MANAGEMENT DISCUSSION AND ANALYSIS

Industry Structure and Development

The Spinning Industry, which is highly capital intensive, marks the initial stage of cotton textiles and apparel value chain. For the sustainability and financial viability of the spinning industry, exports of cotton yarn are of very much importance. There has been over capacity of ~ 30% in the Indian spinning sector. Cotton yarn output in India has remained in the range of 4.1 - 4.2 million tonnes during FY 2017 to FY 2019 and further decreased by 4% to 3.4 million tonnes during first 10 months of FY 2019-20. The demand for cotton yarn both in domestic and international markets was very weak during FY 2019-20. There was sharp decline of ~ 23% in cotton yarn export from India from April 2019 to January 2020, with a drastic fall of ~ 42% to China.

The cotton production has declined by 15.3% to 5.3 million tonnes in Cotton Season (CS) 2018-19 due to unfavourable monsoon and pink bollworm attack in Maharashtra and Gujarat. However, during the CS 2019-20, starting from 1st October, 2019, cotton output in India is estimated to grow by ~13.6%. Domestic consumption of cotton was around 331 lakh bales in 2019-20 vis a vis 316 lakh bales in the previous year.

Domestic cotton prices have decreased as compared to cotton prices in FY 2018-19. This was mainly due to fall in international cotton prices and weak export scenario. Cotton prices slumped to its lowest, in recent times, in the month of October 2019, thereafter remained stable till January 2020 and again declined due to outbreak of COVID-19 Pandemic. The cotton prices were volatile and ruled higher as compared to yarn price. Cotton yarn prices did not correspond positively, resulting in pressure on spinners' margins.

Operational and Financial Performance

FY 2019-20 was yet another year of major challenges for spinning industry and the Company. Many cotton spinning companies could not sustain due to multiple headwinds over the years and were shut down. During the year under review, the demand for cotton yarn in domestic and export markets was sluggish and there was sharp decline in cotton yarn exports from India. The cotton prices, though lower as compared to FY 2018-19, were still higher and volatile as compared to yarn prices. A weak demand, declining cost competitiveness and huge disparity between cotton and yarn prices have impacted the business of the Company. At the end of the year FY 2019-20, the outbreak of COVID-19 aggravated the challenges of spinning industry. It is pretty evident that it is going to be very difficult for standalone spinning mills to sustain themselves, unless they are truly modernized and are managed efficiently and cost effectively.

Due to abovementioned external factors, the operational and financial performance of your Company was adversely affected. During FY 2019-20, Revenue from operations declined by around 15% from ₹ 8,226.07 Lakhs in FY 2018-19 to ₹ 6,941.13 Lakhs in FY 2019-20. The FOB value of exports also declined to ₹ 3515.48 lakhs as compared to ₹ 3,190.51 lakhs in previous year. Fall in revenue, disparity between cotton and yarn prices and weak demand for cotton yarn led to a higher net loss of ₹ 268.25 Lakhs for the year ended 31st March 2020 as compared to net loss of ₹ 65.61 lakhs in previous year.

As regards ratios for the year ended 31st March 2020, the debt equity ratio and interest coverage ratio are not applicable as the Company does not have any debts/borrowings. There were significant changes i. e. (change of 25% or more) as compared to the Financial Year ended 31st March, 2019 in the Debtors Turnover ratio due to reduction in receivables. Further, there was more than 25% change in Operating Profit margin, Net Profit margin (%) and Return on Net Worth (%), due to reduced Turnover and less margins in comparison to the year ended 31st March, 2019.

IMPACT OF COVID-19

The manufacturing plant of the Company at Kolhapur was temporarily closed from March, 23, 2020 in order to contain the spread of COVID-19 pandemic as per Central/ State Government directions. Thereafter, as per the directions received from State Government/ Local Authorities, partial manufacturing operations were resumed from May 6, 2020.

Due to temporary stoppage of operations, sales for the year 2019-20 were impacted to the extent of around ₹ 150 lakhs, thereby increasing the inventory. The immediate impact of the lockdown was the slump in demand for our products and

consequently, declining prices. The Company has no short term or long term borrowings. However, thin operating margins are expected to exert adverse pressure on Company's liquidity.

The Company has taken all steps to comply with government directions and guidelines to contain spread of COVID-19 viz. social distancing norms, wearing of face masks, regular sanitisation of premises, thermal screening before entering workplace, appropriate training to workmen and staff and other precautionary measures required to be taken in the prevailing situation to ensure the health, safety of workers and staff at workplace.

Opportunities, Threats, Risks and Concerns

The condition of the spinning industry is dependent on the vagaries of cotton fibre production in the country. The acreage, output, rainfall and minimum support prices always have bearing on the fortunes of the industry from time to time. Adequate availability of cotton at right price is very much crucial for spinning mills.

Some of the threats faced by spinning industry include high minimum support price, disparity between cotton and yarn price, overcapacity in industry, duty challenges in export market & inadequate export incentives, weak demand of cotton yarn, fibre contamination and high moisture content, high manufacturing costs due to high capital cost and power tariff, lack of modernization incentives under TUFS and low labour productivity.

The Cotton yarn prices do not move in tandem with that of cotton, as demand for cotton yarn is always over shadowed by higher supply. Cotton prices in India do not move in sync with international cotton prices, which makes hedging difficult. The rise in international trade and the consequent integration of domestic cotton markets with global markets expose the domestic stakeholders to international price fluctuations and the risks resulting therefrom. For Company's business, cotton is the key raw material/ commodity and the company is exposed to price variation in cotton. The Company has in place Commodity Risk Management Policy. The Company regularly monitors cotton prices and take appropriate decisions to minimize the risks. As regards foreign exchange risks, the Company evaluates foreign exchange rate exposure arising from these transactions and take appropriate steps to mitigate such exposure and to minimize the impact of volatility in foreign exchange fluctuations on the earnings.

China's reduced imports of cotton yarn from India are continuing and the trend is expected to continue in near future thus overall yarn demand is projected to remain lower. China, the largest importer of cotton yarn, has replaced India with Vietnam and Indonesia, as they have duty-free access. Further, Indian exports of cotton yarn are subject to a 4% duty in the EU, while Vietnam and Indonesia have a 3.2% tariff and least developed countries (LDCs) get duty-free access. Therefore such favoured policy to some of the Asian countries and LDCs has made Indian market uncompetitive. The Indian cotton spinning industry, which is already facing various problems, is now confronted with yet another challenge in the form of COVID-19 pandemic. Following shutdown of manufacturing units and weak downstream demand in both domestic and export markets the cotton yarn industry is staring at extremely challenging time this year. In the medium to long-term, it is expected that some demand from the US and the EU markets may shift gradually from China to other major garment manufacturers viz. Vietnam, Bangladesh, India and Cambodia.

