For us,
**delivering
'Natural' food**
is a choice we are proud of.

For us, food is not just a
blend of tasty ingredients,
rather it's a culmination of
**convenience with
nutrition.**

For us, adopting the organic
route is a means to fulfil a
coveted desire – to deliver
**goodness in
every bite.**

Tasty Bite continues to set new benchmark
in the food service business with its growing
range of tasty and innovative products.
We use only the finest ingredients in all our
creations. Keeping food safety at the core, we
consistently dish out natural and preservative-
free food that not only offer a diverse range of
healthy choices but also fulfils the promise of
convenience without compromise.

We realize the
importance of
encouraging a shift
towards natural and
organic products.
At the heart of our

Chairman's Message

Business resilience in a Covid world

Dear Shareholders,

» LAST YEAR, MY NOTE TO YOU WAS TITLED “GROWTH & INNOVATION IN A POST-COVID WORLD.” THE UNDERLYING ASSUMPTION WAS WE’D BE LOOKING AT THE PANDEMIC IN THE REARVIEW MIRROR, EVEN AS WE ACKNOWLEDGED SOME PERMANENT BEHAVIORAL CHANGES FOR A NEW TOMORROW. «

Instead, we have seen a global spike from 7 million cases I mentioned in the Annual Report last year to an alarming 173 million cases a year later. Tragically, almost 4 million people have died and even this is acknowledged to be vastly under-reported. The cases in India skyrocketed recently and today we stand 2nd only to the US in Covid cases and fatalities.

This has been a very difficult year for the families of our employees, contractors, suppliers and farmers. I know you too dear shareholders, are dealing with more than you planned for. I wish you a safe return to normalcy from this long period of turbulence.

As a company, we have been agile and responsible in dealing with this situation, the best we can. We have, and will be contemplating further measures to deal with this uncertainty but before I get into that let's take stock of the difficult year gone by:

- After a 5-year annual growth rate (CAGR) of over 20%, your company saw net revenues decline for the first time ever by 11% to INR 4.04 billion from INR 4.55 billion.

- Our Consumer business though, represented by exports managed to grow 9% for the year from INR 2.76 billion to INR 3.01 billion. The US continued to reel under Covid most of the year but Tasty Bite sales were up in all channels (grocery, club & private label). Not surprisingly, online sales continued to grow the fastest yet another year.

- Organic Madras Lentils and the range of Organic Grains was followed by the introduction of several new SKUs and today, with 60+ organic SKUs, Tasty Bite has become a largely organic brand in North America.

- The TFS (Tasty Bite Food Service) business which is essentially domestic dropped 44% from INR 1,502 million to INR 842 million as our QSR customers were hit hard.

- ‘TastyBite Xclusive’ launched last year targeting HoReCa has been aborted as restaurants and catering establishments struggled to keep their doors open across our test markets. We are in the process of redesigning this initiative.

- These setbacks did not stop us from continuing our capacity expansion plan through the year despite the physical challenges posed by Covid, adding INR 371 million to our asset base to prepare for the growth ahead.

- It's a tribute to our resilience and discipline that profits after tax (INR 393 million) managed to remain at 96% of last year (INR 409 million) enhancing profitability to 9.7% of revenues, up from 9%. This was driven by cross-the-board improvements in operating efficiencies, cost discipline and incredible dedication of team Tasty Bite.

Is Covid here to stay?

Every day, we wake up to news of increased infections, new variants, vaccine shortages, poor infrastructure and inadequate preparedness. To a lesser or greater extent this seems to be the situation everywhere in the world. There is a widening acknowledgement that this virus is now endemic - here to stay permanently as our unwelcome guest. How we deal with it as individuals, as a community and as a business will set us apart and determine our future. So far there are no global or corporate

role models - only temporary heroes, shifting fortunes, and the lucky or unlucky ones. The only common denominator the whole world seems to be dealing with is the terrible duo: *unpredictability & uncertainty*. For a business that is unprepared, this can translate to fuzzy forecasting, poor planning, tentative execution and a faulty review. Fortunately, I believe your company is acutely aware of its environment and dealing with crisis of today without losing its focus on the future.

Here is how we are looking at the changed environment.

Necessarily Natural, Preferably Organic:

Consumers globally have a heightened awareness of food and its role in wellness. This has been a megatrend Tasty Bite has championed for more than 25 years. Our commitment to keeping products all natural without the need for chemicals, artificial colors, flavors or preservatives is well documented. This is a very high bar for most food companies. For us it's a way of life.

This year however, we raised this bar further. You will recall my earlier message that on the back of our organic rice and grains line, we launched our bestseller SKU Madras Lentils across all channels. The results were so encouraging that we currently have nearly 60 organic SKUs and more than 20 variants across Canada and United States.

Growth of the Tasty Bite organic range has been nothing short of spectacular. Just 3 years ago, only 10% of our branded volume or revenue was organic. Last year it was about half. This year 70% of the Tasty Bite branded business is organic.

This is truly mission aligned as we continue to build a socially responsible business that will continue to provide consumer delight.

Food Service industry pivots globally - expect new winners and losers:

Lockdowns came in different flavors through the year, creating new problems, unfamiliar to the Food Service industry. Partial store openings, restricted hours, new safety protocols, ageing perishable commodities, cost escalations and an uncertain consumer turnout, in the dine in, takeout and delivery segments are just a sample

what the industry is dealing with. No one was spared-fast food chains, restaurants, catering establishments, hotels. The effect on our customers impacted us quickly.

The ramifications to the nearly USD 4 trillion global industry are widespread and long lasting. But it has also opened up opportunities for innovators. Our customers are looking at new technology enabled business models. Everything from precision farming, emerging cell-based foods, plant-based meats, new processing technologies, customized nutrition, cloud kitchens, driverless and drone deliveries are each examples of multi-billion industries in the making.

We are witnessing green shoots in our local and regional markets of these emerging technologies and we will be exploring new business options with our customers. If we are to stay mission aligned with our TFS purpose of *being the natural partner of choice to leaders in the Food service industry*, then I am persuaded we can do nothing less.

Tasty Bite Foundation repurposed for Covid Relief:

I am extremely grateful to our parent company Mars and to our Board of Directors for having repurposed the Tasty Bite Foundation during the year, from “integrated rural development” to Covid relief. The work and the speed at which programs were implemented these last few months by the Foundation and the employees of TBEL in supporting our local communities will forever inspire.

It is true this was one of the more difficult years in our history as the largest Covid cases happen to be the US and India, our 2 most important markets. But the measures we have in place now to tide over the short-term impediments and the strategic plans we have across product segments, geographies and channels allows us to face the future not with anxiety but with renewed energy.

It is difficult and probably unwise to describe a company in one word. But there is one that best portrays Tasty Bite and one that has been repeatedly demonstrated over the years. **Resilience.**

Investing in our people

Well - being of our associates is at the core of our business strategy. At Tasty Bite, we remain committed to protecting the health of our associates and empowering them to build a rewarding career at our Company.

Our associates comprise individuals with diverse experience, skills, knowledge and culture. They remain the cornerstone of your Company's growth, shaping our success.

Building a culture of excellence

Our people practices were once again validated with retention of "Great Place to Work-Certified (2020-2021)" certification for building a High-Trust, High-Performance Culture™. This marks the seventh continuous year of your Company retaining this highly acclaimed certification. Additionally, we are also thrilled to share that Tasty Bite has been again recognized in "India's Top 100 Best Places to Work for Women 2020". We were also accredited with a special honour "Commitment To Being a Great Place to Work" for our continuous efforts to drive employee empowerment and engagement.

Learning and Engagement

We increased our focus on virtual learning for all employees with more than 40 online training programs. To release the stress levels, we encouraged our teams to pursue their hobbies like cooking, music, painting, etc. Formation of “Sudhar group” (Improvement Group) helped the people on shop floor bring their ideas on table covering several issues and processes. This helped increase engagement as well as improve hygiene and productivity. In addition, multiple ‘townhall’ sessions and other direct interactive sessions were also held with all employees to ensure strong engagement levels in a challenging year.

Combating Covid-19

We focused on “Employee Wellness Calls” during lockdown imposed by Covid-19, providing necessary comfort and support to associates and their families. SOP on Covid Safety (people practices) was designed and communicated to all employees through series of training. We also improved the infrastructure to maintain social distancing norms, implemented automation to reduce manpower and increase productivity. To empower our associates with medical assistance, we gave them access to DocsApp prime service. This came as a major relief for the associates with almost 70 percent of associates taking online consultation, free home delivery of medicines and home collection of test samples. This helped us curtail the risk of Covid infection by avoiding hospital visits. For regularisation of manpower, we facilitated building of a labour colony for accommodating 200+ migrant workers. This helped them stay in a hygienic, safe and risk free environment.

Celebrating Heroes

During the height of lockdown, many associates could not travel due to restrictions. Our shopfloor workers and employees from other departments, who could travel took charge and kept the factory running. There were no functional boundaries and it was our ‘never give up’ attitude that ensured business continuity. The commitment and passion of these associates was recognised through our “Reward and Recognition” programme.

Embracing the future of food

We keep our consumers in the driving seat and all our decisions are centered around improving their experience and providing them superior value. Across both our businesses, retail and food service, we have seen major shifts in food choices, channels as well as consumption habits.

Increased Brand Trust

The pandemic has heightened the need for consuming safe food and consumers have gravitated more towards brands that they trust. Brand Trust can no longer be an afterthought for food companies, but needs to be at the top of their agenda right along taste and experience. Trust needs to be built through proactive communication and transparency around safe & healthy food sourcing and handling.

Healthy and Tasty

The trend towards healthy, natural, organic and better-for-you food isn't slowing down: infact, Covid - 19 increased its acceptance. However, consumers are not ready to compromise on taste! During these testing times, taste has become more important than ever.

Convenience is King

Whether cooking at home, eating in a restaurant or getting a home delivery, consumers are increasingly looking for convenient options given the busy lives they lead. Food choices that offer them convenience without any compromise are most preferred. Increased consumption of ready-to-eat, ready-to-cook products or increased adoption of online food deliveries is a clear indication of preference towards convenience.

Digitalization

Pandemic has increased the adoption as well as acceptance of digitalization in the food value chain. Whether its food ordering or trying out new recipes online or brands reaching out to consumers, or driving back end efficiencies, digitalization is playing a major role in driving consumer centricity as well as operational excellence. These trends will only accelerate, driven by the higher demand for convenience, fierce competition and exponential technology advancement.

The Tasty Bite advantage

TBRC

Tasty Bite Research Centre (TBRC), our inhouse research for excellence is focused on adapting to industry trends that are primarily influencing the food consumption patterns. TBRC team comprise Chefs & Food Technologists who progressively work towards fulfilling our company's promise of delivering Great Taste, Good Value and Real Convenience to the consumer.

Accredited as an 'In - house R&D centre' by the Department of Scientific and Industrial Research (DSIR), Ministry of Science and Technology, Govt. of India, TBRC holds a position of pride within Tasty Bite. We pursue a strategy of combining our in-house expertise with global R&D collaborations to develop 'WOW' products.

Innovation at core

Building on our core values, we are focused on creating a portfolio that is increasingly organic and necessarily natural. Our holistic approach is focused on product, packaging, ingredient and process innovation. Whether its developing a new SKU or converting a conventional SKU into organic or driving operational efficiency or saving a natural resource like water, we keep innovation at the core of everything we do.

Supply Chain and Logistics

We have a complex supply chain with 400+ raw materials and equal number

of packaging material sourced from 750+ suppliers within and outside India. Our constant endeavour is to create a value added and low cost supply chain that will provide assured availability of high quality ingredients and packaging material. Our strength comes from our ability to understand the market dynamics of each of these input materials and make timely strategic decisions on buying them.

Our purchasing strategy ranges from spot purchases, seasonal buying and in case of few commodities, pre-processing these ingredients into intermediate forms that can be easily stored and utilized over the course of the year. This creates ability to manufacture a better and consistent product leading to consumer delight. Our organic journey has also helped create a better impact for the environment while delivering taste and nutrition for our consumers.

Manufacturing

Our state-of-the-art manufacturing facility is one of our biggest strengths where we create magic. Products that are conceptualised in the R & D center are brought to life in this 'kitchen' except that its slightly bigger than our home kitchen. All our products are manufactured with the same amount of care and love, like at home, whilst meeting the most stringent standards of quality and food safety. Our manufacturing facility houses various technologies like Retort, Pasteurization and Freezing with flexibility in managing pack sizes from 100 gms to 3 kgs. Over the past few years, we have been adapting newer technologies that help us drive efficiencies without losing taste that makes our food so likeable.

