The proposed new draft Articles of Association is being uploaded on the Company's website for perusal by the shareholders.

BUSINESS ENVIRONMENT

The business environment was challenging during the year due to the volatility in the market conditions and the foreign currency rates. But the outlook remained positive. In our view, the new government at the Centre in India is doing its best to boost the economic environment by bringing about various changes thereby positively impacting the investor sentiments.

The year 2014-2015 was a challenging year due to various factors. Inflationary pressures continued unabated during the year. High volatility in fuel prices, raw material prices and fluctuations in exchange rates added to the product cost leading to moderate increase in sales volumes.

Despite the above factors, the year 2014-15 was a satisfactory year for the Company. The Company was able to achieve a turnover close to ₹ 100 Crs as projected by the management. Persistent efforts have been made by the Company to maintain higher sales volume and reduce finance costs. There was intense competition both from the organized market players as well as the local unorganized manufacturers. The Management believes that the overall growth and new entrants in the organized market, executing business transactions through the e-commerce portals will bring transparency in doing business and a shift from unorganized market players to organized market players.

Your Company is working further on consolidating its strengths in the key markets to increase export sales in the coming years.

Net Sales were ₹ 82.84 Crores as against ₹ 74.95 Crores in the previous year. The profit after tax for the year under review was at ₹ 127.78 Lacs representing an increase of 31% over the previous year.

Due to various initiatives taken by the Company, the Interest and Finance cost have decreased by ₹ 53.14 Lacs i.e. from ₹ 459.69 Lacs to ₹ 406.54 Lacs.

The Company has endeavored to bring out new & unique moulded furniture for improving the sales of the products.

The Company is taking all necessary steps to reduce wastages and make production cost efficient and will surely be able to achieve its targets.

The PVC flooring Mats business in Nellore, Andhra Pradesh in the southern part of the country under the brand name **INSTA** had been subdued during the year 2014-15 due to the persistent power issues faced by the Company.

Note

Particulars

b) Significant accounting policies (Illustrative)

i) Basis of accounting and preparation of financial statements

The financial statements of the Company have been prepared in accordance with the Generally Accepted Accounting Principles in India (Indian GAAP) to comply with the Accounting Standards notified under the Companies (Accounting Standards) Rules, 2006 (as amended) and the relevant provisions of the Companies Act, 1956. The financial statements have been prepared on accrual basis under the historical cost convention. The accounting policies adopted in the preparation of the financial statements are consistent with those followed in the previous year.

ii) Use of estimates

The preparation of the financial statements in conformity with Indian GAAP requires the Management to make estimates and assumptions considered in the reported amounts of assets and liabilities (including contingent liabilities) and the reported income and expenses during the year. The Management believes that the estimates used in preparation of the financial statements are prudent and reasonable. Future results could differ due to these estimates and the differences between the actual results and the estimates are recognised in the periods in which the results are known / materialise.

iii) Inventories

Inventories are valued at the lower of cost (on FIFO basis) and the net realisable value after providing for obsolescence and other losses, where considered necessary. Cost includes all charges in bringing the goods to the point of sale, including octroi and other levies, transit insurance and receiving charges. Work-in-progress and finished goods include appropriate proportion of overheads and, where applicable, excise duty.

iv) Cash and cash equivalents (for purposes of Cash Flow Statement)

Cash equivalents are short-term balances (with an original maturity of three months or less from the date of acquisition), highly liquid investments that are readily convertible into known amounts of cash and which are subject to insignificant risk of changes in value.

v) Cash flow statement

Cash flows are reported using the indirect method, whereby profit / (loss) before extraordinary items and tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from operating, investing and financing activities of the Company are segregated based on the available information.

vi) Depreciation and amortisation

Depreciation has been provided as per provisions in Schedule II of the Companies Act 2013 based on useful life of the fixed assets as specified in Part C of the said schedule.