Industry Outlook

Due to the Covid-19 pandemic, the performance of domestic cotton spinning sector in the FY 2020-21 is likely to be at multi-year lows. The operating income of cotton spinners is expected to decline by 15-20% on a YoY basis owing to demand disruptions and pressure on realisations. The yarn production for FY 2020-21 would remain muted, with lack of visibility on wholesale demand resulting in fall of India's cotton yarn exports by 18-20%. Demand for the downstream products viz. fabrics, apparels and home textiles, has been affected due to COVID-19 and lockdowns. Yarn, being an intermediate product, is likely to face a ripple effect of the contraction in demand in the downstream segments. Further, there might be reduction in production volumes because of weak demand and declined cost competitiveness. With expectations of a slow paced and elongated recovery, sluggish end-consumer demand and choked liquidity, post lockdowns, severe pressures on the overall performance of the domestic spinning companies and a loss of business to the tune of US\$2.5-3 billion in FY 2020-21 is also expected. Going forward the overall spinning and textile scenario will depend on how the situation evolves in the domestic and international markets and faster return to normalcy will enable the industry to curtail the damages.

Segment

Your Company is mainly engaged in the manufacturing of yarn and operates in a single segment i.e. Textiles.

INDEPENDENT AUDITOR'S REPORT

To
the Members of
Pranavaditya Spinning Mills Limited

Report on the Audit of the Standalone Financial Statements

Opinion

We have audited the standalone financial statements of Pranavaditya Spinning Mills Limited ("the Company"), which comprise the Balance Sheet as at 31st March 2020, and the statement of Profit and Loss (including other comprehensive income), Statement of Changes in Equity and Cash Flow Statement for the year then ended, and notes to the financial statements, including a summary of significant accounting policies and other explanatory information (hereinafter referred to as "standalone financial statements").

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid standalone financial statements give the information required by the Companies Act, 2013 ("the Act") in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2020, and loss, changes in equity and its cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Act. Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Emphasis of Matter

We draw attention to Note No. 39 to the standalone financial statements, which describes the uncertainties and the impact of Covid-19 pandemic on the Company's operations and results as assessed by the management. Our opinion is not modified in respect of this matter.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

As on 31st March 2020, current tax assets and other current assets includes amounts recoverable from government department for which efforts for recovery are being made (refer Note No. 12 and 13 to the financial statements). Our audit procedures consisted of evaluating whether any change was required to management's position on these uncertainties and the likelihood of recoverability.

Information Other than the Standalone Financial Statements and Auditor's Report Thereon

The Company's Board of Directors is responsible for the preparation of the other information. The other information comprises the information included in the Management Discussion and Analysis, Board's Report including Annexures to Board's Report, Business Responsibility Report, Corporate Governance and Shareholder's Information, but does not include the standalone financial statements and our auditor's report thereon.

Our opinion on the standalone financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the standalone financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the standalone financial statements or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and those charged with Governance for the Standalone Financial Statements.

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the the Act with respect to the preparation of these standalone financial statements that give a true and fair view of the financial position, financial performance, changes in equity and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the accounting standards specified under section 133 of the Act. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statement that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls system in place and the operating effectiveness of such controls.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the standalone financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the financial statements. We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

As required by the Companies (Auditor's Report) Order, 2016 ("the Order"), issued by the Central Government of India in terms of sub-section (11) of section 143 of the Companies Act, 2013, we give in the "Annexure A" statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.

As required by Section 143(3) of the Act, we report that:

- a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.
- b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books
- c) The Balance Sheet, the Statement of Profit and Loss (including other comprehensive income), Statement of Changes in Equity and the Cash Flow Statement dealt with by this Report are in agreement with the books of account.
- d) In our opinion, the aforesaid standalone financial statements comply with the Accounting Standards specified under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014.

- e) On the basis of the written representations received from the directors as on 31st March, 2020 taken on record by the Board of Directors, none of the directors is disqualified as on 31st March, 2020 from being appointed as a director in terms of Section 164 (2) of the Act.
- f) With respect to the adequacy of the internal financial controls over financial reporting of the Company and the operating effectiveness of such controls, refer to our separate Report in “Annexure B”. Our report expresses an unmodified opinion on the adequacy and operating effectiveness of the Company’s internal financial controls over financial reporting.
- g) With respect to the other matters to be included in the Auditor’s Report in accordance with the requirements of section 197(16) of the Act, as amended:

In our opinion and to the best of our information and according to the explanations given to us, during the year the Company has not paid/provided any remuneration to its directors.

- h) With respect to the other matters to be included in the Auditor’s Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us:
 - i. The Company does not have any pending litigations which would impact its financial position.
 - ii. The Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses.
 - iii. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company.

Annexure A referred to in Paragraph (I) under the heading of “Report on Other Legal and Regulatory Requirements” of our report of even date to the members of Pranavadiya Spinning Mills Limited on the Standalone Ind AS Financial Statements for the year ended 31st March 2020.

(i)	(a) The Company has maintained proper records showing full particulars including quantitative details and situation of fixed assets.
	(b) The fixed assets have been physically verified by the management during the year as per the phased program designed to cover all the fixed assets over a period, which in our opinion is reasonable having regard to the size of the Company and nature of its assets. Discrepancies noticed on such verification, which are not material, have been properly dealt with in the books of accounts.
	(c) The title deeds of immovable properties are held in the name of the Company.
(ii)	As explained to us, the inventories have been physically verified by the management during the year, except stocks lying with third parties in respect of whom confirmations have been obtained and the discrepancies noticed on physical verification as compared to book record are not material, have been properly dealt with in the books of account. In our opinion, the frequency of such verification is reasonable.
(iii)	As explained to us, the Company has not granted any loans, secured or unsecured to companies, firms, limited liability partnerships or other parties covered in the register maintained under section 189 of the Companies Act, 2013 and as such clauses (iii) (a), (b) and (c) of the Order are not applicable to the Company.
(iv)	In our opinion and according to the information and explanations given to us no loans, investments, guarantees and security covered under section 185 and 186 of the Companies Act, 2013 has been given by the Company. Therefore, the provisions of clause (iv) of the Order are not applicable to the Company.
(v)	According to the information and explanations given to us, the Company has not accepted any deposit from the public. Therefore, the provisions of clause (v) of the Order are not applicable to the Company.
(vi)	We have broadly reviewed the books of account maintained by the Company pursuant to the Order made by the Central Government for the maintenance of cost records under section 148(1) of the Act, and we are of the opinion that prima facie the prescribed accounts and records have been made and maintained. However, we are neither required to carry out nor have carried out detailed examination of such cost accounting records with a view to determine whether they are accurate or complete.
(vii)	According to the records of the Company, examined by us and information and explanations given to us:
	(a) The Company is generally regular in depositing with the appropriate authorities undisputed statutory dues including provident fund, employees' state insurance, income tax, sales tax, service tax, duty of customs, duty of excise, value added tax, cess and others as applicable. There are no undisputed amounts payable in respect of aforesaid dues outstanding as at 31 st March 2020 for a period of more than six months from the date they became payable.
	(b) There are no disputed dues of income tax or sales tax or service tax or duty of customs or duty of excise or value added tax or goods and service tax outstanding as at 31 st March 2020.
(viii)	In our opinion and according to the information and explanations given to us, the Company has no outstanding loans or borrowings from financial institutional, bank or government hence provisions of clause (viii) of the Order are not applicable to the Company.
(ix)	In our opinion, during the year, no money has been raised by way of initial public offer or further public offer (including debt instruments) or term loans hence provisions of clause (ix) of the Order are not applicable to the Company.
(x)	According to the information and explanations given to us, no fraud by the Company or on the Company by its officers or employees has been noticed or reported during the year.
(xi)	In our opinion, and according to the information and explanation given to us, during the year the Company has not paid/ provided any managerial remuneration and hence provisions of clause (xi) of the Order are not applicable to the Company.
(xii)	The Company is not a nidhi company and hence provisions of clause (xii) of the Order are not applicable to the Company

(xiii)	According to the records examined by us, and information and explanations given to us, all transactions with the related parties are in compliance with Sections 188 and 177 of the Act and necessary details as required by the accounting standards have been disclosed in the Standalone Ind AS Financial Statements.
(xiv)	The Company has not made any preferential allotment / private placement of shares or fully or partly convertible debentures during the year ended 31 st March 2020.
(xv)	The Company has not entered into any non cash transactions with directors or persons connected with him.
(xvi)	The Company is not required to be registered under section 45-1A of the Reserve Bank of India Act, 1934

Annexure B referred to in Paragraph (II)(f) under the heading of “Report on Other Legal and Regulatory Requirements” of our report of even date to the members of Pranavadiya Spinning Mills Limited on the Standalone Ind AS Financial Statements for the year ended 31st March 2020.

