ANNEXURE VII: - MANAGEMENT DISCUSSION AND ANALYSIS REPORT**INDUSTRY STRUCTURE AND DEVELOPMENT**

The Indian Paper Industry accounts for about approx 2.6% of the world's production of paper. The estimated turnover of the industry is INR 50,000 crore approximately and its contribution to the exchequer is around INR 4500 crore. The industry provides employment to more than 0.5 million people directly and 1.5 million people indirectly. Most of the paper mills are in existence for a long time and hence present technologies fall in a wide spectrum ranging from oldest to the most modern.

As per industry guesstimates, over all paper consumption has now touched 13.10 million tons. The per capita consumption is only at 10/11 kg. India is the fastest growing market for paper globally and it presents an exciting scenario; paper consumption is estimated to touch 13.95 million tons by 2015-16. The futuristic view is that growth in paper consumption would be in multiples of GDP and hence an increase in consumption by one kg per capita would lead to an increase in demand of 1 million tons.

The Kay Power and Paper Ltd is paper mill which is strategically located at Satara with all infrastructure facilities. The company is manufacturing the Kraft Paper by Indian and imported waste paper.

Over the years company has focused on stringent quality measures, which help to meet all our customers' needs. Our focus on quality has helped us in building strong relationship with customers and eliminated supplementary cost.

OPPORTUNITIES AND THREATS:

The Low per capita consumption of paper/paper board in the country is bound to increase with the growth in the GDP, rising income of middle class, and a ban on plastic packing

under the Swach Bharat Mission.

The company has adequate infrastructure facilities such as land, water & power. Apart from this company has the flexibility of various grades of paper, which gives the company distinct competitive advantage.

The availability of raw material has always been a matter of concern for the industry. In India about 850,000-1,000,000 tons of waste paper is being currently recovered annually. The recovery rate works out to about 20% which is much lower in comparison with 65% recovery achieved by many global players. Low recovery is on account of alternate use of paper in wrapping, packing, etc. The utilization rate of recovered fibre is only 47%. Paper mills are heavily dependent on imported waste paper which commands exorbitant price due to inadequate availability. India needs a well-defined and aggressive system for collection, sorting, grading and utilization recyclable waste paper to contain imports.

At the same time, it may face competition due to proliferation of capacities in the country.

SEGMENT-WISE OR PRODUCT WISE PERFORMANCE

The Company has two divisions 1) Paper Division and 2) Power Division. The power division was not operational throughout the year hence segment-wise performances are not given.

Additional comments from the board/ audit committee chair:	Provision for terminal benefits to employees like gratuity is not made in view of the heavy losses and due to the skeleton eligible staff strength; no actuarial working is taken to avoid extra expenditure for it.
