CHAIRMAN'S MESSAGE

▼ Though “Make in India” is a slogan coined by the current Government in 2014, this has been a mission for our company since its very inception in 1961.▼

Dear Shareholders,

The last Financial Year was a significant one for us, as we crossed an important milestone in our journey surpassing the sales volume of three lac KL (3,00,000 KL) making us one of the largest Specialty Oil and Lubricating Oil manufacturers in India. Globally in Transformer Oil, we are now the Fifth Largest manufacturer.

I am pleased to inform you that after two difficult years 2014-2015 and 2015-2016, we had a smart recovery in 2017-2018 with a significant increase in profit and also growth in all our product segments.

Passion for Innovation:

Though “**Make in India**” is a slogan coined by the current Government in 2014, this has been a mission for our company since its very inception in 1961. Given our passion for innovation; we have pioneered and introduced for the first time in India more than 10 product categories that were hitherto imported and Made in India for the first time by our company.

Our strong R&D culture is the edge which sets us apart from our competition. Innovation is a second nature to us and continues to motivate and drive us in all that we strive to do. Producing world-class products alone is not enough for us. We aim to do it in a sustainable manner.

Towards A Greener Future:

We were one of the first Indian companies to invest in Renewable Wind Energy and today are proud of the fact that we are the only **Carbon Positive Specialty Oil and Lubricating Oil Manufacturer in India**. Our R&D team is now focussed on developing a range of Lubricants that are greener and leave a lower carbon footprint than conventional mineral oil based lubricants.

We have recently re-launched our lubricant brand SAVSOL in a “**Greener Avatar**”. We have also significantly strengthened our lubricating oil marketing team with a view to enhancing our distribution network so that we may have our products available in every corner of the country.

Best-in-Class Products and Manufacturing facilities:

We are also adopting the best Global Technologies in our manufacturing units and both our manufacturing units in Silvassa employ state-of-the-art technology with a view to increasing output in the most cost-effective manner. Our workforce is being continuously trained in the best manufacturing practices with a view to enhance productivity.

Given that most of the challenges related to the GST and Demonetisation are behind us, we see a strong growth for the Indian economy in the years ahead and are well poised to take advantage of this growth in all three of our product segments Transformer Oils, Lubricating Oils and White Oil.

Acknowledgements:

We consider our employees as our most valuable resource and central to the success of our Company. I take this opportunity to thank our employees for their relentless hard work, dedication and teamwork. My sincere gratitude to all our external stakeholders, bankers, supply chain partners and all those who have been the strong pillars enabling our business to withstand the tough times and flourish in better times.

Last but not the least, I thank you dear Shareholders for your continued support which has enabled our Company to achieve a place of pride not just in the Indian economy but also in Asia. I look forward to your continued support in the years ahead to achieve new milestones of growth and profitability for your Company.

Best wishes

OUR KEY DIFFERENTIATORS

Our strong R&D base

At SAVITA, we believe that we are responsible for our own future and that of the environment in which we operate. SAVITA was amongst the first companies within its industry to setup a dedicated R&D unit way back in 1976, showcasing its pursuit for innovative and long-term vision. This relentless focus has helped us develop and manufacture future-focused products. SAVITA

innovation-led strategy is central to the reduction of its carbon footprint. We continue to deliver sustainable and profitable growth by leveraging our strong R&D capabilities. Our R&D team also utilises our strong relationships with customers and suppliers to ensure practical insights are imbibed into our pursuit of developing value-added products.

Our diversified products and their applications

TRANSFORMER OILS

Transformer Oils are used as an insulating and cooling medium in distribution transformers, power transformers and instrumentation transformers.

WHITE AND MINERAL OILS

Range of highly refined specialty mineral oil based products for technical applications as well as consumer care and pharmaceutical applications.

Custom formulated products finding applications in industries like cosmetics, personal care, plastics, pharmaceutical, agriculture and food lubricants.

AUTOMOTIVE OILS

Motorcycles and Scooter Engine Oils (4T and 2T), Passenger Car Motor Oils, Tractors and Farm Oils, Equipment Oils, Heavy Duty Diesel Engine Oils, Gear Oils, Power Steering Fluids, Automatic Transmission Fluids, Greases and Coolants.

INDUSTRIAL RANGE OF OILS

Hydraulic Oils, Industrial Gear Oils, Refrigeration Compressor Oils, Quenching Oils, Thermic and Heat Exchange Oils, Greases, Metal Working Fluids.

Our manufacturing prowess

We have over the years invested in state-of-the-art manufacturing facilities which are equipped with ultra-modern testing equipment. Our Laboratories are accredited by National Accreditation Board for Testing and Calibration Laboratories (NABL), a leading autonomous body of the Department of Science & Technology, Government of India. The facilities have the unique built-in capability to change the product mix and customise it as per the demand trends

RE-BRANDING SAVSOL AS THE GREEN PERFORMER

In line with our go green philosophy, we undertook the rebranding of our decade-old SAVSOL lubricant brand in 2017-2018. The revised identity aims to reposition, highlight and attract the environment-conscious millennial consumers to the environment-friendly qualities of our product range. This has helped the Company carve out a niche for itself with lubricants that not only ensure enhanced vehicle performance but also by virtue of their eco-friendliness, safeguard the harmful impact on the environment.

With a commitment to increase fuel efficiency and to ensure maximum engine performance with minimal or mitigated emissions, SAVSOL engine oils successfully meet the stringent BS-IV norms for a wide range of automobiles. These include trucks (diesel engine oils), motorcycles (MCO) and passenger vehicles. Curated after extensive R&D, SAVSOL is helping the Company build a sustainable future - not just for the Company, but also for the world at large.

FORM NO. MR-3
SECRETARIAL AUDIT REPORT
FOR THE FINANCIAL YEAR ENDED MARCH 31, 2018
[Pursuant to Section 204(1) of the Companies Act, 2013 and Rule No. 9 of the Companies (Appointment and Remuneration of Managerial Personnel) Rules, 2014]

To,
The Members,
Savita Oil Technologies Limited

We have conducted the secretarial audit of the compliance of applicable statutory provisions and the adherence to good corporate practices by **Savita Oil Technologies Limited** (hereinafter called “the Company”). Secretarial Audit was conducted in a manner that provided us a reasonable basis for evaluating the corporate conduct/statutory compliances and expressing our opinion thereon.

Based on our verification of the Company’s books, papers, minute books, forms and returns filed and other records maintained by the Company and also the information provided by the Company, its officers, agents and authorized representatives during the conduct of secretarial audit, we hereby report that in our opinion, the Company has, during the audit period covering the financial year ended on March 31, 2018 complied with the statutory provisions listed hereunder and also that the Company has proper Board-processes and compliance-mechanism in place to the extent, in the manner and subject to the reporting made hereinafter:

We have examined the books, papers, minute books, forms and returns filed and other records made available to us and maintained by **Savita Oil Technologies Limited** (“the Company”) for the financial year ended on March 31, 2018 according to the provisions of:

- (i) The Companies Act, 2013 (the Act) and the Rules made thereunder;
- (ii) The Securities Contracts (Regulation) Act, 1956 (‘SCRA’) and the Rules made thereunder;
- (iii) The Depositories Act, 1996 and the Regulations and Bye-laws framed thereunder;
- (iv) The following Regulations and Guidelines prescribed under the Securities and Exchange Board of India Act, 1992 (‘SEBI Act’):-
 - i. The Securities and Exchange Board of India (Substantial Acquisition of Shares and Takeovers) Regulations, 2011;
 - ii. The Securities and Exchange Board of India (Prohibition of Insider Trading) Regulations, 1992;
- (v) Foreign Exchange Management Act, 1999 and the Rules and Regulations made thereunder to the extent of Foreign Direct Investment, Overseas Direct Investment and External Commercial Borrowings [Applicable only to the extent of External Commercial Borrowings].
- (vi) The Securities and Exchange Board of India (Buyback of Securities) Regulations, 1998.