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 (“the Act”)

We have audited the internal financial controls over financial reporting of Pranavadiya Spinning Mills Limited (“the Company”) as of 31st March, 2020 in conjunction with our audit of the Standalone Ind AS Financial Statements of the Company for the year ended on that date.

Management’s Responsibility for Internal Financial Controls

The Company’s management is responsible for establishing and maintaining internal financial controls based on “the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the “Guidance Note”) issued by the Institute of Chartered Accountants of India (ICAI)”. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to Company’s policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditors’ Responsibility

Our responsibility is to express an opinion on the Company’s internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Act, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the ICAI. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor’s judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company’s internal financial controls system over financial reporting.

Meaning of Internal Financial Controls Over Financial Reporting

A Company’s internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A Company’s internal financial control over financial reporting includes those policies and procedures that:

- a) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company;

- b) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and
- c) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31st March, 2020, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note issued by the ICAI.

NOTES TO THE FINANCIAL STATEMENTS FOR YEAR ENDED 31ST MARCH, 2020

1. CORPORATE INFORMATION

Pranavaditya Spinning Mills Limited (the 'Company') is a limited company incorporated and domiciled in India whose shares are publicly traded. The registered office is located at Office No.2, Plot No.266, Village Alte, Kumbhoj Road, Taluka Hatkanagale, Dist. Kolhapur- 416109, Maharashtra, India.

The Company is a Spinning Unit engaged in the manufacture of cotton yarn.

The Financial statements of the Company for the year ended March 31, 2020 were authorized for issue in accordance with a resolution of the Board of Directors on June 9, 2020.

2. BASIS OF PREPARATION

The financial statements have been prepared in accordance with the Indian Accounting Standards (referred to as 'Ind AS') as prescribed under section 133 of the Companies Act, 2013 read with Companies (Indian Accounting Standards) Rules as amended from time to time.

The financial statements have been prepared on a historical cost basis, except for the following assets and liabilities which have been measured at fair value:

- Derivative financial instruments,
- Certain financial assets and liabilities measured at fair value (refer accounting policy regarding financial instruments)

The financial statement are presented in Indian Rupees ('INR') and all values are rounded to the nearest lakhs, except otherwise indicated.

3. SIGNIFICANT ACCOUNTING POLICIES

3.1 Property, plant and equipment and right-of-use assets:

The company has opted to follow cost model for accounting of its entire property, plant and equipment. Property, plant and equipment are stated at original cost inclusive of incidental expenses related to acquisition net of tax / duty credit availed, net of accumulated depreciation and accumulated impairment losses, if any. Such cost includes the cost of replacing part of the plant and equipment and borrowing costs for long-term construction projects if the recognition criteria are met. When significant parts of plant and equipment are required to be replaced at intervals, the Company depreciates them separately based on their specific useful lives. Likewise, when a major repair is performed, its cost is recognised in the carrying amount of the plant and equipment as a replacement if the recognition criteria is satisfied. All other repair and maintenance costs are recognised in profit or loss as incurred. The present value of the expected cost for the decommissioning of an asset after its use is included in the cost of the respective asset if the recognition criteria for a provision are met.

Capital work-in-progress includes cost of property, plant and equipment under installation / under development as at the balance sheet date.

Right-of-use (ROU) assets are stated at cost, less accumulated depreciation and impairment loss, if any. The carrying amount of ROU assets is adjusted for remeasurement of lease liability, if any, in future. Cost of ROU assets comprises the amount of initial measurement of lease liability, lease payments made before the commencement date (net of incentives received), initial direct costs and present value of estimated costs of dismantling and restoration, if any.

Depreciation on the property, plant and equipment is provided over the useful life of assets as specified in schedule II to the Companies Act, 2013. Property, plant and equipment which are added / disposed off during the year, depreciation is provided on pro-rata basis with reference to the date of addition / deletion.

NOTES TO THE FINANCIAL STATEMENTS FOR YEAR ENDED 31ST MARCH, 2020

The present value of the expected cost for the decommissioning of an asset after its use is included in the cost of the respective asset if the recognition criteria for a provision are met.

The Company, based on technical assessment made by technical expert and management estimate, depreciates certain items of building, plant and equipment over estimated useful lives which are different from the useful life prescribed in Schedule II to the Companies Act, 2013. The management believes that these estimated useful lives are realistic and reflect fair approximation of the period over which the assets are likely to be used.

In case of some items of plant, depreciation has been provided in range of 26 years (minimum) to 35 years (maximum) based on the technical evaluation of the remaining useful life which is different from the one specified in schedule II to the Companies Act, 2013.

An item of property, plant and equipment and any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the statement of profit and loss when the asset is derecognised.

The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

In case of pre-owned assets, the useful life is estimated on a case to case basis.

3.2 Investment properties

Investment properties comprise portions of freehold land and office building that are held for long-term rental yields and/or for capital appreciation. Investment properties are initially recognized at cost. Subsequently, investment property comprising of building is carried at cost less accumulated depreciation and impairment losses.

The cost includes the cost of replacing parts and borrowing cost for long term construction projects if the recognition criteria are met. When significant parts of the investment property are required to be replaced at intervals, the Company depreciates them separately based on their specific useful lives. All other repair and maintenance costs are recognized in profit and loss as incurred.

Depreciation on building is provided over the estimated useful lives as specified in schedule II to the Companies Act, 2013. The residual values, useful lives and depreciation method of investment properties are reviewed, and adjusted on prospective basis as appropriate, at each financial year end. The effects of any revision are included in the statement of profit and loss when the change arise.

Though the company measures investment property using cost based measurement, the fair value of investment property is disclosed in the notes. Fair values are determined based on an annual evaluation performed by an accredited external independent valuer applying a valuation model recommended by the International Valuation Standards Committee.

Investment properties are derecognized when either they have been disposed off or when the investment property is permanently withdrawn from use and no future economic benefit is expected from its disposal.

The difference between the net disposal proceeds and the carrying amount of the asset is recognized in the statement of profit and loss in the period of derecognition.

NOTES TO THE FINANCIAL STATEMENTS FOR YEAR ENDED 31ST MARCH, 2020

3.3 Intangible Assets

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and accumulated impairment losses. Internally generated intangibles, excluding capitalised development costs, are not capitalized and the related expenditure is reflected in profit or loss in the period in which the expenditure is incurred.