Making an impact

Tasty Bite is always committed to socio-economic development of the community. Our stewardship commitment revolves around contributing positive impact on People and Planet. Through our CSR arm, Tasty Bite Foundation, we continue to expand our CSR reach to more under privileged communities.

Covid support

We made significant financial contribution to set up Covid quarantine centers equipped with medicines, medical equipment and other required accessories for 160 patients. Nearby hospitals were provided with much needed medical equipments like ventilators, concentrators and various types of testing equipment. We also distributed grocery kits and food packets to frontline workers. This was in line with our commitment to help the community during difficult times.

INR 9.80 million

Spent towards CSR activities in FY 2020-21

Farmers' welfare for sustainable farming

With an aim to promote sustainable farming, Tasty Bite Foundation partners with two NGO's on Integrated Rural Development. The Agriculture Development Trust focuses on Natural Resource Management like Water Conservation and Rain Water Harvesting by construction of dams and farm ponds to store water for better crop yields. It also focuses on improving soil quality through soil conservation techniques.

Skill and entrepreneurship development:

Through this initiative, we provide new technologies to farmers that enable them to improve crop production. We have also collaborated with The American India Foundation Trust to conduct multi-skills training and entrepreneurship development programs.

Rural education

We supported school in Galandwadi, Pune to develop learning lab equipped with 25 computers for promoting education and Osmanabad School in construction of washrooms and hostels for girls under Swachh Bharat Movement.

Management Discussion and Analysis

Company Overview

Tasty Bite is a leading brand in the Natural, Organic and Ready-to-Eat food category in North America. The consumer business has a range of Ready-to-Eat Indian and Asian entrées, Ready-to-cook sauces, Ready-to-Eat organic Rices and Grains. It also manufactures several products in these categories for other leading brands in North America and UK. Sales and Marketing of the consumer business is managed by PBI (for North America) and Mars (for all other geographies).

Tasty Bite Food Service business comprises a range of customized specialty formed frozen products, sauces and gravies. Your company is a trusted partner to marquee QSR and Cloud Kitchen brands in the food service industry across India and South East Asia.

Global Economy

The global economy contracted by 3.3% in 2020 while the Indian economy contracted by -7.3%. Global prospects remained highly uncertain during the year of the pandemic. Despite Social distancing, vaccinations, and treatments that helped slow the progress of the virus, millions of lives were lost. Second and third infection waves across many countries resulted into a stop - start rhythm making the recovery process painful, uneven and far from complete. Across countries, economic recovery was shaped by the path of the pandemic, steps taken to contain its progress, and extent of policy support provided by the governments.

Losses were particularly large for countries that relied on tourism and commodity exports. Close to 95 million more people are estimated to have fallen below the threshold of extreme poverty in 2020 compared with pre-pandemic projections, reversing a two decade long trend of global poverty reduction.

As the effects of virus fade away in the coming year, growth is expected to bounce back and global economy is expected to grow at 6% for 2021 with most of the economic indicators firing on all growth cylinders. All of this is however circumspect and will largely depend on whether countries experience newer waves of the pandemic as is recently seen in India.

Indian Economy

India's Gross Domestic Product (GDP) contracted by -7.3% in 2020-21, as compared to GDP growth of 4% in 2019-20. GDP had contracted 24.4% in the April to June 2020 quarter, followed by a -7.4% contraction in the second quarter. It had returned to positive territory in the September to December quarter with a marginal 0.5% growth. In terms of sectors, the sharpest decline was from hotels, transport, communication and broad-casting related services which recorded the sharpest decline of -18.2%, followed by construction -8.6%, mining and quarrying -8.5% and manufacturing -7.2%.

Lockdowns in Q1 of 2020-21 and a slow recovery post lockdown had a significant impact on the food service business within India. Most brands in this sector reported heavy losses, with several smaller restaurants closing down permanently. While it was expected that this sector will bounce back, second wave and further lockdowns across the country have impacted an already troubled sector. There was also additional pressure on this industry on account of unprecedented increase in several commodities like Oil, Diesel, Resin and Dairy. Added to this was the imbalance in global shipping resulting in freight rates increasing multi-fold.

Management Discussion and Analysis (Contd.)

The second wave starting April 2021 took country by storm staggering the 'V-shaped' economic recovery. Given the low base of last year, the economic recovery in first half of FY 2021-22 is expected to be optimal. India's GDP growth forecast has been lowered to 9.5% in FY22 compared to 11% projected earlier, taking into account the impact of second wave in April - May 2021.

The accelerated vaccination programs and progressive reforms by the government are expected to put the GDP growth back on track.

Industry Overview

Global RTE Industry

During 2020, as a reaction to lockdowns, consumers across the globe started pantry-stocking resulting in a spike in the sales of packaged food and consumer goods. In addition, consumers were tired of cooking at home while juggling with office as well increased home duties. This trend benefited the demand for Ready-to-Eat (RTE) and Ready-to-Cook food products significantly. Also, consumers shifted their preference towards trusted brands and stocked known sku's experimenting with newer brands or products. Given the global supply challenges, most companies focused on line efficiencies by producing limited number of SKU's. However, unprecedented inflation, increased shipping lead times and other supply challenges resulted in many companies not being able to take full advantage of this consumption spike. This trend continued for most part of 2020 due to second and third waves hitting many economies.

Starting 2021, with many countries opening up once again, we have started witnessing a reversal in this pantry stocking trend. Consumers who are tired of eating at home are eager to step out and experience dining-in like the pre-pandemic days. This could result in a slow-down in the retail off-take of consumer goods and packaged food compared to the highs of 2020.

From a longer term perspective, the drivers of convenience, natural and/or organic food and growing preference for vegetarian food bodes well for this industry as well for your company. The global RTE industry is expected to reach USD 172 billion by the end of 2023¹ with North America commanding the largest share of this segment. An increasing number of online retailers and delivery services in America is also boosting the growth of the ready-to-eat food market.

Indian RTE Industry

India's RTE market is gradually growing and is poised to reach USD 647 million by 2023, growing at a CAGR of 16% from

2018-2023.² Indian consumers are looking to utilize their time effectively and are shifting from traditional cooking methods to RTE food, which considerably saves cooking time. It is also estimated that around 400 million Indians regularly consume some kind of processed food. Urban areas account for 75% of sales, as consumers seek convenience and quality, providing a bigger market for higher-value frozen foods.³

Indian Food Service Industry

Food Services, defined as non-home cooked food or restaurant food currently contributes only approximately 10% of the food market. This is substantially low when compared to global economies like the United States and China which have approximately 54% and 58% contribution from Food Services respectively (of the total food consumption).

Covid-19 dealt a deadly blow to the Indian food services industry on account of the lockdown in the country. It is estimated that the entire food service market plunged more than 80% year-on-year in the first half of FY 2021. The biggest impact was to the small restaurants, followed by the HoReCa (Hotels, Restaurants, Caterers) segment. The Organized QSR chains contracted by more than 50% and by end of the year the recovery was at 75-80% of pre-Covid levels. While in 2021, strong recovery was expected the second wave has created tremendous uncertainty.

From a long-term perspective, Covid-19 is expected to become an enabler boosting preference for QSRs especially as consumers shifted to familiar brands that focus on safety and hygiene. With supply chains also being a challenge, there was a significant shortage supply which again benefitted the larger players alone. It is pegged that the chained outlets will become the highest growing segment with an expected CAGR of 23% in the food service industry over the next five years.

India's food services market was estimated at INR 4,236 billion in FY 2020 and organized QSRs had a market size of INR 348 billion. Future growth in the segment will be driven by larger chains in QSR market, which accounted for 54% of the total QSR sub-segment in FY 2020 and are estimated to reach 64% of the QSR sales by FY 2025. This shift to QSR chains is on the back of a young population, value pricing, increased penetration in tier two and three cities and customization in operating models and store sizes. The more recent popularity of online food ordering and food delivery platforms have enabled QSRs reach more consumers. However, there are several changes that the pandemic has brought to this industry and QSR's need to tweak their business models in order to survive.

Management Discussion and Analysis (Contd.)

Food Delivery and Cloud Kitchens

With restaurant footfall at an all-time low and sales down as much as 80%, takeaway became a vital source of revenue for many restaurants. This has triggered the explosive growth of food delivery services as well as cloud kitchens.

Demand for food delivery services (through online delivery aggregators and mobile apps) has increased four-fold in recent years. This growth has been more profound in the food service industry, as the overall food delivery market has increased from USD 4.7 billion in FY16 to USD 10.2 billion in FY20 at a CAGR of ~21%. With these tailwinds in place, the overall food delivery market is expected to reach USD 18.1 billion by FY 2025, much higher than the earlier projection of USD 16.4 billion.

Even as the pandemic forced restaurants to close down their dining areas, more and more kitchens were firing up for business. Newer brands are emerging every month, many of which are delivery-only. This is because the pandemic triggered the rise of cloud kitchens, also known as dark kitchens or ghost restaurants. These are delivery-only outfits, which do not offer dine-in. Cloud Kitchen is the new emerging vertical as it offers the following advantages:

- No dine-in service enabling the restaurant to focus on great food quality alone.
- Flexibility to keep experimenting with the menu

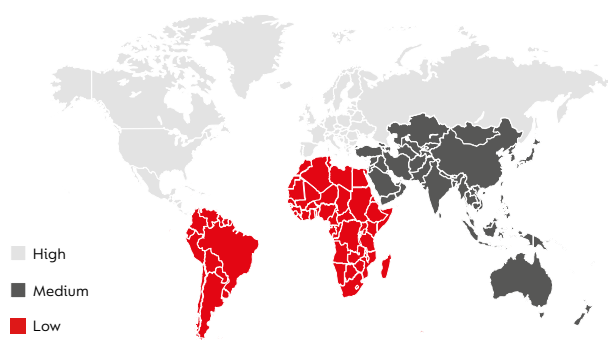

- Easier and faster expansion at a fraction of the costs of a traditional restaurant
- Higher operational efficiency vs QSR due to pooling of resources
- Ability to create multiple private brands at a lower marketing cost

The Indian cloud kitchen market is expected to grow from a size of USD 400 million in 2019 to become a USD 2 billion industry by 2024, owing to customer's increased preference for ordering their food online.

Industry Trends

- **Younger demographics:** Population in the millennial age group of 15 to 34 years constituted approximately 34% of the total Indian population in Fiscal 2019 (approximately 444 million) and most of them prefer outside food compared to home cooked. The youth is generally characterized by good taste and high demand for quality, variety and value for money. This age group is open to experimenting with new cuisines, format offerings and brands. While the frequency with which the youth eat out is the highest across age groups, they are also price conscious and like to prefer eating with family and friends. QSR's and Cloud Kitchens, offer great value for money, making it an ideal choice for the younger generation.

Management Discussion and Analysis (Contd.)

- **Increased participation of women workforce:** The proportion of women workforce in India has been rising, majorly in the urban areas. With hectic work schedules, people are increasingly eating out or ordering food from outside. Also, with higher overall participation in the workforce, disposable incomes have increased. Due to these factors, families are increasingly ordering multi-cuisine food via online channels or eating out, thereby contributing to the QSR market's growth.
- **Rise in disposable income:** Changing consumption patterns and efforts to improve gender composition at work has led to a rise in disposable income. Further, more than 2/3rd of our 1.35 billion population is young with growing incomes, creating a large market for the food processing industry. All these factors will lead to growing food consumption and it is expected to reach USD 1.2 trillion by 2025-26.
- **Larger focus on value meals:** Indian consumers – irrespective of socioeconomic class or type of city – are eating-out and ordering in at a per-household average of 6-7 times per month with a view to experiment and socialize over food. Whilst there is a willingness to spend more on these type of experiences, Indian consumers remain cost-conscious and prefer value-for-money options while eating out or ordering in. Thus, Indian customers find 'combos' and 'value meals' appealing that provide 12-25% discounts. Also, these discounts have resulted in an increase in the average food bill of QSR companies. Some examples of these offers include Burger King's 'The King Deals' and '2 Good Menu,' McDonald's 'McSaver,' KFC's 'Favorites' and 'Box Meals,' and Subway's combos.
- **Increased exposure:** With an increased number of Indians travelling abroad, their exposure to global and exotic cuisines has increased. Popular 'food and cookery' shows on television (MasterChef) have also led to greater awareness of gourmet food and trends. At the same time, social media has become an integral part of India's young and working population's lifestyle. Digital and social media have aided the marketing of food services' brands as an experience at lower costs with greater visibility.
- **Brand perception** will be led by trust built through clear and transparent communication around safe and healthy food sourcing and handling. We have been observing this since the onset of Covid-19. This has, thus, resulted in higher preference for well established brands versus new brands that have entered the market. Brands will have to lead with trust as a key strategy along with Taste and Customer experience in a post Covid-19 world.

