viii) Details of any change in Return on Net Worth as compared to the immediately previous financial year along with a detailed explanation thereof	23.0%

During the year there is significant movement in debt equity ratio. It came down by 52% as compared to previous year primarily because of buyback of preference shares and efficient cash management during the year.

SOURCES & USES OF FUNDS

As at March 31, 2019 the Company had three long-term foreign currency loans from two Japanese banks, namely Mizuho Bank and the Bank of Tokyo-Mitsubishi with a total outstanding balance of \$ 4.7 million (INR 32.5 crores). These loans have maturities from five to eight years with an interest cost of 3 months Libor + 0.90% on two loans and 3 months Libor + 0.75% on the third loan. The Company has entered into an interest rate swap (IRS) agreement with the banks to convert the floating rate liability of these loans into a fixed rate liability. As at March 31, 2019, the IRS has a mark-to-market gain of INR 0.7 crores. The Company has not taken any new long-term loans during the year.

The Company availed working capital loan from affiliates of INR 12 crores in Indian currency in August 2018 which is repayable by August 2019. Out of this INR 6 crores have been repaid and INR 6 crores outstanding is yet to be paid.

The Company has repaid the short-term working capital borrowing in the form of packing credit in foreign currency from Mizuho Bank of INR 6.5 crores in FY 2019.

There was no change in equity share capital (issued/ paid up) during the financial year. However, the Company bought back 59,530 1% non-cumulative, non-convertible redeemable Preference Shares during the year.

Total net property, plant & equipment (including capital work-in-progress) stood at INR 92.4 crores as compared to INR 78.5 crores from previous year. Assets that were capitalized during the year (net of disposals) totaled INR 18.3 crores.

Net working capital in the business grew from INR 52.4 crores in FY'18 to INR 63.0 crores in FY'19, an increase of 20%. Current ratio increased from 2.0 to 2.1.

OPPORTUNITIES & THREATS

The business is built on the foundation of strong values, a consistent vision and has developed a sustainable competitive advantage in both its segments through years of experience. This places it in a good position competitively and provides significant opportunities to grow.

Strategy

Our strategy and mission statement stated earlier is to be a socially responsible company that will delight consumers by offering great taste, good value and real convenience achieved through manufacturing and marketing natural, convenient and specialty foods in a knowledge-driven, energetic and fun work environment.

MANAGEMENT DISCUSSION AND ANALYSIS:

(Contd.)

Our endeavor and goal is to make Tasty Bite:

- Synonymous with 'Wholesome Mazaa' and a household name in key global markets
- Brand of choice for the Aspirationalists
- The benchmark for sustainability in the food industry
- A preferred partner for leading food service brands

Strengths

- **Brand name:** Tasty Bite is one of the leading brands in North America amongst Indian and Asian prepared foods. In the Indian shelf stable prepared foods, it commands a dominant market share and is one of the fastest growing brands in the Asian and rice category
- **Management Experience:** Your Company's senior and middle management has significant experience in the food industry and a strong understanding of consumer business as well as the food service industry.
- **Innovation:** Strong marketing and consumer insight combined highly skilled culinary professionals and food technologists, makes your company extremely strong in innovation. In addition, the innovation team leverages our Research and Development center equipped with latest technology & state-of-the-art equipment.
- **Trusted partner for B2B customers:** Your company partners with leading OSR brands to provide customized product solutions in Frozen Formed Product (FFP) and Specialty Sauces category. The several awards received by your company are a testimony to this strong relationship with its customers
- **Strong distribution and marketing:** Your company is supported by Preferred Brands International Inc in North America and by Mars Food Corporation for all markets outside of North America. Both these companies have a well-established marketing and distribution network in their respective markets.
- **Strong supply chain:** Your company is one of the largest organic producers in the country and is backed by a very strong, agile and efficient supply chain.
- **Product quality:** Your Company manufactures high quality products for its food service as well as consumer business. The manufacturing facility is audited by several customers and meets stringent quality standards of several countries including US, UK, Australia, Japan and Canada.

Competition

The food industry globally is a large and highly competitive industry that is subject to ever changing consumer trends and consumption habits.

In our consumer markets, our products compete not only with other Indian ready-to-eat offerings but all other specialty meal options including other cuisines that a consumer may consider as a lunch or dinner alternative.

Likewise, in our food service business, there are several international and domestic companies that have the technology and capability to manufacture similar products. Some of them also have global relationships with leading OSR brands. Customers are extremely price sensitive and expect continuous innovation from its suppliers.

Outlook, Risks and Concerns

The Company intends to continue to focus on both the consumer and food service business that are seeing similar double-digit growth rate.

For the consumer business, growth will be driven by the following strategies:

- Increasing points of distribution in existing markets like North America and Canada
- Geographical Expansion to newer markets
- Launch of new products to improve frequency of purchase and increase customer base.

In North America, Preferred Brands International Inc is continually adding new supermarkets to its portfolio. Apart from that in-store product sampling and live product demonstrations are a strong medium undertaken to improve customer connect with the brand. Outside of North America, Mars Foods Corporation is partnering with your company to re-launch the Tasty Bite brand in UK, Australia and other markets leveraging their strong relationship with large retailers. In addition, the company plans to launch several new products and convert its existing entrees into Organic.

MANAGEMENT DISCUSSION AND ANALYSIS: (Contd.)

In the Food Service business, our growth will be enabled by the focusing on the following:

- Superior customer service
- Innovation led partnering
- International Expansion

The food service industry is largely relationship driven. OSR brands expect very high levels of customer service, superior product quality and strong innovation capabilities. Your company has been a preferred partner for many customers because it has been extremely strong on these aspects. The company will continue to hold drive higher levels of performance across all parameters. During the year under review, your company expanded its presence in many South East Asia and Middle East markets. In the coming years, the plan would be to leverage this newly formed customer relationships and grow the business in these new geographies. This strategy and approach will enable your Company to target new B2B customers (OSR chains and HORECA) and enhance its market share.

The underlying risks and concerns that we see in the business:

- There is intense competition for shelf-space in supermarkets and there is always uncertainty whether the Company would be able to get its products listed in grocery stores. As new product reviews take place only once or twice a year any delay in getting listing could impact growth.
- The success of any product or category depends finally on consumer acceptance and new launches may or may not be successful.
- In the food service business, we need to continue to innovate and at the same time be highly competitive in terms of cost in order to retain and grow our business with our customers.
- We do not have long-term contracts with our customers and they could stop purchasing from the company with little or no notice period. This could negatively impact our revenues and profits.
- Input costs of raw material, packaging material, utilities, labor etc are on the rise in India. Our product pricing remains relatively stable and we may not be able to pass on cost increases to our customers.
- We are exposed to risk of fluctuations in foreign currency on our export sales. We have a robust forex risk management policy in place and this allows us to hedge movements in foreign currency exchange rates for a period of twelve months. As we are a net exporter, any long-term strengthening of the Indian rupee would have an adverse impact on our profitability.
- All our raw materials are agricultural commodities that sometimes see significant price volatility depending on weather and market conditions. While we do strategic purchases to hedge risk of key commodities, it would not cover all the raw materials that we purchase.
- We have one manufacturing facility that manufactures all our products for our consumer and food service business. Any untoward incident beyond our control can impact our ability to fulfill customer orders and our reputation.
- Our products are shipped globally and ocean freight forms a material portion of our total costs. All our exports are shipped from Nhava Sheva port in Mumbai. Increase in oil prices, changes in supply-demand of vessels and port disruptions could increase this cost or cause delays in reaching our products to our markets.
- A few of our raw and packing materials are imported with longer procurement lead times. Changes in exchange rates and any delays on import can impact production schedules and our ability to fulfill orders.
- We have started our organic journey a few years ago. The overall policies, import/export regulations around Organic Products are continuously changing and any policy change could impact our ability to manufacture and/or export our organic products to customers outside of India.
- Our insurance coverage may not be adequate to protect us against all potential losses to which we may be subject and this may have a material adverse effect on our business.
- We are eligible for various incentives from the Government on the export of value-added agricultural products. Any change on these policies that reduces these incentives could adversely impact our net income.

MANAGEMENT DISCUSSION AND ANALYSIS: (Contd.)

- Any shortcoming in the quality of our products could have a financial impact aside from impacting the reputation of the brand
- We could be the subject of litigation, which if adversely determined, could harm our business and operating results
- Any changes to import policies and taxes in the countries where we export our products could increase the cost of our products for our consumers which could impact demand.
- We need to invest in manufacturing facilities and physical infrastructure ahead of market demand given the long lead times in creating new capacity. Our profitability could be reduced if our business does not grow proportionately.

Supply Chain

The constant focus of our Supply Chain team is on delivering value through strategic purchases, supplier partnerships and cost optimization initiatives. Through an effective combination of these initiatives they have been able to drive consistent profitability for the Company.

With efforts spanning over last several years, we have been able to build sustainable partnerships for an Organic Ecosystem. Our organic rice portfolio is now marketed as "fantastic fifteen" after the introduction of five new organic rice variants.

Another significant milestone for your company was the conversion of our iconic product Madras Lentils into Organic. Your company is committed to continue on the organic journey and several more farmers are partnering with us to improve health and wellness for our consumers.

We purchase over 450 different kinds of raw materials and a similar number of packing materials. Our strength comes from our ability to understand market dynamics of each of these and make timely strategic buying decisions.

Our purchasing strategy ranges from spot purchases, forward contracts, seasonal buying and in the case of a few commodities, pre-processing these ingredients into intermediate forms that can be easily stored and utilized over the course of the year. This all creates ability to manufacture a better and consistent product leading to consumer delight.

Human Resources

During the year under review, the industrial relations of the Company continued to be cordial and peaceful. Wage agreement with the Union is effective up to March 31, 2020. Total personnel employed by the Company are 242 as on March 31, 2019.

