OPERATIONS:

The year under review was a very satisfying and a successful year. The Company posted sales of Rs. 20.27 crores, the highest achieved since its inception; registering top line growth of 3.71% over previous year. The export sales constituted 94.90% of total sales, recording growth of 4.65% over the preceding year. This performance is the outcome of the reputation that your Company continues to enjoy among its overseas customers because of the globally acclaimed quality of its products, product innovation, timely deliveries, prompt communication and quick response in developing samples.

The profit before tax of ₹ 486.60 lac during the year was 48.14% higher compared to ₹ 328.47 lac recorded in the previous year. This is a land mark improvement in profit after absorbing the input cost escalations, is due to favourable exchange rates caused by weakening of ₹ (rupee) against US Dollar (USD) and Great Britain Pound (GBP); and improved product mix achieved by your Company by initiating efforts to reach out to some niche markets, who need exclusive products and offer higher realisation and higher profit margin per pair of socks. The average selling price for export sales during the year was ₹ 42.18 per pair of socks against ₹ 36.03 per pair of socks achieved in the previous year - a rise of 17.07%. The Company is focusing on improving high margin business by debottlenecking the constraints in manufacturing process.

Prices of dyed cotton yarn which constitute 25% of cost of production of your Company remained highly volatile during the year. Besides, there was rise in the prices of other raw materials, and increase in the cost of employees' remuneration, power, fuel and overheads.

It has been the consistent policy of your Company to plough back a substantial part of surplus profits every year to purchase new machines and equipment to enhance the production base and also to replace some old machines which had become cost ineffective. This helps your Company to maintain its competitiveness and achieve better quality. During the year, Twenty (20) sock knitting machines were installed and Six (6) existing machines were replaced. Total capital outlay was ₹ 141.84 lac.

The comparative performance highlights for last five years are as under:

ANNEXURE "A" TO THE DIRECTORS' REPORT**MANAGEMENT DISCUSSION AND ANALYSIS****Overview:**

Global economic scenario remained turbulent in the year under review, especially in Europe where 90% of your Company's exports are shipped. The uncertainties continued to remain in the current year as well and this may further moderate growth if economy of the countries purchasing your Company's products does not improve.

India's GDP growth decelerated for the second year in succession to 4.5%, due to abysmal performance in all sectors, especially in the manufacturing sectors.

In the fiscal year ended March 2014, total outbound shipments from India touched \$ 312 billion, recording nominal growth of 3.96% over the last financial year.

Despite odds, the performance of your Company in the year under review is noteworthy when viewed in the backdrop of an extremely challenging environment, especially during the second half of the year.

During the year, the Company carried out sales in the following geographical segments: (In ₹)

	United Kingdom	Switzerland	UAE	India	Rest of the World	Total
Revenues	84,732,521	85,762,750	18,571,139	10,330,685	3,286,752	202,683,848

Industry Structure and Development

Indian textile industry including hosiery and clothing accounts for nearly 11% share of the Country's total export basket and employs 35 million people. The industry contributes around 5% to Indian GDP and 11% to manufacturing production. For the Indian economy, it is the second largest generator of employment, after agriculture.

Textiles and apparels exported from India consume mainly indigenous inputs and are, therefore, big earners of net foreign exchange. This helps the country reduce its current account deficit.

Opportunities

Your Company is well poised to seize opportunities available in the sock knitting industry on account of its state-of-the-art production facilities, technical expertise, good quality culture and emphasis on product innovation and growth potential.

The socks produced by your Company are meeting international quality norms of comfort, stretch, sizing, skin care and other parameters essential for inner wear intimate apparel. They also meet the fashion demands in terms of design, different knits and multiple shades. The socks manufactured by your Company are sold in Supermarket Chains and upper end Retail Stores.

With the era of domination of the world's textiles, including hosiery items, originating in China, decreasing slowly, the base is shifting to India and other Emerging/Developing Countries. This augurs well for Indian Companies in the textile and hosiery sector.

The domestic market for textiles, including clothing and hosiery items, has great growth potential for the following reasons;

- (i) Higher disposable incomes: India's per capita income is estimated at USD 1200 per annum and rising.
- (ii) Favourable demographic profile: The proportion of India's economically productive population (15-16 years) is rising; almost 50% of its population, below 26 years, catalyses textile consumption.
- (iii) Higher Urban growth: India's urban (and related) income is rising rapidly, strengthening apparel consumption.

All major overseas customers of your Company insist on social audits to be carried out in the factory at least once in two years, by the internationally acclaimed "Business Social Compliance Initiative Agencies". Such audits cover compensation to employees, health, safety, environment and management practices. New customers also insist on such audits to be conducted, before they start the business. The compliance of such audits brings healthy and ethical culture in working and creates goodwill of the Company among its clients. Your Company has successfully complied with many such audits and has thus ensured continuance of business with major clients for long periods.

Threats and Risks:

Your Company derives over 94 to 95 % of its revenue from the export market. Any problem of economic slowdown or decline in demand in the country of buyer of your Company's product will have adverse impact on the working of Company.

