Industry Structure and Developments

Indian Economy

In 2015-16, India remained a resilient economy. The Growth rate achieved during a challenging year such as last year reaffirms India's strength in its domestic consumption and speaks volumes of its better progress in years to come.

The improvement in India's economic fundamentals has accelerated in the year gone by with the combined impact of strong government reforms, RBI's inflation focus supported by benign global commodity prices.

Indian economy is expected to grow at 7-7.75 per cent during FY 2016-17, despite the uncertainties in the global market. The Economic Survey 2015-16 had forecasted that the Indian economy will be growing by more than 7 per cent for the third successive year 2016-17 and can start growing at 8 per cent or more in next two years. Foreign direct investment (FDI) in India has increased by 29 per cent during October 2014-December 2015 period post the launch of Make in India campaign, compared to the 15-month period before the launch.

The steps taken by the government in recent times have shown positive results as India's gross domestic product (GDP), at factor cost at constant (2011-12) prices, in 2015-16 is Rs 113.5 trillion (US\$ 1.668 trillion), as against Rs 105.5 trillion (US\$ 1.55 trillion) in 2014-15, registering a growth rate of 7.6 per cent. The economic activities which witnessed significant growth were 'financing, insurance, real estate and business services' at 11.5 per cent and 'trade, hotels, transport, communication services' at 10.7 per cent.

Total private equity (PE) investments in India for 2015 reached a record high of US\$ 19.5 billion through 159 deals, according to the PwC Money Tree India report. According to The World Bank, India's per capita income is expected to cross Rs 100,000 (US\$ 1,505.4) in FY 2017 from Rs 93,231 (US\$ 1,403.5) in FY 2016.

Gems and Jewellery

The Gems and Jewellery sector plays a significant role in the Indian economy, contributing around 6-7 per cent of the country's GDP. One of the fastest growing sectors, it is extremely export oriented and labour intensive.

Based on its potential for growth and value addition, the Government of India has declared the Gems and Jewellery sector as a focus area for export promotion. The Government has recently undertaken various measures to promote investments and to upgrade technology and skills to promote 'Brand India' in the international market.

India is deemed to be the hub of the global jewellery market because of its low costs and availability of high-skilled labour. India is the world's largest cutting and polishing centre for diamonds, with the cutting and polishing industry being well supported by government policies. Moreover, India exports 95 per cent of the world's diamonds, as per statistics from the Gems and Jewellery Export promotion Council (GJEPC). The industry has generated US\$ 38.6 billion of revenue from exports in 2015-16, making it the second largest exporter after petrochemicals.

India's Gems and Jewellery sector has been contributing in a big way to the country's foreign exchange earnings (FEEs). The Government of India has viewed the sector as a thrust area for export promotion. The Indian government presently allows 100 per cent Foreign Direct Investment (FDI) in the sector through the automatic route.

The gems and jewellery market in India is home to more than 500,000 players, with the majority being small players.

India is one of the largest exporters of gems and jewellery and the industry is considered to play a vital role in the Indian economy as it contributes a major chunk to the total foreign reserves of the country. UAE, US, Russia, Singapore, Hong Kong, Latin America and China are the biggest importers of Indian jewellery.

The overall gross exports of Gems & Jewellery in April 2016 stood at US\$ 3.23 billion, whereas exports of cut and polished diamonds stood at US\$ 1.78 billion. Exports of gold coins and medallions stood at US\$ 302.67 million and silver jewellery export stood at US\$ 299.69 million in April 2016. The overall gross imports of Gems & Jewellery in April 2016 stood at US\$ 2.90 billion.

According to a report by Research and Markets, the jewellery market in India is expected to grow at a Compound Annual Growth Rate (CAGR) of 15.95 per cent over the period 2014-2019.

The cumulative Foreign Direct Investment (FDI) inflows in diamond and gold ornaments in the period April 2000-December 2015 were US\$ 751.37 million, according to Department of Industrial Policy and Promotion (DIPP).

During April-December 2015, India imported US\$ 17.33 billion worth of raw material for gems and jewellery. With an 8 per cent share in polished diamonds, India has become the world's third largest diamond consumer.

Trading in Shares and Derivatives

The derivative market in India, like its counterparts abroad, is increasingly gaining significance. During the financial year 2015-16, the securities market in India and global as well, has performed decently. However, day-to-day fluctuation in stock market price is a usual scenario which indicates that the said sector is not stable. Since your Company is not deeply engaged in dealing or trading in securities, derivatives and other financial intermediaries, the management has not taken extreme efforts to cover this sector.

Real Estate

The real estate sector is one of the most globally recognised sectors. In India, real estate is the second largest employer after agriculture and is slated to grow at 30 per cent over the next decade.

The real estate sector comprises four sub sectors - housing, retail, hospitality, and commercial. The growth of this sector is well complemented by the growth of the corporate environment and the demand for office space as well as urban and semi-urban accommodations.

The construction industry ranks third among the 14 major sectors in terms of direct, indirect and induced effects in all sectors of the economy.

The Indian real estate market is expected to touch US\$ 180 billion by 2020. The housing sector alone contributes 5-6 percent to the country's Gross Domestic Product (GDP).

In the period FY08-20, the market size of this sector is expected to increase at a Compound Annual Growth Rate (CAGR) of 11.2 percent. Retail, hospitality and commercial real estate are also growing significantly, providing the much-needed infrastructure for India's growing needs.

The Indian real estate sector has witnessed high growth in recent times with the rise in demand for office as well as residential spaces.

According to data released by Department of Industrial Policy and Promotion (DIPP), the construction development sector in India has received Foreign Direct Investment (FDI) equity inflows to the tune of US\$ 24.19 billion in the period April 2000-March 2016.

Opportunities and Threats

The consumer landscape has been continuously evolving and one has to keep pace with the changing trends in order to win consumer confidence. The Gems and Jewellery sector, Securities market sector and Real estate sector in India offers a significant growth opportunity to be tapped and appropriate strategies need to be formulated to capture this opportunity. The Company is capturing these opportunities by adopting various business techniques and strategies to

attract the contemporary consumers. The Company's core business is leveraging its deep experience in the field of gems and jewellery segment rather than dealing or trading in securities market and real estate activities and building its business based on the gems and jewels theme across categories. Unorganised sector, threat from China, predominance of the US market, exchange rate/currency risk, high level of inventories, decreasing diamond reserves, competition from other luxury goods, beneficiation in mining countries, global economic slowdown, synthetic diamonds, issue of conflict diamonds and more are some of the threats to the company's prospects.

The Company expects demand to pick up as and when the disposable income in the hands of consumers increases due to pick up in economic activity and various government initiatives. The company has a good mix of business activities to service the demand of consumers. We are well poised to effectively capture the growth opportunities in the coming years.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2016, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.
