ANNEXURE- I TO THE DIRECTORS' REPORT-2018**MANAGEMENT DISCUSSION AND ANALYSIS REPORT**

The Management of the Company is pleased to present the Management Discussion and Analysis Report (to the extent applicable to the Company) covering overall performance and outlook of its activities.

MACRO ECONOMIC OVERVIEW**Indian Economy:**

India has emerged as the fastest growing major economy in the world as per the Central Statistics Organisation (CSO) and International Monetary Fund (IMF) and is expected to be one of the top three economic powers of the world over the next 10-15 years, backed by its strong democracy and partnerships. India's GDP is estimated to have increased to 6.6 per cent in 2017-18 and is expected to grow at 7.3 per cent in 2018-19. India's Gross Domestic Product (GDP) at constant prices grew by 7.2 per cent in September-December 2017 quarter as per the Central Statistics Organisation (CSO). Corporate earnings in India are expected to grow by 15-20 per cent in FY 2018-19 supported by recovery in capital expenditure. With the improvement in the economic scenario, there has been an increase in investments in various sectors of the economy.

Numerous foreign companies are setting up their facilities in India on account of various government initiatives like Make in India and Digital India. Mr. Narendra Modi, the Hon'ble Prime Minister of India, has launched the Make in India initiative with an aim to boost various sectors of Indian economy, to increase the purchasing power of an average Indian consumer, which would further boost demand, and hence spur development, in addition to benefiting investors.

NBFCs serve as an important lending machinery that supports the government's financial inclusion mission. NBFCs have scripted a great success story and their contribution to the economy has grown from 8.4% in 2006 to above 14% in March 2015. In terms of financial assets, NBFCs have recorded a healthy growth - a Compounded Annual Growth Rate of 19% over the past few years-comprising 13% of the total credit and expected to reach nearly 18% by 2018-19.

As per the RBI Report, the aggregate balance sheet size of the NBFC sector was at Rs. 13.8 trillion in September 2017, expanding by about 16 per cent, as compared to Rs. 11.9 trillion in September 2016. Loans and advances increased by 15.7 percent, whereas, investments increased by 15.8 percent. Net profit increased by 4.7 per cent in September 2017 (y-o-y). RoA was at 1.9 per cent in September 2017.

We believe that the growth momentum of NBFCs will result in increasing their share in the financial services sector in the near future.

INVESTMENTS

The investment portfolio of the Company in quoted investments as on 31st March, 2018 was Rs. 10,585.62 lakhs, at cost.

RISKS AND CONCERNS

Your Company is exposed to specific risks that are particular to its businesses and the environment within which it operates, which include market risk, interest rate volatility, execution risk and economic cycle.

- The Company has significant quoted investments which are exposed to fluctuations in stock prices. These investments represent a substantial portion of the Company's core capital and are vulnerable to fluctuations in the stock markets. Any decline in these quoted investments may severely impact its financial position and results of operations.
- Credit risk is a risk arising from default or failure on the part of borrowers in meeting their financial obligations towards repayment of loans and interest. This risk is comprehensively addressed by the Company both at the strategic level and at the client level.

- **Liquidity Risk: Asset/Liability Management:** The Company is exposed to liquidity risk principally as a result of lending to its customers for periods which may differ from those of its funding sources. Financial firms are now increasingly focused on asset-liability risk. Asset-liability risk is a leveraged form of risk. The capital of most financial institutions is small relative to the firm's assets or liabilities, hence small percentage changes in assets or liabilities can translate into large percentage changes in capital.

The risk is that the value of assets might fall or that the value of liabilities might rise. It was that Capital might be depleted by narrowing of the difference between assets and liabilities—that the values of assets and liabilities might fail to move in tandem. The Company is alive to the dynamics of this risk and has in place a control structure for closely monitoring incipient signs of risk in this area and to take necessary corrective measures, if needed. The Company's treasury actively manages asset liability positions in accordance with the overall guidelines laid down by the management in the Asset Liability Management (ALM) framework.

- The Company can be adversely affected by volatility in interest rates in India, which could cause its margins to decline and profitability to shrink. Earnings from interest income is steadily becoming one of the important businesses of the Company. It is therefore exposed to interest rate risk, principally as a result of lending to its customers at interest rates, in amounts and for periods which may differ from those of its funding sources. Your Company is hedged to a large extent against this risk through the reset clause in its advances portfolio.
- While the Indian economy has shown sustained growth over the last several years, a slowdown could cause the business of the Company to suffer. The Company manages such risks by maintaining a conservative financial profile and following prudent business and risk management practices.
- The risk appetite is enunciated by the Board from time to time. The Company has in place specially mandated Committees such as ALCO, Risk Management Committee, besides Nomination and Remuneration Committee and Audit Committee.

INTERNAL CONTROL SYSTEMS

The Company has an independent internal control system which is commensurate with the size and scale of the Company. A Company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles.