The useful lives of intangible assets are assessed as either finite or indefinite.

Intangible assets with finite lives are amortised over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortisation period or method, as appropriate, and are treated as changes in accounting estimates. The amortisation expense on intangible assets with finite lives is recognised in the statement of profit and loss.

Intangible assets with indefinite useful lives are not amortised, but are tested for impairment annually, either individually or at the cash-generating unit level. The assessment of indefinite life is reviewed annually to determine whether the indefinite life continues to be supportable. If not, the change in useful life from indefinite to finite is made on a prospective basis.

Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the statement of profit or loss when the asset is derecognised.

Research and Development Cost:

Research costs are expensed as incurred. Development expenditures on an individual project are recognized as an intangible asset when the Company can demonstrate:

- The technical feasibility of completing the intangible asset so that the asset will be available for use or sale
- Its intention to complete and its ability and intention to use or sell the asset
- How the asset will generate future economic benefits
- The availability of resources to complete the asset
- The ability to measure reliably the expenditure during development

Following initial recognition of the development expenditure as an asset, the asset is carried at cost less any accumulated amortisation and accumulated impairment losses. Amortisation of the asset begins when development is complete and the asset is available for use. It is amortised over the period of expected future benefit. Amortisation expense is recognised in the statement of profit and loss.

During the period of development, the asset is tested for impairment annually.

3.4 Borrowing costs

Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds. Borrowing cost also includes exchange differences to the extent regarded as an adjustment to the borrowing costs.

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the asset. All other borrowing costs are expensed in the period in which they occur.

NOTES TO THE FINANCIAL STATEMENTS FOR YEAR ENDED 31ST MARCH, 2020

3.5 Impairment of non-financial assets:

As at each balance sheet date, the Company assesses whether there is an indication that an asset may be impaired and also whether there is an indication of reversal of impairment loss recognized in the previous periods. If any indication exists or when annual impairment testing for an asset is required, if any, the Company determines the recoverable amount and impairment loss is recognized when the carrying amount of an asset exceeds its recoverable amount.

Recoverable amount is determined:

- In the case of an individual asset, at the higher of the fair value less cost to sell and the value in use; and
- In the case of cash generating unit (a group of assets that generates identified, independent cash flows) at the higher of the cash generating unit's fair value less cost to sell and the value in use.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessment of the time value of money and the risks specific to the asset. In determining fair value less cost of disposal, recent market transaction is taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

The company bases its impairment calculation on detailed budgets and forecast calculations, which are prepared separately for each of the Company's CGUs to which the individual assets are allocated. These budgets and forecast calculations generally cover a period of five years. For longer periods, a long-term growth rate is calculated and applied to project future cash flows after the fifth year.

Impairment losses of continuing operations, including impairment on inventories, are recognized in profit and loss section of the statement of profit and loss, except for properties previously revalued with the revaluation taken to Other Comprehensive Income (the OCI) for such properties, the impairment is recognized in OCI up to the amount of any previous revaluation.

3.6 Inventories

Inventories are valued at the lower of cost and net realisable value. Costs incurred in bringing each product to its present location and condition is accounted for as follows:

- a) Raw material, packing material, construction material, stores & spares:
Cost includes cost of purchase and other costs incurred in bringing the inventories to their present location and condition. Cost is determined on weighted average basis.
- b) Finished goods and work in progress:
Cost includes cost of purchase and other costs incurred in bringing the inventories to their present location and condition. Cost is determined on weighted average basis.
- c) Traded goods:
Cost includes cost of purchase and other costs incurred in bringing the inventories to their present location and condition. Cost is determined on weighted average basis.
- d) Wastage and rejections are valued at estimated realizable value.

Slow and non-moving material, obsolescence, defective inventories are duly provided for and valued at net realisable value. Goods and materials in transit are valued at actual cost incurred. Materials and supplies held for use in the

NOTES TO THE FINANCIAL STATEMENTS FOR YEAR ENDED 31ST MARCH, 2020

production of inventories are not written down if the finished products in which they will be used are expected to be sold at or above cost.

Net realisable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated costs necessary to make the sale.

3.7 Cash and cash equivalents

Cash and cash equivalents comprise cash on hand and demand deposits with banks which are short-term, highly liquid investments that are readily convertible into known amounts of cash and which are subject to insignificant risk of changes in value.

3.8 Foreign currency transactions

The Company's financial statements are presented in INR, which is also the Company's functional currency.

Foreign currency transactions are recorded on initial recognition in the functional currency, using the exchange rate at the date of the transaction. At each balance sheet date, foreign currency monetary items are reported using the closing exchange rate. Exchange differences that arise on settlement of monetary items or on reporting at each balance sheet date at the closing rate are recognized as income or expenses in the period in which they arise. Non-monetary items which are carried at historical cost denominated in a foreign currency are reported using the exchange rate at the date of transaction. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. The gain or loss arising on transaction of non-monetary items is recognized in line with the gain or losses of the item that gave rise to the translation difference (i.e. translation differences on items whose gain or loss is recognized in other comprehensive income or the statement of profit and loss is also recognized in other comprehensive income or the statement of profit and loss respectively).

3.9 Current versus non-current classification

The Company presents assets and liabilities in the balance sheet based on current/ non-current classification. An asset is current when it is:

- Expected to be realised or intended to sold or consumed in normal operating cycle
- Held primarily for the purpose of trading
- Expected to be realised within twelve months after the reporting period, or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period

All other assets are classified as non-current.

A liability is current when:

- It is expected to be settled in normal operating cycle
- It is held primarily for the purpose of trading
- It is due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

The Company classifies all other liabilities as non-current. Deferred tax assets and liabilities are classified as non-current assets and liabilities.

NOTES TO THE FINANCIAL STATEMENTS FOR YEAR ENDED 31ST MARCH, 2020

3.10 Fair value measurement

The Company measures financial instruments, such as, derivatives at fair value at each balance sheet date. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible to the Company.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

3.11 Revenue Recognition

The Companies (Indian Accounting Standards) Amendment Rules, 2018 issued by the Ministry of Corporate Affairs (MCA) notified Ind AS 115 "Revenue from Contracts with Customers" related to revenue recognition which replaced Ind AS 11 "Construction Contracts" and Ind AS 18 "Revenue" and provide a single, comprehensive model for all contracts with customers. The revised standard contains principles to determine the measurement of revenue and timing of when it is recognized. The amendment also requires additional disclosure about the nature, amount, timing and uncertainty of revenue and cash flows arising from customer contracts, including significant judgements and changes in those judgements as well as assets recognized from costs incurred to fulfill these contracts.

The Company has adopted Ind AS 115 w.e.f. 1 April, 2018 using the modified retrospective approach. However, the adoption of the standard did not have any impact on the financial statements.

NOTES TO THE FINANCIAL STATEMENTS FOR YEAR ENDED 31ST MARCH, 2020

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured, regardless of when the payment is being made. Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payment and excluding taxes or duties collected on behalf of the government. The Company has concluded that it is the principal in all of its revenue arrangements since it is the primary obligor in all the revenue arrangements as it has pricing latitude and is also exposed to inventory and credit risks.

The specific recognition criteria described below must also be met before revenue is recognised.

