ECONOMIC SCENARIO AND OUTLOOK

Financial Year 2016-17 closed as a momentous year for the country marked by two landmark economic reforms even as the global economic scenario was indifferent.

The first reform was the rollout of the demonetization scheme in early November. In the long run, this reform aims to usher in greater transparency in financial transactions and a transition towards a cashless economy. In the short term, it has squeezed liquidity and consumption across the economy.

The outlook for 2017 brightens as liquidity in the economy moves towards normalization, with expectations for early revival and growth in overall consumption across several sectors.

The second is imminent roll out of the Goods and Services Tax (GST). GST is a landmark reform which will have a lasting impact on the economy and on

businesses. Implementation of a well-designed GST model that applies to the widest possible base at a low rate, can provide significant growth stimulus to business and contribute to the Prime Minister's mission of 'Make in India'. Your Company has been preparing for migrating to GST for the past year; changes across IT systems, business have been made keeping in mind the sweeping changes that GST would bring in. While there are a few areas that need to be addressed, the Government has announced its firm intention to go live with GST on 1st July, 2017, and your Company will be ready for this transformative reform.

ANNEXURE- I TO THE DIRECTORS' REPORT-2017**MANAGEMENT DISCUSSION AND ANALYSIS REPORT**

The Management of the Company is pleased to present Management Discussion and Analysis Report (to the extent applicable to the company) covering overall performance and outlook of its activities.

MACRO ECONOMIC OVERVIEW**Indian Economy:**

The year was marked by major events namely demonetization of specified bank notes, conclusion of legislative assembly elections in five states, passage of Goods and Services Tax (GST) Bill by the Parliament. On November 8, 2016, it was decided to demonetize high value currency notes of denomination of Rs. 1000 and Rs.500. Such notes, valued at Rs.15.4 trillion, constituted 86.9 per cent of the value of total currency in circulation. The decision was in continuation of a series of measures taken by the Government of India during last two years aimed at eliminating corruption, black money, counterfeit currency and terror funding. The decline in cash in circulation had led to increase in bank deposits with a resultant decline in interest rates on deposits, loans and government securities as well as a decline in real-estate prices, increase in savings, digitalization, income disclosure with a resultant increase in collections by tax and other local authorities.

Inflation in terms of the wholesale price index (WPI) was moving in tandem with consumer price index (CPI) inflation during October-December 2016, but it shot up in January and further in February to close to three percentage points above CPI inflation, driven by a sharp pick-up in international commodity prices. After moderating continuously over the last six months to a historic low, retail inflation measured by year-on-year changes in the CPI, turned up in February, 2017 to 3.7 per cent.

The demonetization decision was guided by the aim of reaping its enormous potential medium-term benefits in the form of reduced corruption, greater digitisation of the economy, increased flow of financial savings and greater formalisation of the economy. All of these would lead to higher GDP growth and tax revenues that could be used by the Government for inclusive and stronger economic growth within the norms of fiscal prudence, besides contributing to overall improvement in business environment. However, despite headwinds to growth from demonetisation, GDP growth has been pegged at 7% in quarter ending December 2016. As

per the second advance estimates report dated 28th February 2017 of the Central Statistics Office (CSO), the growth in GDP during 2016-17 is estimated at 7.1%; and a real gross value added (GVA) growth of 6.7%. Both estimates are significantly lower than what the economy achieved in the previous year. Table 1 gives the data over the last four financial years.

Table 1: Growth in Real GDP and GVA, India

	FY2014	FY2015	FY2016	FY2017 (E)
Real GDP growth	6.9%	7.3%	7.9%	7.1%
Real GVA growth	6.6%	7.2%	7.8%	6.7%

Demonetisation has impacted various financial intermediaries differently. In case of the NBFCs, Loan disbursements by all categories of NBFCs declined significantly since November 2016 compared with the monthly average disbursements during April-October 2016, especially for micro finance companies (NBFC-MFIs) whose business is more cash intensive. NBFCs operating in semi-urban and rural areas rely more on cash and thus got affected. Fresh loan demand for large truck operators fell with lower freight business. Inability of borrowers to make down payments slowed consumer loans. The demand from real estate sector was the worst affected as buyers expected prices to decline sharply. Demand for credit declined due to customers postponing decisions on account of uncertainty. However, the situation with regard to most NBFCs has started to improve from late December 2016.

Non-Banking Finance Companies (NBFCs) continued to grow their share in the financial services industry. As per data published by RBI in its Financial Stability Report of December 2016, NBFCs have outperformed Scheduled Commercial Banks (SCBs) on growth in advances and in asset quality. Table 2 gives the data.