Your company continues to have very cordial and productive relations with its workforce. Several programs, including "Quarterly Townhall Meeting" and "Monthly Power Up Fridays" allow the management to communicate with the workforce on a regular basis creating a transparent work environment. Tasty Bite recruits, retains and rewards the best of talent through its employee-oriented policies and practices. The Company believes that 'employees' are the prime reason behind its success and their contribution needs to be recognized and rewarded. This enables in creating a fun-filled, high-energy, knowledge-driven, vibrant culture.

Programs like 'Campus to Corporate' are aimed at directing new entrants from colleges to understand the company culture and vision. Several other initiatives like 'Workers Leadership' and 'Management Leadership' were also conducted to reinforce the belief that ordinary people can deliver extraordinary performance."

The company also undertook several activities like "Tasty Bite Premier Cricket League", "OxFam 100 km Trailwalker" and "All Hands Day" to improve employee engagement and create fun at the work place.

Women are encouraged to take greater responsibility in the company, hence more and more women employee are seen working and growing in the Company. Women managers now hold several key executive positions in the Company. Our female:male gender ratio is 50:50 including contractual and permanent staff in factory. Likewise, women are also encouraged to participate in the Workers Union, and a tradition of having about 33% women in the Union Committee has been set. This is against the backdrop of a 'all male' workers union committee that existed when the union was initially formed.

Each year, your Company participates in the Great Place to Work survey – a survey jointly conducted by the Economic Times of India and Great Places to Work Institute, India. We are very pleased to report that your Company is in the **Top 50 (ranked 35) list of India's Great**

Finance, Accounts and Internal Financial Controls

Finance and accounting functions work with the business teams to continually increase the intrinsic value of the business and instituting strong and effective financial and management control systems in day to day operations.

The Company has a comprehensive ERP system to manage its operations and record its financial transactions. It has implemented additional system tools to manage stores, spares and consumables procurement that also integrates with the ERP system.

Your Company attaches significant importance on having tested internal control systems, risk assessment and management of operating risks. These risks are actively managed by the leadership team through various committees and strong internal processes. This internal control structure also has considerable oversight and is monitored by an external set of auditors, both statutory and internal. The Company's internal controls are commensurate with the nature of the business and size and complexity of its operations.

Some significant aspects covered in the internal control framework include:

- Standard Operating Procedures and Risk Control Matrix for all business processes to ensure effective internal financial controls;
- Oversight by the Audit Committee that finalizes the scope of the internal audit which is carried out by an experienced and qualified firm of Chartered Accountants;
- Integration of ERP system across Materials, Manufacturing and sales processes;
- Review and approval of annual operative and capital expenditure budget and monthly monitoring of actual spends;
- Regular review of key business risks such as new product development, foreign exchange management, commodity risk management, financial reporting;
- Legal framework to manage all compliances applicable to the Company. Your company has implemented a compliance tool in factory and head office.
- For overall supervision of controls, your company has strong governance committees to take key business decisions.

The statutory auditors have also issued a clean report on internal controls of the Company. The Audit Committee and Independent directors have also provided satisfaction over internal controls of the Company.

Quality

The Company's stated mission for quality is to "rise beyond certifications". Consequently, the company's own Quality Management system calls for higher standards than what is specified in various 3rd party certifications.

In keeping with Industry requirements, the Company continues to be certified for the following certifications:

- ISO-14001:2004 (Environmental Management Systems)
- OHSAS 18001:2007 (Occupational Health and Safety)
- ISO 22000 (Food Safety Management System)
- BRC v6 (Global Standard for Food Safety)
- SQF code- 7.2 (Safe Quality Food)
- Organic
- Kosher
- Halal

The Company also adheres to the highest levels of compliance with CT-PAT (Customs Trade Partnership against Terrorism)'s standards, which gives the company an advantage for smooth exports to US, our most important market.

Sustainability

The Company focuses on being a sustainable food manufacturer through conserving water (through installation of in-ground rain-

water harvesting system) and reducing its carbon footprint (through use of renewable energy). Around 14% of the company's energy requirement comes from Wind and Biogas. All its steam generation is done using compacted agricultural waste (briquettes). Monitoring and conservation of power and water is inbuilt into Company processes. The Company commissioned its bio-gas facility that now converts all its organic waste into electricity. This is used to power the effluent treatment plant and the water treatment plant. The Company intends to complete installing rooftop solar panels with a total capacity of 640 kW by end of 2019. This would provide 10% of the current power that the Company consumes, thus furthering the percentage of power that come from renewable sources.

Your company also uses simple techniques such as crop rotation, use of natural fertilizers and pest control methods and green composting in its organic farm. Moreover, several initiatives have been undertaken by the Company towards improvement of air, soil and water quality in its eco-system.

Your Company continues to remain strongly committed towards building a sustainable supply and manufacturing chain. Several of the United Nations Sustainable Development Goals, where the Company can directly contribute as part of its business model, have been adopted. Some of these include Good Health, Quality Education, Gender Equality, Innovation & Infrastructure, Reduce Inequalities, Sustainable Cities and Communities, Clean Water and Sanitation, Renewable Energy, Economic Growth and Responsible Consumption.

Corporate Social Responsibility

As per Section 135 of the Companies Act, 2013, a company, meeting the applicability threshold, needs to spend at least 2% of the average profits for the immediately three preceding financial years on Corporate Social Responsibility (CSR) activities. For fiscal year FY 19, the Company was required to spend INR 67.21 lakhs on CSR.

The CSR committee has taken the following areas to focus on, namely, (1) farmer's welfare, (2) public health, (3) water and soil conservation and (4) rural education.

The Company continued to focus its CSR activity towards improvement of the school infrastructure at the local Bhandgaon village school. It provided infrastructure for the school. The Company spent INR 4.06 lakhs on the above activities during the fiscal year.

Cautionary Statement

Statements in Management Discussion and Analysis describing the Company's objectives, projections, estimates, expectations may be "forward looking statements" within the meaning of applicable securities law and regulations. Actual results may differ materially from those expressed or implied. Important factors that could make a difference to results include economic conditions affecting demand / supply, price conditions in domestic and overseas markets in which the Company operates, competitive pressures in these markets, changes in government regulations, tax laws and other statutes and incidental factors.

Appreciation

Your Directors wish to express their sincere appreciation for the co-operation received from the banks, government authorities, customers, vendors and suppliers during the year under review. Your Directors also would like to acknowledge the contribution of its parent, Preferred Brands International Inc. in the role of the marketing company in growing and developing the business in all international markets.

Your Directors also wish to place on record their deep sense of appreciation for the significant contribution made by each & every employee of the Company.

INDEPENDENT AUDITORS' REPORT

To the Members of Tasty Bite Eatables Limited Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of Tasty Bite Eatables Limited ('the Company'), which comprise the balance sheet as at 31 March 2019, and the statement of profit and loss (including other comprehensive income), statement of changes in equity and statement of cash flows for the year then ended, and notes to the financial statements, including a summary of the significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements give the information required by the Companies Act, 2013 ("Act") in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at 31 March 2019, and profit and other comprehensive income, changes in equity and its cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Act. Our responsibilities under those SAs are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and the Rules there under, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

The key audit matter	How the matter was addressed in our audit
<p>Provision for inventory write down</p> <p>As at 31 March 2019, the Company held INR 4,890.31 lakhs of inventories. Given the size of the inventory balance relative to the total assets of the Company and the estimates and judgments described below, the valuation of inventory required significant audit attention.</p> <p>As disclosed in Note 3.5 and Note 10, inventories are held at the lower of cost and net realizable value determined using the weighted average cost method. At each reporting period, the valuation of inventory is reviewed by management and the cost of inventory is reduced where inventory is forecasted to be sold below cost.</p> <p>The determination of whether inventory will be realized for a value less than cost requires management to exercise judgment and apply assumptions. Management undertakes the following procedures for determining the level of write down required:</p>	<p>We have performed the following procedures over the provision for inventory:</p> <ul style="list-style-type: none"> We tested the design, implementation and operating effectiveness of controls surrounding the inventory valuation process. For a sample of inventory items, re-performed the weighted average cost calculation and compared the weighted average cost to the net realizable value. On sample basis, we tested the net realizable value of inventory items to the selling price subsequent to the year end. We tested that the ageing reports, used by management, correctly aged the inventory items by agreeing a sample of aged inventory items to the goods received note. We assessed the percentage write down applied to older inventory with reference to historic inventory write downs.

INDEPENDENT AUDITORS' REPORT (Contd.)

The key audit matter	How the matter was addressed in our audit
<ul style="list-style-type: none"> Use inventory ageing reports together with historical trends to estimate the likely future saleability/usability of slow moving and older inventory items; For inventory aged greater than one year or items due for expiry in the near future, management applies a percentage based provision to inventory. The percentages are derived from historical levels of write down; and Performs a line-by-line analysis of remaining inventory to ensure it is stated at lower of cost and not realizable value and a specific write down is recognized if Management determines that the stock exceeds future requirements. 	<ul style="list-style-type: none"> We re-performed the calculation of the inventory write down; We performed retrospective reviews of provisions made historically to assess the reasonableness of provisions made during the year; and We also challenged management's judgment for inventory provisions and evaluated whether any specific write downs were required on inventory items.

Other Information

The Company's management and Board of Directors are responsible for the other information. The other information comprises the information included in the Company's annual report, but does not include the financial statements and our auditors' report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Management's Responsibility for the Financial Statements

The Company's management and Board of Directors are responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these financial statements that give a true and fair view of the state of affairs, profit/loss and other comprehensive income, changes in equity and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards (Ind AS) specified under section 133 of the Act. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management and Board of Directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors is also responsible for overseeing the Company's financial reporting process.

INDEPENDENT AUDITORS' REPORT (Contd.)

