MANAGEMENT DISCUSSION AND ANALYSIS

INDUSTRY STRUCTURE AND DEVELOPMENTS

Your Company is a producer of pharmaceutical chemicals. The intermediates produced are used in pharmaceutical and chemical industries. Your Company is amongst the manufacturers who produce for local and international needs of the pharmaceuticals and chemicals industry. The pharmaceutical and chemical industry is growing at a rapid pace every year. This results into growth of the support or intermediate industry like us.

OPPORTUNITIES AND THREATS

The company looks forward optimistically for all round growth in turnover & profitability in the ensuing years. Your company has taken effective steps to realize the dream performance in the years to come. The company intends to double its turnover in a short period of time. The company has taken effective measures to improve quality of products and its productivity to outwit competitor from domestic and international market.

The profit margin has come down drastically over the years and unless the quantitative volume of sales is increased it would be difficult to achieve the target of profitability set by the directors. The company should also plan to widen the product range by increasing the basket of products thereby enlarging the customer and sales base.

PRODUCT PERFORMANCE

The company has two plants producing varied items. The basic purpose of producing in two different plants is to improve efficiency and manageability. Your Company shall achieve sustainable growth in both plants by modernization and automation of operations. According to your Directors, these plants facilitate better division of labour, enable us to develop expertise in each plant and their respective items, and hence improve productivity and profitability of the Company.

OUTLOOK

According to Yes Bank Report titled "Indian Pharmaceutical Industry : Vision 2015", the Indian Pharmaceutical & Chemical industry is projected to grow at an annual rate of 14.2%. Currently valued at USD 10 Billion, the projected turnover to touch USD 50 Billion by the year 2015.

RISKS AND CONCERNS

Currency Risk : The year 2014-15 saw some volatility on the currency exchange front. Imports constitute a major portion of our business activity. The company does selective hedging from time to time. However it is difficult to fully contain such adverse fluctuations, the management shall continue to take remedial steps to reduce its severity from time to time.

Competition Risk : We feel that the major business risks are the stiff competition due to low priced products from countries like China and also from domestic manufacturers for certain products. However the company is trying to expand its range of products to cater to different segment of customers and market in order to absorb fall in sales and margins.

Credit Risk : We have been able to reduce the irrecoverable amounts to a very negligible level, notwithstanding the inevitability of having some debts which are not recoverable. Due to strict monitoring and disciplined distribution channels, we do not foresee any material risk on this count.

Dead Stocks/Slow moving items/Rejections Risk : Sometimes the quality of finished product becomes bad or is rejected by a customer. The Company has taken every step in the raw material procurement stage, production stage, packing stage, testing stage and delivery stage to minimize the risk of rejection. If due to some unforeseen reasons the goods are rejected or are not as per our in-house standards, the company has made a system to reprocess all such failed material. Minimum cost is incurred to make them into acceptable standards again. Further the products that have irregular demand or are sold in lesser quantities round the year are manufactured as per customers order only. Thus the company is successful in handling dead stocks, slow moving items and rejections.

Fire, Theft & Explosion Risk : The Company has been quite conscious of the inherent risk in our business. A lot of measures to safeguard the fixed assets and stocks in the factory are taken. The management has been regularly updating the risk profile and take necessary corrective steps like educating workers, insisting workers to wear gum boots, gloves, eye goggles, helmets etc, installing fire fighting equipments, putting sign boards, banning smoking in the premises, keeping hazardous materials in a safe and protected place etc. Apart from these measures, the company has also underwritten the various risks like fire, theft & burglary, earthquake, floods, riots, public liability, sale/purchase in transit etc with ICICI Lombard General Insurance Co Ltd & United India Insurance Co. Ltd

INTERNAL CONTROL SYSTEM AND ITS ADEQUACY

The Company has instituted adequate internal controls, managed by professionals. The control mechanism duly supported by efficient integrated software ensures a proper documentation, accounting, reporting and safeguarding of assets. The Company has also well defined and established system of internal audit, which is periodically reviewed by the audit committee and steps taken to strengthen the control measures. The management and audit committee of the Board periodically reviews the observations and findings of the statutory auditors and ensures adherence to the well laid down policies, guidelines and procedures forming part of the internal control system.

FINANCIAL PERFORMANCE WITH RESPECT TO OPERATIONAL PERFORMANCE

A satisfactory business performance with average volume growth in key products and business units, combined with productivity improvement, cost management and working capital management have contributed to the good operating results for the year. Also sharp focus on cost and margins has resulted in enhanced operational efficiency.