While your Company witnessed a decline in the food service business by 44%, in line with the broader industry, the long-term trends of eating out bode well and the Company expects return back to normalcy in the next 18 - 24 months.

Opportunities & Threats

2020, was a difficult year for many businesses and industries. The VUCA world, which was till now only heard and read, was witnessed first-hand by everyone. The last 12 months (and the next 12 months) has been a true test of resilience and adaptation. Your Company is built on a foundation of strong values and a consistent strategy. So despite a setback in 2020 and further uncertainty in 2021, from a longer term perspective the Company continues to have a strong competitive advantage and has significant opportunities to grow.

Strategy

Our strategy and mission statement is to be a socially responsible company that will delight consumers by offering great taste, good value and real convenience achieved through manufacturing and marketing natural, convenient and specialty foods in a knowledge-driven, energetic and fun work environment.

We continue to focus on the following strategic goals:

- Be the Brand of choice for aspirationalists
- Become a global household name in key global markets
- Benchmark for sustainability
- Preferred and trusted partner for leading food service brands

Strengths

- **Brand name:** Tasty Bite is one of the leading brands in North America amongst Indian and Asian Natural, Organic and ready-to-eat prepared foods. In the Indian shelf stable prepared foods, it commands a dominant market share and is one of the fastest growing brands in the Asian and rice category.
- **Management Experience:** Your Company's senior and middle management has significant experience in the food industry and a strong understanding of consumer business as well as food service.
- **Innovation:** Strong marketing and consumer insight combined highly skilled culinary professionals and food

technologists, makes your company extremely strong in innovation. In addition, the innovation team leverages our Research and Development center equipped with latest technology & state-of-the-art equipment.

- **Trusted Partner:** Your Company partners with leading QSR brands to provide customized product solutions in Formed Frozen Product (FFP) and Specialty Sauces category.
- **Strong distribution and marketing:** Your Company is supported by Preferred Brands International Inc. in North America and by Mars Food Corporation for all markets outside of North America. Both these companies have a well-established marketing and distribution network in their respective markets.
- **Strong supply chain:** Your company is one of the largest organic processors in the country and is backed by a very strong, agile and efficient supply chain.
- **Product quality:** Your Company manufactures high quality products for its food service as well as consumer business. The manufacturing facility is audited by several customers and meets stringent quality standards of several countries including US, UK, Australia, Japan and Canada.

Competition

The food industry globally is a large and highly competitive industry that is subject to ever changing consumer trends and consumption habits.

RTE acceptance across the globe is on the rise and many new brands are finding their way onto the retail shelves. In our consumer markets, our products compete not only with other Indian ready-to-eat offerings but all other specialty meal options including other cuisines that a consumer may consider as a lunch or dinner alternative.

Likewise, in our food service business, there are international and domestic players that have the technology and capability to manufacture similar products. Many of them have international relationships, well recognized consumer brands in India and extensive distribution networks. This is also a highly price sensitive market and industry and the Company needs to continuously innovate, enhance its procurement strategies and make its manufacturing more efficient in order to remain ahead of its competition. With a significant drop in demand there is excess capacity in the country. This will result in many companies dropping prices to retain existing businesses and gain new ones.

Outlook, Risks and Concerns

Your company intends to continue focusing on both the consumer as well as the food service business. While in 2020, we witnessed an increased demand for the consumer business and decline in the food service business, over the longer term we are confident about the growth prospects for both these verticals.

For the consumer business, following is our growth strategy:

- **Improve Distribution Points** – Our focus will continue to be increasing reach by adding new channels as well as expand to newer geographies
- **Lead Innovation** – We would continue to be leaders in category innovation through transition to organic, new line extensions and new formats.
- **Manufacturing partner for Mars** – We will continue to explore opportunities to manufacture different products for Mars Food.
- **Increase conversion** – Product sampling and demonstrations, use of focused digital media will increase the consumer base of Tasty Bite brand lovers.

In the Food Service business, our growth will be enabled through:

- Value Leadership
- Innovation
- Superior Customer Service

The food service industry is driven by innovation, value consciousness and customer-supplier partnership. Covid-19 increased the emphasis on the value conscious lever far more than the others. During the year under review, with tremendous profitability pressure many brands had a ruthless focus on cost reduction. This resulted in varying strategies from insourcing to different sourcing models focused on reducing taxation impact. These change in sourcing strategies impacted several suppliers who have been long term partners to these brands. The coming few years will continue to witness such moves from all QSR brands. Your Company will continue to explore every opportunity and figure out ways to operate effectively in this new normal.

On the other hand, brands have also realized the importance that their consumers are placing on trust, safety & hygiene. This will make them shift towards supply partners who can offer them innovative solutions both in terms of new products as well as standardized supply chain solutions. Your company has been a preferred partner for many customers and will strive harder to earn their trust.

Management Discussion and Analysis (Contd.)

With the HoReCa segment under most stress, the new launched “TastyBite Xclusive” range is back on the drawing board. The company is reviewing the future of this range and will tweak the go-to-market strategy to meet the current realities.

The underlying risks and concerns that we see in the business:

- With the rise in packaged foods consumption in 2020, several new brands entered the market and competition for shelf-space has increased multi-fold. There always uncertainty whether the Company would be able to get its products listed in grocery stores. As new product reviews take place only once or twice a year any delay in getting listing could impact growth.
- The success of any product or category depends finally on consumer acceptance of the same and new launches may or may not be successful.
- Food Service customers have had a major dent in their revenue and profitability since the advent of Covid – 19. It is estimated that it will take anywhere from 18 - 24 months to resume normalcy.
- In the short to medium term, there would be immense pricing pressure from our food service customers as they seek lower cost options or discounts on existing products.
- We do not have any long - term contracts with our customers and they could stop purchasing from the Company with little or no notice period. This could negatively impact our revenues and profits.
- 2020 witnessed unprecedented commodity inflation and with Covid-19 impact on consumers earning capacity, it will be difficult to pass on cost increases to our customers.
- We have a robust forex risk management policy in place and it allows us to hedge movements in foreign currency exchange rates for a period of twelve months. However, we are exposed to risk of fluctuations in foreign currency on our export sales. As we are a net exporter, any long – term strengthening of the Indian rupee would have an adverse impact on our profitability.
- All our raw materials are agricultural commodities that sometimes see significant price volatility depending on weather and market conditions. While we do strategic purchases to hedge risk of key commodities, it would not cover all the raw materials that we purchase.
- We have one manufacturing facility for all our products of our consumer and food service business. Any untoward incident beyond our control can impact our ability to fulfill customer orders and our reputation.
- Our products are shipped globally and ocean freight forms a material portion of our total costs. 2020, witnessed a disruption in global supply chains and while freight costs increased multi-fold, reliability dipped to an all time low. This continues to be a challenge in 2021 as well. Some of these risks of ocean freight could impact the company.
- A few of our raw and packing materials are imported and have longer procurement lead times. Changes in exchange rates and any delays on import can impact production schedules and our ability to fulfill orders.
- Our insurance coverage may not be adequate to protect us against all potential losses to which we may be subject and this may have a material adverse effect on our business.
- We are eligible for various incentives from the Government on the export of value – added agricultural products. Any change on these policies that reduces these incentives could adversely impact our net income. We witnessed this in 2020 with the withdrawal of the MEIS export incentive and the government in yet undecided on the rates of the new scheme.
- Any shortcoming in the quality of our products could have a financial impact aside from impacting the reputation of the brand.
- We could be the subject of litigation, which if adversely determined, could harm our business and operating results.
- Any changes to import policies and taxes in the countries where we export our products could increase the cost of our products for our consumers which could impact demand.
- We need to invest in manufacturing facilities and physical infrastructure ahead of market demand given the long lead times in creating new capacity. Our profitability could be reduced if our business does not grow proportionately.
- With Covid – 19 pandemic across the globe, there's a potential short to mid – term impact on the business due to labor availability, destabilized supply chains and demand shrinkage especially on the food service side of the business.

Your Company revenues de - grew by 11% over the previous year. The export business grew 9% on account of constant demand from US markets and touched a revenue of INR 3,011.3 million.

The Tasty Bite Food Service (TFS) business de - grew 44%, highly impacted by the pandemic since most of the QSR's were closed due to lock - down during first half of the year and dine - in restrictions continued for the whole of the year. Our Food Service Business (TFS) touched revenue of INR 841.8 million.

Overall revenue from both businesses touched INR 4,042.9 million including other income.

Material cost in the year decreased by 210 bps over previous year to 60.2% of revenue mainly on account of better yields driven by higher efficiencies and business mix impact. Your Company also took some strategic decisions to forward buy key organic commodities like urad, lentils, onions, rice and tomato paste.

While revenue dropped by 11%, stronger cost controls and increased efficiencies helped deliver an EBITDA of 18% (de-growth of 1.3% over the previous year).

During FY'21 Profit before tax (PBT) was INR 525.8 million as against INR 533.5 million in FY'20. Profit after tax decreased by 3.7% to INR 393.4 million from INR 408.6 million in FY'20.

Other comprehensive income records the remeasurement gains / losses on our defined benefit plan (gratuity) and the mark to market gain / loss on the effective portion of cash flow hedges taken by the Company to hedge its forex exposure, net of taxes. There was an actuarial gain, net of taxes of INR 0.3 million as compared loss of INR 6.4 million in FY'20 and mark to market gain, net of taxes on effective portion of cashflow hedges of INR 46.2 million as compared to loss of INR 84.6 million in FY'20.

Sources and Uses of Funds

As at 31 March 2021, the Company had four long - term foreign currency loans - three from Japanese banks (two from Mizuho Bank Ltd. and one from MUFG Bank Ltd.) and fourth from Mars Netherlands with a total outstanding balance of USD 7.8 million (INR 567.6 million).

These loans have maturity of five to eight years with an interest cost of 3 months Libor + 0.90% on two loans, 3 months Libor + 0.75% on third loan and 2.2% fixed on loan from Mars Nederland's. The Company has entered into an interest rate swap (IRS) agreement with Japanese banks to convert the floating rate liability of these loans into a fixed rate liability. As at 31 March 2021, the IRS has a mark to market loss of INR 3.7 million.

During the year, the Company has taken a new loan from one of its affiliate entity namely Mars Netherlands BV for capex project of USD 5 million (INR 366.3 million).

During the year, the Company has also availed short term working capital borrowing in the form of packing credit in foreign currency from Mizuho Bank for meeting its working capital requirements, as at 31 March 2021 an amount of USD 6.8 million (INR 496.0 million) is outstanding.

Total net property, plant & equipment (including capital work - in - progress and Intangible assets) stood at INR 1,545.8 million vs INR 1,162.3 million in the previous year. Assets that were capitalized during the year (net of disposals) totaled INR 351.7 million.

Supply Chain

As the Covid - 19 pandemic unfolded in FY 2020-21, food supply chains across the world and India had to adjust rapidly to demand-side shocks as well as supply side disruptions caused by labour shortage, lockdowns and unreliable logistics. On the demand side, your Company experienced a huge drop in food service demand resulting in inventory management issues like expiry threats, slow-moving/non-moving inventory, exposure to longer-term contracts. While on the RTH business, the demand went up because of panic buying resulting in shortage and other kinds of challenges. This coupled with lockdowns, migrant labor moving back to their villages, imbalance in global trade with container shortages and increased freight rates to increase was like a perfect storm for supply chain teams.

Our supply chain teams and supplier partners response to this unprecedented challenge was exemplary. Scenario based planning and recalibration our supply chain strategies to the address on-ground realities ensured that production lines were kept running while causing minimal financial risk to the

company. There are several learnings from FY 2020-21 which will help your Company to build an even more robust and resilient supply chain.

Quality

The Company's stated mission for quality is to "rise beyond certifications". Consequently, the Company's own Quality Management system is designed to ensure Excellence in Quality which spans our entire business defining quality requirement for design, procurement, manufacture, sales and distribution, and listening and responding to the voice of the consumer and customer. The Company is committed to manufacture high quality products, while ensuring highest standards in food safety, in full compliance with all legal and regulatory requirement in the markets in which our products are sold.