We have also examined compliance with the applicable clauses of the following:

- i. Secretarial Standards with regard to meeting of Board of Directors (SS-1) and General Meetings (SS-2) issued by The Institute of Company Secretaries of India;
- ii. SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 and the Listing Agreements entered into by the Company with BSE Limited and National Stock Exchange of India Limited.

During the period under review and as per the explanations and representations made by the management and subject to clarifications given to us, the Company has complied with the provisions of the Act, Rules, Regulations, Guidelines, Standards, etc. mentioned above except that

1. *The Company’s Corporate Social Responsibility spending in pursuance to the Corporate Social Responsibility Policy is less than 2% of the average net profits of the company made during the three immediately preceding financial years.*

2. *The Company has not published notice convening Board meeting dated February 3, 2018 as required under Regulation 47 of the SEBI (Listing Obligation and Disclosure Requirements) Regulations, 2015.*

We further report that, having regard to the compliance system prevailing in the Company and on examination of the relevant documents and records in pursuance thereof, on test-check basis, the Company has complied with the following laws applicable specifically to the Company-

MANAGEMENT DISCUSSION AND ANALYSIS

Management Discussion and Analysis covering segment-wise performance and outlook is given below:

A. INDUSTRY STRUCTURE AND DEVELOPMENT

I. Petroleum Products:

Transformers are required for generation, transmission and distribution of power and are filled with Transformer Oil which functions as an insulating medium. The market for transformer oils is based on the growth of installed power generation capacity, grid and distribution infrastructure. Hydrocarbon mineral oil is mainly used to fill the transformers. There are two major types of transformer oil used in the industry; naphthenic and paraffinic based. Bio based and ester based transformer oils have already gathered attention due to stringent safety and environmental issues but their usage is hampered because of higher prices.

Liquid paraffins are highly-refined mineral oils that are suitable for personal care product such as hair oils, body lotions, skin creams, etc. and even for oral ingestion. White Oils are manufactured from highly refined Base Oils. They are commonly used as blending base for cosmetics, personal care and pharmaceutical products. They lubricate, smoothen, soften, extend and resist moisture in many formulations. Demand for cosmetics, pharmaceutical and personal care products determine the demand for White Oil.

The lubricating oil market in the country, currently estimated to be 2.5 million tons, is now growing at a CAGR of 2.5% to 3%. It's the 3rd largest lube market after US & China. The growth of the market is squarely dependent on the economic and industrial growth in the country. Automotive market in India registered a good growth of 13.9% in 2017-2018 as compared to previous year. All segments, namely Passenger Cars (11%), Motorcycle & Scooter (14.5%) and Commercial Vehicles (19%) contributed handsomely.

However, Automotive and Lubricant Industry is faced with uphill task of meeting time lines for implementation of BS-VI norms. The Auto industry is responding to this challenge through designing more compact engines and this then creates a challenge for the lubricant manufacturers, since they are required to develop lubricants that last longer.

The Lubricant market in India is dominated by Automotive applications, which is estimated to be

at 51% and Industrial application and Institutional business like Rail, Defence, ASRTUs, etc contribute to the extent of 49%. With the upgradation of hardware, Lubricants specifications are also getting upgraded. Higher Performance requirement, environment related issues, fuel economy & high drain intervals are key to development of new generation lubricants.

II. Wind Power:

It is important to note that massive burning of fossil fuels has been one of the key attributes to global warming. The resultant impact on the climate is unmistakable. A large part of global pollution comes from energy production during the burning of coal, oil and gas. For decades it has been clear that a transition from fossil fuels to renewable energy is critical in protecting the world from extreme weather conditions. Renewable energy sources play a critical role in addressing growing energy security and climate challenges. Presently, India's energy basket is dominated by coal. Government is working towards increasing the share of renewables in its energy basket. India in its goal to arrest climate change, targets installation of 175 GW of renewable energy capacity by 2022 (including 100 GW of solar and 60 GW of wind capacity). Industries need to step up their efforts to address the climate change issues, commit to decreasing their carbon footprint and rely more on renewable energy sources.

During the year, India added 1.77 GW of wind power capacity against 5.2 GW capacity addition during previous year. This steep reduction is attributed due to transition of sector from feed-in tariff regime to tariff-based competitive auctions. The cumulative installed capacity as on 31.03.2018 for wind power in India now stands at 34.04 GW.

B. OPPORTUNITIES AND THREATS

I. Petroleum Products:

The Transformer Oil market globally is going to be driven by increasing demand for electricity in the emerging and developed countries, along with the increasing infrastructure investment for energy access. In India, rapid growth in rural electrification due to various government initiatives like "Power for All" which is expected to ensure continuous and

uninterrupted electricity supply to all households, industries and commercial establishments is expected to impel the growth in demand of transformers which is subsequently projected to drive the demand for Transformer Oil.

The Indian Economy is expected to expand at a decent rate. Indian Government is investing and has also committed large sums in developing infrastructure, especially State and National highways. This is a clear stimulus to increased vehicle sales and Industrial production, which in turn will result in growing lubricant consumption. Higher GDP, Industrial growth, buoyant rural spending, power and higher infrastructural related investments all offer huge opportunities to lubricant industry in the coming days.

However, a constant threat to lubricant demand as well as Indian economy is the rising price of Crude Oil and the volatility of US Dollar rate. Higher Crude price impacts balance of payment for the country and would in turn impact economy which then impacts all sectors. These two factors also impact input costs of the lubricants. Electric vehicles will remain to be a future threat.

II. Wind Power:

As India grapples with power shortage problems, Government believes renewable energy will be a feed-in for power sector. The potential for on-shore and off-shore is tremendous in India. With better technology and MW series, CUF has increased substantially. The National Institute of Wind Energy's (NIWE) latest estimate for India's wind power potential is 302 GW at 100 metre hub height. Aerodynamics is the key to maximizing output from wind turbines and there is ongoing advancement in aerodynamics and material technology. Immense opportunity lies in repowering of old wind turbines at high wind sites. These can be repowered with technological advancements to maximize the potential of site for higher energy yield. The industry is also looking at setting up solar-wind-hybrids.

Distribution segment remains the weakest link in the power sector. Capacity additions on the generation side will fail to make the right impact if no distribution reforms are undertaken. Policy uncertainty is also a major challenge for the sector. Other challenges for most onshore installations in the country are land

acquisition, clear title land, poor financial health with payment delays of up to one year or more by DISCOMs, non-availability of good wind potential sites, in-ordinate delays in signing power purchase agreements, etc.