MATERIAL DEVELOPMENT IN HUMAN RESOURCES/INDUSTRIAL RELATIONS FRONTS

The industrial relations have been satisfactory in the Registered Office Cum Factory and at the Corporate Office. There was no loss of man-days during the year. A lot of initiatives have been undertaken by the Human Resource Department during the year. Apart from improvement in the system to align the compensation to the performance of the employees, steps are being taken by the management to provide training both in-house and at recognized institutes to enhance the effectiveness of the employees. INVENTORIES

Inventories of finished goods, raw materials, and work in progress are carried at lower of cost or net realisable value. The cost of inventories of items that are not ordinarily interchangeable are assigned by specific identification of their individual costs. The cash flows from regular revenue generating, investing & financing activities of the company are segregated.

REVENUE RECONGNITION:

Sales turnover for the year includes sales value of goods and other recoveries such as Octroi, Transportation Charges etc, but excludes excise duty and VAT. Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured. Revenue from sale of goods is recognised when the significant risks and rewards of ownership of the goods have passed to the buyer.

RETIREMENT BENEFITS:

The Company's contribution to Provident Fund and ESIC is accounted on accrual basis and charged to Profit and Loss Account. The Company accounts for liability for Gratuity of employees on the basis of Actuarial Valuation. Gratuity is payable to Employees after Retirement or Resignation of Employees; whereas there is no defined policy enabling the employees to avail encashment of leave.

IMPAIRMENT OF ASSETS

An asset is treated as impaired when the carrying cost of the Asset exceeds its recoverable value. An impairment loss is charged to the Profit & Loss account in the year in which an asset is identified as impaired. The Impairment loss recognized in prior accounting periods is increased / reversed where there has been change in the estimate of recoverable amount. The recoverable value is the higher of the net selling price and value in use.

USE OF ESTIMATES

The preparation of financial statements requires management to make estimates and assumption that affect the reported amounts of assets and liabilities on the date of financial statements, the reported amount of revenues and expenses and the disclosures relating to contingent liabilities as on the date of financial statements. Actual results could differ from those of estimates. Any revision in accounting estimates is recognized in accordance with the respective accounting standard.

EARNINGS PER SHARE

The Company reports basic and diluted earnings per share in accordance with AS-20 "Earnings Per Share". Basic earnings per share are computed by dividing the net profit or loss for the period by the weighted average number of Equity Shares outstanding during the period. Diluted earnings per share is computed by dividing the net profit or loss for the period by the weighted average number of Equity Shares outstanding during the period as adjusted for the effects of all dilutive potential equity shares.

PROVISIONS, CONTINGENT LIABILITIES AND CONTINGENT ASSETS

Contingent liabilities as defined in AS-29 "Provisions, Contingent Liabilities and Contingent Assets" are disclosed by way of notes to accounts. Provision is made if it becomes probable that an outflow of future economic benefits will be required for an item previously dealt with as a contingent liability.

TAXES ON INCOME:

Tax expenses comprise both current & deferred taxes.

Current tax is determined as the tax payable in respect of taxable income for the year.

Deferred tax for the year is recognised on timing difference; being difference between taxable incomes and accounting income that originate in one period and are capable of reversal in one or more subsequent periods.

Deferred tax assets and liabilities are measured assuming the tax rates and tax laws that have been enacted or substantially enacted by the Balance Sheet date. Deferred tax assets are recognised and carried forward only if there is a reasonable / virtual certainty of realisation.

LEASES

Assets leased by the Company in its capacity as lessee, where the Company has substantially all the risks and rewards of ownership are classified as finance lease. Such a lease is capitalized at the inception of the lease at lower of the fair value or the present value of the minimum lease payments and a liability is recognized for an equivalent amount. Each lease rental paid is allocated between the liability and the interest cost so as to obtain a constant periodic rate of interest on the outstanding liability for each year.

1. Lease arrangements where the risks and rewards incidental to ownership of an asset substantially vest with the lessor, are recognized as operating leases. Lease rentals under operating leases are recognized in the statement of profit and loss on a straight-line basis.

2. The value on realization of current assets in the ordinary course of business would not be less than the amount at which they are stated in the Balance Sheet. According to the management, provision for all the known liabilities is adequate.