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls with reference to financial statements in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

INDEPENDENT AUDITORS' REPORT (Contd.)

Report on Other Legal and Regulatory Requirements

1. As required by the Companies (Auditors' Report) Order, 2016 ("the Order") issued by the Central Government in terms of section 143 (11) of the Act, we give in the "Annexure A" a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.

(A) As required by Section 143(3) of the Act, we report that:

- a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.
- b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books.
- c) The balance sheet, the statement of profit and loss (including other comprehensive income), the statement of changes in equity and the statement of cash flows dealt with by this Report are in agreement with the books of account.
- d) In our opinion, the aforesaid financial statements comply with the Ind AS specified under section 133 of the Act.
- e) On the basis of the written representations received from the directors as on 31 March 2019 taken on record by the Board of Directors, none of the directors is disqualified as on 31 March 2019 from being appointed as a director in terms of Section 164(2) of the Act; and
- f) With respect to the adequacy of the internal financial controls with reference to financial statements of the Company and the operating effectiveness of such controls, refer to our separate Report in "Annexure B".

(B) With respect to the other matters to be included in the Auditors' Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us:

- i. The Company has disclosed the impact of pending litigations as at 31 March 2019 on its financial position in its financial statements - Refer Note 34 to the financial statements.
- ii. The Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses.
- iii. There has been no delay in transferring amounts, required to be transferred, to the Investor Education and Protection Fund by the Company; and
- iv. The disclosures in the financial statements regarding holdings as well as dealings in specified bank notes during the period from 8 November 2016 to 30 December 2016 have not been made in these financial statements since they do not pertain to the financial year ended 31 March 2019.

(C) With respect to the matter to be included in the Auditors' Report under section 197(16):

In our opinion and according to the information and explanations given to us, the remuneration paid by the Company to its directors during the current year is in accordance with the provisions of Section 197 of the Act. The remuneration paid to any director is not in excess of the limit laid down under Section 197 of the Act. The Ministry of Corporate Affairs has not prescribed other details under Section 197(16) which are required to be commented upon by us.

ANNEXURE A

to the Independent Auditor's Report on the Financial Statements of Tasty Bite Eatables Limited

With reference to the Annexure referred to in paragraph 1 in Report on Other Legal and Regulatory Requirements of the Independent Auditor's Report to the Members of the Company on the Ind AS financial statements for the year ended 31 March 2019, we report that:

- (i) (a) The Company has maintained proper records showing full particulars, including quantitative details and situation of fixed assets
- (b) The Company has a regular program of physical verification of its fixed assets by which its fixed assets are verified once a year. In our opinion, this periodicity of physical verification is reasonable having regard to the size of the Company and the nature of its fixed assets. The discrepancies noticed on such verification between the physical count and the book records were not material and have been properly dealt with in the books of account.
- (c) According to the information and explanations given to us and on the basis of examination of the records of the Company, the title deeds of the immovable properties are held in the name of the Company, except for the following:

Sr. no	Type of Asset	Gross block as on 31 March 2019	Net block as on 31 March 2019	Remarks
1	Freehold land - Gvt. No. 503	INR 0.28 lakh	INR 0.28 lakh	The Company has filed a legal suit alleging illegal occupation of the land.

- (ii) The inventory, except goods in transit, has been physically verified by management during the year. The discrepancies noticed on such verification between the physical stock and the book records were not material and have been properly dealt with in the books of account. In our opinion, the frequency of such verification is reasonable and adequate in relation to the size of the Company and the nature of its business. In respect of stocks lying with third parties at the year end, written confirmations from major parties have been obtained.
- (iii) The Company has not granted any loans, secured or unsecured, to companies, firms, Limited Liability Partnerships or other parties covered in the register maintained under section 189 of the Act. Accordingly, paragraph 3(iii) of the Order is not applicable.
- (iv) According to the information and explanations provided to us, the Company has neither granted any loan and nor made any investments, or guarantees or security during the year, to which section 185 or 186 of the Companies Act, 2013 is applicable. Accordingly, paragraph 3(iv) of the Order is not applicable.
- (v) The Company has not accepted any deposits in accordance with section 73 to 76 of the Act and the rules made there under. Accordingly, paragraph 3(v) of the Order is not applicable.
- (vi) In our opinion and according to the information and explanations given to us, maintenance of cost records under section 148 of the Act is not applicable to the Company under the Companies (Cost Record and Audit) Rules, 2014.
- (vii) (a) According to the information and explanations given to us and on the basis of our examination of the records of the Company, amounts deducted / accrued in the books of account in respect of undisputed statutory dues including Provident Fund, Employees' State Insurance, Income-tax, Goods and Services Tax, Duty of Customs and any other statutory dues have generally been regularly deposited during the year by the Company with the appropriate authorities though there has been one instance of delay in payment of Employees' State Insurance.

According to the information and explanations given to us, no undisputed amounts payable in respect of Provident Fund, Employees' State Insurance, Income-tax, Goods and Services Tax, Duty of Customs, cess and any other statutory dues were in arrears as at 31 March 2019, for a period of more than six months from the date they became payable.

- (b) According to the information and explanations given to us, there are no dues of Income-tax, Sales-Tax, Service tax, Goods and Services Tax, Duty of Customs which have not been deposited by the Company on account of disputes, except as disclosed in Enclosure 1 to this Annexure.

ANNEXURE A

to the Independent Auditor's Report on the Financial Statements of Tasty Bite Eatables Limited (Contd.)

- (viii) In our opinion and according to the information and explanations given to us, the Company has not defaulted in repayment of dues to its bankers. The Company did not have any dues to financial institutions or any outstanding debentures during the year.
- (ix) According to the information and explanations given to us, the term loans taken by the Company have been applied for the purpose for which they were taken. The Company has not raised money by way of further public offer (including debt instruments) during the year.
- (x) According to the information and explanations given to us, no fraud on or by the Company by its officers or employees has been noticed or reported during the year.
- (xi) According to the information and explanations given to us, the managerial remuneration has been paid/ provided in accordance with the requisite approvals mandated by the provisions of Section 197 read with schedule V to the Act.
- (xii) In our opinion and according to the information and explanations given to us, the Company is not a Nidhi Company as per the Act. Accordingly, paragraph 3(xii) of the Order is not applicable.
- (xiii) In our opinion and according to the information and explanations given to us, all the transactions with related parties are in compliance with sections 177 and 188 of the Act and the details, as required by the applicable accounting standards have been disclosed in the financial statements.
- (xiv) According to the information and explanations given to us, the Company has not made any preferential allotment or private placement of shares or fully or partially convertible debentures during the year.
- (xv) According to the information and explanations given to us, the Company has not entered into any non-cash transactions with directors or persons connected with them during the year.

ANNEXURE B

to the Independent Auditor's Report on the Financial Statements of Tasty Bite Eatables Limited for the year ended 31 March 2019

Report on the Internal Financial Controls with Reference to aforesaid Financial Statements under Clause (i) of Sub-section 3 of Section 143 of the Act

Referred to in paragraph 2(f) In Report on Other Legal and Regulatory Requirements of the Independent Auditor's Report to the Members of the Tasty Bite Eatables Limited on the financial statements for the year ended 31 March 2019.

Opinion

We have audited the internal financial controls with reference to financial statements of Tasty Bite Eatables Limited ("the Company") as of 31 March 2019 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

In our opinion, the Company has, in all material respects, adequate internal financial controls with reference to financial statements and such internal financial controls were operating effectively as at 31 March 2019, based on the internal financial controls with reference to financial statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India (the "Guidance Note").

Management's Responsibility for Internal Financial Controls

The Company's management and the Board of Directors are responsible for establishing and maintaining internal financial controls based on the internal financial controls with reference to financial statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013. (hereinafter referred to as "the Act").

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls with reference to financial statements based on our audit. We conducted our audit in accordance with the Guidance Note and the Standards on Auditing, prescribed under section 143(10) of the Act, to the extent applicable to an audit of internal financial controls with reference to financial statements. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to financial statements were established and maintained and whether such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls with reference to financial statements and their operating effectiveness. Our audit of internal financial controls with reference to financial statements included obtaining an understanding of such internal financial controls, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the standalone financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls with reference to financial statements.

Meaning of Internal Financial controls with Reference to Financial Statements

A company's internal financial controls with reference to financial statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial controls with reference to financial statements include those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded

ANNEXURE B

to the Independent Auditor's Report on the Financial Statements of Tasty Bite Eatables Limited for the year ended 31 March 2019 (Contd.)

as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management; and directors of the company, and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial controls with Reference to Financial Statements

Because of the inherent limitations of internal financial controls with reference to financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to financial statements to future periods are subject to the risk that the internal financial controls with reference to financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

NOTES TO THE FINANCIAL STATEMENTS

for the year ended 31 March 2019 (Contd.)

(Currency - INR in Lakhs, except per share data)

1. Background

Tasty Bite Eatables Limited (the Company) is a company domiciled in India with its registered office situated at Shivajinagar, Pune and its manufacturing facility near Pune. The Company has been incorporated under the provisions of Indian Companies Act and its equity shares are listed on the Bombay Stock Exchange Limited and the National Stock Exchange Limited. The Company is in the business of manufacturing and selling 'Prepared Foods'.

2. Basis of preparation

2.1 Statement of compliance

These financial statements have been prepared in accordance with Indian Accounting Standards (Ind AS) as per the Companies (Indian Accounting Standards) Rules, 2015 notified under Section 133 of Companies Act, 2013, (the 'Act') and other relevant provisions of the Act.

Details of the Company's significant accounting policies are included in Note 3.

The financial statements were authorised for issue by the Company's Board of Directors on 16th May 2019.