C. SEGMENT WISE PERFORMANCE

I. Petroleum Products:

Your Company's sales turnover during the year 2017-2018 stood at ₹ 1,80,861 lac against ₹ 1,66,838 lac in the year 2016-2017, showing an increase of 8.4% in value terms. The sales volume stood at 3,00,304 KLS/MTs during the year 2017-2018 against 2,89,356 KLS/MTs during 2016-2017. In line with increased value and volume, the net profit of your Company increased from ₹ 9,362 lac for the previous year to ₹ 12,613 lac during the year under review.

II. Wind Power:

During the year 2017-2018, your Company's Wind Power Plants situated in the states of Maharashtra, Karnataka and Tamil Nadu generated 90.37 MU against 103.40 MU generated in the previous year. The generation during the year was affected largely due to low wind compared to previous year.

D. FUTURE OUTLOOK

I. Petroleum Products:

Economic growth is expected to revive after the temporary disruption due to demonetisation & GST. Further, the resolution of bad loans under the Bankruptcy Code, implementation of a bank recapitalization package for public sector banks and further liberalization of FDI scheme is expected to boost GDP growth. This strong GDP growth rate, increasing population & urbanization of households, and strong demand from energy consuming sectors is expected to fuel energy demand in India.

Having said that, the present geo-political uncertainties coupled with ongoing trade sanctions and counter sanctions are going to hurt every economy and India will not be an exception. These global developments could result in further uncertainty in Crude Oil and in turn Base Oil prices, depreciating rupee and growing inflation, all of which may adversely hit the overall demand.

II. Wind Power:

Wind power is one of the more mature sources of renewable energy. This stability along with the shift to competitive bidding from feed-in-tariff regime is helping the country move rapidly towards the 60 GW of Wind Power capacity by 2022. This transition has changed the sector dynamics. As the good wind sites are obsolete, the market is compelled to innovate and create better technology to harness untapped potential. The Ujwal Discom Assurance Yojna (UDAY) is launched for financial turnaround and revival package for state electricity distribution companies (DISCOMs). Forecasting and scheduling is a step towards better grid integration and stability. The need of the hour in India is a clean and renewable source of energy, in which offshore wind power can play a major role supported by country's vast coastline of 7600 km.

E. INTERNAL CONTROL SYSTEMS AND THEIR ADEQUACY

Having a strong internal control system is a pre-requisite for any growing organisation. Your Company had recognized this need a long time ago and had put in place internal control systems to monitor and evaluate compliances with operating systems, accounting processes and procedures. To strengthen this implementation, help from external expert auditing agencies is sought from time to time and the developments and reports resulting out of

this exercise are reported to the Audit Committee for its scrutiny and timely remedial measures. The Audit Committee after in-depth scrutiny of such reports decides on the remedial measures through various agencies and departments within your Company to strengthen the internal control systems.

F. MATERIAL DEVELOPMENTS IN HUMAN RESOURCES/INDUSTRIAL RELATIONS

Your Company has always given prime importance to existence of harmonious industrial relation within the organisation and the year under review was no exception. Auditor's Report

To the Members of Savita Oil Technologies Limited Report on the Standalone Ind AS Financial Statements

We have audited the accompanying Standalone Ind AS Financial Statements of **SAVITA OIL TECHNOLOGIES LIMITED** ("the Company"), which comprise the Balance Sheet as at 31st March, 2018, the Statement of Profit and Loss (including Other Comprehensive Income), the Cash Flow Statement and the Statement of Changes in Equity ("The Financial Statements") for the year then ended and the summary of the significant accounting policies and other explanatory information.

MANAGEMENT'S RESPONSIBILITY FOR THE STANDALONE IND AS FINANCIAL STATEMENTS

The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these Financial Statements that give a true and fair view of the state of affairs, financial performance (including Other Comprehensive Income), cash flows and statement of changes in equity of the Company in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards (Ind AS) specified under Section 133 of the Act, read with Rule 3 of the Companies (Indian Accounting Standards) Rules, 2015.

This responsibility also includes the maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the Standalone Ind AS Financial Statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

AUDITORS' RESPONSIBILITY

Our responsibility is to express an opinion on these Financial Statements based on our audit. We have taken into account the provisions of the Act, the accounting and auditing standards and matters which are required to be

included in the audit report under the provisions of the Act and the Rules made thereunder. We conducted our audit in accordance with the Standards on Auditing issued by Institute of Chartered Accountants of India, as specified under Section 143(10) of the Act. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the Financial Statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the Financial Statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the Financial Statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal financial controls relevant to the Company's preparation of the Financial Statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of the accounting estimates made by the Company's directors, as well as evaluating the overall presentation of the Financial Statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Standalone Ind AS Financial Statements.

OPINION

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid Financial Statements, give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India including Ind AS, of the state of affairs (financial position) of the Company as at 31st March, 2018, and its profit (financial performance including total comprehensive income), its cash flows and the statement of changes in equity for the year ended on that date.

ANNEXURE "B" TO THE INDEPENDENT AUDITORS' REPORT ON STANDALONE IND AS FINANCIAL STATEMENTS OF SAVITA OIL TECHNOLOGIES LIMITED

(Referred to in paragraph I (h) under 'Report on Other Legal and Regulatory Requirements' of our report of even date to the members of Savita Oil Technologies Limited on the Standalone Ind AS Financial Statements for the year ended 31st March, 2018)

Report on the Internal Financial Controls Over Financial Reporting under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of **Savita Oil Technologies Limited** ("the Company") as of 31st March, 2018 in conjunction with our audit of the Standalone Ind AS Financial Statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting ("the Guidance Note") issued by the Institute of Chartered Accountants of India (ICAI). These responsibilities include

the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note and the Standards on Auditing issued by the ICAI and deemed to be prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply

with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material aspects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the Standalone Ind AS Financial Statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of Standalone Ind AS Financial Statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of Standalone Ind AS Financial Statements in accordance with generally accepted accounting principles, and that receipts and expenditures

of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the Standalone Ind AS Financial Statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, to the best of our information and according to the explanations given to us, the Company has, in all material aspects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as of 31st March, 2018, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note issued by the ICAI.

Notes :

The Board of Directors have recommended dividend @ 25 %, i.e., ₹ 2.50 per Equity Share (face value ₹ 10 each) aggregating to ₹ 430.94 lacs (including dividend distribution tax) for the year ended 31st March, 2018.

Capital Reserve - Others	: This reserve represents compensation received for breach of contract during the year 1994-95.
Securities Premium	: Premium collected on issue of securities is accumulated as part of securities premium. Utilisation of such premium is restricted by the Companies Act, 2013. During the current year, entire amount in Securities Premium account has been utilised for buy-back of equity shares.
Capital Redemption Reserve	: This reserve is created u/s 69 of the Companies Act, 2013 by transferring an amount equal to the nominal value of shares bought back by the Company. The same is permitted to be used for issuing fully paid bonus shares.
General Reserve	: General reserve forms part of the retained earnings and is permitted to be distributed to shareholders as dividend.
Retained Earning	: This represents profits remaining after all appropriations. This is free reserve and can be used for distribution as dividend.

Notes to Financial Statements

for the year ended 31st March, 2018

1 CORPORATE INFORMATION

Savita Oil Technologies Limited (“the Company”) is a Public Limited Company incorporated under the Companies Act, 1956 and domiciled in India. Its equity shares are listed on the Bombay Stock Exchange (BSE) and National Stock Exchange (NSE).