Your Company is potentially exposed to any changes in exchange rates, tariff, duty drawback rates, and also the Government Policies of the Countries which purchase your Company's product.

In the international market, countries like Turkey have developed an edge over the Indian manufacturers due to reduced freight cost and much reduced delivery time. Besides, Turkey enjoys exemption of 10.6% custom duty in relation with EU countries. This has posed a threat to the Indian socks suppliers and may pressurise them to reduce prices and thereby squeeze their margins. Even Bangladesh enjoys exemption in import duty by virtue of its being a less developed country and exports goods at prices, which Indian socks suppliers cannot compete.

The Company is exposed to risks attached to various statutes and regulations. The Company is mitigating these risks through regular reviews of legal compliances, through internal as well as external compliance audits.

Dyed cotton yarn is the main constituent of raw materials used by your Company. The prices of cotton have been highly volatile and can have adverse impact on the profits of your Company.

Cheap imports of socks from China are posing problem of fierce competition to Indian products.

However, because of your Company's good reputation for quality products, timely delivery, better communication and fair business practices, foreign buyers have been patronizing your Company regardless of benefits that accrue to them from the other countries.

Internal Control System and their Adequacy

Your Company believes in formulating adequate and effective internal control systems and implementing the same to ensure that assets and interests of the Company are safeguarded and reliability of accounting data and accuracy are ensured with proper checks and balances. The Internal control system is improved and modified continuously to meet the changes in business conditions, statutory and accounting requirements. The Audit Committee of the Board of Directors actively reviews the adequacy and effectiveness of internal control system and suggests improvements for strengthening them. The Company has a sound Management Information System which is an integral part of the control mechanism. The Audit Committee of the Board of Directors and Statutory Auditors are periodically apprised of the internal audit findings and corrective actions taken.

Human Resources and Industrial Relations

Industrial relations continue to remain cordial and peaceful at the manufacturing unit at Navsari. There are 127 employees working at the manufacturing unit for a common objective of Profit, Growth and Excellence.

We conducted our audit in accordance with the Standards on Auditing issued by the Institute of Chartered Accountants of India. Those Standards require that we comply with the ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and the disclosures in the financial statements. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Company's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of the accounting estimates made by the Management, as well as evaluating the overall presentation of the financial statements.

The financial statements of the Company have been prepared in accordance with the Generally Accepted Accounting Principles in India (Indian GAAP) to comply with the Accounting Standards notified under Section 211(3C) of the Companies Act, 1956 (Accounting Standards) Rules, 2006 (as amended) ("the 1956 Act") (which continue to be applicable in respect of Section 133 of the Companies Act, 2013 ("the 2013 Act") in terms of General Circular 15/2013 dated 13 September, 2013 of the Ministry of Corporate Affairs) and the relevant provisions of the 1956 Act/ 2013 Companies Act, as applicable 1956. The financial statements have been prepared on accrual basis under the historical cost convention. The accounting policies adopted in the preparation of the financial statements are consistent with those followed in the previous year.

2.2 Use of Estimates:

The preparation of the financial statements in conformity with Indian GAAP requires the Management to make estimates and assumptions considered in the reported amounts of assets and liabilities (including contingent liabilities) and the reported income and expenses during the year. The Management believes that the estimates used in preparation of the financial statements are prudent and reasonable. Future results could differ due to these estimates and the differences between the actual results and the estimates are recognised in the periods in which the results are known / materialise.

2.3 Inventories:

Inventories are valued at the lower of cost on weighted average basis and the net realisable value after providing for obsolescence and other losses, where considered necessary. Cost includes all charges in bringing the goods to the point of sale, including octroi and other levies, transit insurance and receiving charges. Work-in-progress and finished goods include appropriate proportion of overheads and, where applicable, excise duty.

2.4 Fixed Assets:

Fixed assets are carried at cost less accumulated depreciation / amortisation and impairment losses, if any. The cost of fixed assets comprises its purchase price net of any trade discounts and rebates, any import duties and other taxes (other than those subsequently recoverable from the tax authorities), any directly attributable expenditure on making the asset ready for its intended use, other incidental expenses and interest on borrowings attributable to acquisition of qualifying fixed assets up to the date the asset is ready for its intended use.

2.5 Depreciation:

- a Depreciation has been provided on the straight-line method as per the rates prescribed in Schedule XIV to the Companies Act, 1956.
- b Leasehold land is amortized over the period of lease.

2.6 Impairment:

At the end of each year, the company determines whether a provision should be made for impairment loss on fixed assets by considering the indication that an impairment loss may have occurred in accordance with Accounting Standard 28 "Impairment of Assets". Where the recoverable amount of any fixed assets is lower than its carrying amount in accordance with AS 28, a provision for impairment loss on fixed assets is made for the difference.