2.2 Functional and presentation currency

These financial statements are presented in Indian Rupees (INR), which is also the Company's functional currency. All amounts have been rounded-off to the nearest lakh (except per share data) to two decimals, unless otherwise indicated.

2.3 Basis of measurement

The financial statements have been prepared on the historical cost basis except for the following items:

Items	Measurement basis
Certain financial assets and liabilities (including derivative instruments)	Fair value
Liabilities for cash-settled share-based payment arrangements	Refer Note 45.
Net defined benefit (asset)/ liability	Fair Value of plan assets less present value of defined benefit obligations

2.4 Use of estimates and judgements

In preparing these financial statements, management has made judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized prospectively.

Judgements, Assumptions and estimation uncertainties

Information about judgements made in applying accounting policies, assumptions and estimation uncertainties that have the most significant effects on the amounts recognized/significant risk resulting in a material adjustment in the financial statements is included in the following notes:

Note 3.3 - Estimation of useful life used by the management for property, plant and equipment and intangible assets

Note 4.3 - Measurement of defined benefit obligations: key actuarial assumptions

Note 3.4 - recognition and measurement of provisions and contingencies: key assumptions about the likelihood and magnitude of an outflow of resources

Note 3.7 - Lease classification

NOTES TO THE FINANCIAL STATEMENTS

for the year ended 31 March 2019 (Contd.)

(Currency - INR in Lakhs, except per share data)

Note 33 - Estimation of current tax expense and tax payable

Note 33 - Recognition of deferred tax asset

Note 11 - Impairment of Trade Receivables

2.5 Measurement of fair values

A number of accounting policies and disclosures require the measurement of fair values, for both financial and non-financial assets and liabilities.

The Company has an established control framework with respect to measurement of fair values. The Company's board of directors has overall responsibility for the establishment and oversight of the Company's risk management framework.

The established framework is reviewed and monitored by the Chief Financial officer, which includes the responsibility for reviewing and monitoring all significant fair value measurements including level 3 fair values. Chief financial officer regularly reviews significant unobservable inputs and valuation adjustments.

Significant valuation issues are reported to the Company's Board of Directors.

Fair values are categorized into different levels in a Fair value hierarchy based on inputs used in the valuation techniques as follows:

Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities

Level 2: inputs other than quoted prices included in level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices)

Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

When measuring the fair value of an asset or liability, the Company uses observable market data as far as possible. If the inputs used to measure fair value of asset or liability fall into different levels of fair value hierarchy, then the fair value measurement is categorized in its entirety in the same level of fair value hierarchy as the lowest level input that is significant to the entire measurement.

The Company recognises transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

Further information about the assumptions made in measuring fair values is included in following notes:

Note 47 - Financial instruments

Note 45 - Employee Share based payment.

2.6 Current-non-current classification

The Company presents assets and liabilities in the balance sheet based on current/ non-current classification.

Assets

An asset is classified as current when it satisfies any of the following criteria:

- it is expected to be realized in, or is intended for sale or consumption in, the Company's normal operating cycle,
- it is held primarily for the purpose of being traded;
- it is expected to be realized within 12 months after the reporting date, or
- it is cash or cash equivalent unless it is restricted from being exchanged or used to settle a liability for at least 12 months after the reporting date

NOTES TO THE FINANCIAL STATEMENTS

for the year ended 31 March 2019 (Contd.)

(Currency - INR in Lakhs, except per share data)

Current assets include current portion of non-current financial assets. All other assets are classified as non-current.

Liabilities

A liability is classified as current when it satisfies any of the following criteria:

- a) it is expected to be settled in the Company's normal operating cycle;
- b) it is held primarily for the purpose of being traded;
- c) it is expected to be settled within 12 months after the reporting date; or
- d) The Company does not have an unconditional right to defer settlement of the liability for at least 12 months after the reporting date. Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

Current liabilities include current portion of non-current financial liabilities. All other liabilities are classified as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

Operating cycle

Operating cycle is the time between the acquisition of assets for processing and their realisation in cash or cash equivalents. The operating cycle of the Company is less than 12 months.

3. Significant accounting policies

3.1 Foreign Currency transaction

Transaction in foreign currencies are translated into the functional currency of the Company at the exchange rates on the date of the transaction or an average rate if the average rate approximates the actual rate at the date of the transaction.

Monetary assets and liabilities denominated in foreign currencies are translated into the functional currency at the exchange rate at the reporting date. Non-monetary assets and liabilities denominated in a foreign currency are translated into functional currency at the exchange rate when the fair value was determined. Non-monetary assets and liabilities that are measured based on historical cost in a foreign currency are translated at the exchange rate at the date of transaction.

Exchange difference are recognised in profit and loss, except exchanges differences arising from the translation of the qualifying cash flow hedges to the extent the hedges are effective, which are recognized in OCI.

3.2 Financial Instrument

i. Recognition and Initial measurement

Trade receivables are initially recognised when they are originated. All other financial assets and financial liabilities are initially recognised when the Company becomes a party to the contractual provisions of the instrument.

A financial asset or financial liability is initially measured at fair value plus, for an item not at fair value through profit and loss (FVTPL), transaction costs that are directly attributable to its acquisition or issue.

ii. Classification and subsequent measurement

Financial assets

On initial recognition, a financial asset is classified as measured at

- amortised cost;
- Fair value through profit and loss (FVTPL)

NOTES TO THE FINANCIAL STATEMENTS

for the year ended 31 March 2019 (Contd.)

(Currency - INR in Lakhs, except per share data)

Financial assets are not reclassified subsequent to their initial recognition, except if and in the period the Company changes its business model for managing financial assets.

A financial asset is measured at **amortised cost** if it meets both of the following conditions and is not designated as at FVTPL:

- The asset is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

All financial assets (except for derivative contract assets) not measured at amortised cost as described above are measured at FVTPL. On initial recognition, the Company may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

Financial assets: Assessment whether contractual cash flows are solely payments of principal and interest

For the purpose of this assessment, 'principal' is defined as the fair value of financial asset on initial recognition. 'Interest' is defined as consideration for time value of money and for credit risk associated with the principal amount outstanding during a particular period of time and other basic lending risks and costs (e.g. liquidity risk and administrative costs), as well as profit margin.

In assessing whether the contractual cash flows are solely payments of principal and interest, the Company considers contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making this assessment, the Company considers:

- contingent events that would change the amount and timing of cash flows;
- term that would adjust the contractual rate, including variable interest rate features;
- prepayment and extension features; and
- term that limits the Company's claim to cash flows for specified assets (e.g. non-recourse features)

A prepayment feature is consistent with the solely payments of principal and interest criterion if the prepayment amount substantially represents unpaid amount of principal and interest on principal amount outstanding, which may include reasonable additional compensation for early termination of contract. Additionally, for a financial asset acquired on a significant premium or discount to its contractual par amount, a feature that permits or require prepayment at an amount that substantially represents the contractual par amount plus accrued (but unpaid) contractual interest (which may also include reasonable additional compensation for early termination) is treated as consistent with this criterion if the fair value of the prepayment feature is significant at initial recognition.

Financial assets: Subsequent measurement gains and losses

Financial assets at FVTPL	These assets are subsequently measured at fair value. Net gains and losses, including any interest or dividend income, are recognised in profit or loss. However refer note 47 for derivatives designated as hedging instruments.
Financial assets at amortised cost	These assets are subsequently measured at amortised cost using the effective interest method. The amortised cost is reduced by impairment losses. Interest income, foreign exchange gains and losses and impairment are recognised in profit or loss. Any gain or loss on derecognition is recognised in profit or loss.

NOTES TO THE FINANCIAL STATEMENTS

for the year ended 31 March 2019 (Contd.)

(Currency - INR in Lakhs, except per share data)

Financial liabilities: Classification, subsequent measurement and gains and losses

Financial liabilities are classified as measured at amortised cost or FVTPL. A financial liability is classified as at FVTPL if it is classified as held-for-trading or it is designated as such on initial recognition. Financial liabilities at FVTPL are measured at fair value and net gains and losses, including any interest expense, are recognised in profit or loss. Other financial liabilities are subsequently measured at amortised cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognised in profit or loss. Any gain or loss on derecognition is also recognised in profit or loss. Refer note 47 for financial liabilities designated as hedging instrument.

iii. Derecognition

Financial assets

The Company derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Company neither transfers nor retains substantially all of the risks and rewards of ownership and does not retain control of the financial asset.

If the Company enters into transactions whereby it transfers assets recognised on its balance sheet but retains either all or substantially all of the risks and rewards of the transferred assets, the transferred assets are not derecognised.

Financial liabilities

The Company derecognises a financial liability when its contractual obligations are discharged or cancelled or expire.

The Company also derecognises a financial liability when its terms are modified and the cash flows under the modified terms are substantially different. In this case, a new financial liability based on the modified terms is recognised at fair value. The difference between the carrying amount of the financial liability extinguished and the new financial liability with modified terms is recognised in profit or loss.

iv. Offsetting

Financial assets and financial liabilities are offset and the net amount presented in the balance sheet when, and only when, the Company currently has a legally enforceable right to set off the amounts and it intends either to settle them on a net basis or to realise the asset and settle the liability simultaneously.

v. Derivative financial instrument and hedge accounting

The Company holds derivative financial instruments to hedge its foreign currency and interest rate risk exposures.

Derivatives are initially measured at fair value. Subsequent to initial recognition, derivatives are measured at fair value, and changes therein are generally recognized in profit or loss.

The Company designates certain derivatives as hedging instruments to hedge the variability in cash flows associated with highly probable forecast transactions arising from changes in foreign exchange rates and interest rates.

At inception of designated hedge relationships, the Company documents the risk management objective and strategy for undertaking the hedge. The Company also documents the economic relationship between the hedged item and the hedging instrument are expected to offset each other.