The Company is principally engaged in two segments, namely, manufacturing of petroleum speciality products and generation of electricity through wind power plants.

Authorization of financial statements

The standalone financial statements were authorized for issue in accordance with a resolution of the Board of Directors passed on 11th May, 2018.

2 SIGNIFICANT ACCOUNTING POLICIES:

This note provides a list of the significant accounting policies adopted in the preparation and presentation of these standalone financial statements.

(A) Basis of Preparation of Financial Statements:

- i. **Compliance with Ind AS:** The standalone financial statements have been prepared to comply, in all material aspects, with the Indian Accounting Standards (Ind AS) notified under Section 133 of the Companies Act, 2013, read with Companies (Indian Accounting Standards) Rules, 2015 and the relevant provisions of the Companies Act, 2013.
- ii. **Classification of assets and liabilities:** All assets and liabilities have been classified as current or non-current based on the Company’s normal operating cycle and other criteria set out in the Schedule III to the Companies Act, 2013. Deferred tax assets and liabilities are classified as non-current on net basis.

For the above purposes, the Company has determined the operating cycle as twelve months based on the nature of products and the time between the acquisition of inputs for manufacturing and their realisation in cash and cash equivalents.
- iii. **Historical cost convention:** The financial statements have been prepared on going concern

basis under the historical cost convention except:

- (a) certain financial instruments (including derivative instruments) and
- (b) defined benefit plans

which are measured at fair value at the end of each reporting period, as explained in the accounting policies below.

- iv. **Functional and presentation currency:** The Company’s functional and presentation currency is Indian Rupee (INR). All amounts disclosed in the financial statements and notes have been rounded off to the nearest lacs (₹ Lacs), except otherwise indicated.

- v. **Fair value measurement:** The Company measures certain financial assets and financial liabilities including derivatives and defined benefit plans at fair value.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either

- a) in the principal market for the asset or liability or
- b) in the absence of a principal market, in the most advantageous market for the asset or liability.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their best economic interest.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities.

Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.

Notes to Financial Statements

for the year ended 31st March, 2018

Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

(B) Property, Plant and Equipment

- (i) Freehold land is carried at historical cost and all other property, plant and equipment are shown at cost (net of adjustable taxes) less accumulated depreciation and accumulated impairment losses. The cost of an asset comprises of its purchase price, non refundable / adjustable purchase taxes and any costs directly attributable to bringing the asset into the location and condition necessary for it to be capable of operating in the manner intended by the management, the initial estimate of any decommissioning obligation, if any, and for assets that necessarily take a substantial period of time to get ready for their intended use, finance costs. The purchase price is the aggregate amount paid and the fair value of any other consideration given to acquire the asset. The cost also includes trial run cost and other operating expenses such as freight, installation charges etc. The projects under construction are carried at costs comprising of costs directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management and attributable borrowing costs.
- (ii) Lease arrangements for land are identified as finance lease, in case such arrangements result in transfer of the related risks and rewards to the Company. Accordingly, the Company classifies land lease arrangement with a term in excess of 99 years as a finance lease.
- (iii) Stores and spares which meet the definition of property, plant and equipment and satisfy the

recognition criteria of Ind AS 16 are capitalized as property, plant and equipment.

- (iv) When significant parts of plant and equipment are required to be replaced at intervals, the Company depreciates them separately based on their specific useful lives.
- (v) An item of property, plant and equipment and any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset or significant part) is included in the Statement of Profit and Loss when the asset is derecognised.
- (vi) In line with the provisions of Schedule II to the Companies Act, 2013, the Company depreciates significant components of the main asset (which have different useful lives as compared to the main asset) based on the individual useful life of those components. Useful life for such components of property, plant and equipment has been assessed based on the historical experience and internal technical inputs.
- (vii) Depreciation on property, plant and equipment is provided as per written down value method based on useful life prescribed under Schedule II to the Companies Act, 2013. The Company has assessed the estimated useful lives of its property, plant and equipment and has adopted the useful lives and residual value as prescribed in Schedule II. The property, plant and equipment acquired under finance lease are depreciated over the period of lease. Depreciation on stores and spares specific to an item of property, plant and equipment is based on life of the related property, plant and equipment. In other cases, the stores and spares are depreciated over their estimated useful life based on the internal technical inputs.
- (viii) The residual values and useful life of property, plant and equipment are reviewed at each financial year end and changes, if any, are accounted prospectively.

Notes to Financial Statements

for the year ended 31st March, 2018

(C) Investment Property

Investment properties are properties held to earn rentals and / or for capital appreciation (including property under construction for such purpose). Investment properties are measured initially at cost, including transaction costs. Subsequent to initial recognition, investment properties are measured in accordance with the requirements of Ind AS 16 for cost model.

An investment property is derecognised upon disposal or when the investment property is permanently withdrawn from use and no future economic benefits are expected from the disposal. Any gain or loss arising on derecognition of the property is included in the Statement of Profit and Loss in the period in which the property is derecognised.

Depreciation on investment property is provided as per written down value method based on estimated useful life which is considered at 60 years based on internal technical inputs.

(D) Intangible Assets

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and accumulated impairment losses. Internally generated intangibles are not capitalised and the related expenditure is reflected in the Statement of Profit and Loss in the period in which the expenditure is incurred.

Licences and application softwares are classified as Intangible Assets collectively termed as Computer Softwares in the financial statements.

Estimated lives of Computer Software is 5 to 7 years.

(E) Borrowing Costs

Borrowing costs are charged to Statement of Profit and Loss except to the extent attributable to acquisition / construction of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale.

Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds. Borrowing cost also includes exchange differences to the extent regarded as an adjustment to the borrowing costs.

(F) Impairment of Non-financial Assets

At each balance sheet date, an assessment is made of whether there is any indication of impairment.

If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or Cash-Generating Unit's (CGU) fair value less costs of disposal and its value in use. Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets.

When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used.

The Company bases its impairment calculation on detailed budgets and forecast calculations, which are prepared separately for each of the Company's CGUs to which the individual assets are allocated.

(G) Non-current Assets held for sale

Non-current assets classified as held for sale are measured at the lower of carrying amount and fair value less costs to sell.

Non-current assets are classified as held for sale if their carrying amounts will be recovered through a sale transaction rather than through continuing use. This condition is regarded as met only when the sale is highly probable and the asset is available for immediate sale in its present condition subject only to terms that are usual and customary for sale of such assets.

Property, plant and equipment and intangible assets are not depreciated or amortized once classified as held for sale.

Notes to Financial Statements

for the year ended 31st March, 2018

(H) Inventories

Raw and packing materials, fuels, stores and spares are valued at lower of weighted average cost and net realisable value. However, materials and other items held for use in the production of finished goods are not written down below cost if the finished products in which they will be incorporated are expected to be sold at or above cost. Cost of raw materials and stores and spares which do not meet the recognition criteria under property, plant and equipment is determined on a weighted average basis.

Work-in-progress and finished goods are valued at lower of weighted average cost and net realisable value. Cost includes direct materials, labour, other direct cost and manufacturing overheads based on normal operating capacity.

