MANAGEMENT DISCUSSION AND ANALYSIS

ECONOMY OVERVIEW

GLOBAL ECONOMY-

The world economies witnessed sluggish trade and low investment activity, with market sentiments weighed down by economic uncertainties. The weakness in the Euro zone continued along with the dilemma over withdrawal of the US fiscal stimulus as growth in India and China continued to remain sluggish. Speculation about the withdrawal of quantitative easing in the US led to capital flight and currency depreciation, thereby impacting the financial markets in developing countries. The world economy grew at 3% growth in the financial year 2013-14.

Though high inflation and interest rates as well as a deceleration in exports are likely to weigh on growth in emerging markets, the global economic outlook for 2014-15 is more positive as businesses and consumer sentiments are reviving. Growth in advanced economies should pick up in 2015 driven by higher business investment.

INDIAN ECONOMY-

During the year under review, the uneven political climate led to stagnant economical scenario, which not only led to lower infusion of investments in the infrastructure & core industries but also led to lower capital expenditure and less job creation. Inflation continued to be on the higher side, thereby ultimately reducing the consumer spending. The Indian economy grew at a rate of 4.7% during the period.

The outlook for economic growth in India looks much more promising as the new government, which took charge in May, has since initiated various measures like minimising tax litigation, loosening caps on foreign investment in railway infrastructure and defense manufacturing, speeding up regulatory approvals and reducing bureaucratic discretion, to attract more investments and remove bottlenecks in the infrastructure, among others, to boost growth. The growth prospects, however, continue to be significantly below pre-crisis levels and well short of the new government's target to raise growth to 7-8 per cent by 2017-18. Inflation expectations have moderated and retail inflation stood at 8.31% in March 2014. The recovery is likely to be supported by increased investment activity due to execution of stalled projects backed by business and consumer optimism. Better exports, lower inflation and project clearances will translate into higher investments leading to an improved business environment in the coming years. Containment of the fiscal and current account deficits in the coming months will provide a cushion to the Indian economy from further volatility.

The new government is engaged in an effort to lift economic growth, which has languished below 5% in each of the last two financial years. Foreign capital inflows to India have risen markedly. India could be seen as one of the world's most attractive investment destination, especially with the opening up of foreign direct investment (FDI) in several sectors.

INDUSTRY STRUCTURE & DEVELOPMENTS

NON-BANKING FINANCIAL COMPANIES (NBFCs)

Banks and financial institutions broadly encompass the framework of the Indian financial system. The rapid rise of financial institutions was facilitated by simplified sanction procedures, flexibility and low-cost of operations. However, tighter liquidity conditions, stringent prudential norms and regulatory changes led to the survival of only a handful of Non-Banking Financial Companies (NBFCs) to partner in the financial inclusion of the country. During the year under review, the banking system in India continued to grapple with rising delinquencies and higher scrutiny from regulators. The core industries and the infrastructure sectors witnessed lower traction in terms of activity, thereby leading to lukewarm activity economic across key states.

The NBFC sector in India is integral to the financial framework of the country. NBFCs are largely involved in serving those classes of borrowers who are generally excluded from the formal banking sector. However, progressively over the years, the exclusiveness between the banks and NBFCs has somewhat blurred. More recently, NBFCs are competing with banks in providing financial services such as infrastructure finance and housing finance among others. NBFCs also often take lead role in providing innovative financial services to Micro, Small, and Medium Enterprises (MSME) most suitable to their business requirements. The characteristics of NBFC financial services include simpler processes and procedures in sanction and disbursement of credit; timely, friendly and flexible terms of repayment aligned to the unique features of its clientele, albeit at a higher cost. Unlike the banking sector, entities under NBFCs differ not only in terms of size and sophistication of operations but also in terms of activities they undertake. The NBFC industry has witnessed a Compounded Annual Growth Rate (CAGR) of 22% during March 2006 to March 2013.