Sale of goods:

Revenue from the sale of goods is recognised when the significant risks and rewards of ownership of the goods have passed to the buyer. Revenue from the sale of goods is measured at the fair value of the consideration received or receivable, net of returns and allowances, trade discounts and volume rebates.

Rendering of Services:

Revenue from sale of service is recognised as per terms of the contract with customers when the outcome of the transactions involving rendering of services can be estimated reliably.

Interest Income:

For all financial instruments measured at amortised cost, interest income is recorded using the effective interest rate (EIR), which is the rate that exactly discounts the estimated future cash payments or receipts through the expected life of the financial instrument or a shorter period, where appropriate, to the net carrying amount of the financial asset. Interest income is included in other income in the statement of profit and loss.

Dividends:

Revenue is recognised when the Company's right to receive the payment is established, which is generally when shareholders approve the dividend.

Lease Income:

Lease agreements by which the risks and rewards incident to the ownership of an asset substantially vest with the lessor are recognized as operating leases. Lease rentals are recognized on straight-line basis as per the terms of the agreements in the statement of profit and loss.

3.12 Government Grants

Government grants are recognised where there is reasonable assurance that the grant will be received and all attached conditions will be complied with. When the grant relates to an expense item, it is recognised as income on a systematic basis over the periods that the related costs, for which it is intended to compensate, are expensed.

When the grant relates to the purchase of property, plant and equipment, it is included in non-current liabilities as deferred income and are credited to the statement of profit and loss on a straight-line basis over the expected lives of the related assets and presented within other income.

When the Company receives grants of non-monetary assets, the asset and the grant are recorded at fair value amounts and released to profit or loss over the expected useful life in a pattern of consumption of the benefit of the underlying asset by equal annual instalments. When loans or similar assistance are provided by governments or related institutions, with an interest rate below the current applicable market rate, the effect of this favorable interest

NOTES TO THE FINANCIAL STATEMENTS FOR YEAR ENDED 31ST MARCH, 2020

is regarded as a government grant. The loan or assistance is initially recognised and measured at fair value and the government grant is measured as the difference between the initial carrying value of the loan and the proceeds received. The loan is subsequently measured as per the accounting policy applicable to financial liabilities.

3.13 Earnings per share

Basic earnings per share is calculated by dividing the profit from continuing operations and total profit, both attributable to equity shareholders of the Company by the weighted average number of equity shares outstanding during the period.

3.14 Taxes

Current Income Tax:

- Tax on income for the current period is determined on the basis on estimated taxable income and tax credits computed in accordance with the provisions of the relevant tax laws and based on the expected outcome of assessments / appeals.
- Current income tax relating to items recognized directly in equity and not in the statement of profit and loss. Management periodically evaluates position taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

Deferred Tax:

Deferred Tax is provided using the balance sheet approach on temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilized. Unrecognized deferred tax assets are reassessed at each reporting date and are recognized to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognized outside the statement of profit and loss is recognized outside the statement of profit and loss. Deferred tax items are recognized in correlation to the underlying transaction either in other comprehensive income or directly in equity.

The break-up of the major components of the deferred tax assets and liabilities as at balance sheet date has been arrived at after setting off deferred tax assets and liabilities where the Company have a legally enforceable right to set-off assets against liabilities and where such assets and liabilities relate to taxes on income levied by the same governing taxation laws.

3.15 Segment accounting

The Chief Operational Decision Maker monitors the operating results of its business segments separately for the purpose of making decisions about resource allocation and performance assessment. Segment performance is evaluated based on profit or loss and is measured consistently with profit or loss in the financial statements.

NOTES TO THE FINANCIAL STATEMENTS FOR YEAR ENDED 31ST MARCH, 2020

The operating segments have been identified on the basis of the nature of products / services.

- a) Segment revenue includes sales and other income directly identifiable with / allocable to the segment including inter-segment revenue.
- b) Expenses that are directly identifiable with / allocable to segments are considered for determining the segment result. Expenses which relate to the Company as a whole and not allocable to segments are included under unallocable expenditure.
- c) Income which relates to the Company as a whole and allocable to segments is included in unallocable income.
- d) Segment result includes margins on inter-segment and sales which are reduced in arriving at the profit before tax to the Company.
- e) Segment assets and liabilities include those directly identifiable with respective segments. Unallocable assets and liabilities represent the assets and liabilities that relate to the Company as a whole and not allocable to any segment.

Inter-Segment transfer pricing

Segment revenue resulting from transactions with other business segments is accounted on the basis of transfer price agreed between the segments. Such transfer prices are either determined to yield a desired margin or agreed on a negotiated basis.

3.16 Leases

The Company as a lessee:

The Company's lease asset classes primarily consist of leases for land and buildings. The Company assesses whether a contract contains a lease, at inception of a contract. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Company assesses whether:

- (i) the contract involves the use of an identified asset,
- (ii) the Company has substantially all of the economic benefits from use of the asset through the period of the lease, and
- (iii) the Company has the right to direct the use of the asset.

At the date of commencement of the lease, the Company recognizes a right-of-use (ROU) asset and a corresponding lease liability for all lease arrangements in which it is a lessee, except for leases with a term of 12 months or less (short-term leases) and low value leases. For these short-term and low-value leases, the Company recognizes the lease payments as an operating expense on a straight-line basis over the term of the lease. Certain lease arrangements include the options to extend or terminate the lease before the end of the lease term. ROU assets and lease liabilities includes these options when it is reasonably certain that they will be exercised. The ROU assets are initially recognized at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or prior to the commencement date of the lease plus any initial direct costs less any lease incentives. They are subsequently measured at cost less accumulated depreciation and impairment losses.

ROU assets are depreciated from the commencement date on a straight-line basis over the shorter of the lease term and useful life of the underlying asset. ROU assets are evaluated for recoverability whenever events or changes in circumstances indicate that their carrying amounts may not be recoverable. For the purpose of impairment testing, the recoverable amount (i.e. the higher of the fair value less cost to sell and the value-in-use) is determined on an individual asset basis unless the asset does not generate cash flows that are largely independent of those from other assets. In such cases, the recoverable amount is determined for the Cash Generating Unit (CGU) to which the asset belongs.

NOTES TO THE FINANCIAL STATEMENTS FOR YEAR ENDED 31ST MARCH, 2020

The lease liability is initially measured at amortized cost at the present value of the future lease payments. The lease payments are discounted using the interest rate implicit in the lease or, if not readily determinable, using the incremental borrowing rates in the country of domicile of these leases. Lease liabilities are remeasured with a corresponding adjustment to the related ROU asset if the Company changes its assessment of whether it will exercise an extension or a termination option. Lease liability and ROU assets have been separately presented in the Balance Sheet and lease payments have been classified as financing cash flows.

The Company as a lessor:

Leases for which the Company is a lessor is classified as a finance or operating lease. Whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee, the contract is classified as a finance lease. All other leases are classified as operating leases.

3.17 Employee benefits

i) Short-term employee benefits

All employee benefits payable only within twelve months of rendering the service are classified as short term employee benefits. Benefits such as salaries, wages, etc. and the expected cost of bonus, ex-gratia, and incentives are recognized in the period during which the employee renders the related service.

ii) Post-employment benefits

a) Defined contribution plans

State Government Provident Scheme is a defined contribution plan. The contribution paid / payable under the scheme is recognized in the statement of profit and loss during the period in which the employee renders the related services.

b) Defined Benefit Plans

The employee Gratuity Fund scheme and Leave Encashment scheme managed by different trusts are defined benefit plans.