Cash flow hedges

When a derivative is designated as a cash flow hedging instrument, the effective portion of changes in the fair value of the derivative is recognized in OCI and accumulated in other equity under 'effective portion of cash flow hedges'. The effective portion of changes in the fair value of the derivative that is recognized in OCI is limited to the cumulative change in fair value of the hedge item, determined on a present value basis, from inception of the hedge. Any ineffective portion of changes in the fair value of the derivative is recognized immediately in profit or loss.

NOTES TO THE FINANCIAL STATEMENTS

for the year ended 31 March 2019 (Contd.)

(Currency - INR in Lakhs, except per share data)

When the hedged forecast transaction subsequently results in the recognition of a non-financial item such as inventory, the amount accumulated in other equity is included directly in the initial cost of the non-financial item when it is recognised. For all other hedged forecasted transaction, the amount accumulated in other equity is reclassified to profit or loss in the same period or periods during which the hedged expected future cash flows affect profit or loss.

If a hedge no longer meets the criteria for hedge accounting or the hedge instrument is sold, expires, is terminated or is exercised, then hedge accounting is discontinued prospectively. When hedge accounting for cash flow hedges is discontinued, the amount that has been accumulated in other equity remains there until, for a hedge of a transaction resulting in recognition of a non-financial item, it is included in the non-financial item's cost on its initial recognition or, for other cash flow hedges, it is reclassified to profit or loss in the same period or periods as the hedge expected future cash flow affect profit or loss.

If the hedge future cash flow are not expected to occur, then the amounts that have been accumulated in other equity are immediately reclassified to profit or loss.

3.3 Property, plant and equipment

i. Recognition and measurement

Items of property, plant and equipment are measured at cost, which includes capitalised borrowing costs, less accumulated depreciation and accumulated impairment losses, if any.

Cost of an item of property, plant and equipment comprises its purchase price, including import duties and non-refundable purchase taxes, after deducting trade discounts and rebates, any directly attributable cost of bringing the item to its working condition for its intended use and estimated costs of dismantling and removing the item and restoring the site on which it is located.

If significant parts of an item of property, plant and equipment have different useful lives, then they are accounted for as separate items (major components) of property, plant and equipment.

Any gain or loss on disposal of an item of property, plant and equipment is recognised in profit or loss.

ii. Subsequent expenditure

Subsequent expenditure is capitalised only if it is probable that the future economic benefits associated with the expenditure will flow to the Company.

iii. Depreciation

Depreciation is calculated on cost of items of property, plant and equipment less their estimated residual values over their estimated useful lives using the straight line method, and is generally recognised in the statement of profit and loss.

Assets acquired under finance leases are depreciated over the shorter of the lease term and their useful lives unless it is reasonably certain that the Company will obtain ownership by the end of the lease term. Freehold land is not depreciated.

The estimated useful lives of item of property, plant and equipment for the current and comparative periods are as follows

Category of asset	Useful life followed (In years)	Useful life as per Schedule II (In years)
Factory Building	30	30
Electrical installations	10	10
Plant and equipment:	15	15
-Form Plate	2	15
Office equipment	5	5
Furniture & Fixtures	10	10
Vehicle	10	10
Computers	3	3
-Server	6	6
-Printer	5	3
Lab Equipment	10	10

NOTES TO THE FINANCIAL STATEMENTS

for the year ended 31 March 2019 (Contd.)

(Currency - INR in Lakhs, except per share data)

Depreciation method, useful lives and residual values are reviewed at each financial year-end and adjusted if appropriate. Based on technical evaluation and consequent advice, the management believes that its estimates of useful lives as given above best represents the period over which the management expects to use these assets.

Assets installed on leasehold premises are depreciated over the period of lease. Freehold land is not depreciated.

Depreciation on additions (disposals) during the year is provided on a pro-rata basis i.e. from (upto) the date on which asset is ready for use (disposed of).

3.4 Intangible assets

Intangible assets are initially measured at cost. Such intangible assets are subsequently measured at cost less accumulated amortisation and any accumulated impairment losses. Subsequent expenditure is capitalised only when it increases the future economic benefits embodied in the specific asset to which it relates. All other expenditure is recognised in profit or loss as incurred.

Amortisation is calculated to write off the cost of intangible assets less their estimated residual value over their estimated useful lives using straight line method, and is included in depreciation and amortisation in Statement of Profit and Loss.

The estimated useful lives are as follows:

Asset	Estimated useful life
Computer Software	5 years

Amortisation method, useful lives and residual values are reviewed at the end of each financial year and adjusted if appropriate.

3.5 Inventories

The cost of inventory is based on weighted average formula, and includes expenditure incurred in acquiring the inventories, production or conversion cost and other costs incurred in bringing them to their present location and condition. In case of manufactured inventory and work-in-progress, cost includes an appropriate share of fixed production overheads based on normal operating capacity.

Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and selling expense. The net realisable value of work-in-progress is determined with reference to the selling price of related finished products. The comparison of cost and net realizable value is made on an item-by-item basis.

Raw materials, components and other supplies held for use in production of finished products are not written down below cost except in cases where material prices have declined and it is estimated that the cost of finished products will exceed their net realizable value.

3.6 Impairment of financial instruments

The Company recognises loss allowances for expected credit losses on financial assets measured at amortised cost. At each reporting date, the Company assesses whether financial assets carried at amortised cost are credit-impaired. A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

Evidence that a financial asset is credit-impaired includes the following observable data:

- significant financial difficulty of the borrower or issuer;
- a breach of contract such as a default or being past due for 180 days or more;
- the restructuring of a loan or advance by the Company on terms that the Company would not consider otherwise;
- it is probable that the borrower will enter bankruptcy or other financial reorganisation; or
- the disappearance of an active market for a security because of financial difficulties.

NOTES TO THE FINANCIAL STATEMENTS

for the year ended 31 March 2019 (Contd.)

(Currency - INR in Lakhs, except per share data)

Measurement of expected credit loss

The Company measures loss allowances at an amount equal to lifetime expected credit losses. Loss allowances for trade receivables are always measured at an amount equal to lifetime expected credit losses. Lifetime expected credit losses are the expected credit losses that result from all possible default events over the expected life of a financial instrument. The maximum period considered when estimating expected credit losses is the maximum contractual period over which the Company is exposed to credit risk.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating expected credit losses, the Company considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Company's historical experience and informed credit assessment and including forward - looking information.

The Company assumes that the credit risk on a financial asset has increased significantly if it is more than 90 days past due.

The Company considers a financial asset to be in default when:

- the borrower is unlikely to pay its credit obligations to the Company in full, without recourse by the Company to actions such as realising security (if any is held), or
- the financial asset is 180 days or more past due

Expected credit losses are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the Company in accordance with the contract and the cash flows that the Company expects to receive). Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of the assets.

The gross carrying amount of a financial asset is written off (either partially or in full) to the extent that there is no realistic prospect of recovery. This is generally the case when the Company determines that the debtor does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write-off. However, financial assets that are written off could still be subject to enforcement activities in order to comply with the Company's procedures for recovery of amounts due.

3.7 Impairment of non-financial assets

Intangible assets that have an indefinite useful life and not subject to amortization are tested annually for impairment, or more frequently if events or changes in circumstances indicate that they might be impaired. Other assets are tested for impairment whenever events or changes in circumstances indicate that the carrying amount might not be recoverable. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs of disposal and value in use. For the purpose of assessing impairment, assets are grouped at the lowest levels for which they are separately identifiable cash inflows for which are largely independent of the cash inflows from other assets or group of assets (cash-generating units). Non-financial assets that suffered an impairment are reviewed for possible reversal of the impairment at the end of each reporting period.

3.8 Employee benefits

i. Short-term employee benefits

Short term employee benefit obligations are measured on an undiscounted basis and are expensed as the related service is provided. A liability is recognised for the amount expected to be paid, if the Company has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee, and the amount of obligation can be estimated reliably.

for the year ended 31 March 2019 (Contd.)

(Currency - INR in Lakhs, except per share data)

ii. Defined contribution plans

A defined contribution plan is a post-employment benefit plan under which an entity pays fixed contributions into a separate entity and will have no legal or constructive obligation to pay further amounts. The Company makes specified monthly contributions towards Government administered provident fund scheme. Obligations for contributions to defined contribution plans are recognised as an employee benefit expense in profit or loss in the periods during which the related services are rendered by employees.

Prepaid contributions are recognised as an asset to the extent that a cash refund or a reduction in future payments is available.

iii. Defined benefit plans

A defined benefit plan is a post-employment benefit plan other than a defined contribution plan. The Company's net obligation in respect of defined benefit plans is calculated separately for each plan by estimating the amount of future benefit that employees have earned in the current and prior periods, discounting that amount and deducting the fair value of any plan assets.

The calculation of defined benefit obligations is performed annually by a qualified independent actuary using the projected unit credit method. When the calculation results in a potential asset for the Company, the recognised asset is limited to the present value of economic benefit available in the form of any future refunds from the plan or reductions in future contributions to the plan (the asset ceiling). In order to calculate the present value of economic benefits, consideration is given to any minimum funding requirements.

Remeasurements of the net defined benefit liability, which comprise actuarial gains and losses, the return on plan assets (excluding interest) and the effect of the asset ceiling (if any, excluding interest), are recognised in OCI. The Company determines the net interest expense (income) on the net defined benefit liability (asset), taking into account any changes in the net defined benefit liability (asset) during the period as a result of contributions and benefit payments. Net interest expense and other expenses related to defined benefit plans are recognised in profit or loss.