The NBFCs have maintained stable asset quality, although cyclical pressures & persistent challenges in the operating environment have started to push up delinquencies levels for the NBFCs. A stable operating performance has facilitated their access to funding from banks and capital markets but at the same time a protracted and sharp contraction in industrial activities (and overall economic growth) can adversely impact their credit quality. The asset quality pressures could further lead to negative rating actions by Credit rating agencies. Conversely, a strong through-the-cycle operating performance, stable asset quality, robust capital buffers and diversified funding profile can lead to positive rating actions.

SEGMENT-WISE PERFORMANCE

The performance of the company during the year under review has been good with both its major segments i.e. Secured Lending and Proprietary Investments, doing well.

In the Secured Lending segment, the meticulous practices followed by the company both, before and after the disbursement of loans, have resulted in good performance of its loan book whilst maintaining its no-default record at the same time. The loan book as on 31.03.2014 stood at Rs. 52 Cr. (approx.). The company has now been into this segment for 4 years with the loan book fairly seasoned. The comprehensive due diligence along with speed of decision making have made it not just a lender of choice for small, mid-sized companies but also helped it create long lasting relationships with its clients in the Delhi & NCR region. The blended yield for the FY 2013-14 was 20.37%.

The company continues to cater to the short-term/working capital requirements of small, mid-sized companies. The company's focus on analyzing borrower's cash-flows continues to be a key criteria whilst carrying out due-diligence of a loan proposal. During the year under review, the loan book has been further diversified by the company to mitigate any exposure risks. New clients have been added during the year under review. Given the increased challenges in the operating environment on account of overall slowness in economy and tight liquidity conditions, consolidation of the loan book continues to be the guiding principle of the company and the company continues to do it successfully by evaluating not just the quantitative factors of the borrower company but also the qualitative factors of its promoters & management. The knowledge & experience of the management has been the prime driver in achieving the zero default rate. The company is confident of further scaling up its loan book in the coming years.

The other vertical i.e. Proprietary Investments, wherein the company trades in arbitrage opportunities arising in the stock market like Open Offers, Demergers, Delistings etc has been satisfactory; despite the extreme unpredictability prevailing in the stock market on account of micro & macro-economic factors, the performance of the company has been satisfactory during the year 2013-14. The changing political & economic scenario in India as well as reviving global factors, will decide the course of the deployment of funds in this segment in the coming years.

Going forward, the company's intends to focus on its secured lending business and further expand its loan book as it sees

ample opportunities in the lending space, for those NBFCs which have the right set of people, knowledge, internal systems & network in place. It plans to enter new segments like working capital loans to industrial units. It is also studying various business models across wholesale and retail lending, to further diversify its assets base.

BUSINESS OUTLOOK

The performance during the year has been extremely encouraging and the company intends to carry on the good work in the years to come. Though, the business environment has gotten more challenging, the company strongly believes that with a strong & prudent internal working system in place, it would be able to keep itself in good stead in its field of operations. The company continues to improve its processes in the loan due diligence & post-monitoring procedures, so as to enable it to further refine its decision point and credit rating models. The Company's prudent risk management has helped maintain a better asset quality, which has resulted in steady growth despite market volatilities. The Company focuses on building long-term relationships with all stakeholders, including customers, bankers, investors, dealers and employees.

The company understands the evolving economic and regulatory environment and this has helped it maintain strong profitability, despite macroeconomic headwinds. With the new government in place since May 2014, the company feels that the healthy economic growth in the years to come and the likely higher industrial growth & improved investment sentiments, could make way for further opportunities for NBFCs along with betterment of asset quality.

Though the short-term environment might prompt the company to follow a cautionary approach, the company firmly believes it has set itself in the right direction for long-term success in the Secured lending segment. We shall continue to expand our loan book.