In keeping with industry requirements, the Company continues to be certified for the following certifications:

- ISO - 14001:2015 (Environmental Management Systems)
- ISO 45001 (Occupational Health and Safety)
- FSSC 22000 v5 (Global Standard for Food Safety System Certification)
- USDA Organic and India Organic
- Kosher
- Halal

The Company also adheres to the highest levels of compliance with CT - PAT (Customs Trade Partnership against Terrorism) standards, which gives the company an advantage for smooth exports to US, our most important market.

Human Resources

During the year under review, industrial relations of the Company continued to be cordial and peaceful. Total personnel employed by the Company are 265 as on 31 March 2021. Covid-19 caused tremendous level of fear, uncertainty and anxiety amongst everyone. Work from home became a new norm and employees had to juggle with home responsibilities in addition to office work. All this coupled with social isolation, disrupted work and family routine, economic instability meant negative impact on the mental health of many people. Given this uncertainty, your Company focused on several employee engagement activities during this period. Frequent calls to employees to check on their well-being, e-learning programs, stress buster activities and roll-out of new benefits and flexible work policies helped the Company ease the stress. Thanks to all these efforts, we were delighted that your Company was able to retain its "Great Place to Work - Certified (2020-2021)" certification

Management Discussion and Analysis (Contd.)

for building a High - Trust, High - Performance Culture™ for 7 years in continuation. Additionally, your Company was once again recognized as “**India’s Top 100 Best Places to Work for Women 2020**”. Great Place to Work® Institute assessed 852 Great Place to Work® Certified organizations through an objective and rigorous workplace culture assessment process to identify India’s Best Workplaces for Women 2020. Just 516 organizations met the eligibility criteria: 1) Women form at least 10% of the overall workforce in the organization & 2) at least 70% of women employees shared positive feedback in the Trust Index® survey conducted by Great Place to Work® and we are proud to be recognised amongst these best 100 organisation. The Company has also received a special honour for its: “**Commitment to Being a Great Place to Work**”.

Compliance, Finance, Accounts and Internal Financial Controls

Finance and accounting teams work with all the other functions to continually increase the intrinsic value of the business and institute strong and effective financial and management control systems in day to day operations.

The Company has a comprehensive ERP system to manage its operations and record its financial transactions. It has implemented additional system tools to manage stores, spares and consumables procurement that also ties in with the ERP system.

Your Company attaches significant importance on frequently testing internal control systems, risk assessment and management of operating risks. These risks are actively managed by the Management Committee through various committees and strong internal processes. This internal control structure also has considerable oversight and is monitored by an external set of auditors, both statutory and internal. Your Company’s internal controls are commensurate with the nature of the business and size and complexity of its operations.

Some significant aspects covered in the internal control framework includes:

- Standard Operating Procedures and Risk Control Matrix for all business processes to ensure effective internal financial controls;
- Oversight by an Audit Committee carried out by an experienced and qualified firm of Chartered Accountants;
- End to end integration of ERP system across supply chain, manufacturing and sales processes;
- Review and approval of annual operative and capital expenditure budget and monthly monitoring of actual spends;

- Regular review of key business risks such as new product development, foreign exchange management, commodity risk management, financial reporting;
- Legal framework w.r.t. compliances applicable to the Company. Company has implemented compliance tool in factory and head office;
- For overall supervision of controls, your Company has a Management Committee (MCom) to take key business decisions.

The statutory auditors have also issued a clean report on internal controls of the Company. The Audit Committee and Independent Directors have also provided satisfaction over internal controls of the Company.

Sustainability

The Company focuses on being a sustainable food manufacturer through conserving water (through installation of ‘in – ground rainwater harvesting’ system) and reducing its carbon footprint (through use of renewable energy). All of its steam generation is done using compacted agricultural waste (briquettes). The Company continues to focus on using renewable sources of electricity in financial year 2021, 16% of its energy requirement came from wind, 6% from solar and 0.5% from biogas. The biogas facility converts its organic waste into electricity and powers the effluent treatment plant, water treatment plant and the research center. Monitoring and conservation of power and water is inbuilt into company processes. It also uses simple techniques such as crop rotation, use of natural fertilizers and pest control methods and green composting in its organic farm. Moreover, several initiatives have been undertaken by the Company towards improvement of air, soil and water quality in its eco system.

Your Company continues to remain strongly committed towards building a sustainable supply and manufacturing chain. Several of the United Nations Sustainable Development Goals where the Company can directly contribute as part of its business model have been adopted. Some of these include Good Health, Quality Education, Gender Equality, Innovation & Infrastructure, Reduce Inequalities, Sustainable Cities and Communities, Clean Water and Sanitation, Renewable Energy, Economic Growth and Responsible Consumption.

Corporate Social Responsibility

As per Section 135 of the Companies Act, 2013, a company, meeting the applicability threshold, needs to spend at least 2% of the average profits for the immediately three preceding financial years on Corporate Social Responsibility (CSR) activities. For fiscal year 2020 - 21, the Company was required to spend INR 9.8 million on CSR.

Independent Auditors' Report

To the Members of
Tasty Bite Eatables Limited

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of Tasty Bite Eatables Limited ("the Company"), which comprise the balance sheet as at 31 March 2021, and the statement of profit and loss (including other comprehensive income), statement of changes in equity and statement of cash flows for the year then ended, and notes to the financial statements, including a summary of the significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements give the information required by the Companies Act, 2013 ("Act") in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at 31 March 2021, and profit and other comprehensive income, changes in equity and its cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Act.

Our responsibilities under those SAs are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion on the financial statements.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

The key audit matter

Provision for inventory obsolescence

As at 31 March 2021, the Company held INR 692.79 million of inventories net of provision for inventory obsolescence of INR 30.50 million. Given the size of the inventory balance relative to the total assets of the Company and considering the estimates and judgments described below, the valuation of inventory and provision for inventory obsolescence required significant audit attention.

As disclosed in Note 3.5 and Note 10, inventories are held at the lower of cost (determined using the weighted average cost method) and net realizable value. At each reporting period, the valuation of inventory is reviewed by management for provisioning. This assessment is of higher significance and involves increased estimation uncertainty in the current period considering the possible impact of the ongoing Covid-19 pandemic on the Company's business.

How the matter was addressed in our audit

We have performed the following procedures over valuation of inventory and provision for inventory obsolescence:

- We obtained an understanding, tested the design, implementation and operating effectiveness of controls surrounding the inventory valuation process;
- We performed testing on the Company's controls over the inventory cycle count process. In testing these controls, we observed the inventory cycle count process at selected locations on a sample basis, inspected the results of the inventory cycle count and assessed whether the variances were accounted for and approved by management;
- For a sample of inventory items, we also re-performed the weighted average cost calculation and compared the weighted average cost to the net realizable value;

Independent Auditors' Report (Contd.)

The key audit matter

The determination of whether inventory will be realized for a value less than cost requires management to exercise judgment and apply assumptions. Management undertakes the following procedures for determining the level of write down required:

- Performs periodic cycle counts to assess whether specific write down is required for obsolete inventory / shortages;
- Uses inventory ageing reports together with historical trends to estimate the likely future saleability / usability of slow moving and older inventory items;
- For inventory aged greater than one year or items due for expiry in the near future, management applies a percentage-based provision to inventory. The percentages are derived from historical levels of write down and forward-looking estimates based on assessment of expected utilization of production capacity considering the current market conditions;
- Management performs a line-by-line analysis of remaining inventory to ensure it is stated at lower of cost and net realizable value and a specific write down is recognized if management determines that the stock exceeds future requirements; and
- Management has also performed an analysis of the possible impact of the Covid-19 pandemic on offtake plans of its key customers and the consequent requirement to establish provisions for certain inventory items due to either possible obsolescence or reduction in net realizable value.

How the matter was addressed in our audit

- We tested the ageing reports used by management for correctness of ageing;
- We challenged the reasonableness of the assumptions used by the management relating to expected utilization of production capacity in the near future. We also challenged Management's analysis of the possible impact of the Covid-19 pandemic on offtake plans of the Company's customers and Management's conclusions regarding the impact on the carrying values of specific inventory items; and
- We performed retrospective reviews of provisions made historically to assess the reasonableness of provisions made during the year.

Other Information

The Company's management and Board of Directors are responsible for the other information. The other information comprises the information included in the Company's annual report, but does not include the financial statements and our auditors' report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Management's and Board of Directors' Responsibility for the Financial Statements

The Company's Management and Board of Directors are responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these financial statements that give a true and fair view of the state of affairs, profit /loss and other comprehensive income, changes in equity and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards (Ind AS) specified under section 133 of the Act. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

Independent Auditors' Report (Contd.)

In preparing the financial statements, the Management and Board of Directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors is also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3) (i) of the Act, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls with reference to financial statements in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures in the financial statements made by the Management and Board of Directors.
- Conclude on the appropriateness of the Management and Board of Directors use of the going concern basis of accounting and, based on the audit evidence obtained,

whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

1. As required by the Companies (Auditors' Report) Order, 2016 ("the Order") issued by the Central Government in terms of section 143 (11) of the Act, we give in the "Annexure A" a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.
2. (A) As required by Section 143(3) of the Act, we report that:
 - a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.

Independent Auditors' Report (Contd.)

Annexure A

to the Independent Auditors' report on the financial statements of Tasty Bite Eatables Limited for the year ended 31 March 2021

With reference to the Annexure referred to in paragraph 1 in Report on Other Legal and Regulatory Requirements of the Independent Auditor's Report to the Members of the Company on the Ind AS financial statements for the year ended 31 March 2021, we report that:

- (i) (a) The Company has maintained proper records showing full particulars, including quantitative details and situation of fixed assets.

- (b) The Company has a regular program of physical verification of its fixed assets by which its fixed assets are verified once every year. In our opinion, this periodicity of physical verification is reasonable having regard to the size of the Company and the nature of its fixed assets. The discrepancies noticed on such verification between the physical count and the book records were not material and have been properly dealt with in the books of account.

- (c) According to the information and explanations given to us and on the basis of examination of the records of the Company, the title deeds of the immovable properties are held in the name of the Company, except for the following:

Sr. No.	Type of Asset	Gross block as on 31 March 2021	Net block as on 31 March 2021	Remarks
1	Freehold land – Gut No. 503	INR 0.03 million	INR 0.03 million	The Company has filed a legal suit alleging illegal occupation of the land owned by the Company.

- (ii) The inventory, except goods in transit, has been physically verified by management during the year. The discrepancies noticed on such verification between the physical stock and the book records were not material and have been properly dealt with in the books of account. In our opinion, the frequency of such verification is reasonable and adequate in relation to the size of the Company and the nature of its business. In respect of stocks lying with third parties at the year end, written confirmations from major parties have been obtained.

- (iii) The Company has not granted any loans, secured or unsecured, to companies, firms, Limited Liability Partnerships or other parties covered in the register maintained under section 189 of the Act. Accordingly, paragraph 3(iii) of the Order is not applicable.

- (iv) According to the information and explanations given to us, the Company has not granted any loans or provided any guarantees or security to the parties covered under Section 185 of the Act. The Company has complied with the provisions of Section 186 of the Act in respect of investments made or loans or guarantee or security provided to the parties covered under Section 186.

- (v) In our opinion, and according to the information and explanations given to us, the Company has not accepted any deposits as mentioned in the directives issued by Reserve Bank of India and the provisions of Section 73 to 76 or any other relevant provisions of the Act and the rules framed thereunder. Accordingly, paragraph 3(v) of the Order is not applicable.

- (vi) In our opinion and according to the information and explanations given to us, maintenance of cost records under section 148 of the Act is not applicable to the Company under the Companies (Cost Record and Audit) Rules, 2014.

- (vii) (a) According to the information and explanations given to us and on the basis of our examination of the records of the Company, amounts deducted / accrued in the books of account in respect of undisputed statutory dues including provident fund, employees state insurance, income-tax, goods and services tax, professional tax, tax deducted at source, duty of customs and other material statutory dues have generally been regularly deposited by the Company with the appropriate authorities. As explained to us, the Company did not have any dues on account of duty of excise, value added tax, sales tax, service tax, and cess.

According to the information and explanations given to us, no undisputed amounts payable in respect of Provident Fund, Employees' State Insurance, Income-tax, Goods and Services Tax, Duty of Customs, cess and any other statutory dues were in arrears as at 31 March 2021, for a period of more than six months from the date they became payable.