When the benefits of the plan are changed or when plan is curtailed, the resulting change in benefit that relates to past service ('past service cost' or 'past service gain') or the gain or loss on curtailment is recognised immediately in profit or loss. The Company recognises gain and losses on the settlement of a defined benefit plan when the settlement occurs.

iv. Other long-term employee benefits

The Company's net obligation in respect of other long-term employee benefits (compensated absences) is the amount of future benefit that employees have earned in return for their service in the current and prior periods; that benefit is discounted to determine its present value, and the fair value of any related assets is deducted. The obligation is measured on the basis of an annual independent actuarial valuation using the Projected Unit Credit method. Remeasurements gains or losses are recognised in profit or loss in the period in which they arise.

v. Employee Shared based payment

Specified employees of the Company were eligible for equity settled stock options under Preferred Brand Inc.'s ('PBI Inc.' or the Holding Company's) 2009 Non-Qualified Stock Option and Equity Plan (the Equity Plan). However, during the year 2015 a value pool agreement was entered into, by and between PBI Inc., the Company and the holders of outstanding options ('Holders'), wherein PBI Inc. and the Holders agreed to cancel the Options and terminate the Grant Agreements in exchange for a consideration payable by PBI Inc. in lieu of such cancellation of unvested options to the employees of the Company.

In accordance with Ind-AS 102, the classification of the share-based payment transaction depends on the nature of the award granted and whether the entity has an obligation to settle the transaction and if the entity has either an obligation to settle in its own equity instruments or no obligation to settle at all, then the transaction is accounted as

NOTES TO THE FINANCIAL STATEMENTS

for the year ended 31 March 2019 (Contd.)

(Currency - INR in Lakhs, except per share data)

Equity Settled: Since, the Company does not have any obligation to reimburse corresponding cost of share based payment transaction to PBI Inc., it has classified the settlement as Equity Settled.

Since the amount of cash payment is pre-determined by the Holding Company based on the Value Pool agreement and the employees covered were specifically mentioned in the said agreement, the Company is of the view that the share based payment shall be measured at such amount agreed since the Company does not have any separate obligation towards the settlement.

3.9 Revenue

i. **Sale of goods**

Revenue from sale of goods in the course of ordinary activities is measured at the fair value of the consideration received or receivable, net of returns, trade discounts and volume rebates. This inter alia involves discounting of the consideration due to the present value if payment extends beyond normal Credit terms. Revenue is recognised when the significant risk and rewards of ownership of goods have been transferred to the buyer, recovery of the consideration is probable, the associated costs and possible return of goods can be estimated reliably, there is no continuing effective control over, or managerial involvement with, the goods, and the amount of revenue can be measured reliably. The timing of transfers of risks and rewards varies depending on the individual terms of sale.

ii. **Export Incentive**

Export incentives are recognised when the right to receive credit as per the terms of incentives is established in respect of the exports made and when there is no significant uncertainty regarding the ultimate collection of the relevant export proceeds.

This is the first set of the financial statements where Ind AS 115 has been applied. Changes to significant accounting policies are described in Note 4.

3.10 Recognition of interest income or expense: "t"

Interest income is recognised using effective interest method. The 'effective interest rate' is the rate that exactly discounts estimated future cash payments or receipts through the expected life of financial instrument to:

- the gross carrying amount of the financial assets, or
- the amortised cost of the financial liability

In calculating interest income and expense, the effective interest rate is applied to the gross carrying amount of the assets (when asset is not credit - impaired) or to the amortised cost of the liability. However, for financial asset that have become credit - impaired subsequent to initial recognition, interest income is calculated by applying the effective interest rate to the amortised cost of financial asset. If the asset is no longer credit-impaired, then the calculation of interest income reverts to gross basis.

3.11 Leases

i. **Determining whether an arrangement contains a lease**

At inception of an arrangement it is determined whether the arrangement is or contains a lease.

At inception or on reassessment of the arrangement that contains a lease, the payments and other considerations required by such an arrangement are separated into those for the lease and those for other elements on the basis of their relative fair values. If it is concluded for the finance lease that it is impracticable to separate the payment reliably, then an asset and a liability are recognised at an amount equal to fair value of the underlying asset. The liability is reduced as payments are made and an imputed finance cost on the liability is recognised using the incremental borrowing rate.

NOTES TO THE FINANCIAL STATEMENTS

for the year ended 31 March 2019 (Contd.)

(Currency - INR in Lakhs, except per share data)

II. Assets held under leases

Leases of property, plant and equipment that transfer to the Company substantially all the risks and rewards of ownership are classified as finance leases. The leased assets are measured initially at an amount equal to the lower of their fair value and present value of minimum lease payment. Subsequent to initial recognition, the assets are accounted for in accordance with the accounting policy applicable to the similar owned asset.

Asset held under leases that do not transfer to the Company substantially all the risks and rewards of ownership (i.e. operating lease) are not recognised in the Company's balance sheet.

III. Lease payments

Payments made under operating leases are generally recognised in profit and loss on straight-line basis over the term of the lease unless such payments are structured to increase in line with expected general inflation to compensate for the lessor's expected inflationary cost increases. Lease incentives received are recognised as an integral part of the total lease expense over the term of lease.

Minimum lease payments made under finance leases are apportioned between the finance charge and the reduction of the outstanding liability. The finance charge is allocated to each period during the lease term so as to produce a constant periodic rate of interest on remaining balance of the liability.

3.12 Income tax

Income tax comprises current and deferred tax. It is recognised in the Statement of Profit and Loss except to the extent that it relates to an item recognized directly in equity or in other comprehensive income.

Current tax comprises the expected tax payable or receivable on the taxable income or loss for the year and any adjustment to the tax payable or receivable in respect of previous years. The amount of current tax reflects the best estimate of the tax amount expected to be paid or received after considering the uncertainty, if any, related to income taxes. It is measured using tax rates (and tax laws) enacted or substantively enacted by the reporting date.

Current tax assets and current tax liabilities are offset only if there is a legally enforceable right to set off the recognised amounts, and it is intended to realise the asset and settle the liability on a net basis or simultaneously.

Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. Deferred tax is also recognised in respect of carried forward tax losses and tax credits only to the extent that it has sufficient taxable temporary differences or there is convincing other evidence that sufficient taxable profit will be available against which such deferred tax asset can be realised. Deferred tax assets - unrecognised or recognised, are reviewed at each reporting date and are recognised/ reduced to the extent that it is probable/ no longer probable respectively that the related tax benefit will be realised.

Deferred tax is measured at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on the laws that have been enacted or substantively enacted by the reporting date. The measurement of deferred tax reflects the tax consequences that would follow from the manner in which the Company expects, at the reporting date, to recover or settle the carrying amount of its assets and liabilities.

3.13 Provisions and contingencies

A provision is recognised if, as a result of a past event, the Company has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows (representing the best estimate of the expenditure required to settle the present obligation at the balance sheet date) at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The unwinding of the discount is recognised as finance cost. Expected future operating losses are not provided for.

NOTES TO THE FINANCIAL STATEMENTS

for the year ended 31 March 2019 (Contd.)

(Currency - INR in Lakhs, except per share data)

Contingencies

Provision in respect of loss contingencies relating to claims, litigations assessment, fines, penalties etc are recognised when it is probable that a liability has been incurred, and the amount can be estimated reliably. Where no reliable estimate can be made as to the outcome of an event, a disclosure is made as contingent liability. Contingent assets are not recognised in the accounts.

3.14 Borrowing cost

Borrowing costs are interest and other costs (including exchange differences relating to foreign currency borrowings to the extent that they are regarded as an adjustment to interest costs) incurred in connection with the borrowing of funds. Borrowing costs directly attributable to acquisition or construction of an asset which necessarily take a substantial period of time to get ready for their intended use are capitalised as part of the cost of that asset. Other borrowing costs are recognised as an expense in the period in which they are incurred.

Preference shares, which are mandatorily redeemable on a specific date, are classified as liabilities. The dividends on these preference shares are recognised in profit or loss as finance costs.

3.15 Research and development expenditure

Revenue expenditure on research and development are recognised as an expense in the period in which they are incurred.

3.16 Earnings per share

The basic earnings per share is computed by dividing the net profit attributable to equity shareholders for the period by the weighted average number of equity shares outstanding during the year.

The diluted earnings per share is computed by dividing the net profit attributable to equity shareholders for the year by the weighted average number of equity and equivalent potential dilutive equity shares outstanding during the year, except where the result would be anti-dilutive.

3.17 Cash and cash equivalents

For the purpose of presentation in the statement of cash flows, cash and cash equivalents includes cash on hand, deposits held at call with financial institutions, other short-term, highly liquid investments with original maturities of three months or less that are readily convertible to known amount of cash and which are subject to an insignificant risk of changes in value and bank overdrafts.

3.18 Cash flow statement

Cash flows are reported using the indirect method, whereby profit before tax is adjusted for the effects of transactions of a non-cash nature, any deferrals or accruals of past or future operating receipts or payments and items of income or expenses associated with investing or financing cash flows. The cash flows from operating, investing and financing activities of the Company are segregated.

4. Changes in significant accounting policies

The Company has adopted Ind AS 115 Revenue from Contracts with Customers (which replaces earlier revenue recognition standard) using the cumulative effect method (without practical expedients), with the effect of initially applying this standard recognised at the date of initial application (i.e. 1 April 2018).

The effect of initially applying this standards is mainly attributed to the presentation of income from export incentives. There is no impact of transition to Ind AS 115 on retained earnings as on 1 April 2018.

NOTES TO THE FINANCIAL STATEMENTS

for the year ended 31 March 2019 (Contd.)