Table 2: Comparison of growth in advances and asset quality of NBFCs and SCBs 31st March, 2016 30th September, 2016

	31 st March, 2016		30 th September, 2016	
	NBFCs	SCBs	NBFCs	SCBs
Growth in Advances	16.6%	8.8%	10.5%	7.8%
Gross Non-Performing Assets	4.6%	7.8%	4.9%	9.1%

We believe that the growth momentum of NBFCs will

result in increasing in the near future their share in the financial services .

INVESTMENTS

The investment portfolio of the Company in quoted investments as on March 31, 2017 was Rs. 7926.75 lakhs, at cost.

RISKS AND CONCERNS

SIL is exposed to specific risks that are particular to its businesses and the environment within which it operates, which include market risk, interest rate volatility, execution risk, and economic cycle.

- The company has significant quoted investments which are exposed to fluctuations in stock prices. These investments represent a substantial portion of the Company's core capital, and are vulnerable to fluctuations in the stock markets. Any decline in these quoted investments may severely impact its financial position and results of operations.
- Credit risk is a risk arising from default or failure on the part of borrowers in meeting their financial obligations towards repayment of loans and interest. This risk is comprehensively addressed by the company both at the strategic level and at the client level.
- Liquidity Risk: Asset/Liability Management: The company is exposed to liquidity risk principally as a result of lending to its customers for periods which may differ from those of its funding sources. Financial firms are now increasingly focused on asset-liability risk. Asset-liability risk is a leveraged form of risk. The capital of most financial institutions is small relative to the firm's assets or liabilities, so small percentage changes in assets or liabilities can translate into large percentage changes in capital.

The problem was not that the value of assets might fall or that the value of liabilities might rise. It was that capital might be depleted by narrowing of the difference between assets and liabilities—that the values of assets and liabilities might fail to move in tandem. The Company is alive to the dynamics of this problem and has in

place a control structure for closely monitoring incipient signs of risk in this area and to unleash necessary corrective measures, if needed. SIL's treasury actively manages asset liability positions in accordance with the overall guidelines laid down by the Management in the Asset Liability Management (ALM) framework.

- The company can be adversely affected by volatility in interest rates in India, which could cause its margins to decline and profitability to shrink. Earnings from interest income is steadily becoming one of the important businesses of the Company. It is therefore exposed to interest rate risk, principally as a result of lending to its customers at interest rates, in amounts, and for periods which may differ from those of its funding sources. Your company is hedged to a large extent against this risk through the reset clause in its advances portfolio.
- While the Indian economy has shown sustained growth over the last several years, a slowdown could cause the business of the company to suffer. SIL manages such risks by maintaining a conservative financial profile and following prudent business and risk management practices.
- The risk appetite is enunciated by the Board from time to time. Company has in place specially mandated Committees such as ALCO, Risk Management Committee, besides Nomination and Remuneration Committee and Audit Committee.

INTERNAL CONTROL SYSTEMS

SIL Investments Limited has an independent internal control system which is commensurate with the size and scale of the Company. It evaluates the adequacy of all internal controls and processes, and ensures strict adherence to clearly laid down processes and procedures as well as to the prescribed regulatory and legal framework. Conforming to the requirements of the regulatory authorities such as the RBI and the SEBI and consistent with the requirements of the Listing Regulations of the Stock Exchanges, the company has institutionalized an elaborate system of control processes designed to provide a high degree of assurance regarding the effectiveness and efficiency of operations, the adequacy of safeguards for assets, reliability of financial controls and compliance with applicable laws and regulations. The Internal Auditors are mandated to carry out periodical audit and report on areas of non-compliances/ weaknesses. Corrective actions in case of reported deficiencies, if any, are taken actively to further strengthen the internal control

systems. These reports are reviewed by the Audit Committee of the Board of Directors for follow-up action, and instructions are issued for taking necessary measures.

FUTURE OUTLOOK

The Company's present business operations are preponderantly that of an investment company, future of which largely depends upon financial and capital markets. Your Company has investments in financially sound companies and has immovable properties in the State of Maharashtra, U.P.etc. Company will continue to earn good dividend and rent income. However, the income from the advances/lending business is steadily growing, contributing significant volume to the overall business of the Company. The Management is optimistic about the future outlook of the Company. Further, more promising areas of activity are being explored on a sustained basis. The company will expand its activities, consistent with its status as a NBFC.