Traded Goods are valued at lower of weighted average cost and net realisable value.

Net realisable value is the estimated selling price in the ordinary course of business less estimated costs of completion and estimated costs necessary to make the sale.

(I) Revenue Recognition

The Company recognises revenue when the amount of revenue can be reliably measured and it is probable that future economic benefits will flow to the entity.

- a) **Sale of goods:** Sales are accounted on passing of significant risks, rewards and control of ownership attached to the goods to customers. Revenue from the sale of goods is measured at the fair value of the consideration received or receivable, net of returns, applicable discounts and allowances and is inclusive of excise duty wherever applicable.
- b) **Processing income:** Revenue from services is recognized as and when the services are rendered on proportionate completion method.
- c) **Rental income:** Rental income arising from operating leases of investment properties is accounted for on a straight-line basis over the lease unless the payments are structured to increase in line with the expected general inflation to compensate for the lessor's expected inflationary cost increases and is included in other income in the Statement of Profit and Loss.

- d) **Incentives based on renewable energy generation:** Incentives for renewable energy generation are recognised as income on passing of significant risks, rewards and control of ownership attached with such incentive.
- e) **Interest income:** Interest income is recognised using the effective interest rate method. The effective interest rate is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to the gross carrying amount of a financial asset. When calculating the effective interest rate, the Company estimates the expected cash flows by considering all the contractual terms of the financial instrument (for example, prepayment, extension, call and similar options) but does not consider the expected credit losses.
- f) **Dividend income:** Dividends are recognised in the Statement of Profit and Loss only when the right to receive payment is established, the economic benefits associated with the dividend will flow to the Company and the amount of the dividend can be measured reliably.
- g) **Others:** Income in respect of export incentives, insurance / other claims, etc. is recognised when it is reasonably certain that the ultimate collection will be made.

(J) Expenditure on Research and Development

Revenue expenditure on Research and Development is charged to Statement of Profit and Loss under the appropriate heads of expenses. Expenditure relating to property, plant and equipment are capitalised under respective heads.

Development expenditure incurred on an individual project is recognized as an intangible asset when the Company can demonstrate the following :

- a) the technical feasibility of completing the intangible asset so that it will be available for use or sale;
- b) its intention to complete the asset;
- c) its ability to use or sell the asset;
- d) how the asset will generate future economic benefits;

Notes to Financial Statements

for the year ended 31st March, 2018

- e) the availability of adequate resources to complete the development and use or sell the asset and
- f) the ability to measure reliably the expenditure attributable to the intangible asset during development.

(K) Foreign Currency Transactions

Foreign currency transactions are translated into the functional currency using exchange rate prevailing on the date of transaction. Monetary assets and liabilities are translated at rate of exchange prevailing at the reporting date. The difference arising on settlement or translation on account of fluctuation in the rate of exchange is dealt within the Statement of Profit and Loss.

Foreign exchange differences regarded as an adjustment to borrowing costs are presented in the Statement of Profit and Loss, as finance costs. All other foreign exchange gains and losses are presented in the Statement of Profit and Loss on a net basis within other gains / (losses).

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions.

(L) Employee Benefits

Short-term obligations

Short-term employee benefits (benefits which are payable within twelve months after the end of the period in which employees render service) are measured at an undiscounted amount in the Statement of Profit and Loss for the year in which the related services are rendered.

Post-employment obligations

The Company operates the following post-employment schemes

- a) defined benefit plan – gratuity, and
- b) defined contribution plan- provident fund.

Defined benefit plan – Gratuity obligation

Post-employment benefits (benefits which are payable on completion of employment) are measured

on a discounted basis by the Projected Unit Credit Method on the basis of actuarial valuation carried out at each reporting data.

The liability or asset recognised in the Balance Sheet in respect of defined benefit gratuity plan is the present value of the defined benefit obligation at the end of the reporting period less fair value of plan assets.

Defined benefit costs are categorised as follows:

- a) service cost (including current service cost, past service cost, as well as gains and losses on curtailments and settlements);
- b) net interest expense or income; and
- c) re-measurement.

Changes in the present value of the defined benefit obligation resulting from plan amendments or curtailments are recognised immediately in the Statement of Profit and Loss as past service cost.

The net interest expense or income is included in employee benefit expense in the Statement of Profit and Loss.

Re-measurement gains and losses arising from experience adjustments and changes in actuarial assumptions are recognised in the period in which they occur, directly in Other Comprehensive Income. They are included in retained earnings in the Statement of Changes in Equity and in the Balance Sheet.

Defined contribution plan

Contributions to Provident Fund are made in accordance with the statute and are recognised as an employee benefit expense when employees have rendered service entitling them to the contributions.

Other long-term employee benefit obligations

The eligible employees can accumulate unavailed privilege leave and are entitled to encash the same either while in employment, on termination or on retirement in accordance with the Company's policy. The present value of such unavailed leave is measured using the Projected Unit Credit Method, with actuarial valuations being carried out at each reporting date. The benefits are discounted using the market yields at the end of the reporting period that have terms

Notes to Financial Statements

for the year ended 31st March, 2018

approximating to the terms of the related obligation. Re-measurements as a result of experience adjustments and changes in actuarial assumptions are recognised in the Statement of Profit and Loss.

The obligations are presented as current liabilities in the Balance Sheet if the entity does not have an unconditional right to defer settlement for at least twelve months after the reporting period, regardless of when the actual settlement is expected to occur.

(M) Leases

The determination of whether an arrangement is, or contains, a lease is based on the substance of the arrangement at the inception date, whether fulfillment of the arrangement is dependent on the use of a specific asset(s) or the arrangement conveys a right to use the asset, even if that right is not explicitly specified in an arrangement.

a) As a lessee

- i) **Finance lease:** Agreements are classified as finance leases, if substantially all the risks and rewards incidental to ownership of the leased asset are transferred to the lessee. Assets held under finance leases are initially recognised as assets of the Company at their fair value at the inception of the lease or, if lower, the present value of the minimum lease payments. The corresponding liability to the lessor is included in the balance sheet as finance lease obligation. Each lease payment is allocated between the liability and finance cost. The finance cost is charged to the Statement of Profit and Loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period.
- ii) **Operating lease:** Leases, where the lessor effectively retains substantially all the rights and benefits of ownership of the leased assets, are classified as operating leases. Lease payments under operating leases are recognised as an expense in the Statement of Profit and Loss on a straight-line basis over the period of the lease unless

the payments are structured to increase in line with expected general inflation to compensate for the lessor's expected inflationary cost increases and is included in revenue in the Statement of Profit and Loss due to its operating nature.

b) As a Lessor

- i) **Operating lease:** Rental income from operating leases is generally recognised on a straight-line basis over the period of the lease unless the rentals are structured to increase in line with expected general inflation to compensate for the Company's expected inflationary cost increases and is included in revenue in the Statement of Profit and Loss due to its operating nature.

(N) Government Grants

Government grants are recognized when there is reasonable assurance that the grant will be received and all attached conditions will be complied with.

The benefit of a government loan at a below market rate of interest is treated as a government grant, measured as the difference between proceeds received and the initial fair value of loan based on prevailing market interest rates.

Government grants are recognised in the Statement of Profit and Loss on a systematic basis over the periods in which the Company recognises as expenses the related costs for which the grants are intended to compensate.

