MANAGEMENT DISCUSSION AND ANALYSIS REPORT

We submit herewith the Management discussion and analysis report on the business of the Company as applicable to the extent relevant.

Industry Structure:

The Gem and Jewellery industry occupies an important position in the Indian economy. It is a leading foreign exchange earner as well as fastest growing industry in the country and accounts for more than 13% of India's total exports. The two major sectors in India are gold jewellery and diamonds. Gold jewellery forms around 80 percent of the Indian Jewellery market, with the balance comprising fabricated studded jewellery that includes diamond studded as well as gemstone studded jewellery.

India possesses world's most competitive gems and jewellery market due to its low cost of production and availability of traditionally competent workforce. Highly skilled and low cost manpower, along with strong government support in the form of incentives and establishment of SEZs, has been the major driver for the Indian gems and jewellery market. Currently the Indian market remains highly fragmented, but is rapidly transforming into an organized sector.

At present, the Indian gems and jewellery market is dominated by the unorganized sector; however, the trend is set to change in near future with the branded jewellery market growing at an expected CAGR (Compound Annual Growth Rate) of more than 41% in the coming four years.

Gold jewellery is the most preferred form of jewellery in demand in India as it is considered auspicious to purchase gold on major occasions like festivals, marriage, birth etc. Also, gold occupies the first position among all investment instruments and is considered as the safest investment option. According to the data released by the World Gold Council (WGC), India is the largest consumer of gold. The sector has gained global popularity because of its talented craftsmen, its superior practices in cutting and polishing fine diamonds and precious stones, and its cost-efficiencies.

Opportunities and Threats

Opportunities:

India is one of the largest exporters of Gem and Jewellery in the world. Foreign Trade Policy has identified the gems and jewellery sector as a thrust area with prospects for export expansion and employment generation. India's gems and jewellery industry is now on a high growth trajectory. Indian hand-made jewellery has a large ethnic demand in various countries with sizeable Indian emigrant population such as the Middle-East, South East Asian countries, USA, Canada and so on. With imported or domestically processed studding (diamonds and precious/ semi-precious stones) and findings (jewellery components), Indian machine-made jewellery industry will also generate demand from non-ethnic jewellery markets abroad. This coupled with slow rise in disposable income

of Indian household and younger generation provides opportunities for the Company to increase its presence in the segment.

Threats:

However, the ever rising prices of precious metals due to fall in US and UK currency values has made the production value go up and has posed a major risk in accumulating inventories. Due to this, the prices of the finished products are steadily increasing making the customer gamut diminutive. In addition, there is a steady increase in the competition between the organized and unorganized players. Being export-dependent also makes the sector susceptible to foreign currency volatility.

Outlook

The Indian gems and jewellery market continues to be dominated by the unorganized sector. However, with the Indian consumer becoming more aware and quality conscious, branded jewellery is becoming very popular and the market for branded jewellery is likely to increase manifold. The Company is the sole authorised distributor for two brands ISHTAA and NISHTAA. The Company has plans to acquire the distributorship for few other reputed brands for which the discussions are on and also to start its manufacturing division. For establishing its manufacturing division, the Company is planning to create a strategic alliance that will suit the Company in the best possible manner to successfully start its manufacturing division using the advanced and latest technologies so as to effectively meet the changing lifestyle and preferences of consumers.

Risks And Concerns:

Risk is an indispensable part of any business. The continuous fluctuation in the prices of precious and semi-precious stones and metals is a matter of concern and risk as the uncontrolled steady increase in these prices will affect the sales of the Company which in turn will affect the profitability of the Company. The Company is also subject to international market and regulatory risks. The international prices are largely governed by movements at major bullion exchanges of London, New York, Tokyo and others. The local bullion prices are an algorithm of these movements on 'spot' basis. From time to time, tariffs, quotas and other tariff and non-tariff trade barriers may be imposed on our products in jurisdictions in which we operate and/or seek to sell our products. Any such imposition of trade barriers may have a material adverse effect on our financial condition and results of operations.

Significant additional competition in the gold trade may also result in reduced off-take and thereby negatively affect the Company's revenues and profitability. Further, maintaining or increasing the market share will depend on effective marketing initiatives including advertising and the Company's ability to improve processes.

Internal Control Systems And Their Adequacy

The internal control systems are aimed at promoting operational efficiencies. The Company is conducting internal audit with its own staff, at regular intervals to ensure that:

- a) Transactions are executed in accordance with the Company's policies and authorizations.
- b) Deployment of funds is in accordance with the Company's policies and Budgets.

The Audit committee with three independent and non-executive directors meets regularly to investigate any matter relating to the internal control system and reviews the Internal Audit. The committee reviews the quarterly and half yearly financials before they are submitted to the Board of Directors.

The Company has put in place sufficient systems to ensure that assets are safeguarded against loss from unauthorized use or disposition. Also an exhaustive Budgetary Control system is in place to monitor capital related as well as other costs against Budgets on an ongoing basis.

Financial Condition:

Share Capital

During the year under review Company has not allotted any Equity Shares out of unissued capital.

Secured Loans

The Company has not borrowed any Secured loans as at 31st March, 2011.

Fixed Assets

Fixed Assets (Net Block) is Rs. 50,932 during the financial year. Plans are being drawn to acquire existing manufacturing facility during the current year.

Human Resources:

The Company strongly believes that a right workforce makes all the difference in catapulting an organization to the highest echelons of success and achievement. Our workforce, thus, is a blend of cohesive and effective knowledge workers, one that is flexible. Working together, we intend to develop and hone a workforce strategy that will be integral to the business strategy of our customers.

Cautionary Statement:

Statement made in Management Discussion and Analysis report which seeks to describe the Objectives, projections, estimates, predictions may be considered to be forward looking statements and are stated as required by applicable laws and regulations. Actual results could differ from those expressed or implied and are determined by many factors including global and domestic demand – supply conditions, process, raw materials availability, tax laws, governmental policies and other statutes which may affect actual results which may be different from what the Directors envisaged in terms of future performance and outlook.