(Currency - INR in Lakhs, except per share data)

The following table summarizes the impact of adopting Ind AS 115 on the Company's Financial Statements for the year ended 31 March 2019 for each of the line items affected:

Sn.	Particulars	Notes	Amounts without adoption of Ind AS 115	Impact of Ind AS 115	As reported
i	Revenue from operations	4 (a) and 4(b)	36,891.23	(3,198.27)	33,692.96
ii	Other Income	4 (a)	96.00	1,726.84	1,822.84
iii	Other Expenses	4 (b)	7,297.72	(1,471.43)	5,826.29

- (a) Amount of export incentives relevant to Merchandise Exports from India Scheme (MEIS) and other export benefits, have been recognised as 'Other Income' with effect from 1 April 2018. In prior periods, these incentives were reported under 'Other Operating Revenue' in the Statement of Profit and Loss.
- (b) In certain cases, the Company makes transport arrangements for delivering its goods to the customers and with effect from 1 April 2018, the Company has presented the gross consideration received net off cost associated with respect to these arrangements within Revenue. Until 1 April 2018, the gross consideration received in respect of these arrangements were recognised and presented in Revenue from Operations and the cost associated with these arrangements was presented with Freight cost in Other Expenses.

This has no impact on reported Profit Before Tax (PBT) for the period.

The details of the new significant accounting policies and the nature of the changes to previous accounting policies in relation to the Company's various goods and services are set out below. Under Ind AS 115, revenue is recognised when a customer obtains control of the goods or services. Determining the timing of the transfer of control - at a point in time or over time - requires judgement.

Sale of goods/scrap: Customers obtain control of goods/scrap when the goods are delivered to and have been accepted at their premises. Invoices are generated and revenue is recognised at that point in time. Invoices are usually payable within 60 days. No discounts are provided for this. For contracts that permit the customer to return an item, under Ind AS 115 revenue is recognised to the extent that it is probable that a significant reversal in the amount of cumulative revenue recognised will not occur. Therefore, the amount of revenue recognised is adjusted for expected returns, which are estimated based on the historical data. Returned goods are exchanged only for new goods - i.e. no cash refunds are offered. In such circumstances, a refund liability and a right to recover returned goods asset are recognised. Ind AS 115 did not have a significant impact on the Company's accounting policies.

Income from export incentives: Under Ind AS 18, income from export incentive schemes was disclosed and presented as Other operating income. Under Ind AS 115, income from export incentive schemes is presented as Other non-operating income as the same is not receivable from customers.

5. Standard issued but not effective

Recent accounting pronouncements

Ministry of Corporate Affairs ("MCA"), through Companies (Indian Accounting Standards) Amendment Rules, 2019 and Companies (Indian Accounting Standards) Second Amendment Rules, has notified the following new Ind AS and amendments to Ind AS which the Company has not applied as they are effective from 1 April 2019:

NOTES TO THE FINANCIAL STATEMENTS

for the year ended 31 March 2019 (Contd.)

(Currency - INR in Lakhs, except per share data)

Ind AS - 116

The Company is required to adopt Ind AS 116, Leases from 01 April 2019. Ind AS 116 introduces a single, on-balance sheet lease accounting model for lessees. A lessee recognizes a right-of-use asset representing its right to use the underlying asset and a lease liability representing its obligation to make lease payments. There are recognition exemptions for short-term leases and leases of low-value items. Lessor accounting remains similar to the current standard- i.e. Lessors continue to classify leases as finance or operating leases. Its replaces existing leases guidance, Ind AS 17, Leases.

The Company has completed a initial assessment of the potential impact on its financial statements but has not yet completed its detailed assessment. The quantitative impact of adoption of Ind AS 116 on the financial statements in the period of initial application is not reasonably estimable as at present.

Ind AS 23 - Borrowing Costs

The amendments clarify that if any specific borrowing remains outstanding after the related asset is ready for its intended use or sale, that borrowing becomes part of the funds that an entity borrows generally when calculating the capitalization rate on general borrowings. The Company does not expect any significant impact on its financial statements due to this amendment.

Ind AS 19 - Plan Amendment, Curtailment or Settlement

The amendments clarify that if a plan amendment, curtailment or settlement occurs, it is mandatory that the current service cost and the net interest for the period after the re-measurement are determined using the assumptions used for the re-measurement. In addition, amendments have been included to clarify the effect of a plan amendment, curtailment or settlement on the requirements regarding the asset ceiling. The Company does not expect this amendment to have any significant impact on its financial statements.

Ind AS 12 Income taxes (amendments relating to income tax consequences of dividend and uncertainty over income tax treatments)

The amendment relating to income tax consequences of dividend clarify that an entity shall recognize the income tax consequences of dividends in profit or loss, other comprehensive income or equity according to where the entity originally recognized those past transactions or events. The Company does not expect any impact from this pronouncement. It is relevant to note that the amendment does not amend situations where the entity pays a tax on dividend which is effectively a portion of dividends paid to taxation authorities on behalf of shareholders. Such amount paid or payable to taxation authorities continues to be charged to equity as part of dividend, in accordance with Ind AS 12.

The amendment to Appendix C of Ind AS 12 specifies that the amendment is to be applied to the determination of taxable profit (tax loss), tax bases, unused tax losses, unused tax credits and tax rates, when there is uncertainty over income tax treatments under Ind AS 12. It outlines the following: (1) the entity has to use judgement, to determine whether each tax treatment should be considered separately or whether some can be considered together. The decision should be based on the approach which provides better predictions of the resolution of the uncertainty (2) the entity is to assume that the taxation authority will have full knowledge of all relevant information while examining any amount (3) entity has to consider the probability of the relevant taxation authority accepting the tax treatment and the determination of taxable profit (tax loss), tax bases, unused tax losses, unused tax credits and tax rates would depend upon the probability. The Company does not expect any significant impact of the amendment on its financial statements.

Note 34 (a)

During the year ended 31 March 2018, a draft order dated 30 November 2017 was received relevant to the assessment year 2014-2015 from the Deputy Commissioner of Income Tax, Pune ("DCIT") proposing upward adjustment of income amounting to INR 991 lakhs under transfer pricing regulations, resulting in approximate tax impact of INR 336.84 lakhs (calculated at tax rate of 30.90%) excluding the amount of penalty and interest. This amount was included under Income tax matters for the year ended 31 March 2018. The Company had filed an objection with Dispute Resolution Panel for the same and was awaiting the final order. During the current year, the Company received the demand order wherein the Transfer Pricing Officer issued the demand of INR 296.39 lakhs. The Company has filed the appeal with the Income Tax Appellate Tribunal (ITAT) on 26 November 2018. This amount is included under Income tax matters for the year ended 31 March 2019.

Income tax demand comprise demand from the Indian tax authorities, upon completion of their tax review for the assessment years 2008-09 to 2011-12. The tax demands are mainly on account of certain transfer pricing adjustments of expenses claimed by the Company under the Income Tax Act. The matters are pending before the ITAT.

Excise duty demand comprise demand from the Central Excise authorities of INR 98.83 lakhs (31 March 2018: INR 98.83 lakhs). The tax demands are mainly related to Excise duty on clearance of goods under certain concessional rate of duty, which as per Department's contention, are covered under different category (with higher tax rates). Management is of the view that the

department's contention is not appropriate since the Company does not sell any products in domestic market under categories mentioned by the department. These litigation are pending before Central Excise and Service Tax Appellate Tribunal ('CESTAT').

The Company is contesting the demands and the management believes that its position will likely be upheld in the appellate process. The management believes that the ultimate outcome of these proceeding will not have a material adverse effect on the Company's financial position and results of operations.

Pending resolution of the respective proceedings, it is not practicable for the Company to estimate the timings of the cash flow, if any, in respect of the above as it is determinable only on receipt judgements / decision pending with various forums/authorities.

Custom duty demand comprise demand from the Office of the Commissioner of Custom of INR 147.67 lakhs (31 March 2018: 264.09 lakhs). The tax demands are mainly related to benefit received by the Company under Agri Infrastructure Incentive Scheme, which as per Department's contention, have been availed under incorrect and inadmissible notification. Management is of the view that such benefits are admissible and cannot be denied only because of incorrect mentioning of the notification. This litigation is pending before CESTAT.

The Company has reviewed all its pending litigations and proceedings and has adequately provided for where the provision is required and disclosed as contingent liabilities where applicable, in its financial statements.

Note 34 (b)

Based on the Supreme Court judgement dated 28th February 2019, the Company has reassessed the components to be included in basic salary for the purpose of employer's contribution towards Provident Fund. However, there has been no corresponding amendment in the Act or Scheme framed under the Provident Fund Act, consequent to Supreme Court judgement. Management does not expect the Supreme Court decision to have any significant impact on the Company's financial position as at 31 March 2019.

41 Transfer pricing regulations

The Company has established a comprehensive system of maintenance of information and documentation as required by the transfer pricing legislation under section 92- 92F of the Income Tax Act, 1961. The Company is in process of preparing related documentation for the financial year 2018-2019.

The management is of the opinion that its international transactions are at arm's length such that the aforesaid legislation will not have any impact on the financial statements, particularly on the amount of tax expense and that of provision for taxation.

42 Segment information

A. Business Segments

An operating segment is a component of the Company that engages in business activities from which it may earn revenues and incur expenses, including revenues and expenses that relate to transactions with any of the Company's other components, and for which discrete financial information is available. The Company recognizes its sale of Prepared Foods activity as its only primary business segment since its operations predominantly consist of manufacture and sale of Prepared Foods to its customers. The 'Chief Operating Decision Maker' monitors the operating results of the Company's business as single segment. Accordingly in context of 'Ind AS 108 - Operating Segments' the principle business of the Company constitute a single reportable segment.

B. Information about major customers

Revenue from one of the customers of the Company's single segment i.e. Prepared Foods is INR 18,796.70 lakhs (2018: INR 17,643.22 lakhs) which is more than 10 percent of the total revenue for the year ended 31 March 2019 and 31 March 2018.

Non-current	456.99	367.30
Current	73.98	95.95

For details about the related employees benefit expenses (including those of Defined Contribution Plan), see Note 29.