- (b) According to the information and explanations given to us, there are no dues of Income tax, Sales-Tax, Service tax, Goods and Services Tax, Duty of Customs which have not been deposited by the Company on account of disputes, except as disclosed in Enclosure 1 to this Annexure.

- (viii) According to the information and explanations given to us, the Company has not defaulted in repayment of dues to its bankers. Further, the Company has not taken any loan or borrowings from any financial institutions or government and have not issued any debentures during the year.

- (ix) According to the information and explanations given to us, the term loans taken by the Company have been applied for the purpose for which they were taken. The Company has not raised money by way of further public offer (including debt instruments) during the year.

Annexure B

to the Independent Auditors' report on the financial statements of Tasty Bite Eatables Limited for the year ended 31 March 2021

Report on the internal financial controls with reference to the aforesaid financial statements under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013

(Referred to in paragraph 2(f) under 'Report on Other Legal and Regulatory Requirements' section of our report of even date)

Opinion

We have audited the internal financial controls with reference to financial statements of Tasty Bite Eatables Limited ("the Company") as of 31 March 2021 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

In our opinion, the Company has, in all material respects, adequate internal financial controls with reference to financial statements and such internal financial controls were operating effectively as at 31 March 2021, based on the internal financial controls with reference to financial statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India (the "Guidance Note").

Management's Responsibility for Internal Financial Controls

The Company's management and the Board of Directors are responsible for establishing and maintaining internal financial controls based on the internal financial controls with reference to financial statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013 (hereinafter referred to as "the Act").

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls with reference to financial statements based on our audit. We conducted our audit in accordance with the Guidance Note and the Standards on Auditing, prescribed

under section 143(10) of the Act, to the extent applicable to an audit of internal financial controls with reference to financial statements. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to financial statements were established and maintained and whether such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls with reference to financial statements and their operating effectiveness. Our audit of internal financial controls with reference to financial statements included obtaining an understanding of such internal financial controls, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls with reference to financial statements.

Meaning of Internal Financial controls with Reference to Financial Statements

A company's internal financial controls with reference to financial statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial controls with reference to financial statements include those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Annexure B

to the Independent Auditors' report on the financial statements of Tasty Bite Eatables Limited for the year ended 31 March 2021. (Contd.)

Inherent Limitations of Internal Financial controls with Reference to Financial Statements

Because of the inherent limitations of internal financial controls with reference to financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to financial statements to future periods are subject to the risk that the internal financial controls with reference to financial statements may become

inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Notes to the Financial Statements

for the year ended 31 March 2021

1. Background

Tasty Bite Eatables Limited ('the Company') is a company domiciled in India with its registered office situated at Shivajinagar, Pune and its manufacturing facility near Pune. The Company has been incorporated under the provisions of Indian Companies Act and its equity shares are listed on the Bombay Stock Exchange Limited and the National Stock Exchange Limited. The Company is in the business of manufacturing and selling 'Prepared Foods'.

2. Basis of preparation

2.1 Statement of compliance

These financial statements have been prepared in accordance with Indian Accounting Standards (Ind AS) as per the Companies (Indian Accounting Standards) Rules, 2015 notified under Section 133 of Companies Act, 2013, (the 'Act') and other relevant provisions of the Act.

Details of the Company's significant accounting policies are included in Note 3.

The financial statements of the Company for the year ended 31 March 2021 were authorized for issue by the Company's Board of Directors on 15 May 2021.

2.2 Functional and presentation currency

These financial statements are presented in Indian Rupees (INR), which is also the Company's functional currency. All amounts have been rounded-off to the nearest million (except per share data) to two decimals, unless otherwise indicated.

Transactions and balances with values below the rounding off norm adopted by the Company have been reflected as "0" in the relevant notes to these financial statements.

2.3 Basis of measurement

The financial statements have been prepared on the historical cost basis except for the following items:

Items	Measurement basis
Certain financial assets and liabilities (including derivative instruments)	Fair value
Net defined benefit (asset) / liability	Fair Value of plan assets less present value of defined benefit obligations

2.4 Use of estimates and judgements

In preparing these financial statements, management has made judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized prospectively.

Judgements, Assumptions and estimation uncertainties

Information about judgements made in applying accounting policies, assumptions and estimation uncertainties that have the most significant effects on the amounts recognized / significant risk resulting in a material adjustment in the financial statements is included in the following notes:

Note 3.3 – Estimation of useful life used by the management for property, plant and equipment and intangible asset

Note 3.5 and 10 – Estimation of provisions for expired, near expiry and slow-moving inventories

Note 44 – Measurement of defined benefit obligations: key actuarial assumptions

Note 35 – Recognition and measurement of provisions and contingencies: key assumptions about the likelihood and magnitude of an outflow of resources

Note 38 – Lease accounting and assessment of incremental borrowing rate

Note 34 – Estimation of current tax expense and tax payable

Note 34 – Recognition of deferred tax asset

Note 11 – Impairment of Trade Receivables

2.5 Measurement of fair values

A number of accounting policies and disclosures require the measurement of fair values, for both financial and non-financial assets and liabilities.

The Company has an established control framework with respect to measurement of fair values. The Company's board of directors has overall responsibility for the establishment and oversight of the Company's risk management framework.

Notes to the Financial Statements

for the year ended 31 March 2021 (Contd.)

The established framework is reviewed and monitored by the Chief financial officer, which includes the responsibility for reviewing and monitoring all significant fair value measurements, including level 3 fair values. Chief financial officer regularly reviews significant unobservable inputs and valuation adjustments.

Significant valuation issues are reported to the Company's Board of Directors.

Fair values are categorized into different levels in a Fair value hierarchy based on inputs used in the valuation techniques as follows.

Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: inputs other than quoted prices included in level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

When measuring the fair value of an asset or liability, the Company uses observable market data as far as possible. If the inputs used to measure fair value of asset or liability fall into different levels of fair value hierarchy, then the fair value measurement is categorized in its entirety in the same level of fair value hierarchy as the lowest level input that is significant to the entire measurement.

The Company recognizes transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

Further information about the assumptions made in measuring fair values is included in following notes:

Note 47 – Financial Instruments – Fair Value

2.6 Current-non-current classification

The Company presents assets and liabilities in the balance sheet based on current / non – current classification.

Assets

An asset is classified as current when it satisfies any of the following criteria:

- a) it is expected to be realized in, or is intended for sale or consumption in, the Company's normal operating cycle;

- b) it is held primarily for the purpose of being traded;
- c) it is expected to be realized within 12 months after the reporting date; or
- d) it is cash or cash equivalent unless it is restricted from being exchanged or used to settle a liability for at least 12 months after the reporting date.

Current assets include current portion of non-current financial assets. All other assets are classified as non-current.

Liabilities

A liability is classified as current when it satisfies any of the following criteria:

- a) it is expected to be settled in the Company's normal operating cycle;
- b) it is held primarily for the purpose of being traded;
- c) it is expected to be settled within 12 months after the reporting date; or
- d) The Company does not have an unconditional right to defer settlement of the liability for at least 12 months after the reporting date. Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

Current liabilities include current portion of non-current financial liabilities. All other liabilities are classified as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

Operating cycle

Operating cycle is the time between the acquisition of assets for processing and their realisation in cash or cash equivalents. The operating cycle of the Company is less than 12 months.

2.7 Impact of Covid – 19

"The Company has considered internal and external sources of information as of the date of approval of the financial results in determining the possible impact, if any, of the resurgence of the Covid-19 pandemic on the carrying amounts of its trade receivables, inventories, financial and non-financial assets. The Company has used the principle of prudence in applying judgements and making estimates. Based on this evaluation, the Company does not expect any material impact on its financial results."

Notes to the Financial Statements

for the year ended 31 March 2021 (Contd.)

3. Significant accounting policies

3.1 Foreign Currency transaction

Transaction in foreign currencies are translated into the functional currency of the Company at the exchange rate on the date of the transaction or an average rate if the average rate approximates the actual rate at the date of the transaction.

Monetary assets and liabilities denominated in foreign currencies are translated into the functional currency at the exchange rate at the reporting date. Non-monetary assets and liabilities that are measured based on historical cost in a foreign currency are translated at the exchange rate at the date of transaction.

Exchange difference are recognised in profit and loss, except exchanges differences arising from the translation of the qualifying cash flow hedges to the extent the hedges are effective, which are recognized in Other Comprehensive Income (OCI).

3.2 Financial Instruments

i. Recognition and initial measurement

Trade receivables are initially recognised when they are originated. All other financial assets and financial liabilities are initially recognised when the Company becomes a party to the contractual provisions of the instrument.

A financial asset or financial liability is initially measured at fair value plus, for an item not at fair value through profit and loss (FVTPL), transaction costs that are directly attributable to its acquisition or issue.

ii. Classification and subsequent measurement

Financial assets

On initial recognition, a financial asset is classified as measured at

- Amortised cost;
- Fair value through profit and loss (FVTPL)

Financial assets are not reclassified subsequent to their initial recognition, except if and in the period the Company changes its business model for managing financial assets.

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- The asset is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

All financial assets (except for derivative contract assets) not measured at amortised cost as described above are measured at FVTPL. On initial recognition, the Company may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

Financial assets: Assessment whether contractual cash flows are solely payments of principal and interest

For the purpose of this assessment, 'principal' is defined as the fair value of financial asset on initial recognition. 'Interest' is defined as consideration for time value of money and for credit risk associated with the principal amount outstanding during a particular period of time and other basic leading risks and costs (e.g. liquidity risk and administrative costs), as well as profit margin.

In assessing whether the contractual cash flows are solely payments of principal and interest, the Company considers contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making this assessment, the Company considers:

- contingent events that would change the amount and timing of cash flows;
- term that would adjust the contractual rate, including variable interest rate features;
- prepayment and extension features; and
- term that limits the Company's claim to cash flows for specified assets (e.g. non - recourse features).

A prepayment feature is consistent with the solely payments of principal and interest criterion if the prepayment amount substantially

Notes to the Financial Statements

for the year ended 31 March 2021 (Contd.)

represents unpaid amount of principal and interest on principal amount outstanding, which may include reasonable additional compensation for early termination of contract. Additionally, for a financial asset acquired on a significant premium or discount to its contractual par amount, a feature that permits or require prepayment at an amount that substantially represents the contractual par amount plus accrued (but unpaid) contractual interest (which may also include reasonable additional compensation for early termination) is treated as consistent with this criterion if the fair value of the prepayment feature is significant at initial recognition.

Financial assets: Subsequent measurement gains and losses

Financial assets at FVTPL	These assets are subsequently measured at fair value. Net gains and losses, including any interest or dividend income, are recognised in profit or loss. However, refer note 48 and 49 for derivatives designated as hedging instruments.
Financial assets at amortised cost	These assets are subsequently measured at amortised cost using the effective interest method. The amortised cost is reduced by impairment losses. Interest income, foreign exchange gains and losses and impairment are recognised in profit or loss. Any gain or loss on derecognition is recognised in profit or loss.

Financial liabilities: Classification, subsequent measurement and gains and losses

Financial liabilities are classified as measured at amortised cost or FVTPL. A financial liability is classified as at FVTPL if it is classified as held – for – trading or it is designated as such on initial recognition. Financial liabilities at FVTPL are measured at fair value and net gains and losses, including any interest expense, are recognised in profit or loss. Other financial liabilities are subsequently measured at amortised cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognised in profit or loss. Any gain or loss on derecognition is also recognised in profit or loss. Refer note 47 and 48 for financial liabilities designated as hedging instrument.

iii. Derecognition

Financial assets

The Company derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Company neither transfers nor retains substantially all of the risks and rewards of ownership and does not retain control of the financial asset.

If the Company enters into transactions whereby it transfers assets recognised on its balance sheet but retains either all or substantially all of the risks and rewards of the transferred assets, the transferred assets are not derecognised.

Financial liabilities

The Company derecognises a financial liability when its contractual obligations are discharged or cancelled or expire.

The Company also derecognises a financial liability when its terms are modified and the cash flows under the modified terms are substantially different. In this case, a new financial liability based on the modified terms is recognised at fair value. The difference between the carrying amount of the financial liability extinguished and the new financial liability with modified terms is recognised in profit or loss.

iv. Offsetting

Financial assets and financial liabilities are offset and the net amount is presented in the balance sheet when, and only when, the Company currently has a legally enforceable right to set off the amounts and it intends either to settle them on a net basis or to realize the asset and settle the liability simultaneously.

v. Derivative financial instrument and hedge accounting

The Company holds derivative financial instruments to hedge its foreign currency and interest rate risk exposures.

