MANAGEMENT DISCUSSION AND ANALYSIS REPORT

1. INDUSTRY STRUCTURE AND DEVELOPMENTS

The year 2014 - 15 began with multiple macroeconomic challenges, including rising inflation, falling industrial output and a sliding rupee. The Reserve Bank of India (RBI) had to intervene to stem the rupee's slide by increasing the marginal standing facility rate and the bank rate by 200 bps each to 10.25%, resulting in a pullback from the bond market by frequent issuers such as Non Banking Financial Companies (NBFCs). By the first quarter of 2015, there were signs of a moderation in inflation, leading to the RBI cutting the repo rate by 50 bps to 7.50%.

Overall GDP growth in the fiscal settled at around 7.4%, mostly driven by the industry and services sector. Wholesale Price Index has registered moderation at (2.33%), while Consumer Price Index has moderated to 5.17% up to March 2015. Structural shifts in inflation have occurred due to lower oil prices, deceleration in agriculture prices & wages and improved household inflation expectations. The trading environment is becoming more challenging as the buoyancy of Indian exports has declined with respect to world growth.

The new government has a rather pragmatic vision of inclusive growth with thrust on infrastructure, measures to revive the investment cycle, boost to savings, 'Make in India' initiative, ease of doing business and boosting entrepreneurship being major focus areas of the government

The NBFCs were impacted by a moderation in rate of asset growth, rising delinquencies resulting in higher provisioning thereby having a negative impact on their profitability. However conservative liquidity management continues to provide comfort to the credit profile of well run NBFCs.

2. OPPORTUNITIES AND THREATS

The Monetary Policy Framework Agreement between the Government of India and Reserve Bank of India is a vital step to keep inflation below 6%. This is also supported by the steep decline in the international crude oil prices, which controlled food inflation and increased consumption of the basic commodities in rural areas. Government has announced a number of policy measures to achieve the projected GDP growth in 2015-16 like approval of large infrastructure projects, addressing challenges of mining and power sectors, increasing foreign investment limits in Insurance, Railways, Defence manufacturing and Aerospace. Growth in agricultural sector output will drive demand from rural areas. In view of the aforesaid initiatives of the Government, NBFCs can also look for growth in asset financing and collateral backed lending activities.

Your Company is examining various new avenues of business in financial activities. The present business of your Company is investment and financing.

The biggest challenge before NBFCs is the stiff competition from banks and financial institutions, due to their ability to raise low cost funds which enables them to provide funds at much cheaper rate. Besides, increased purview of monitoring by regulatory authorities increase the threat of losing the essence of NBFCs.

The Financial statements of all the subsidiaries considered in the consolidated accounts are drawn up to March 31, 2015.

a. Basis of preparation of Accounts

The financial statements are prepared on accrual basis, following the historical cost convention in accordance with the Generally Accepted Accounting Principles (GAAP), which are consistently adopted by the Company, and in compliance with the Accounting Standard issued by the Institute of Chartered Accountants of India and provisions of the Companies Act, 2013, to the extent applicable.

b. Use of Estimates

The presentation of financial statements in conformity with GAAP requires estimates and assumptions to be made that affect the reported amount of assets and liabilities and disclosure of contingent liabilities on the date of the financial statements. Any differences between the actual results and the estimates are recognized in the period in which the results are known / materialized.

c. Fixed Assets

Fixed Assets are stated at cost of acquisition less accumulated depreciation and impairment loss, if any.

d. Depreciation

The Company follows the Written Down Value method of Depreciation (WDV). The Rates of Depreciation charged on all fixed assets are those specified in Schedule XIV to the Companies Act, 2013.

e. Investments

Long Term investments are stated at cost after providing for any diminution in value, if such diminution is of permanent nature.

Current Investments are stated at lower of cost or market value.

f. Revenue Recognition

Significant items of Income and Expenditure are recognised on accrual basis, except those with significant uncertainties.

Dividend income on investments is accounted for when the right to receive the payment is established by Balance Sheet date.

Income on NPI is recognised on realisation.

g. Employee Benefits

Short-term employee benefits are recognized as an expense at the undiscounted amount in the Profit and Loss Account for the year in which the related service is rendered.

Post employment and other long term employee benefits are recognized as an expense in the Profit and Loss Account for the year in which the employee has rendered services. The expense is recognized at the present value of the amount payable determined using actuarial valuation techniques. Actuarial gains and loss in respect of post employment and other long term benefits are charged to the Profit and Loss Account.

h. Provision for Current and Deferred Tax

Provision for current tax is made after taking into consideration benefits admissible under the provisions of the Income Tax Act, 1961. Deferred tax resulting from "time differences" between taxable and accounting income is accounted for using the tax rates and laws that are enacted or substantively enacted as on Balance Sheet date. The effect of deferred tax asset & liabilities of a change in tax rates is recognised in the Profit & Loss Account in the year of change.

NOTES ON CONSOLIDATED FINANCIAL STATEMENT FOR THE YEAR MARCH 31, 2015

i. Earnings per share

Basic Earnings per share are calculated by dividing the net profit or loss for the period attributable to equity shareholders. For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

j. Derivative Instruments

Derivative financial instruments are initially recorded at their fair value on the date of the derivative transaction and are re-measured at their fair value at subsequent Balance Sheet dates. Changes in the fair value of derivatives are recorded in the Profit & Loss Account.