The Company operates the following post employment benefit plans:

"The Company has a defined benefit plan, governed by the Payment of Gratuity Act, 1972. Benefit plan entitles an employee, who has rendered at least five years of continuous service, to gratuity at the rate of fifteen days for every completed year of service or part thereof in excess of six months, based on the rates of wages last drawn by the employee concerned.

The defined benefit plan for gratuity is administered and funded through a Group Gratuity Scheme with HDFC Life.

These defined benefit plans expose the Company to actuarial risk, such as longevity risk, interest rate risk and market (investment) risk.

A. Funding

Gratuity Plan is funded by the Company. The funding requirements are based on the gratuity fund's actuarial measurement framework set out in the funding policies of the plan. The funding of Gratuity Plan is based on separate actuarial valuation for funding purposes for which assumption may differ from the assumptions set out in (E). Employees do not contribute to the plan.

The Company expects to pay INR 65 lakhs in contributions to its defined benefit plans in 2019-2020.

E. Defined benefit obligation

I. Actuarial assumptions

Principal actuarial assumptions at the reporting date:	31 March 2019	31 March 2018
Discount rate	7.70%	7.70%
Future salary growth	8.00%	8.00%
Attrition rate	9.00%	9.00%
Mortality rate (% of IALM 06-08)	100%	100%

Assumptions regarding future mortality are based on published statistics and mortality tables (i.e. India Assured Life Mortality (2006-08))

At 31 March 2019, the weighted average duration of the defined benefit obligation is 6 years

II. Sensitivity Analysis

Reasonably possible changes at the reporting date to one of the relevant actuarial assumptions, holding other assumptions constant, would have affected the defined benefit obligation by the amount shown below.

Effect in lakhs of INR

	31 March 2019		31 March 2018	
	Increase	Decrease	Increase	Decrease
Discount rate (1% movement)	(34.49)	31.40	(30.58)	34.16
Future salary growth (1% movement)	30.93	(34.66)	33.73	(30.77)
Attrition rate (50% movement)	(8.76)	3.72	(3.36)	4.52
Mortality rate (10% movement)	(3.52)	(3.47)	(0.02)	0.02

Although the analysis does not take account of the full distribution of cash flows expected under the plan, it does provide an approximation of the sensitivity of the assumptions shown.

45 Employee share based payment

a) Background:

Specified employees of the Company were eligible for equity settled stock options under Perfomed Brand Inc.'s ('PBI Inc.' or the Holding Company/s) 2009 Non-Qualified Stock Option and Equity Plan (the Equity Plan). However, during the year 2015 a value pool agreement was entered into, by and between PBI Inc., the Company and the holders of outstanding options ('Holders'), wherein PBI Inc. and the Holders agreed to cancel the Options and terminate the Grant Agreements in exchange for a consideration payable by PBI Inc. in lieu of such cancellation of unvested options to the employees of the Company.

The details of such aggregate consideration was as below:

Payout date	Consideration payable (Amount in USD)
01-Apr-16	\$ 53,184
01-Apr-17	\$ 44,070
01-Apr-18	\$ 76,970

b) Conditions:

The consideration is payable only to those Holders who continue their employment with the Company on such dates. Any payments forfeited shall be credited to a segregated account of the Company and on 1 April 2020 shall be allocated and paid pro-rata among the Holders and each other Holder who is employed by the Company.

c) Classification of share based payments:

In accordance with Ind-AS 102, the classification of the share-based payment transaction depends on the nature of the award granted and whether the entity has an obligation to settle the transaction and if the entity has either an obligation to settle in its own equity instruments or no obligation to settle at all, then the transaction is accounted as Equity Settled. Since, the Company does not have any obligation to reimburse corresponding cost of share based payment transaction to PBI Inc., it has classified the settlement as Equity Settled.

d) Expense recognised in the Statement of Profit and Loss:

(Currency - INR in Lakhs, except per share data)		
Particulars	31 March 2019	31 March 2018
Share based payment	108.98	28.67

e) Measurement of settlement:

Since the amount of cash payment is pre-determined by the Holding Company based on the Value Pool agreement and the Employee covered were specifically mentioned in the said agreement, the Company is of the view that the share based payment shall be measured at such amount agreed since the Company does not have any separate obligation towards the settlement. Accordingly, the details of the fair value and the inputs used in the measurement of the grant-date fair values are not required. Further, since the aggregate amount payable is pre-determined and any payments forfeited shall be allocated and paid pro-rata among the Holders who are in employment with the Company, details such as reconciliation of outstanding share options, weighted average etc. are not applicable.

The liabilities as at 31 March 2017 and 31 March 2018 were settled by PBI Inc. during the year ended 31 March 2018 and 31 March 2019 respectively.

B. Measurement of fair value

Specific valuation technique used to value financial instruments include:

- The use of quoted market price or dealer quotes of similar instruments
- the fair value of interest rate swaps is calculated at the present value of the estimated future cash flows based on observable yield curves
- the fair value of forward foreign exchange contracts and principle swap is determined using forward exchange rates at the balance sheet date
- the fair value of the remaining financial instruments is determined using discounted cash flow analysis

All of the resulting fair value estimates, where the fair values have been determined based on present values and the discount rates used were adjusted for counterparty or own credit risk

C. Financial risk management

The Company has exposure to the following risk arising from financial Instruments:

- credit risk (see (iii) below);
- liquidity risk (see (iii) below); and
- market risk (see (iv) below).

I. Risk management framework

The Company's board of directors has overall responsibility for the establishment and oversight of the Company's risk management framework. The board of directors have established a Risk Management Framework, which is reviewed and monitored by the Chief Financial Officer (CFO). The CFO reports regularly to the board of directors on its activities.

The Company's risk management policies are established to identify and analyse the risks faced by the Company, to set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Company's activities. The Company, through its training and established procedures, aims to maintain a disciplined and constructive control environment in which all employees understand their roles and obligations.

The Company's Audit Committee oversees how management monitors compliance with the Company's risk management policies and procedures, and reviews the adequacy of the risk management framework in relation to the risks faced by the Company. The Audit Committee is assisted in its oversight role by internal auditors. Internal auditors undertake regular reviews of risk management controls and procedures, the results of which are reported to the Audit Committee.

II. Credit risk

Credit risk is the risk of financial loss to the Company if a customer or a counterparty to a financial instrument fails to meet its contractual obligation, and arises principally from the Companies receivable from customer and loans, if any.

The carrying amounts of financial asset represents the maximum credit risk exposure

Trade receivables are typically unsecured and are derived from revenue earned from customers located in India and outside India. Credit risk is managed by a periodic review of amounts outstanding from customers by treasury head and the chief financial officer. On account of adoption of Ind AS 109, the Company uses expected credit loss model to assess the impairment loss or gain. The Company computes the expected credit loss allowance for trade receivables based on available external and internal credit risk factors such as the ageing of its dues, market information about the customer, industry information and the Company's historical experience for customers. The Company's exposure to credit risk is influenced mainly by the individual characteristics of each customer. However, management also considers the factors that may influence the credit risk of its customer base, including the default risk associated with the industry and country in which customers operate.

The Company limits its exposure to credit risk from trade receivables by establishing a maximum payment period for customers.

Refer Note 11 for the following information:

- Exposure to the credit risk for trade receivables by geographic region

- Movement in the allowance for impairment
- Carrying amount of trade receivables (net of impairment)

Also refer note 3.6 for policy related impairment of financial instruments

Cash and cash equivalent and bank balances other than cash and cash equivalent ('collectively referred as Bank balance')

The Bank balance is held with Banks. Credit risk on Bank balance is limited as the Company generally invest in deposits with banks with high credit ratings assigned by domestic credit rating agencies. Bank balance primarily include investment in fixed deposit with banks for a specified time period.

III. Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Company's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation.

The Company's treasury department is responsible for liquidity and funding. The Company manages its liquidity risk by continuously monitoring its working capital and by preparing month on month cash flow projections to monitor liquidity requirements.

The Company's principal sources of liquidity are cash and cash equivalents and the cash flow that is generated from operations. The Company believes that the working capital is sufficient to meet its current requirements. Accordingly, no liquidity risk is perceived. The Company aims to maintain the level of its working capital at an amount in excess of expected cash outflows on account of financial liability over the next six months.

iv. Market risk

Market risk is the risk that changes in market prices - such as foreign exchange rates and interest rates, will affect the Company's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.

The Company is exposed to foreign exchange risk through purchases from overseas suppliers and sales to overseas customers in various foreign currencies. The Company uses derivatives to manage market risk. All such transactions are carried out within the guidelines set by the Company. Generally, the Company seeks to apply hedge accounting to manage volatility in profit or loss.

A) Currency risk

The Company is exposed to currency risk to the extent that there is a mismatch between the currencies in which sales, purchases and borrowings are denominated and the functional currency (INR) of the Company. The exposure is primarily denoted in US Dollars.

The Company uses forward exchange contracts to hedge its currency risk, most with a maturity of less than one year from the reporting date. Such contracts are generally designated as cash flow hedges. At any point of time, the Company hedges 80 to 90% of its estimated foreign currency exposure in respect of forecasted sales. Currency risk related to External Commercial Borrowings have been fully hedged using forward contracts on same dates as the loan are due for repayment.

Sensitivity analysis

A reasonably possible strengthening (weakening) of the US Dollar and other currencies against INR at 31 March would have affected the measurement of financial instruments denominated in foreign currency and affected equity and profit or loss by the amounts shown below. The analysis assumes that all other variables remain constant other than change in foreign currency rate to INR

1 % increase or decrease in foreign currency rate will have following impact on profit before tax

B) Interest Rate risk

The Company adopts the policy of ensuring that between 80 and 90 % of its interest rate risk exposure is at a fixed rate. This is achieved partly by entering into fixed-rate instruments and partly by borrowing at floating rate and using interest rate swaps as hedges of the variability in cash flows to interest rate risk.