The cost of providing benefits under the defined benefit plan is determined using the projected unit credit method with actuarial valuations being carried out at each balance sheet date, which recognizes each period of service as giving rise to additional unit of employee benefit entitlement and measure each unit separately to build up the final obligation.

Remeasurements, comprising of actuarial gain and losses, the effect of the asset ceiling, excluding amounts included in net interest on the net defined benefit liability and the return on plan assets (excluding amounts included in net interest on the net defined benefit liability), are recognized immediately in the balance sheet with a corresponding debit or credit to retained earnings through other comprehensive income in the period in which they occur. Remeasurements are not reclassified to the statement of profit and loss in subsequent periods. Past service cost is recognized in the statement of profit and loss in the period of plan amendment.

Net Interest is calculated by applying the discount rate to the net defined benefit liability or asset.

The Company recognizes the following changes in the net defined benefit obligation under employee benefit expenses in the statement of profit and loss.

- Service costs comprising current service costs, past-service costs, gains and losses on curtailments and non-routine settlements.
- Net interest expense or income.

NOTES TO THE FINANCIAL STATEMENTS FOR YEAR ENDED 31ST MARCH, 2020

Long-term employee benefit

Compensated absences which are not expected to occur within twelve months after the end of the period in which the employee renders the related services are recognized as a liability at the present value of the defined benefit obligation at the balance sheet date.

Termination benefits

Termination benefits are recognized as an expenses in the period in which they are incurred.

3.18 Provision, Contingent liabilities, Contingent assets and Commitments

General

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. When the company expects some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognized as a separate asset, but only when the reimbursement is virtually certain. The expense relating to a provision is presented in the statement of profit and loss net of any reimbursement.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognized as a finance cost.

Contingent liability is disclosed in the case of:

- a present obligation arising from past events, when it is not probable that an outflow of resources will be required to settle the obligation;
- a present obligation arising from past events, when no reliable estimate is possible;
- a possible obligation arising from past events, unless the probability of outflow of resources is remote.

Commitments include the amount of purchase order (net of advances) issued to parties for completion of assets.

Provision, contingent liabilities, contingent assets and commitments are reviewed at each balance sheet date.

Liquidated damages

Provision for liquidated damages are recognized on contracts for which delivery dates are exceeded and computed in reasonable manner.

Other Litigation claims

Provision for litigation related obligation represents liabilities that are expected to materialize in respect of matters in appeal.

Onerous contracts

A provision for onerous contracts is measured at the present value lower of the expected costs of terminating the contract and the expected cost of continuing with the contract. Before a provision is established, the Company recognizes impairment on the assets under the contract.

NOTES TO THE FINANCIAL STATEMENTS FOR YEAR ENDED 31ST MARCH, 2020

3.19 Exceptional Items

On certain occasions, the size, type or incidence of an item of income or expense, pertaining to the ordinary activities of the Company is such that its disclosure improves the understanding of the performance of the Company. Such income or expense is classified as an exceptional item and accordingly, disclosed in the notes accompanying the financial statements.

3.20 Non-current assets held for sale and discontinued operations

Non-current assets and disposal groups are classified as held for sale if their carrying amounts will be recovered principally through a sale transaction rather than through continuing use. Non-current assets and disposal groups classified as held for sale are measured at the lower of their carrying amount and fair value less costs to sell. This condition is regarded as met only when the sale is highly probable and the asset or disposal group is available for immediate sale in its present condition. Management must be committed to the sale, which should be expected to qualify for recognition as a completed sale within one year from the date of classification.

Discontinued operations are excluded from the results of continuing operations and are presented as a single amount as profit or loss after tax from discontinued operations in the statement of profit and loss.

Assets and liabilities classified as held for distribution are presented separately from other assets and liabilities in the balance sheet.

A disposal group qualifies as discontinued operation if it is a component of the Company that either has been disposed of, or is classified as held for sale and:

- represents a separate major line of business or geographical area of operations,
- is part of a single coordinated plan to dispose of a separate major line of business or geographical area of operations,
or
- is a subsidiary acquired exclusively with a view to resale.

An entity shall not depreciate (or amortise) a non-current asset while it is classified as held for sale or while it is part of a disposal group classified as held for sale.

3.21 Financial Instruments

i) Financial assets

Initial recognition and measurement

All financial assets are recognized initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset.

Financial assets are classified, at initial recognition, as financial assets measured at fair value or as financial assets measured at amortised cost.

Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in two broad categories:

- Financial asset at fair value
- Financial assets at amortised cost

NOTES TO THE FINANCIAL STATEMENTS FOR YEAR ENDED 31ST MARCH, 2020

Where assets are measured at fair value, gains and losses are either recognized entirely in the statement of profit and loss (i.e. fair value through profit or loss), or recognized in other comprehensive income (i.e. fair value through other comprehensive income).

A financial asset that meets the following two conditions is measured at amortised cost (net of any write down for impairment) unless the asset is designated at fair value through profit or loss under the fair value option.

- **Business model test:** The objective of the Company's business model is to hold the financial asset to collect the contractual cash flows (rather than to sell the instrument prior to its contractual maturity to realize its fair value changes).
- **Cash flow characteristics test:** The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

A financial asset that meets the following two conditions is measured at fair value through other comprehensive income unless the asset is designated at fair value through profit or loss under the fair value option.

- **Business model test:** The Financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets.
- **Cash flow characteristics test:** The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Even if an instrument meets the two requirements to be measured at amortised cost or fair value through other comprehensive income, a financial asset is measured at fair value through profit or loss if doing so eliminates or significantly reduces a measurement or recognition inconsistency (sometimes referred to as an 'accounting mismatch') that would otherwise arise from measuring assets or liabilities or recognizing the gains and losses on them on different basis.

All other financial asset is measured at fair value through profit or loss.

All equity investments are measured at fair value in the balance sheet, with value changes recognized in the statement of profit and loss, except for those equity investments for which the entity has elected to present value changes in 'other comprehensive income'.

If an equity investment is not held for trading, an irrevocable election is made at initial recognition to measure it at fair value through other comprehensive income with only dividend income recognized in the statement of profit and loss.

Derecognition

A financial asset (or, where applicable, a part of a financial asset or part of a Company of similar financial assets) is primarily derecognised (i.e. removed from the Company's statement of financial position) when:

- The rights to receive cash flows from the asset have expired, or
- The Company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a "pass-through" arrangement and either;
 - a) The Company has transferred substantially all the risks and rewards of the asset, or

NOTES TO THE FINANCIAL STATEMENTS FOR YEAR ENDED 31ST MARCH, 2020

- b) The Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Company has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Company continues to recognize the transferred asset to the extent of the Company's continuing involvement. In that case, the Company also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Company could be required to repay.

Investment in associates, joint venture and subsidiaries

The Company has accounted for its investment in associates, joint venture, and subsidiaries at cost.

Impairment of financial assets

The Company assesses impairment based on expected credit losses (ECL) model to the following:

- Financial assets measured at amortised cost;
- Financial assets measured at fair value through other comprehensive income (FVTOCI);

Expected credit losses are measured through a loss allowance at an amount equal to:

- The 12-months' expected credit losses (expected credit losses that result from those default events on the financial instrument that are possible within 12 months after the reporting date); or
- Full lifetime expected credit losses (expected credit losses that result from all possible default events over the life of the financial instrument).