2.7 Leases:

- a Assets leased by the Company in its capacity as a lessee, where substantially all the risks and rewards of ownership vest in the Company are classified as finance leases. Such leases are capitalised at the inception of the lease at the lower of the fair value and the present value of the minimum lease payments and a liability is created for an equivalent amount. Each lease rental paid is allocated between the liability and the interest cost so as to obtain a constant periodic rate of interest on the outstanding liability for each year.
- b Lease arrangements where the risks and rewards incidental to ownership of an asset substantially vest with the lessor are recognised as operating leases. Lease rentals under operating leases are recognised in the Statement of Profit and Loss on a straight-line basis.

2.8 Borrowing Cost:

Borrowing cost, if any, that are attributable to the acquisition or construction of qualifying assets are capitalized as part of the cost of such assets. A qualifying asset is one that necessarily takes a substantial period of time to get ready for its intended use or sale. All other borrowing costs are charged to revenue.

2.9 Foreign Currency Transactions:

Transactions in foreign currency are recorded at the original rates of exchange in force at the time the transactions are effected. Monetary Items denominated in foreign currency are restated using the exchange rates prevailing at the date of the Balance Sheet. The exchange difference between the rates prevailing on the date of transactions on the date of settlement as also on translation of Monetary items at the end of the year, is recognised as income or expense, as the case may be.

2.10 Employee Benefits:**a Defined Contribution Plan:**

Contributions under Defined Plans in the form of Provident Fund are recognised in the Statement of profit and loss in the period in which the employee has rendered the service.

b Defined Benefit and Other Long-term Benefit Plan:

For defined benefit plans in the form of gratuity fund, the cost of providing benefits is determined using the Projected Unit Credit method, with actuarial valuations being carried out at each balance sheet date. Actuarial gains and losses are recognised in the Statement of Profit and Loss in the period in which they occur. Past service cost is recognised immediately to the extent that the benefits are already vested and otherwise is amortised on a straight-line basis over the average period until the benefits become vested. The retirement benefit obligation recognised in the Balance Sheet represents the present value of the defined benefit obligation as adjusted for unrecognised past service cost, as reduced by the fair value of scheme assets. Any asset resulting from this calculation is limited to past service cost, plus the present value of available refunds and reductions in future contributions to the schemes.

c Other Benefits:

The Company's liability towards provision for Compensated Absences is determined on the basis of actuarial valuation being carried out at each Balance Sheet date using the Projected Unit Credit Method. The retirement benefit obligation recognised in the Balance Sheet represents the total of present value of the defined benefit obligation as reduced by unrecognised past

service cost. Actuarial gains and losses are recognised immediately in the Statement of profit and loss in the period of occurrence of such gains and losses. Past service cost is recognised as an expense on a straight line basis over the average period until the benefits become vested. To the extent that the benefits are already vested immediately following the introduction of or changes to a defined benefit plan, past service cost is recognised immediately.

2.11 Revenue Recognition:

Sales of goods are recognised, net of returns and trade discounts, on transfer of significant risks and rewards of ownership to the buyer, which generally coincides with the delivery of goods to customers. Sales include excise duty but exclude sales tax and value added tax. In appropriate circumstances, revenue (income) is recognised when no significant uncertainty as to determination or realisation exists.

2.12 Income Taxes:

Deferred income tax reflect the current period timing differences between taxable income and accounting income for the period and reversal of timing differences of earlier years/period. Deferred tax assets are recognised only to the extent that there is reasonable certainty that sufficient future income will be available except that deferred tax assets arising on account of unabsorbed depreciation and losses are recognised if there is virtual certainty that sufficient future taxable income will be available to realize the same.

Tax on distributed profits payable in accordance with the provision of Income Tax Act, 1961 is disclosed in accordance with the Guidance Note on Accounting for Corporate Dividend Tax issued by the Institute of Chartered Accountants of India. Credit available in respect of Minimum Alternate Tax under the Income Tax Act, 1961 has been recognised in accordance with the Guidance Note on Accounting for Credit available in respect of Minimum Alternate Tax under the Income Tax Act, 1961.

2.13 Investments:

Long-term investments (excluding investment properties), are carried individually at cost less provision for diminution, other than temporary, in the value of such investments. Current investments are carried individually, at the lower of cost and fair value. Cost of investments include acquisition charges such as brokerage, fees and duties.

2.14 Provisions and Contingencies:

A provision is recognised when the Company has a present obligation as a result of past events and it is probable that an outflow of resources will be required to settle the obligation in respect of which a reliable estimate can be made. Provisions (excluding retirement benefits) are not discounted to their present value and are determined based on the best estimate required to settle the obligation at the balance sheet date. These are reviewed at each balance sheet date and adjusted to reflect the current best estimates. Contingent liabilities are disclosed in the Notes. Contingent assets are not recognised in the financial statements.

2.15 Operating Cycle:

Based on the nature of products / activities of the Company and the normal time between acquisition of assets and their realisation in cash or cash equivalents, the Company has determined its operating cycle as 12 months for the purpose of classification of its assets and liabilities as current and non-current.
