OPERATIONS:

Your Company has continued to grow steady but substantially due to the concerted marketing efforts in new business centers, new product, and prudent recovery system. Company has maintained steady growth in operations and profit during fiscal 2013-14. Total revenue including income from operations and other income increased to Rs.1112.94 lacs in the current year from Rs.1055.63 lacs in previous year. Accordingly, the profit before tax increased from Rs.546.15 lacs in the previous year to Rs.550.10 lacs in the current year 2013-14, registering marginal growth. After providing tax of Rs.175.00 lacs in the current year (Rs.177.00 lacs in previous year) profit after tax remained 372.53 lacs

The Company's strategy to focus for the business in smaller places and specialization in two/three wheeler segment has remained unchanged. FUTURE OUTLOOK/ MANAGEMENT DISCUSSION AND ANALYSIS:

According to the advance estimates of national income for the year 2013-14 the growth of Gross Domestic Product (GDP) during 2013-14 is estimated at 4.9% as compared to growth rate of 4.5% in the year 2012-13 (previous year). The Agriculture sector comprising 'agriculture, forestry and fishing' sectors is likely to show a growth of 4.6% during 2013-14 as against the previous year's growth rate of 1.4 . In Industry sector de-growth of 0.2% is estimated in the 'manufacturing' sector as compared to the growth of 1.1% in the previous year. The sector 'financing, insurance, real estate and business services' is expected to show a growth rate of 11.2% as compared to growth rate of 10.9% in the previous year.

The early part of the Financial Year 2013-14 witnessed some volatility in the emerging markets in response to the Federal Reserve's tapering, but the global economic scenario has since remained stable. While the recovery in advanced economies notably the US, has gathered steam, economic activity in most emerging market economies has remained below par.

INDIAN ECONOMY

For the first time in 25 years, the Indian economy witnessed its second successive year of below 5% growth, driven predominantly by a decline in financial savings, low business confidence and sluggish investment demand over successive quarters, resulting in a sharp deceleration in industrial growth. Rarely has India seen a slowdown of such length and depth, and the recovery is likely to be a slow and long process.

India's exports, buoyed by a weakened rupee, witnessed a revival of Agricultural GDP grew by 4.9% during April – December 2013 and with good winter rainfall and healthy reservoir storage, food grain production is estimated to be a record 263.2 million tonnes in 2013-14. Unseasonal rainfall in March is said to have caused some damage to crops in parts of Central and South India but the overall impact is unlikely to be significant. This is very important in the context of the company business as its majority business is in rural area and recovery is heavily dependent on this factor.

High interest rates, stubborn retail inflation and lack of policy direction, combined with uncomfortably high fiscal and current account deficits (CAD), left the Government with very few options. Faced with compulsions to rein in the fiscal deficit, government put the brakes on Plan expenditure, as a result of which investment and consumption growth declined to their lowest levels in 11 years.

Faced with sticky retail inflation, RBI was compelled to increase the repo rate by 75 bps during the year. However, with retail inflation, as measured by the CPI, dropping from 9.1% in December 2013 to 6.7% in February 2014, RBI held the policy rates steady in April 2014. Though both the fiscal deficit and CAD have narrowed, many believe that the reduction in the fiscal deficit is merely an accounting adjustment, which will catch up in the current financial year. The Balance of Payments situation however, appears to be comfortable.

The year 2013-14 witnessed continued slowdown in the automobile segment with the overall automobile segment witnessing growth of a mere 3.53%. Commercial Vehicles segment declined by 20.23% over the previous year, Passenger Vehicles declined by 6.05%, Three-wheelers by 10.90% and only Two-wheelers grew by 7.31% . In 2013-14, the domestic two-wheeler (2W) industry had recorded sales volumes of 14.8 million units, a growth of 7.3% over the previous year.

Our mission is to be sound NBFC among regional players in terms of product offerings, technology, service levels, risk management and audit and compliance etc. The objective is to continue building sound customer / franchises across distinct businesses so as to be a preferred provider of NBFC services for its target retail and customer segments, and to achieve a healthy growth in profitability, consistent with the company's risk appetite.

The company's range of retail financial products and excellent services and branches net work is fairly exhaustive to meet up the coming challenges. The objective is continue to build sound customer/dealer friendly atmosphere to achieve healthy growth in profitability, consistent with company's risk appetite. The company also emphasizes to develop innovative products and services that attract its Customers, Increase its market share as NBFC and financial services industry by following a disciplined growth strategy focusing on balancing quality and volume growth while delivering high quality customer service, maintain reasonably good standards for asset quality through disciplined credit risk management; and continue to develop products and services that reduce its cost of funds; and Focus on healthy earnings growth with low volatility. Our company growth is more important especially looking to the concentration in rural area for the business. The company grew its retail assets portfolio in a well balanced manner focusing on both returns as well as risk. Company intends to follow conservative view in the coming years. Company also expects continuous threats to small/medium Company like us, from global/giant players in the retail finance market especially with large size/volume, lower rate of interest and ability to sustain in the market is inevitable for the company to sustain in the market.

Overall, in spite of various pros and cons your company has demonstrated outstanding achievement in terms of earned valued and well built market presence. Your company is cash rich, has better liquidity, improved working capital and it has shown its readiness to accept market challenges. All of these are signs of strong fundamentals which the company has been able to establish with the help of batter and professional management support.

RISK MANAGEMENT /SWOT ANALYSIS

Your company has comprehensive Risk Management System towards identification and evaluation of all potential business risks. Management has developed Risk Management Plan and reviews its implementation regularly. The company is exposed to external and internal risk associated with its business. To counter these risks, the company continues to broaden its product portfolio, increase customer profile and geographic reach.

Taking on various types of risk is integral to the NBFC business. Sound risk management and balancing risk-reward trade-offs are critical to a company's success. Business and revenue growth have therefore to be weighed in the context of the risks implicit in the company's business strategy. Of the various types of risks your company is exposed to, the most important are credit risk, market risk including liquidity risk and price risk and operational risk. The identification, measurement, monitoring and management of risks accordingly remain a key focus area for the Company. For credit risk, appropriate distinct policies and processes are in place for the retail businesses. Overall portfolio diversification and reviews also facilitate mitigation and management. Especially a small capital based company faces multiple problems due to poor recovery systems. The specific NPA provisions that the company has made continue to be more conservative than the regulatory requirements. This will help the company to maintain high standards for assets quality through disciplined credit risk management.

However, while the balance of risks in the last financial year were largely external, rising domestic interest rates as well as firm inflationary pressures have meant that domestic factors have now emerged as points of concern for growth in the current fiscal year.