(O) Taxation

Income tax expense comprises of current tax expense and the net change in the deferred tax asset or liability during the year. Current and deferred tax are recognised in the Statement of Profit and Loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity, respectively.

- (a) **Current Tax:** Current tax expense is determined as the amount of tax payable in respect of taxable income for the year.

Notes to Financial Statements

for the year ended 31st March, 2018

Income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the time of reporting.

- (b) Deferred Tax:** Deferred income tax is recognised using the balance sheet approach. Deferred income tax assets and liabilities are recognised for deductible and taxable temporary differences arising between the tax base of assets and liabilities and their carrying amount.

Deferred tax liabilities are recognised for all taxable temporary differences.

Deferred tax assets are recognised for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax assets and deferred tax liabilities are off set if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

(P) Segment Reporting

The Chairman and Managing Director (CMD) monitors the operating results of its business segments separately for the purpose of making decisions about resources allocation and performance assessment.

Segment performance is evaluated based on profit or loss and is measured consistently with profit or loss in the financial statements.

The operating segments have been identified on the basis of nature of products / service.

- a) Segment revenue includes sales and other income directly attributable / allocable to segments including inter-segment revenue.
- b) Expenses directly identifiable with / allocable to segments are considered for determining the segment results. Expenses which relate to the Company as a whole and not allocable to segments are included under unallocable expenditure.
- c) Income which relates to the Company as a whole and not allocable to segments is included in un-allocable income.
- d) Segment results include margins on inter-segment sales which are reduced in arriving at the profit before tax of the company.
- e) Segment assets and liabilities include those directly identifiable with the respective segments. Un-allocable assets and liabilities represent the assets and liabilities that relate to the Company as a whole and not allocable to any segment.

(Q) Earnings Per Share

Basic earnings per share is calculated by dividing the net profit or loss for the year after tax attributable to equity shareholders by the weighted average number of equity shares outstanding during the year. The weighted average number of equity shares outstanding during the year is adjusted for events, if any, such as bonus issue, bonus elements in a rights issue to existing shareholders, shares split and reverse shares split (consolidation of shares). For the purpose of calculating diluted earnings per share, the net profit or loss for the year after tax attributable to equity shareholders and the weighted average number of equity shares outstanding during the year are adjusted for the effects of all dilutive potential equity shares.

(R) Provisions

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result

Notes to Financial Statements

for the year ended 31st March, 2018

of past events, for which it is probable that an outflow of resources will be required to settle the obligation and a reliable estimate of the amount can be made.

Provisions are measured at the present value of management's best estimate of the outflow required to settle the present obligation at the end of the reporting period. If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognized as a finance cost.

Contingent liabilities are disclosed in the case of:

- a) a present obligation arising from the past events, when it is not probable that an outflow of resources will be required to settle the obligation;
- b) a present obligation arising from the past events, when no reliable estimate is possible;
- c) a possible obligation arising from past events, unless the probability of outflow of resources is remote.

Contingent assets are not recognised but disclosed in the financial statements when an inflow of economic benefits is probable.

(5) Financial Instruments

Financial assets and financial liabilities are recognised when the Company becomes a party to the contractual provisions of the instruments.

I. Financial Assets

A. Initial recognition and measurement :

Financial assets are initially measured at fair value. Transaction costs that are directly attributable to the acquisition of the financial asset [other than financial assets at Fair Value Through Profit or Loss (FVTPL)] are added to the fair value of the financial assets. Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the Company commits to purchase or sell the asset. Transaction costs of financial assets carried at FVTPL are expensed in the Statement of Profit and Loss.

B. Subsequent measurement:

For purposes of subsequent measurement, financial assets are classified in the following categories:

- (i) Debt instruments at amortised cost
A 'debt instrument' is measured at the amortised cost if both the following conditions are met:
 - a) The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows, and
 - b) Contractual terms of the asset give rise on specified dates to cash flows that are Solely Payments of Principal and Interest (SPPI) on the principal amount outstanding.

After initial measurement, such financial assets are subsequently measured at amortised cost using the Effective Interest Rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium and fees or costs that are an integral part of the EIR. The EIR amortisation is included in finance income in the Statement of Profit and Loss. The losses arising from impairment are recognised in the Statement of Profit and Loss. This category generally applies to trade and other receivables.
- (ii) Debt instruments included within the Fair Value Through Profit or Loss (FVTPL) category are measured at fair value with all changes recognized in the Statement of Profit and Loss.

- (iii) All equity instruments within the scope of Ind-AS 109 are measured at fair value. Equity instruments which are classified as held for trading are measured at FVTPL. For all other equity instruments, the Company decides to measure the same either at Fair Value Through Other Comprehensive Income (FVTOCI) or FVTPL. The Company makes such selection on an instrument-by-instrument basis. The classification is made on initial recognition and is irrevocable.

For equity instruments measured at FVTOCI, all fair value changes on the instrument, excluding dividends, are recognized in Other Comprehensive Income (OCI). There is no recycling of the amounts from OCI to Statement of Profit and Loss on sale of such instruments.

Notes to Financial Statements

for the year ended 31st March, 2018

- iv) Equity instruments included within the FVTPL category are measured at fair value with all changes recognized in the Statement of Profit and Loss.

C. De-recognition:

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily de-recognised (i.e. removed from the Company's balance sheet) when:

- the rights to receive cash flows from the asset have expired, or
- the Company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either:
 - (i) the Company has transferred substantially all the risks and rewards of the asset, or
 - (ii) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

D. Impairment of financial assets:

In accordance with Ind-AS 109, the Company applies Expected Credit Loss (ECL) model for measurement and recognition of impairment loss on trade receivables and other advances. The Company follows 'simplified approach' for recognition of impairment loss on these financial assets. The application of simplified approach does not require the Company to track changes in credit risk. Rather, it recognises impairment loss allowance based on lifetime ECLs at each reporting date, right from its initial recognition.

II. Financial Liabilities

A. Initial recognition and measurement:

Financial liabilities are classified at initial recognition as :

- (i) financial liabilities at fair value through profit or loss,
- (ii) loans and borrowings, payables, net of directly attributable transaction costs or
- (iii) derivatives designated as hedging instruments in an effective hedge, as appropriate.

The Company's financial liabilities include trade and other payables, loans and borrowings including derivative financial instruments.

B. Subsequent measurement :

The measurement of financial liabilities depends on their classification, as described below:

- (i) **Borrowings:** Borrowings are initially recognised at fair value, net of transaction costs incurred. Borrowings are subsequently measured at amortised cost. Any difference between the proceeds (net of transaction costs) and the redemption amount is recognised in the Statement of Profit and Loss over the period of the borrowings using the effective interest method. Fees paid on the establishment of loan facilities are recognised as transaction costs of the loan to the extent that it is probable that some or all of the facility will be drawn down. In this case, the fee is deferred until the draw down occurs.

Borrowings are removed from the Balance Sheet when the obligation specified in the contract is discharged, cancelled or expired. The difference between the carrying amount of a financial liability that has been extinguished and the consideration paid is recognised in the Statement of Profit and Loss as other gains / (losses).

