6. MANAGEMENT DISCUSSION AND ANALYSIS :

GLOBAL SCENE

1. Preliminary data suggest that global economic activity is picking up with a long awaited cyclical recovery in investment, manufacturing and trade. World growth is expected to rise from 3.1% in 2016 to 3.5% in 2017 and 3.6% in 2018, slightly above the October 2016 World Economic Outlook (WEO) forecast.
2. Economic activity gained some momentum in the second half of 2016, especially in advanced economies.
3. Growth picked up in the United States as firms grew more confident about future demand, and inventories started contributing positively to growth (after five quarters of drag). Growth in the United States is sluggish at around 1.4 percent in the fourth quarter of 2017. Unemployment rate continued to improve to reaching a low of 4.5% in March 2017.
4. The Dow Jones Industrial Average (DJIA) has increased by approximately -17% because US stock markets are seen as a haven for investment in a sea of gloom.
5. The outlook has also improved for Europe and Japan based on a cyclical recovery in global manufacturing and trade that started in the second half of 2016.
6. Europe – The Euro has weathered the pressures on account of the floundering economies of Portugal, Ireland, Greece and Spain (PIGS countries). The recovery was broadly in line with the January forecast in the euro area, as strengthening domestic demand offset a weaker external impulse. Among countries, growth was weaker than expected in Italy but the recovery was stronger in Spain. The Euro (EUR) has appreciated versus the US Dollar (USD) by about 11%
7. Germany along with a few countries bordering the North Sea continue to be pillars of the European economy. Their relative prosperity forms the back bone of the efforts to keep the EU and ECU integrated. The moribund labour markets in France is a considerable risk to the very EU itself. The Italian economy is also in stasis with very high public debt leaving very little room for maneuvering.
8. The rigid labour markets of Europe, absence of political union, unwillingness of the German public to bear a higher burden, significant welfare commitments, large share of government spending in the economy, etc., are some of the significant structural issues. Countries like Spain, Ireland, etc., have embarked on a journey of significant and painful structural reforms which are starting to bear fruit.
9. The significant challenge for European leadership is the management of structural reforms and containment of public spending without causing social turbulence.
10. The 2017 and 2018 growth forecasts have been marked up for China, reflecting stronger-than-expected policy support, as well as for Russia, where activity appears to have bottomed out and higher oil prices bolster the recovery.
11. China – The Chinese economy is showing signs of considerable slow-down on account of slow down in real estate and NPAs in the banking sector. However, because it is a controlled economy, there are reasonable chances of the leadership managing a slow down without a crash landing. Further fall in growth in China is expected to drag the global economy.
12. Japan – Initially benefitted from Abenomics, the radical monetary expansion, fiscal stimulus and structural reforms, promulgated by Mr. Shinzo Abe, the Prime Minister of Japan. However, the effects of the fiscal stimulus have worn off with just 0.6% growth in recent months.
13. Commodities – The Dow Jones Commodity Index (DJCI) has increased by 0.81% in the last one year due to considerable revival of business sentiments in commodities. This is indicative of growth in various economies in both developed and developing countries.
14. Overall, Global output is estimated to have grown by 2.6% in 2016, with 2.2% growth for advanced economies and 4% growth for emerging market and developing economies per various economic think tanks. Global growth is projected to remain modest in 2017, at 2.7%, before picking up to -2.9% in 2018.
15. The issue of high levels of sovereign debt which most countries have run up over the last two decades, continues to be of serious concern. The next few years appear to be a consolidation phase for the global economy with growth stuck in a range of 3-4%. Getting out of high levels of sovereign debt without derailing economies into recession will be a significant conundrum.

INDIA

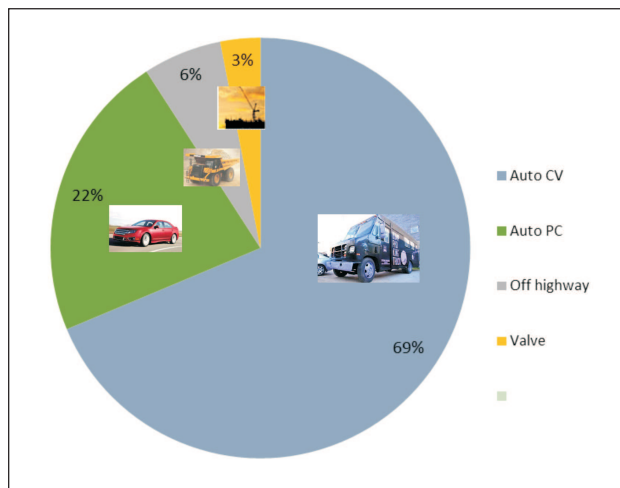

16. The Indian economy is expected to grow by approximately 7.1% in F17 as compared to about 7.5% in F16.

17. During F17 the automotive industry posted growth rates of approximately 11% in the car segment and 4% in the CV segment.
18. Steel prices have dropped by about 4% compared to the highs of the previous year.
19. The INR ended the year higher by approximately 1.5%, ending the year at a level of ₹ 65.86 per USD. Please refer graph below. Further strengthening of the INR is anticipated. However, if FDI inflows are strong, the pressure on the INR will be much higher