Assets costing less than ₹ 5,000 each are fully depreciated in the year of capitalisation

vii) Revenue recognition

Sales include excise duty, sales tax and value added tax. Trade discounts and returns has been disclosed separately under Other Expenditure.

viii) Other income

Interest income is accounted on accrual basis. Dividend income is accounted for when the right to receive it is established.

ix) Tangible fixed assets

Fixed assets, are carried at cost less accumulated depreciation and impairment losses, if any. The cost of fixed assets includes interest on borrowings attributable to acquisition of qualifying fixed assets up to the date the asset is ready for its intended use and other incidental expenses incurred up to that date. Exchange differences arising on restatement / settlement of long-term foreign currency borrowings relating to acquisition of depreciable fixed assets are charged to profit and loss account. Machinery spares which can be used only in connection with an item of fixed asset and whose use is expected to be irregular are capitalised and depreciated over the useful life of the principal item of the relevant assets. Subsequent expenditure relating to fixed assets is capitalised only if such expenditure results in an increase in the future benefits from such asset beyond its previously assessed standard of performance.

Capital work-in-progress:

Projects under which assets are not ready for their intended use and other capital work-in-progress are carried at cost, comprising direct cost, related incidental expenses and attributable interest.

x) Pre Operative Expenditure

Borrowing costs, allocated to and utilised for qualifying assets, pertaining to the period from commencement of activities relating to construction / development of the qualifying asset upto the date of capitalisation of such asset is added to the cost of the assets.

xvi) Earnings per share

Basic earnings per share is computed by dividing the profit / (loss) after tax (including the post tax effect of extraordinary items, if any) by the weighted average number of equity shares outstanding during the year. Diluted earnings per share is computed by dividing the profit / (loss) after tax (including the post tax effect of extraordinary items, if any) as adjusted for dividend, interest and other charges to expense or income relating to the dilutive potential equity shares, by the weighted average number of equity shares considered for deriving basic earnings per share and the weighted average number of equity shares which could have been issued on the conversion of all dilutive potential equity shares. Potential equity shares are deemed to be dilutive only if their conversion to equity shares would decrease the net profit per share from continuing ordinary operations. Potential dilutive equity shares are deemed to be converted as at the beginning of the period, unless they have been issued at a later date. The dilutive potential equity shares are adjusted for the proceeds receivable had the shares been actually issued at fair value (i.e. average market value of the outstanding shares). Dilutive potential equity shares are determined independently for each period presented. The number of equity shares and potentially dilutive equity shares are adjusted for share splits / reverse share splits and bonus shares, as appropriate.

xvii) Taxes on income

Current tax is the amount of tax payable on the taxable income for the year as determined in accordance with the provisions of the Income Tax Act, 1961.

Minimum Alternate Tax (MAT) paid in accordance with the tax laws, which gives future economic benefits in the form of adjustment to future income tax liability, is considered as an asset if there is convincing evidence that the Company will pay normal income tax. Accordingly, MAT is recognised as an asset in the Balance Sheet when it is probable that future economic benefit associated with it will flow to the Company.

Deferred tax is recognised on timing differences, being the differences between the taxable income and the accounting income that originate in one period and are capable of reversal in one or more subsequent periods. Deferred tax is measured using the tax rates and the tax laws enacted or substantially enacted as at the reporting date. Deferred tax liabilities are recognised for all timing differences. Deferred tax assets in respect of unabsorbed depreciation and carry forward of losses are recognised only if there is virtual certainty that there will be sufficient future taxable income available to realise such assets. Deferred tax assets are recognised for timing differences of other items only to the extent that reasonable certainty exists that sufficient future taxable income will be available against which these can be realised. Deferred tax assets and liabilities are offset if such items relate to taxes on income levied by the same governing tax laws and the Company has a legally enforceable right for such set off. Deferred tax assets are reviewed at each Balance Sheet date for their realisability."

Current and deferred tax relating to items directly recognised in equity are recognised in equity and not in the Statement of Profit and Loss.

xviii) Impairment of assets

The carrying values of assets / cash generating units at each Balance Sheet date are reviewed for impairment. If any indication of impairment exists, the recoverable amount of such assets is estimated and impairment is recognised, if the carrying amount of these assets exceeds their recoverable amount. The recoverable amount is the greater of the net selling price and their value in use. Value in use is arrived at by discounting the future cash flows to their present value based on an appropriate discount factor.

xix) Insurance claims

Insurance claims are accounted for on the basis of claims admitted / expected to be admitted and to the extent that there is no uncertainty in receiving the claims.

xx) Service tax input credit

Service tax input credit is accounted for in the books in the period in which the underlying service received is accounted and when there is no uncertainty in availing / utilising the credits.