The Company follows 'simplified approach' for recognition of impairment loss allowance on:

- Trade receivables or contract revenue receivables; and
- All lease receivables

Under the simplified approach, the Company does not track changes in credit risk. Rather, it recognizes impairment loss allowance based on lifetime ECLs at each reporting date, right from its initial recognition.

The Company uses a provision matrix to determine impairment loss allowance on the portfolio of trade receivables. The provision matrix is based on its historically observed default rates over the expected life of the trade receivable and is adjusted for forward looking estimates. At every reporting date, the historically observed default rates are updated and changes in the forward-looking estimates are analysed.

For recognition of impairment loss on other financial assets and risk exposure, the Company determines that whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, 12-months' ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If, in a subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the Company reverts to recognize impairment loss allowance based on 12-months' ECL.

NOTES TO THE FINANCIAL STATEMENTS FOR YEAR ENDED 31ST MARCH, 2020

For assessing increase in credit risk and impairment loss, the Company combines financial instruments on the basis of shared credit risk characteristics with the objective of facilitating an analysis that is designed to enable significant increase in credit risk to be identified on a timely basis.

ii) Financial liabilities:

Initial recognition and measurement

All financial liabilities are recognized initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Company's financial liabilities include trade and other payables, loans and borrowings including bank overdrafts, and derivative financial instruments.

Subsequent measurement

The measurement of financial liabilities depends on their classification, as described below:

Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss.

Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term. This category also includes derivative financial instruments entered into by the Company that are not designated as hedging instruments in hedge relationships as defined by Ind AS 109. Separated embedded derivatives are also classified as held for trading unless they are designated as effective hedging instruments.

Gains or losses on liabilities held for trading are recognized in the statement of profit and loss.

Financial liabilities designated upon initial recognition at fair value through profit or loss are designated at the initial date of recognition, only if the criteria in Ind AS 109 are satisfied.

Loans and borrowings

After initial recognition, interest-bearing loans and borrowing are subsequently measured at amortised cost using the EIR method. Gains and losses are recognized in profit or loss when the liabilities are derecognized as well as through the EIR amortization process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is included as finance costs in the statement of profit and loss.

Financial guarantee contracts

Financial guarantee contracts issued by the Company are those contracts that require a payment to be made to reimburse the holder for a loss it incurs because the specified debtor fails to make a payment when due in accordance with the terms of a debt instrument. Financial guarantee contracts are recognized initially as a liability at fair value, adjusted for transaction costs that are directly attributable to the issuance of the guarantee. Subsequently, the liability is measured at higher of the amount of loss allowance determined as per impairment requirements of Ind AS 109 and the amount recognized less cumulative amortization.

NOTES TO THE FINANCIAL STATEMENTS FOR YEAR ENDED 31ST MARCH, 2020

Derecognition

A financial liability is derecognized when the obligation under the liability is discharged or cancelled or expired. When an existing financial liability is replaced by another from the same lender on substantially different terms of an existing liability substantially modified, such as exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognized in the statement of profit and loss.

iii) Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, to realize the assets and settle the liabilities simultaneously.

iv) Derivative financial instruments and hedge accounting

The company enters into derivative contracts to hedge foreign currency / price risk on unexecuted firm commitments and highly probable forecast transactions. Such derivative financial instruments are initially recognized at fair value on the date on which a derivative contract is entered into and are subsequently remeasured at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative.

Any gains or losses arising from changes in the fair value of derivatives are taken directly to statement of profit and loss, except for the effective portion of cash flow hedges, which is recognized in other comprehensive income and presented as a separate component of equity which is later reclassified to statement of profit and loss when the hedge item affects profit or loss.

3.22 Business combination under common control

Common control business combinations include transactions, such as transfer of subsidiaries or businesses, between entities within a group.

Business combinations involving entities or businesses under common control are accounted for using the pooling of interest method. Under pooling of interest, the assets and liabilities of the combining entities are reflected at their carrying amounts, the only adjustments that are made are to harmonise accounting policies.

The financial information in the financial statements in respects of prior periods are restated as if the business combination had occurred from the beginning of the preceding period in the financial statements, irrespective of the actual date of the combination. However, if business combination had occurred after that date, the prior period information is restated only from that date.

The difference, if any, between the amount recorded as share capital issued plus any additional consideration in the form of cash or other assets and the amount of share capital of the transferor is transferred to capital reserve and presented separately from other capital reserves with disclosure of its nature and purpose in the notes.

3.23 Ministry of Corporate Affairs (“MCA”) notifies new standard or amendments to the existing standards. There is no such notification which would have been applicable from April 1, 2020.

4. SIGNIFICANT ACCOUNTING JUDGEMENTS, ESTIMATES AND ASSUMPTIONS

The preparation of the separate financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying

NOTES TO THE FINANCIAL STATEMENTS FOR YEAR ENDED 31ST MARCH, 2020

disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

Judgements

In the process of applying the Company's accounting policies, management has made judgements, which have the most significant effect on the amounts recognised in the financial statements.

Estimates and assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Company based its assumptions and estimates on parameters available when the standalone financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the Company. Such changes are reflected in the assumptions when they occur.

Impairment of non-financial assets

The Company assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or CGU's fair value less costs of disposal and its value in use. It is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

Defined benefit plans

The cost of the defined benefit plan and other post-employment benefits and the present value of such obligation are determined using actuarial valuations. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases and mortality rates. Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.

Fair value measurement of financial instruments

When the fair values of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques including the DCF model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgement is required in establishing fair values. Judgements include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments.

NOTES TO THE FINANCIAL STATEMENTS FOR YEAR ENDED 31ST MARCH, 2020

Impairment of financial assets

The impairment provisions for financial assets are based on assumptions about risk of default and expected loss rates. The Company uses judgement in making these assumptions and selecting the inputs to the impairment calculation, based on Company's past history, existing market conditions as well as forward looking estimates at the end of each reporting period.

Leases

Ind AS 116 requires lessees to determine the lease term as the non-cancellable period of a lease adjusted with any option to extend or terminate the lease, if the use of such option is reasonably certain. The Company makes an assessment on the expected lease term on a lease-by-lease basis and thereby assesses whether it is reasonably certain that any options to extend or terminate the contract will be exercised. In evaluating the lease term, the Company considers factors such as any significant leasehold improvements undertaken over the lease term, costs relating to the termination of the lease and the importance of the underlying asset to the Company's operations and the availability of suitable alternatives. The lease term in future periods is reassessed to ensure that the lease term reflects the current economic circumstances. After considering current and future economic conditions, the Company has concluded that no changes are required to lease period relating to the existing lease contracts.

Estimation of uncertainties relating to the global health pandemic from COVID-19

The Company has considered the possible effects that may result from the pandemic relating to COVID-19 on the carrying amounts of receivables, unbilled revenues and investment in subsidiaries. In developing the assumptions relating to the possible future uncertainties in the global economic conditions because of this pandemic, the Company, as at the date of approval of these financial statements has used internal and external sources of information including credit reports and related information, economic forecasts. The Company has performed sensitivity analysis on the assumptions used and based on current estimates expects the carrying amount of these assets will be recovered. The impact of COVID-19 on the Company's financial statements may differ from that estimated as at the date of approval of these financial statements.