Borrowings are classified as current liabilities unless the Company has an unconditional right to defer settlement of the liability for at least twelve months after the reporting period. Where there is a breach of a material provision of a long-term loan arrangement on or before the end of the reporting period with the effect that the liability becomes payable on demand on the reporting date, the entity does not classify the liability as current, if the lender has agreed, after the reporting period and before the approval of the financial statements for issue, not to demand payment as a consequence of the breach.

Notes to Financial Statements

for the year ended 31st March, 2018

(ii) **Trade and other payables:** These amounts represent liabilities for goods and services provided to the Company prior to the end of financial period which are unpaid. The amounts are unsecured and are usually paid within twelve months of recognition. Trade and other payables are presented as current liabilities unless payment is not due within twelve months after the reporting period. They are recognised initially at their fair value and subsequently measured at amortised cost using the effective interest method.

(iii) **Derivative financial instruments:** The Company uses derivative financial instruments, such as foreign exchange forward contracts, currency options and interest rate swaps to hedge its foreign currency risks. Such derivative financial instruments are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently re-measured at fair value at the end of each reporting period. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative.

Hedge accounting :

The Company designates certain hedging instruments which include derivatives, embedded derivatives and non-derivatives in respect of foreign currency risk, as either fair value hedges, cash flow hedges or hedges of net investments in foreign operations. At the inception of the hedge relationship, the Company documents the relationship between the hedging instruments and the hedged item, along with its risk management objectives and its strategy for undertaking various hedge transactions. Furthermore, at the inception of the hedge and on an ongoing basis, the Company documents whether the hedging instrument is highly effective in offsetting changes in fair values or cash flows of the hedged item attributable to the hedged risk.

C. De-recognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another, from the same lender, on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the Statement of Profit and Loss.

D. Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

Significant Accounting Judgements, Estimates and Assumptions

The preparation of the Company's financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

Judgements

In the process of applying the Company's accounting policies, management has made the following judgements, which have the most significant effect on the amounts recognised in the financial statements:

- (a) Operating lease commitments – Company as lessor;
- (b) Assessment of functional currency;
- (c) Evaluation of recoverability of deferred tax assets

Estimates and Assumptions

The following are the key assumptions concerning the future, and other key sources of estimation

Notes to Financial Statements

uncertainty at the end of the reporting period that may have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year :

- a) Useful lives of property, plant and equipment, investment property and intangible assets;
- b) Fair value measurements of financial instruments
- c) Impairment of non-financial assets;
- d) Taxes;
- e) Defined benefit plans (gratuity benefits);
- f) Provisions;
- g) Revenue recognition – Khazana Coupon scheme, etc.
- h) Valuation of inventories;
- i) Contingencies

4.2 Fair value of the Company's investment properties

The fair value of the Company's investment properties as at 31st March, 2017 was arrived at on the basis of a valuation carried out by independent registered valuers not related to the Company. The Company has adopted policy of revaluing investment property generally every three years unless there are any significant changes in the circumstances requiring earlier revaluation. Accordingly, the Company has continued with the same valuation for the year ended 31st March, 2018.

The entity has used a practical and expedient model for computing the expected credit loss allowance in respect of trade receivables based on a provision matrix. The provision matrix takes into account historical credit loss experience and is adjusted for forward-looking information. The expected credit loss allowance is based on the ageing of the days the receivables are due and the rates as given in the provision matrix. The provision matrix at the end of the reporting period is as follows :

Ageing	Expected credit loss (%)
0-90 days past due	0.04

34 DETAILS OF SEGMENT REPORTING:

A. Factors used to identify the entity's reportable segments, including the basis of organisation

For management purposes, the Company is organised into segments based on the nature of products / services and has two reportable segments, as follows:

- manufacturing of petroleum speciality products including transformer oils, white oils, mineral oils, liquid paraffins and lubricating oils;
- electricity generation through wind power plants.

The Chairman and Managing Director (CMD) evaluates the Company's performance and allocates resources based on an analysis of various performance indicators by operating segments. The CMD reviews revenue and gross profit as the performance indicator for all of the operating segments. However, the Company's finance (including finance cost and finance income) and income taxes are managed on a company as a whole basis and are not allocated to any segment.

36 FINANCIAL INSTRUMENTS : ACCOUNTING CLASSIFICATIONS AND FAIR VALUE MEASUREMENTS

(i) Accounting classifications

The fair values of the financial assets and liabilities are determined at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale.

The following methods and assumptions were used to estimate the fair values:

The carrying amounts of trade receivables, cash and cash equivalents, bank balances, short term deposits, trade payables, payables for acquisition of property, plant and equipment, short term loans from banks, financial institutions and other current financial assets and liabilities are considered to be the same as their fair values, due to their short-term nature.

(ii) Fair value measurements

The Company uses the following hierarchy for determining and disclosing the fair value of financial instruments by valuation technique:

Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities.

Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.

Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

The following table presents carrying value and fair value of financial instruments by categories and also fair value hierarchy of assets and liabilities measured at fair value :

(iii) Description of significant observable inputs to valuation:

The following table shows the valuation techniques used to determine fair value :

Type	Valuation technique
Investments in equity shares (unquoted)	Based on book value
Investment in mutual fund	Based on NAV
Loan to employees	Based on prevailing market interest rate
Loans from foreign banks	Fair value based on prevailing exchange rate at each closing date
Interest-free sales tax deferral loans	Discounted cash flows. The valuation model considers the present value of expected payments discounted using appropriate discounting rates.
Derivative instruments	Based on quotes from banks and financial institutions

37 FINANCIAL RISK MANAGEMENT

Risk management framework

The Company has put in place Risk Management Policy, objectives of which are to optimize business performance, to promote confidence amongst the Company's stakeholders in the effectiveness of its business management process and its ability to plan and meet its strategic objectives. The Company has a Risk Management Committee (RMC) comprising senior executives which is responsible for the review of risk management processes within the Company, and for overseeing the implementation of the requirements of this policy. The RMC provides updates to the Board on a regular basis on key risks faced by the Company, and the relevant mitigant actions. At an operational level, the respective functional managers are responsible for identifying and assessing risks within their area of responsibility; implementing agreed actions to treat such risks; and for reporting any event or circumstance that may result in new risks. The Company's risk management system is fully aligned with the corporate and operational objectives.

The Board of Directors of the Company and the Audit Committee of Directors periodically review the Risk Management Policy of the Company so that the management controls the risks through properly defined network.

The Company has identified financial risks and categorised them in three parts viz. (i) Credit Risk, (ii) Liquidity Risk and (iii) Market Risk. Details regarding sources of risk in each such category and how Company manages the risk is explained in following notes:

(i) Credit risk

Credit risk refers to the possibility of a customer or other counterparties not meeting their obligations and terms and conditions which would result into financial losses. Such risk arises mainly from trade receivables and investments. Credit risk is managed through internal credit control mechanism such as credit approvals, establishing credit limits and continuously monitoring the credit worthiness of customers to which the Company grants credit terms in the normal course of business. The Company establishes an allowance for doubtful debts and impairment that represents its estimate of incurred losses in respect of trade and other receivables and investments. The maximum exposure to credit risk in case of all the financial instruments covered below is restricted to their respective carrying amount.