Derivatives are initially measured at fair value. Subsequent to initial recognition, derivatives are measured at fair value, and changes therein are generally recognized in profit or loss.

The Company designates certain derivatives as hedging instruments to hedge the variability

Notes to the Financial Statements

for the year ended 31 March 2021 (Contd.)

in cash flows associated with highly probable forecast transactions arising from changes in foreign exchange rates and interest rates.

At inception of designated hedge relationships, the Company documents the risk management objective and strategy for undertaking the hedge. The Company also documents the economic relationship between the hedged item and the hedging instrument are expected to offset each other.

Cash flow hedges

When a derivative is designated as a cash flow hedging instrument, the effective portion of changes in the fair value of the derivative is recognized in OCI and accumulated in other equity under 'effective portion of cash flow hedges'. The effective portion of changes in the fair value of the derivative that is recognized in OCI is limited to the cumulative change in fair value of the hedge item, determined on a present value basis, from inception of the hedge. Any ineffective portion of changes in the fair value of the derivative is recognized immediately in profit or loss.

When the hedged forecast transaction subsequently results in the recognition of a non-financial item such as inventory, the amount accumulated in other equity is included directly in the initial cost of the non-financial item when it is recognised. For all other hedged forecasted transaction, the amount accumulated in other equity is reclassified to profit or loss in the same period or periods during which the hedged expected future cash flows affect profit or loss.

If a hedge no longer meets the criteria for hedge accounting or the hedge instrument is sold, expires, is terminated or is exercised, then hedge accounting is discontinued prospectively. When hedge accounting for cash flow hedges is discontinued, the amount that has been accumulated in other equity remains there until, for a hedge of a transaction resulting in recognition of a non-financial item, it is included in the non-financial item's cost on its initial recognition or, for other cash flow hedges, it is reclassified to profit or loss in the same period or periods as the hedge expected future cash flow affect profit or loss.

If the hedge future cash flow is not expected to occur, then the amounts that have been accumulated in other equity are immediately reclassified to profit or loss.

3.3 Property, Plant and Equipment

i. Recognition and measurement

Items of property, plant and equipment are measured at cost, which includes capitalised borrowing costs, less accumulated depreciation and accumulated impairment losses, if any.

Cost of an item of property, plant and equipment comprises its purchase price, including import duties and non-refundable purchase taxes, after deducting trade discounts and rebates, any directly attributable cost of bringing the item to its working condition for its intended use and estimated costs of dismantling and removing the item and restoring the site on which it is located. Machinery spares that meet the definition of PPE are capitalised and depreciated over the useful life of the principal item of an asset. All other repair and maintenance costs, including regular servicing, are recognised in the Statement of Profit and Loss as incurred. When a replacement occurs, the carrying value of the replaced part is de-recognised.

If significant parts of an item of property, plant and equipment have different useful lives, then they are accounted for as separate items (major components) of property, plant and equipment.

Any gain or loss on disposal of an item of property, plant and equipment is recognised in profit or loss.

ii. Subsequent expenditure

Subsequent expenditure is capitalized only if it is probable that the future economic benefits associated with the expenditure will flow to the Company.

iii. Depreciation

Depreciation is calculated on cost of items of property, plant and equipment less their estimated residual values over their estimated useful lives using the straight-line method and is recognized in the statement of profit and loss.

Notes to the Financial Statements

for the year ended 31 March 2021 (Contd.)

The estimated useful lives of item of property, plant and equipment for the current and comparative periods are as follows:

Category of asset	Useful life followed (in years)	Useful life as per Schedule II (in years)
Factory Building	30	30
Electrical installations	10	10
Plant and equipment	15	15
-Form Plate	2	15
Office equipment	5	5
Furniture & Fixtures	10	10
Vehicle	10	10
Computers	3	3
-Server	6	6
-Printer	5	3
Lab Equipment	10	10

Depreciation method, useful lives and residual values are reviewed at each financial year-end and adjusted if appropriate. Based on technical evaluation and consequent advice, the management believes that its estimates of useful lives as given above best represents the period over which the management expects to use these assets.

Assets installed on leasehold premises are depreciated over the period of lease. Freehold land is not depreciated.

Depreciation on additions (disposals) during the year is provided on a pro-rata basis i.e. from (up to) the date on which asset is ready for use (disposed of).

Capital work-in-progress (CWIP) Projects under commissioning and other CWIP are carried at cost, comprising direct cost, related incidental expenses and attributable borrowing cost. Capital advances given to acquire property, plant and equipment are recorded as non-current assets and subsequently transferred to CWIP on acquisition of related assets.

3.4 Intangible assets

Intangible assets are initially measured at cost. Such intangible assets are subsequently measured at cost less accumulated amortization and any accumulated impairment losses. Subsequent expenditure is capitalized only when it increases the future economic benefits embodied in the specific asset to which it

relates. All other expenditure is recognised in profit or loss as incurred.

Amortization is calculated to write off the cost of intangible assets less their estimated residual value over their estimated useful lives using straight line method and is included in depreciation and amortization in Statement of Profit and Loss.

The estimated useful lives are as follows:

Assets	Estimated useful life
Computer Software	5 Years

Amortisation method, useful lives and residual values are reviewed at the end of each financial year and adjusted if appropriate.

3.5 Inventories

The cost of inventory is based on weighted average formula, and includes expenditure incurred in acquiring the inventories, production or conversion cost and other costs incurred in bringing them to their present location and condition. In case of manufactured inventory and work-in-progress, cost includes an appropriate share of overheads (both fixed and variable). Fixed overheads are included in cost of manufactured inventory based on normal operating capacity.

Net realizable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and selling expense. The net realizable value of work – in – progress is determined with reference to the selling price of related finished products. The comparison of cost and net realizable value is made on an item-by-item basis.

Raw materials, components and other supplies held for use in production of finished products are not written down below cost except in cases where material prices have declined and it is estimated that the cost of finished products will exceed their net realizable value.

3.6 Impairment of financial instruments

The Company recognizes loss allowances for expected credit losses on financial assets measured at amortised cost. At each reporting date, the Company assesses whether financial assets carried at amortized cost are credit impaired. A financial asset is 'credit- impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

Notes to the Financial Statements

for the year ended 31 March 2021 (Contd.)

Evidence that a financial asset is credit - impaired includes the following observable data:

- significant financial difficulty of the customer or issuer;
- a breach of contract such as a default or being past due for 180 days or more;
- the restructuring of a loan or advance by the Company on terms that the Company would not consider otherwise;
- it is probable that the customer will enter bankruptcy or other financial reorganization; or
- the disappearance of an active market for a security because of financial difficulties.

Measurement of expected credit loss

The Company measures loss allowances at an amount equal to lifetime expected credit losses. Loss allowances for trade receivables are always measured at an amount equal to lifetime expected credit losses. Lifetime expected credit losses are the expected credit losses that result from all possible default events over the expected life of a financial instrument. The maximum period considered when estimating expected credit losses is the maximum contractual period over which the Company is exposed to credit risk.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating expected credit losses, the Company considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Company's historical experience and informed credit assessment and including forward - looking information.

The Company assumes that the credit risk on a financial asset has increased significantly if it is more than 90 days past due.

The Company considers a financial asset to be in default when:

- the customer is unlikely to pay its credit obligations to the Company in full, without recourse by the Company to actions such as realizing security (if any is held); and
- the financial asset is 180 days or more past due.

Expected credit losses are a probability-weighted estimate of credit losses. Credit losses are measured

as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the Company in accordance with the contract and the cash flows that the Company expects to receive). Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of the assets.

The gross carrying amount of a financial asset is written off (either partially or in full) to the extent that there is no realistic prospect of recovery. This is generally the case when the Company determines that the debtor does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write - off. However, financial assets that are written off could still be subject to enforcement activities in order to comply with the Company's procedures for recovery of amounts due.

3.7 Impairment of non-financial assets

Intangible assets that have an indefinite useful life and not subject to amortization are tested annually for impairment, or more frequently if events or changes in circumstances indicate that they might be impaired. Other non-financial assets are tested for impairment whenever events or changes in circumstances indicate that the carrying amount might not be recoverable. An impairment loss is recognized for the amount by which the assets carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash-flows are discounted to their present value using a pre-tax discount rate that reflects current market assessment of the time value of money and the risk specific to the asset. In determining fair value less cost of disposal, recent market transactions are taken in account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share price for publicly traded entities or other available fair value indicators. For the purpose of assessing impairment, assets are grouped at the lowest levels for which they are separately identifiable cash inflows for which are largely independent of the cash inflows from other assets or group of assets (cash-generating units). A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the assets' recoverable amount, since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the Statement of Profit and Loss.

Notes to the Financial Statements

for the year ended 31 March 2021 (Contd.)

3.8 Employee benefits

i. Short-term employee benefits

Short term employee benefit obligations are measured on an undiscounted basis and are expensed as the related service is provided. A liability is recognised for the amount expected to be paid, if the Company has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee, and the amount of obligation can be estimated reliably.

ii. Defined contribution plans

A defined contribution plan is a post-employment benefit plan under which an entity pays fixed contributions into a separate entity and will have no legal or constructive obligation to pay further amounts. The Company makes specified monthly contributions towards Government administered provident fund scheme. Obligations for contributions to defined contribution plans are recognised as an employee benefit expense in profit or loss in the periods during which the related services are rendered by employees.

Prepaid contributions are recognised as an asset to the extent that a cash refund or a reduction in future payments is available.

iii. Defined benefit plans

A defined benefit plan is a post-employment benefit plan other than a defined contribution plan. The Company's net obligation in respect of defined benefit plans is calculated separately for each plan by estimating the amount of future benefit that employees have earned in the current and prior periods, discounting that amount and deducting the fair value of any plan assets.

The calculation of defined benefit obligations is performed annually by a qualified independent actuary using the projected unit credit method. When the calculation results in a potential asset for the Company, the recognised asset is limited to the present value of economic benefit available in the form of any future refunds from the plan or reductions in future contributions to the plan ('the asset ceiling'). In order to calculate the present value of economic benefits, consideration is given to any minimum funding requirements.

Remeasurements of the net defined benefit liability, which comprise actuarial gains and losses, the return on plan assets (excluding interest) and the effect of the asset ceiling (if any, excluding

interest), are recognised in OCI. The Company determines the net interest expense (income) on the net defined benefit liability (asset), taking into account any changes in the net defined benefit liability (asset) during the period as a result of contributions and benefit payments. Net interest expense and other expenses related to defined benefit plans are recognised in profit or loss.

When the benefits of the plan are changed or when plan is curtailed, the resulting change in benefit that relates to past service ('past service cost' or 'past service gain') or the gain or loss on curtailment is recognised immediately in profit or loss. The Company recognizes gain and losses on the settlement of a defined benefit plan when the settlement occurs.

iv. Other long-term employee benefits

The Company's net obligation in respect of other long-term employee benefits (compensated absences) is the amount of future benefit that employees have earned in return for their service in the current and prior periods, that benefit is discounted to determine its present value, and the fair value of any related assets is deducted. The obligation is measured on the basis of an annual independent actuarial valuation using the Projected Unit Credit method. Remeasurements gains or losses are recognised in profit or loss in the period in which they arise.

v. Employee Shared based payment

Specified employees of the Company were eligible for equity settled stock options under Preferred Brand Inc.'s ('PBI Inc.' or the Holding Company's) 2009 Non-Qualified Stock Option and Equity Plan ('the Equity Plan'). However, during the year 2015 a value pool agreement was entered into, by and between PBI Inc., the Company and the holders of outstanding options ('Holders'), wherein PBI Inc. and the Holders agreed to cancel the Options and terminate the Grant Agreements in exchange for a consideration payable by PBI Inc. in lieu of such cancellation of unvested options to the employees of the Company.

In accordance with Ind-AS 102, the classification of the share-based payment transaction depends on the nature of the award granted and whether the entity has an obligation to settle the transaction and if the entity has either an obligation to settle in its own equity instruments or no obligation to settle at all, then the transaction is accounted as Equity Settled. Since, the Company does not have any obligation to reimburse corresponding cost

Notes to the Financial Statements

for the year ended 31 March 2021 (Contd.)

of share-based payment transaction to PBI Inc., it has classified the settlement as Equity Settled.

Since the amount of cash payment is pre-determined by the Holding Company based on the Value Pool agreement and the employees covered were specifically mentioned in the said agreement, the Company is of the view that the share based payment shall be measured at such amount agreed since the Company does not have any separate obligation towards the settlement.