Expected contribution to the defined benefit plan for the next annual reporting period

- The actuarial valuation of plan assets and the present value of the defined benefit obligation were carried out at 31 March, 2020. The present value of the defined benefit obligation and the related current service cost and past service cost, were measured using the Projected Unit Credit Method.
- Discount rate is based on the prevailing market yields of Indian Government Securities as at the Balance Sheet date for the estimated term of the obligations.

NOTES TO THE FINANCIAL STATEMENTS FOR YEAR ENDED 31ST MARCH, 2020

- (iii) The salary escalation rate is arrived after taking into consideration the seniority, the promotion and other relevant factors, such as, demand and supply in employment market.

36. FINANCIAL INSTRUMENTS - ACCOUNTING CLASSIFICATIONS AND FAIR VALUE MEASUREMENTS

The fair values of the financial assets and liabilities are included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale.

The following methods and assumptions were used to estimate the fair values:

- 1 Fair value of cash and short-term deposits, trade and other short term receivables, trade payables, other current liabilities, short term loans from banks and other financial institutions approximate their carrying amounts largely due to the short-term maturities of these instruments.
- 2 Financial instruments with fixed and variable interest rates are evaluated by the Company based on parameters such as interest rates and individual credit worthiness of the counterparty. Based on this evaluation, allowances are taken to account for the expected lossess of these receivables.

The Company uses the following hierarchy for determining and disclosing the fair value of financial instruments by valuation technique:

Level 1 : quoted (unadjusted) prices in active markets for identical assets or liabilities.

Level 2 : other techniques for which all inputs which have a significant effect on the recorded fair value are observable, either directly or indirectly.

Level 3 : techniques which use inputs that have a significant effect on the recorded fair value that are not based on observable market data.

37. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES

The Company's financial risk management is an integral part of how to plan and execute its business strategies. The Company's financial risk management policy is set by the Managing Board.

Market risk is the risk of loss of future earnings, fair values or future cash flows that may result from a change in the price of a financial instrument. The value of a financial instrument may change as a result of changes in the interest rates, foreign currency exchange rates, equity prices and other market changes that affect market risk sensitive instruments. Market risk is attributable to all market risk sensitive financial instruments including investments and deposits, foreign currency receivables, payables, loans and borrowings.

The Company manages market risk through a treasury department, which evaluates and exercises independent control over the entire process of market risk management. The treasury department recommends risk management objectives and policies, which are approved by Senior Management and the Audit Committee. The activities of this department includes management of cash resources, implementing hedging strategies for foreign currency exposures, borrowing strategies, and ensuring compliance with market risk limits and policies.

Interest Rate Risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. In order to optimize the Company's position with regards to interest income and interest expense and to manage the interest rate risk, treasury performs a comprehensive corporate interest rate risk management by balancing the proportion of fixed rate and floating rate financial instruments in its total portfolio.

NOTES TO THE FINANCIAL STATEMENTS FOR YEAR ENDED 31ST MARCH, 2020

The Company is not exposed to significant interest rate risk as at the respective reporting dates.

Foreign Currency Risk

The Company operates internationally and portion of the business is transacted in several currencies and consequently the Company is exposed to foreign exchange risk through its sales and services in overseas and purchases from overseas suppliers in various foreign currencies.

Foreign currency exchange rate exposure is partly balanced by purchasing of goods, commodities and services in the respective currencies.

The Company evaluates exchange rate exposure arising from foreign currency transactions and the Company follows established risk management policies, including the use of derivatives like foreign exchange forward contracts to hedge exposure to foreign currency risk.

	5% Increase	5% decrease	5% Increase	5% decrease
USD	250.31	(250.31)	326.76	(326.76)
Increase / (Decrease) in Profit or Loss	250.31	(250.31)	326.76	(326.76)

Credit Risk

Credit risk arises from the possibility that counter party may not be able to settle their obligations as agreed. To manage this, the Company periodically assesses the financial reliability of customers, taking into account the financial condition, current economic trends, and analysis of historical bad debts and ageing of accounts receivables. Individual risk limits are set accordingly.

The Company considers the probability of default upon initial recognition of asset and whether there has been a significant increase in credit risk on an ongoing basis throughout each reporting period. To assess whether there is a significant increase in credit risk the company compares the risk of a default occurring on the asset as at the reporting date with the risk of default as at the date of initial recognition. It considers reasonable and supportive forward looking information such as:

- Actual or expected significant adverse changes in business,
- Actual or expected significant changes in the operating results of the counterparty,
- Financial or economic conditions that are expected to cause a significant change to the counterparty's ability to meet its obligations,
- Significant increases in credit risk on other financial instruments of the same counterparty,

NOTES TO THE FINANCIAL STATEMENTS FOR YEAR ENDED 31ST MARCH, 2020

- Significant changes in the value of the collateral supporting the obligation or in the quality of third party guarantees or credit enhancements.

Financial assets are written off when there is no reasonable expectation of recovery, such as a debtor failing to engage in a repayment plan with the Company. The Company categorises a loan or receivable for write off when a debtor fails to make contractual payments greater than 2 years past due. Where loans or receivables have been written off, the Company continues to engage in enforcement activity to attempt to recover the receivable due. Where recoveries are made, they are recognised in Statement of Profit and Loss.

The Company measures the expected credit loss of trade receivables and loan from individual customer based on historical trend, industrial practices and the business environment in which the entity operates. Loss rates are based on actual credit loss experience and past trends. Based on historical data, loss on collection of receivable is not material, hence no additional provision considered.

Liquidity Risk

Liquidity risk is defined as the risk that the Company will not be able to settle or meet its obligations on time or at a reasonable price. The Company's treasury department is responsible for liquidity, funding as well as settlement management. In addition, processes and policies related to such risks are overseen by senior management. Management monitors the Company's net liquidity position through rolling forecasts on the basis of expected cash flows.

NOTES TO THE FINANCIAL STATEMENTS FOR YEAR ENDED 31ST MARCH, 2020

39. IMPACT OF COVID PANDEMIC AND RELATED LOCKDOWN MEASURES

The World Health Organization announced a global health emergency due to a new strain of coronavirus ("COVID-19") and classified this outbreak as a pandemic in March 2020 following which Government of India announced a countrywide lockdown from March 24, 2020.

The manufacturing operations was temporarily shut down from 23rd March 2020 and after a period of ~ 45 days, restarted partially from 6th May 2020 subject to conditions laid down by the State Government.

The Company has taken all necessary steps to ensure the welfare of our employees and also the working environment as per the Government guidelines.

Business and Financial Impact:

Due to temporary stoppage of operations, sales for the year under review were impacted to the extent of ~ ₹ 150.00 lakhs thereby increasing the inventory. The immediate impact of the lockdown is the slump in demand for our products and consequently, declining prices.

The Company has no short term or long term borrowings. However, thin operating margins are expected to exert adverse pressure on Company's liquidity.

Outlook:

The overall outlook for cotton yarn is not very encouraging as domestic and global textile mills are likely to face uncertain and challenging times. This is expected to impact the margins and liquidity of the Company going forward.

The Company has already initiated plans to reduce the fixed expenses in order to sustain its operations.