Trade receivables

The Company's exposure to credit risk is influenced mainly by the following:

Petroleum Products Segment – As per the credit policy of the Company, generally no credit are given exceeding the accepted credit norms. The Company deals with State Electricity Boards and large corporate houses after considering their credit standing. The credit policy with respect to other customers is strictly monitored by the Company at periodic intervals. Credit risk is managed through credit approvals, establishing credit limits and continuously monitoring the credit worthiness of customers. In addition, for amounts recoverable on exports, the Company has adequate insurance to mitigate overseas customer and country risk.

Wind Energy Segment – Since the sale of wind energy is mostly to State Electricity Boards and reputed private big corporates mostly against performance bank guarantees, the Company is of the view that the risk is highly mitigated.

As at 31.3.2018, the Company's most significant customer accounted for ₹ 3,344.26 lacs of the trade receivables carrying amount (Previous year ₹ 2,700.30 lacs).

The Company uses an allowance matrix to measure the expected credit losses of trade receivables (which are considered good). The following table provides information about the exposure to credit risk and loss allowance (including expected credit loss provision) for trade receivables:

₹ in lacs				
Ageing	Gross Carrying Amount	Expected Credit Loss Rate	Credit Loss	Net Carrying Amount
0-90 days past due	47,924.82	0.04%	17.64	47,907.18
91-180 days past due	4,211.46	0.42%	17.52	4,193.94
181-270 days past due	1,068.85	1.01%	10.82	1,058.03
More than 270 days past due	773.83	3.29%	25.46	748.37
	53,978.96		71.44	53,907.52

Note - Expected credit loss is worked out on the trade receivable for which no specific provision is made.

Cash and cash equivalents

The Company held cash and cash equivalents of ₹ 2,326.34 lacs at 31.3.2018 (Previous year ₹ 1,049.66 lacs). The cash and cash equivalents are held with banks with good credit ratings.

Derivatives

The option contracts, forwards and interest rate swaps were entered into with banks having an investment grade rating and exposure to counterparties is closely monitored and kept within the approved limits.

Investments

The Company invests its surplus funds mainly in liquid schemes of mutual funds, which carry no / low mark to market risks for short duration and therefore, does not expose the Company to credit risk. Such investments are made after reviewing the credit worthiness and market standing of such funds and therefore, does not expose the Company to credit risk. Such investments are monitored on a regular basis.

Security Deposit

The Company has taken premises on lease and has paid security deposits. Since the Company has the ability to adjust the deposit with future lease payments, therefore, does not expose the Company to credit risk.

(ii) Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations on due date. The Company has a strong focus on effective management of its liquidity to ensure that all business and financial commitments are met on time. This is ensured through proper financial planning with detailed annual business plans, discussed at appropriate levels within the organisation. Annual business plans are divided into quarterly plans and put up to management for detailed discussion and an analysis of the nature and quality of the assumptions, parameters etc. Daily and monthly cash flows are prepared, followed and monitored at senior levels to prevent undue loss of interest and utilise cash in an effective manner. Cash management services are availed to avoid any loss of interest on collections. In addition, the Company has adequate, duly approved borrowing limits in place with reputed banks.

a) Financing arrangements

The Company has an adequate fund and non-fund based limits lines with various banks. The Company's diversified source of funds and strong operating cash flow enables it to maintain requisite capital structure discipline. The financing products include working capital loans, buyer's credit loan, External Commercial Borrowings (ECB) Loans etc.

b) Maturities of financial liabilities

The amounts disclosed in the table are the contractual undiscounted cash flows

(iii) Market Risk

The risk that the fair value or future cash flows of financial instruments will fluctuate because of changes in market price. Market risk further comprises of (a) Currency risk, (b) Interest rate risk and (c) Commodity risk.

a) Currency Risk

The Company is exposed to currency risk mainly on account of its import payables, External Commercial Borrowing (ECB) and export receivables in foreign currency. The major exposures of the Company are in U.S. dollars. The Company hedges its import foreign exchange exposure partly through exports and depending upon the market situations partly through options and forward foreign currency contracts. The Company has a policy in place for hedging its foreign currency borrowings along with interest. The Company does not use derivative financial instruments for trading or speculative purposes.

Following are the derivative financial instruments to hedge the foreign exchange rate risk as of dates:

b) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company manages its cash flow interest rate risk by using floating-to-fixed interest rate swaps. Under these swaps, the Company agrees with other parties to exchange, at specified intervals (i.e. quarterly), the difference between fixed contract rates and floating rate interest amounts calculated by reference to the agreed notional principal amounts. The management also maintains a portfolio mix of floating and fixed rate debt. Borrowings issued at variable rates expose the Company to cash flow interest rate risk.

The Company is not exposed to significant interest rate risk during the respective reporting periods.

Following is the outstanding derivative financial instruments to hedge currency and the interest rate risk as of dates

Category	Purpose	Currency	Cross Currency	₹ in lacs		
				31.3.2018	31.3.2017	Buy/Sell
Forwards contracts / Options Contracts	Imports	USD	INR	6,860.46	11,122.63	Buy
Currency and Interest Rates Swaps	External Commercial Borrowings	USD	INR	174.25	1,191.81	Buy

Interest rate risk exposure:

Company's interest rate risk arises from borrowings. The interest rate profile of the Company's interest-bearing financial instruments as reported to the management of the Company is as follows:

Carrying amount as at	31.3.2018 ₹ in lacs	31.3.2017 ₹ in lacs
Fixed-rate instruments		
Financial assets	-	-
Financial liabilities	203.70	1,386.28
Variable-rate instruments		
Financial assets	-	-
Financial liabilities	24,595.29	17,245.98

Cash flow sensitivity analysis for variable-rate instruments

A reasonably possible change of 25 basis points in interest rates at the reporting date would have increased / (decreased) profit or loss by the amounts shown below. The indicative 25 basis point (0.25%) movement is directional and does not reflect management forecast on interest rate movement.

This analysis assumes that all other variables, in particular foreign currency exchange rates, remain constant.

	2017-2018 ₹ in lacs	2016-2017 ₹ in lacs
Floating rate borrowings	61.49	43.11

c) Commodity Risk

Raw Material Risk

Petroleum Products Segment - Timely availability and also non-availability of good quality base oils from across the globe could negate the qualitative and quantitative production of various products of the Company. Volatility in prices of crude oil and base oil is another major risk for this segment. The Company procures base oils from various suppliers scattered in different parts of the world. The Company tries to enter into long term supply contracts with regular suppliers and at times buys base oils on spot basis.

Wind Energy Segment – Availability of good windy sites, delays in land acquisitions and forest land approvals, right of way issues, weak Renewal Purchase Obligation enforcement, resistance to Open Access by State Electricity Boards, lack of adequate transmission infrastructure can effect the decisions to invest and to operate this segment. The Company tries its best to carry out a thorough feasibility study before embarking on investment in this segment. The Company also explores the possibility of scattering its investments over various states and over a period of time.

Capital management

The Company's policy is to maintain a strong capital base so as to maintain investor, creditor and market confidence and to sustain future development of the business. Management monitors the return on capital as well as the level of dividends to ordinary shareholders.

i) Debt Equity Ratio

The Company monitors capital using debt equity ratio. The Company's debt to equity ratios are as follows:

	31.3.2018 ₹ in lacs	31.3.2017 ₹ in lacs
Total borrowings (Refer note 11.1 and 11.2)	599.41	2,224.96