3.9 Revenue

i. Sale of goods

The Company has applied Ind AS 115: Revenue from Contracts with Customers which establishes a comprehensive framework for determining whether, how much and when revenue is to be recognised.

Revenue from sale of goods is recognised when control of the products being sold is transferred to the customer and when there are no longer any unfulfilled obligations. The performance obligations in customer contracts are fulfilled at the time of dispatch, delivery or upon formal customer acceptance depending on customer terms. Revenue is measured at fair value of the consideration received or receivable, after deduction of any discounts or rebates and any taxes or duties collected on behalf of the government such as goods and services tax. Accumulated experience is used to estimate the provision for such discounts and rebates. Due to the short nature of credit period given to customers, there is no financing component in the contract. Revenue is only recognised to the extent that it is highly probable a significant reversal will not occur. Customers do not have a contractual right to return goods.

ii. Export incentive

Export incentives are recognised when the right to receive credit as per the terms of incentives is established in respect of the exports made and when there is no significant uncertainty regarding the ultimate collection of the relevant export proceeds. Under Ind AS 115, income from export incentive schemes is presented as Other non-operating income as the same is not receivable from customers.

3.10 Recognition of interest income or expense:

Interest income is recognised using effective interest method. The 'effective interest rate' is the rate that exactly discounts estimated future cash payments

or receipts through the expected life of financial instrument to:

- The gross carrying amount of the financial assets; or
- The amortised cost of the financial liability.

In calculating interest income and expense, the effective interest rate is applied to the gross carrying amount of the assets (when asset is not credit – impaired) or to the amortised cost of the liability. However, for financial asset that have become credit – impaired subsequent to initial recognition, interest income is calculated by applying the effective interest rate to the amortised cost of financial asset.

3.11 Leases

A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

IND AS 116

The Ministry of Corporate Affairs ("MCA") through Companies (Indian Accounting Standards) Amendment Rules, 2019 and Companies (Indian Accounting Standards) Second Amendment Rules, had notified Ind AS 116 - Leases which replaced the erstwhile standard and its interpretations. Ind AS 116 had outlined the principles for the recognition, measurement, presentation and disclosure of leases for both lessees and lessors thereby introducing a single, on-balance sheet lease accounting model for lessees.

The Company has adopted Ind AS 116-Leases effective 1 April 2019, using the modified retrospective method.

The Company's lease asset classes primarily consist of leases for Buildings. The Company assesses whether a contract is or contains a lease, at inception of a contract. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Company assesses whether:

- the contract involves the use of an identified asset;
- the Company has substantially all of the economic benefits from use of the asset through the period of the lease; and
- the Company has the right to direct the use of the asset.

Notes to the Financial Statements

for the year ended 31 March 2021 (Contd.)

At the date of commencement of the lease, the Company recognises a right-of-use asset ("ROU") and a corresponding lease liability for all lease arrangements in which it is a lessee, except for leases with a term of twelve months or less (short-term leases) and leases of low value assets. For these short-term and leases of low value assets, the Company recognises the lease payments as an operating expense on a straight-line basis over the term of the lease.

The right-of-use assets are initially recognised at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or prior to the commencement date of the lease plus any initial direct costs less any lease incentives. They are subsequently measured at cost less accumulated depreciation and impairment losses, if any. Right-of-use assets are depreciated from the commencement date on a straight-line basis over the shorter of the lease term and useful life of the underlying asset.

The lease liability is initially measured at the present value of the future lease payments. The lease payments are discounted using the interest rate implicit in the lease or, if not readily determinable, using the incremental borrowing rates. The lease liability is subsequently remeasured by increasing the carrying amount to reflect interest on the lease liability, reducing the carrying amount to reflect the lease payments made.

A lease liability is remeasured upon the occurrence of certain events such as a change in the lease term or a change in an index or rate used to determine lease payments. The remeasurement normally also adjusts the leased assets

Lease liability and ROU asset have been separately presented in the Balance Sheet and lease payments have been classified as financing cash flows.

Please refer Note 6B for details of the right-of-use asset held by the Company.

3.12 Income tax

Income tax comprises current and deferred tax. It is recognised in the Statement of Profit and Loss except to the extent that it relates to an item recognized directly in equity or in other comprehensive income.

Current tax comprises the expected tax payable or receivable on the taxable income or loss for the year and any adjustment to the tax payable or receivable in respect of previous years. The amount of current tax reflects the best estimate of the tax amount expected to be paid or received after considering the uncertainty, if any, related to income taxes. It is

measured using tax rates (and tax laws) enacted or substantively enacted by the reporting date.

Current tax assets and current tax liabilities are offset only if there is a legally enforceable right to set off the recognised amounts, and it is intended to realize the asset and settle the liability on a net basis or simultaneously.

Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. Deferred tax is also recognised in respect of carried forward tax losses and tax credits only to the extent that it has sufficient taxable temporary differences or there is convincing other evidence that sufficient taxable profit will be available against which such deferred tax asset can be realized. Deferred tax assets - unrecognized or recognized, are reviewed at each reporting date and are recognised/ reduced to the extent that it is probable/ no longer probable respectively that the related tax benefit will be realized.

Deferred tax is measured at the tax rates that are expected to apply to the period when the asset is realized or the liability is settled, based on the laws that have been enacted or substantively enacted by the reporting date. The measurement of deferred tax reflects the tax consequences that would follow from the manner in which the Company expects, at the reporting date, to recover or settle the carrying amount of its assets and liabilities.

3.13 Provisions and contingencies

A provision is recognised if, as a result of a past event, the Company has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows (representing the best estimate of the expenditure required to settle the present obligation at the balance sheet date) at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The unwinding of the discount is recognised as finance cost. Expected future operating losses are not provided for.

Contingencies

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company or a present obligation that is not recognized because it is not probable that an outflow of economic

Notes to the Financial Statements

for the year ended 31 March 2021 (Contd.)

resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognized because it cannot be measured reliably. The Company does not recognize a contingent liability but discloses its existence in the financial statements. A contingent asset is not recognized unless it becomes virtually certain that an inflow of economic benefits will arise. When an inflow of economic benefits is probable, contingent assets are disclosed in the financial statements. Contingent liabilities and contingent assets are reviewed at each balance sheet date.

3.14 Borrowing cost

Borrowing costs are interest and other costs (including exchange differences relating to foreign currency borrowings to the extent that they are regarded as an adjustment to interest costs) incurred in connection with the borrowing of funds. Borrowing costs directly attributable to acquisition or construction of an asset which necessarily take a substantial period of time to get ready for their intended use are capitalised as part of the cost of that asset. Other borrowing costs are recognised as an expense in the period in which they are incurred. Investment income earned on the temporary investment of specific borrowings is deducted from the borrowing costs eligible for capitalisation.

3.15 Research and development expenditure

Revenue expenditure on research and development is recognised as an expense in the period in which they are incurred.

3.16 Earnings per share

The basic earnings per share is computed by dividing the net profit attributable to equity shareholders for the period by the weighted average number of equity shares outstanding during the year.

The diluted earnings per share is computed by dividing the net profit attributable to equity shareholders for the year by the weighted average number of equity and equivalent potential dilutive equity shares outstanding during the year, except where the result would be anti-dilutive.

3.17 Cash and cash equivalents

For the purpose of presentation in the statement of cash flows, cash and cash equivalents includes cash on hand, deposits held at call with financial institutions, other short-term, highly liquid investments with original maturities of three months or less that are readily convertible to known amount of cash and which are subject to an insignificant risk of changes in value.

3.18 Cash flow statement

Cash flows are reported using the indirect method, whereby profit before tax is adjusted for the effects of transactions of a non-cash nature, any deferrals or accruals of past or future operating receipts or payments and items of income or expenses associated with investing or financing cash flows. The cash flows from operating, investing and financing activities of the Company are segregated.

3.19 Dividend

The Company recognizes a liability to make cash distributions to equity shareholders when the distribution is authorized and the distribution is no longer at the discretion of the Company. As per the corporate laws in India, a distribution is authorized when it is approved by the shareholders of the Company.

4. Changes in significant accounting policies

There have been no changes in accounting policies during the Financial year 2020-21.

5. Standard issued but not effective

On 24 March 2021, the Ministry of Corporate Affairs ("MCA") through a notification, amended Schedule III of the Companies Act, 2013 revising Division I, II and III of Schedule III and are applicable from 1 April 2021. The amendments primarily relate to:

- Change in existing presentation requirements for certain items in the Balance sheet, for e.g. lease liabilities, security deposits, current maturities of long-term borrowings, effect of prior period errors on Equity Share capital.
- Additional disclosure requirements in specified formats, for e.g. ageing of trade receivables, trade payables, capital work in progress, intangible assets, shareholding of promoters.
- Disclosure if funds have been used other than for the specific purpose for which it was borrowed from banks and financial institutions.
- Additional Regulatory Information, for e.g. compliance with layers of companies, title deeds of immovable properties, financial ratios, loans and advances to key managerial personnel.
- Disclosures relating to Corporate Social Responsibility (CSR), undisclosed income and crypto or virtual currency.

The Company is currently evaluating the impact of these amendments, which are applicable from FY 2022.

In assessing the realizability of deferred tax assets, the Company considers the extent to which it is probable that the deferred tax asset will be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable profits during the periods in which those temporary differences become deductible. The Company considers the expected reversal of deferred tax liabilities, projected future taxable income, tax planning strategies and impact of other marketing conditions including Covid-19 in making this assessment.

Based on this, the Company believes that it is probable that the Company will realize the benefits of these deductible differences. The amount of deferred tax asset considered realizable, however, could be reduced in the near term if the estimates of future taxable income during the carry-forward period are reduced.

Notes to the Financial Statements

35. Contingent liabilities and commitments (to the extent not provided for)

Particulars	31 March 2021	31 March 2020
Contingent liabilities		
Claims against the Company not acknowledged as debts		
Income tax matters	40.41	40.41
Custom duty matters (see note below)	14.77	14.77
Employees / labour claims	1.15	0.88
Commitments		
Estimated amount of contracts remaining to be executed on capital account and not provided for (net of advances)	586.49	224.23
Export commitments on account of import under advance licenses	93.13	44.59
Total	735.95	324.88

Note 35 (a)

Income tax demand comprise demand from the Indian tax authorities, upon completion of their tax review for the assessment years 2008-09 and 2014-15. The tax demands are mainly on account of certain transfer pricing adjustments of expenses claimed by the Company under the Income Tax Act. The matters are pending before the ITAT.

Vivad se Vishwas Scheme

The Vivad se Vishwas (VsV) Scheme was announced during the Union Budget, 2020, to provide for dispute resolution in respect of pending income tax litigation. The objective of Vivad se Vishwas is to inter alia reduce pending income tax litigation and benefit taxpayers by providing them peace of mind, certainty and savings on account of time and resources that would otherwise be spent on the long-drawn and vexatious litigation process.

The Company has opted for Vivad se Vishwas scheme for its pending Income Tax case pertaining to AY 2006-07 and the relevant taxes were paid during the year. Closure order from income tax department is awaited.

Custom duty demand comprise demand from the Office of the Commissioner of Custom of INR 14.77 million (31 March 2020: INR 14.77 million). The tax demands are mainly related to benefit received by the Company under Vishesh Krishi and Gram Udyog Yojana (VKGUY), which as per Department's contention, have been availed under incorrect and inadmissible notification. Management is of the view that such benefits are admissible and cannot be denied only because of incorrect mentioning of the notification. This litigation is pending before CESTAT.

The Company is contesting the demands and the management believes that its position will likely be upheld in the appellate process. The management believes that the ultimate outcome of these proceeding will not have a material adverse effect on the Company's financial position and results of operations.

Pending resolution of the respective proceedings, it is not practicable for the Company to estimate the timings of the cash flow, if any, in respect of the above as it is determinable only on receipt judgements / decision pending with various forums/authorities.

The Company has reviewed all its pending litigations and proceedings and has adequately provided for where the provision is required and disclosed as contingent liabilities where applicable, in its financial statements.