Annexure B to the Auditors' Report

Report on the Internal Financial Controls under Clause (i) of Sub – section 3 of Section 143 of the Companies Act, 2013 ('the Act')

We have audited the internal financial controls over financial reporting of M M Forgings Ltd ('the Company') as of 31 March 2017 in conjunction with our audit of the standalone Ind AS financial statements of the company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's Management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditor's Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting ('the Guidance Note') and the standards on Auditing, issued by ICAI and deemed to be prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the standalone Ind AS financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial control systems over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles and that receipts and expenditures of the company are being made only in accordance with authorizations of the management and Directors of the company; and (3) provide reasonable assurance regarding prevention or timely direction of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to

future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial control system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31 March 2017, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India.

extraordinary items, if any) by the weighted average number of equity shares outstanding during the year. Diluted earnings per share is computed by dividing the profit / (loss) after tax (including the post tax effect of extraordinary items, if any) as adjusted for dividend, interest and other charges to expense or income relating to the dilutive potential equity shares, by the weighted average number of equity shares considered for deriving basic earnings per share and the weighted average number of equity shares which could have been issued on the conversion of all dilutive potential equity shares.

2.16 Taxes on income

Current tax is the amount of tax payable on the taxable income for the year as determined in accordance with the provisions of the Income Tax Act, 1961.

Minimum Alternate Tax (MAT) paid in accordance with the tax laws, which gives future economic benefits in the form of adjustment to future income tax liability, is considered as an asset if there is convincing evidence that the Company will pay normal income tax. Accordingly, MAT is recognised as an asset in the Balance Sheet when it is probable that future economic benefit associated with it will flow to the Company.

Deferred tax is recognised on timing differences, being the differences between the taxable income and the accounting income that originate in one period and are capable of reversal in one or more subsequent periods. Deferred tax is measured using the tax rates and the tax laws enacted or substantially enacted as at the reporting date. Deferred tax liabilities are recognised for all timing differences.

Deferred tax assets in respect of unabsorbed depreciation and carry forward of losses are recognised only if there is virtual certainty that there will be sufficient future taxable income available to realise such assets. Deferred tax assets are recognised for timing differences of other items only to the extent that reasonable certainty exists that sufficient future taxable income will be available against which these can be realised. Deferred tax assets and liabilities are offset if such items relate to taxes on income levied by the same governing tax laws and the Company has a legally enforceable right for such set off. Deferred tax assets are reviewed at each Balance Sheet date for their realisability.

Current and deferred tax relating to items directly recognised in equity are recognised in equity and not in the statement of Profit and Loss.

2.17 Research and development expenses

Revenue expenditure pertaining to research is charged to the Statement of Profit and Loss. Development costs of products are also charged to the Statement of Profit and Loss unless a product's technological feasibility has been established, in which case such expenditure is capitalised. Fixed assets utilised for research and development are capitalised and depreciated in accordance with the policies stated for Tangible Fixed Assets and Intangible Assets.

2.18 Impairment of assets

The carrying values of assets / cash generating units at each Balance Sheet date are reviewed for impairment. If any indication of impairment exists, the recoverable amount of such assets is estimated and impairment is recognised, if the carrying amount of these assets exceeds their recoverable amount. The recoverable amount is the greater of the net selling price and their value in use. Value in use is arrived at by discounting the future cash flows to their present value based on an appropriate discount factor. When there is indication that an impairment loss recognised for an asset in earlier accounting periods no longer exists or may have decreased, such reversal of impairment loss is recognised in the Statement of Profit and Loss, except in case of revalued assets.

2.19 Provisions and contingencies

A provision is recognised when the Company has a present obligation as a result of past events and it is probable that an outflow of resources will be required to settle the obligation in respect of which a reliable estimate can be made. Provisions (excluding retirement benefits) are not discounted to their present value and are determined based on the best estimate required to settle the obligation at the Balance Sheet date. These are reviewed at each Balance Sheet date and adjusted to reflect the current best estimates. Contingent liabilities are disclosed in the Notes.

2.20 Insurance claims

Insurance claims are accounted for on the basis of claims admitted / expected to be admitted and to the extent that there is no uncertainty in receiving the claims.

2.21 Service tax input credit

Service tax input credit is accounted for in the books in the period in which the underlying service received is accounted and when there is no uncertainty in availing / utilising the credits.
