Noties to the Financial Statements for the year ended 31st. March, 2013

SIGNIFICANT ACCOUNTING POLICIES

J. Income taxes:

Tax expense comprises of current and deferred tax. Current income Tax is measured at the amount expected to be paid to the tax authorities in accordance with the Indian Income Tax Act, 1961. Deferred tax reflects the impact of current year timing differences between taxable income and accounting income for the year and reversal of timing differences of earlier years.

The deferred tax for timing differences between the book and tax profits for the year is accounted for using the tax rates and laws that have been substantially enacted as of the balance Sheet date. Deferred tax asset is recognised only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax asset can be realised. In situations where the company has unabsorbed depreciation or carry forard tax losses, all deferred tax assets are recognised only if there is virtual certainty supported by convincing evidence that they can be realised against future taxable profits.

At each Balance Sheet date the company re-assesses unrecognised deferred tax assets. It recognizes unrecognised deferred tax assets to the extent it has become reasonably certain or virtual certain, as the case may be that sufficient future taxable income will be available against which such deferred tax assets can be realised.

The carrying amount of deferred tax assets are reviewed at each balance sheet date. The company writes-down the carrying amount of a deffered tax asset to the extent that it no longer reasonably certain or virtually certain, as the case may be that sufficient future taxable income will be available against which such deferred tax assets can be realised. Any such write -down is reversed to the that it becomes reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available.