Note 35 (b)

Based on the Supreme Court judgement dated 28th February 2019, the Company has reassessed the components to be included in basic salary for the purpose of employer's contribution towards Provident Fund. However, there has been no corresponding amendment in the Act or Scheme framed under the Provident Fund Act, consequent to Supreme Court judgement. Management does not expect the Supreme Court decision to have any significant impact on the Company's financial position as at 31 March 2021

38. Leases

Transition to IND AS 116

The Ministry of Corporate Affairs ("MCA") through Companies (Indian Accounting Standards) Amendment Rules, 2019 and Companies (Indian Accounting Standards) Second Amendment Rules, had notified Ind AS 116 - Leases which replaced the erstwhile standard and its interpretations. Ind AS 116 had outlined the principles for the recognition, measurement, presentation and disclosure of leases for both lessees and lessors thereby introducing a single, on-balance sheet lease accounting model for lessees.

The Company had adopted Ind AS 116, w.e.f. 1 April 2019 using the modified retrospective approach whereby an ROU asset of INR 97.42 million was recognized on transition date equivalent to the Lease Liability of INR 97.42 million. A weighted average incremental borrowing rate on the basis of communication received from its bankers from time to time was applied for recognition of lease liabilities on the date of transition. The incremental borrowing rate used was with in range of 8.30% - 8.40% depending on the amount involved and tenure of the lease agreement.

40. Capital management

A business objective of the Company is to sustain the strongest possible equity base in order to foster confidence in all key stakeholders and promote the Company's onward development. A sound equity base is also a key factor in ensuring a stable risk rating with lenders, which is important for obtaining acceptable borrowing terms for the Company. The Board of Directors and the shareholders of the Company ensure a responsible dividend policy and an appropriate return on invested capital to promote value growth and safeguard the Company's future.

The Board of Directors of the Company are kept informed about the equity position of the Company as part of quarterly reporting. Measures are implemented as necessary, taking the tax and legal frameworks into account, to sustain an appropriate capital base that enables the Company to attain operating targets and to meet the strategic goals.

42. Transfer pricing regulations

The Company has established a comprehensive system of maintenance of information and documentation as required by the transfer pricing legislation under section 92- 92F of the Income Tax Act, 1961. The Company is in process of preparing related documentation for the financial year 2020-2021.

The management is of the opinion that its international transactions are at arm's length such that the aforesaid legislation will not have any impact on the financial statements, particularly on the amount of tax expense and that of provision for taxation as at and for the year ended 31 March 2021.

43. Segment Information

A. Business Segments

An operating segment is a component of the Company that engages in business activities from which it may earn revenues and incur expenses, including revenues and expenses that relate to transactions with any of the Company's other components, and for which discrete financial information is available. The Company recognizes its sale of Prepared Foods activity as its only primary business segment since its operations predominantly consist of manufacture and sale of Prepared Foods to its customers. The 'Chief Operating Decision Maker' monitors the operating results of the Company's business as single segment. Accordingly in context of 'Ind AS 108 - Operating Segments' the principle business of the Company constitute a single reportable segment.

B. Information about major customers

Revenue from one of the customers of the Company's single segment i.e. Prepared Foods is INR 2,864.21 million (2020: INR 2,104.76 million) which is more than 10 percent of the total revenue for the year ended 31 March 2021 and 31 March 2020.

44. Assets and liabilities relating to employee benefits (Contd.)

The Company operates the following post employment benefit plans:

The Company has a defined benefit plan, governed by the Payment of Gratuity Act, 1972. Benefit plan entitles an employee, who has rendered at least five years of continuous service, to gratuity at the rate of fifteen days for every completed year of service or part thereof in excess of six months., based on the rates of wages last drawn by the employee concerned.

The defined benefit plan for gratuity is administered and funded through Tasty Bite Employees Gratuity Trust.

These defined benefit plans expose the Company to actuarial risk, such as longevity risk, interest rate risk, market (investment) risk and salary increment risk.

A. Funding

Gratuity Plan is funded by the Company. The funding requirements are based on the gratuity fund's actuarial measurement framework set out in the funding policies of the plan. The funding of Gratuity Plan is based on separate actuarial valuation for funding purposes for which assumption may differ from the assumptions set out in (E). Employees do not contribute to the plan.

The Company expects to pay INR 8 million as contributions to its defined benefit plans in 2021-2022.

B. Reconciliation of the net defined benefit liability

The following table shows a reconciliation from the opening balances to the closing balances for the net defined benefit liability and its components:

Refer note 26 for Revenue from operations.

Performance obligations

The Company satisfies its performance obligations pertaining to the sale of products at a point in time when the control of goods is actually transferred to the customers. The control of goods is transferred to the customer based on the delivery terms as follows:

Terms of sale	Transfer of control
Domestic sales	
Ex works	On dispatch
Door delivery	When goods are handed over to the customer
Export sales	On the date of bill of lading

No significant judgment is involved in evaluating when a customer obtains control of the promised goods. The payment is generally due within 30-60 days. There are no obligations on account of refunds or returns.

Disclosure for transaction price allocated to the remaining performance obligations

There is no remaining performance obligation for any contract for which revenue has been recognised till period end. Further, in accordance with paragraph 121 of Ind AS 115, the Company is not required to disclose information about its remaining performance obligation since the Company does not have any performance obligation that has an original expected duration of more than one year.

Determining the timing of satisfaction of performance obligations

There is no significant judgement involved in ascertaining the timing of satisfaction of performance obligations, in evaluating when a customer obtains control of promised goods, transaction price and allocation of it to the performance obligations.

Determining the transaction price and the amounts allocated to performance obligations

The transaction price ascertained for the single performance obligation of the Company (i.e. Sale of goods) is agreed in the contract with the customer. There is no variable consideration involved in the transaction price.

Details of contract balances:

There are no contract assets as at 31 March 2021 and 31 March 2020. Refer note 11 for information on trade receivables.

The fair values of these financial assets and liabilities approximate their carrying amount due to the short-term nature of such assets and liabilities.

** Also refer Note 2.5

B. Measurement of fair value

Specific valuation technique used to value financial instruments include:

- The use of quoted market price or dealer quotes of similar instruments
- the fair value of interest rate swaps is calculated at the present value of the estimated future cash flows based on observable yield curves
- the fair value of forward foreign exchange contracts and principle swap is determined using forward exchange rates at the balance sheet date
- the fair value of the remaining financial instruments is determined using discounted cash flow analysis

All of the resulting fair value estimates, where the fair values have been determined based on present values and the discount rates used were adjusted for counterparty or own credit risk

48. Financial instruments - Risk Management

A. Financial risk management

The Company has exposure to the following risk arising from financial instruments:

- credit risk (see (ii) below);
- liquidity risk (see (iii) below); and
- market risk (see (iv) below).

i. Risk management framework

The Company's board of directors has overall responsibility for the establishment and oversight of the Company's risk management framework. The board of directors have established a Risk Management Framework, which is reviewed and monitored by the Chief Financial Officer (CFO). The CFO reports regularly to the board of directors.

The Company's risk management policies are established to identify and analyse the risks faced by the Company, to set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Company's activities. The Company, through its training and established procedures, aims to maintain a disciplined and constructive control environment in which all employees understand their roles and obligations.

The Company's Audit Committee oversees how management monitors compliance with the Company's risk management policies and procedures, and reviews the adequacy of the risk management framework in relation to the risks faced by the Company. The Audit Committee is assisted in its oversight role by internal auditors. Internal auditors undertake regular reviews of risk management controls and procedures, the results of which are reported to the Audit Committee.

ii. Credit risk

Credit risk is the risk of financial loss to the Company if a customer or a counterparty to a financial instrument fails to meet its contractual obligation, and arises principally from the Companies receivable from customer and loans, if any.

The carrying amounts of financial asset represents the maximum credit risk exposure.

Trade receivables are typically unsecured and are derived from revenue earned from customers located in India and outside India. Credit risk is managed by a periodic review of amounts outstanding from customers by treasury head and the chief financial officer. On account of adoption of Ind AS 109, the Company uses expected credit loss model to assess the impairment loss or gain. The Company computes the expected credit loss allowance for trade receivables based on available external and internal credit risk factors such as the ageing of its dues, market information about the customer, industry information and the Company's historical experience for customers.

The Company's exposure to credit risk is influenced mainly by the individual characteristics of each customer. However, management also considers the factors that may influence the credit risk of its customer base, including the default risk associated with the industry and country in which customers operate.

The Company limits its exposure to credit risk from trade receivables by establishing a maximum payment period for customers. Credit risk is also controlled by analysing credit limits and credit worthiness of customers on a continuous basis.

Refer Note 11 for the following information:

- Exposure to the credit risk for trade receivables by geographic region
- Exposure to the credit risk for trade receivables by type of counterparty (concentration of credit risk)
- Movement in the allowance for impairment
- Carrying amount of trade receivables (net of impairment)

Also refer note 3.6 for policy related to impairment

48. Financial instruments - Risk Management (Contd.)

Cash and cash equivalent and bank balances other than cash and cash equivalent ('collectively referred as Bank balance')

The Bank balance is held with Banks. Credit risk on Bank balance is limited as the Company generally invest in deposits with banks with high credit ratings assigned by domestic credit rating agencies. Bank balances comprising current accounts are maintained with banks with high credit ratings assigned by credit rating agencies

iii. Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Company's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation.

The Company's treasury department is responsible for liquidity and funding. The Company manages its liquidity risk by continuously monitoring its working capital and by preparing month on month cash flow projections to monitor liquidity requirements.

The Company's principal sources of liquidity are cash and cash equivalents and the cash flow that is generated from operations. The Company believes that the working capital is sufficient to meet its current requirements. Accordingly, no liquidity risk is perceived. The Company aims to maintain the level of its working capital at an amount in excess of expected cash outflows on account of financial liability over the next six months.

iv. Market risk

Market risk is the risk that changes in market prices – such as foreign exchange rates and interest rates, will affect the Company's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.

The Company is exposed to foreign exchange risk through purchases from overseas suppliers and sales to overseas customers in various foreign currencies. The Company uses derivatives to manage market risk. All such transactions are carried out within the guidelines set by the Company. Generally, the Company seeks to apply hedge accounting to manage volatility in profit or loss.

A) Currency risk

The Company is exposed to currency risk to the extent that there is a mismatch between the currencies in which sales, purchases and borrowings are denominated and the functional currency (INR) of the Company. The primary exposure of the company is in US Dollars (USD) and British Pounds (GBP).

The Company uses forward exchange contracts to hedge its currency risk, most with a maturity of less than one year from the reporting date. Such contracts are generally designated as cash flow hedges. At any point of time, the Company hedges 60% of its estimated foreign currency exposure in respect of forecasted sales

Sensitivity analysis

A reasonably possible strengthening (weakening) of the US Dollar and other currencies against INR at 31 March would have affected the measurement of financial instruments denominated in foreign currency and affected equity and profit or loss by the amounts shown below. The analysis assume that all other variables as remain constant other than change in foreign currency rate to INR.

1 % increase or decrease in foreign currency rate will have following impact on profit before tax:

B) Interest Rate risk

The Company adopts the policy of ensuring that between 80% and 90% of its interest rate risk exposure on its non-current borrowings is at a fixed rate. This is achieved partly by entering into fixed-rate instruments and partly by borrowing at floating rate and using interest rate swaps as hedges of the variability in cash flows to interest rate risk. Interest rate risk related to External Commercial Borrowings have been fully hedged using forward contracts on same dates as the loan are due for repayment.

Impact of Covid - 19

The Company based on an internal assessment believes that the probability of the occurrence of their highly probable forecasted transactions is not significantly impacted by the Covid-19 pandemic. The Company has also considered the effect of changes, if any, in both counterparty credit risk and own credit risk while assessing hedge effectiveness and measuring hedge ineffectiveness. The Company continues to believe that there is no impact on effectiveness of its hedges.

D) Other Risks

Financial assets carried at amortized cost as at 31 March 2021 is INR 896.55 million (2020: INR 651.48 million).

The Company has assessed the counterparty credit risk in connection with Cash and cash equivalents and Other bank balances amounting to INR 349.06 million as at 31 March 2021 (2020: INR 77.58 million).

Notes to the Financial Statements

for the year ended 31 March 2021 (Contd.)

(Currency - INR in million, except per share data)

48. Financial instruments - Risk Management (Contd.)

Trade receivables amounting to INR 543.40 million as at 31 March 2021 are valued at considering provision for allowance under the expected credit loss method. In addition to the historical pattern of credit loss, the Company has considered the likelihood of increased credit risk considering emerging situations due to the Covid-19 pandemic. This assessment is based on the likelihood of the recoveries from the customers in the present situation. The Company closely monitors its customers who are going through financial stress and assesses actions such as change in payment terms, recognition of revenue on collection basis etc., depending on severity of each case.

Based on this internal assessment, the allowance for doubtful trade receivables is considered adequate.
