Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the Standalone Ind AS Financial Statements, whether due to fraud or error.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the

reliability of financial reporting and the preparation of Standalone Ind AS Financial Statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that

(1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of Standalone Ind AS Financial Statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the Standalone Ind AS Financial Statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

According to the information and explanation given to us, the Company has not established its internal financial control over financial reporting on criteria based on or considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India. Because of this reason, we are unable to obtain sufficient appropriate audit evidence to provide a basis for our opinion whether the Company had adequate internal financial controls over financial reporting and whether such internal financial controls were operating effectively as at March 31, 2018.

We have considered the above in determining the nature, timing, and extent of audit tests applied in our audit of the financial statements of the Company, and we have done 100% substantive verification hence, this does not affect our opinion on the standalone financial statements of the Company.

c. Impairment:

If the estimated recoverable amount is found less than its carrying amount, the impairment loss is recognized and assets are written down to their recoverable amount.

d. Inventories

Inventories are valued at the lower of cost and net realisable value except scrap and by products which are valued at net realisable value.

Costs incurred in bringing the inventory to its present location and conditions are accounted for as follows:

- Raw materials: cost includes cost of purchase and other costs incurred in bringing the inventories to their present location and condition. Cost is determined on weighted average basis.
- Finished goods and work in progress: cost includes cost of direct materials and labour wages and a proportion of manufacturing overheads based on the normal operating capacity, but excluding borrowing costs. Cost is determined on weighted average basis.

e. **Foreign Exchange Transactions/Translation**

Transactions in foreign currencies are accounted at functional currency, at the exchange rate prevailing on the date of transactions. Gains/losses arising out of the fluctuations in the exchange rate between functional currency and foreign currency are recognized in the Statement of Profit & Loss in the period in which they arise. The fluctuations between foreign currency and functional currency relating to monetary items at the year ending are accounted as gains / losses in the Statement of Profit & Loss.

f. **Earnings per Share**

The Company presents basic and diluted earnings per share data for its ordinary shares. Basic earnings per share is calculated by dividing the profit or loss attributable to ordinary shareholders of the Company by the weighted average number of ordinary shares outstanding during the year, adjusted for own shares held. Diluted earnings per share is determined by adjusting the profit or loss attribute to ordinary shareholders and the weighted average number of ordinary shares outstanding, adjusted for own shares held, for the effects of all dilutive potential ordinary shares.

g. **Leases**

The determination of whether an arrangement is (or contains) a lease is based on the substance of the arrangement at the inception of the lease. The arrangement is, or contains, a lease if fulfillment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset or assets, even if that right is not explicitly specified in an arrangement.

h. **Employee benefits:**

Defined Contribution Plans: Payments made to a defined contribution plan such as provident Fund are charged as an expense in the Profit and Loss Account as they fall due.

Defined Benefit Plans: Company's liability towards gratuity to past employees is determined using the projected unit credit method which considers each period of service as giving rise to an additional unit of benefit entitlement and measures each unit separately to build up the final obligation. Past services are recognized on a straight-line basis over the average period until the amended benefits become vested. Actuarial gain and losses are recognized immediately in the statement of profit and loss Account as income or expense. Obligation is measured at the present value of estimated future cash flows using a discounted rate that is determined by reference to market yields at the Balance Sheet date on Government Securities where the currency and terms of the Government Securities are consistent with the currency and estimate terms of the defined benefit obligations.

i. **Income Tax:**

Income tax expense represents the sum of current tax payable and deferred tax.

Current Tax: The tax currently payable is based on the current year taxable profit for the year. The current tax is calculated using the tax rates that have been enacted or substantively enacted at the end of the reporting period.

Deferred tax: Deferred tax is provided using the Balance Sheet method on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date. Deferred tax assets are generally recognized for all deductible temporary differences to the extent that it is probable that the taxable profits will be available against which those deductible temporary differences can be utilized. Deferred tax is calculated using the tax rates that have been enacted or substantively enacted at the end of the reporting period. The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilized.

j. **Research and Development**

All expenses incurred for Research & Development are charged to revenue as incurred. Capital Expenditure incurred during the year on Research & Development is shown as additions to Fixed Assets.

k. **Provisions, Contingent Assets/ Contingent Liabilities**

Show cause notices issued by Government Authorities where the probability of outflow of economic resources is remote are not considered as obligations. When the demands are raised against show-cause notices and are disputed by the company, these are treated as disputed obligations along with other contingent liabilities. Such contingent liabilities are not recognized but are disclosed in the notes. Contingent Assets are neither recognized nor disclosed in the financial statements.

l. **Segment Information:**

The company is considered to be a single segment company engaged in the manufacture of Automobile Parts and providing related customer support services. Consequently, the company has in its primary segment only one reportable business segment.

j. **Financial Instruments:**

Non-derivative financial instruments

Non-derivative financial instruments consist of:

Financial assets, which include cash and cash equivalents, trade receivables, other advances and eligible current and non-current assets;

Financial liabilities, which include long and short-term loans and borrowings, , trade payables, eligible current and non-current liabilities.

Offsetting of financial Instruments

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently

enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, to realize the assets and settle the liabilities simultaneously

Non derivative financial instruments are recognized initially at fair value including any directly attributable transaction costs. Financial assets are derecognized when substantial risks and rewards of ownership of the financial asset have been transferred. In cases where substantial risks and rewards of ownership of the financial assets are neither transferred nor retained, financial assets are derecognized only when the Company has not retained control over the financial asset.

Subsequent to initial recognition, non-derivative financial instruments are measured as described below:

Cash and cash equivalents

For the purposes of the cash flow statement, cash and cash equivalents include cash in hand, at banks and

demand deposits with banks, net of outstanding bank overdrafts, if any, that are repayable on demand and are considered part of the Company's cash management system.

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are presented as current assets, except for those maturing later than 12 months after the reporting date which are presented as non-current assets. Loans and receivables are initially recognized at fair value plus directly attributable transaction costs and subsequently measured at amortized cost, less any impairment losses. Loans and receivables comprise trade receivables and other assets.

The company estimates the un-collectability of accounts receivable by analyzing historical payment patterns, customer concentrations, customer credit-worthiness and current economic trends. If the financial condition of a customer deteriorates, additional allowances may be required.

Borrowings

Borrowings are subsequently measured at amortized cost using the EIR method.

Trade and payable

Liabilities are recognized for amounts to be paid in future for goods or services received, whether billed by the supplier or not.

v. Cash Flow Statement

Cash flows are reported using the indirect method, whereby profit before tax is adjusted for the effects of transactions of a non –cash nature, any deferrals or accruals of past or future operating cash receipts or payments and item of income or expenses associated with investing or financing cash flows.