RISKS AND CONCERNS

During the year under review, the political uncertainty in India and the global economic factors have further added to the unpredictability of the already challenging business environment. The company keeps itself abreast of the biggest as well as the smallest micro & macro economic factors so as to identify opportunities & challenges at the right time, which further enable to take corrective action at the right moment and thereby safeguard its loan book as well as proprietary investments. There is a constant focus on risk identification and its mitigation, with the procedures being reviewed periodically, to ensure the focus of the Company is aligned to the changing business environment.

With the introduction of the new Companies Act and the increased monitoring of NBFCs by the Reserve Bank of India, there has been a significant increase in the level of disclosures, filings to be done to the regulatory authorities. In addition to creating new challenges in the workings of the company, these can also lead to an overall increase in the cost of compliance. The company continues to duly comply with all the laws & regulations as amended upto date.

In a recent development, the Supreme Court in Dashrath Rupasingh Rathod Vs. State of Maharashtra & Anr. has held that a Complaint of Dis-honour of Cheque can be filed only to the Court within whose local jurisdiction the offence was committed i.e. where the cheque is dishonoured by the bank on which it is drawn.

The company is putting in measures to avoid any adverse impact arising out of the above in future.

The company is hopeful of its risk-mitigating approaches holding the company in good stead in the future.

INTERNAL CONTROL SYSTEMS AND THEIR ADEQUACY

The Company has put in place an efficient and effective internal control system to safeguard its assets and ensure operational excellence. The system also meticulously records all transaction details and at the same time ensures regulatory compliance. The organisation structure is clear with well defined roles for all personnel, to ensure effective coordination &

execution. The lapses are identified and wherever deemed necessary, internal control systems are strengthened and corrective actions initiated.

FINANCIAL PERFORMANCE

The company had Sales of Rs.112.96 crores this financial year Vs. Rs.105.78 crores in the previous year.

The Company's Profit before Tax (PBT) stood at Rs.9.98 crores as against Rs.5.96 crores during the previous year 2012-13. The corresponding figures for Profit after Tax (PAT) are Rs.7.20 crores and Rs.4.20 crores for the current year and previous year, respectively.

HUMAN RESOURCES

The company believes that human resources form the most critical aspect of its success or failure. The company has the right set of experienced people with the right set of knowledge & skills and at the right places, to make the most of every opportunity that is identified and at the same time to safeguard the assets of the company. As the company continues to focus on the secured lending segment, it makes sure that the secured lending team is equipped with the right set of experience & skills. The reallocation of responsibilities done in the last few years has reaped good results for the company and shall continue to do so. The no-default record of the company is a reflection of the same. As and whenever needed, the company continues to focus on attracting and retaining employees with valuable experience in the fields of its operations. The personal ambitions of the employees are at complete harmony with the organizational goals and the atmosphere is apt for a well-knit forge towards further growth of the company.

As on 31st March 2014, the company has 9 people on its payrolls.

Current investments are carried at lower of cost and fair value and provision wherever required, made to recognize any decline in carrying value.

d) Fixed Assets & intangible assets:

Fixed Assets are stated in books at historical cost inclusive of all incidental expenses.

Cost comprises the purchase price and any attributable cost of bringing the assets to working condition for its intended use. Intangible assets are recorded at the consideration paid for acquisition of such assets.

e) Depreciation & Amortization:

Depreciation on the fixed assets has been provided on SLM basis at the rates prescribed by schedule XIV of the Companies Act, 1956. Depreciation for assets purchased/sold during the year is proportionately charged. Intangible assets are amortized over their respective individual estimated useful lives on SLM basis.

f) Retirement Benefits:

k) Accounting for Taxes on Income

- i) Current tax is determined as the amount of tax payable in respect of taxable income for the year.
- ii) Deferred Tax is recognized subject to the consideration of prudence on timing difference, being the difference between taxable income and accounting income that originate in one period and are capable of reversal in one or more subsequent periods and measured using relevant enacted tax rates.
