MANAGEMENT DISCUSSION AND ANALYSIS REPORT

The Management of WELLNESS NONI LIMITED (formerly known as RGN Securities and Holdings Ltd) presents the Industry Overview, Opportunities and Threats, Initiatives by the Company and overall strategy of WELLNESS NONI LIMITED (formerly known as RGN Securities and Holdings Ltd) for the year 2010-2011 and its outlook for the future. This outlook is based on assessment on the current business environment; it may vary due to future economic and other developments.

This Management Discussion and Analysis statement of the Annual Report has been included in adherence to the spirit enunciated in the code of Corporate Governance approved by the Securities and Exchange Board of India.

Introduction :

WELLNESS NONI LIMITED (formerly known as RGN Securities and Holdings Ltd) has been entered in the business of manufacturing and Marketing of Noni based Fruit Juice Concentrate. These products are considered Food supplementary and harmless to the human being.

Macro - Economic Developments :

India is on the verge of witnessing a sustained growth in infrastructure build up. The construction industry has been witness to a strong growth wave powered by large spends in housing, road, ports, water supply and airport development. The construction sector has registered double digit growth during the last few years and its share as a percentage of GDP has increased considerably as compared to the last decade.

After a slowdown in last fiscal order inflows in the construction industry registered a healthy growth in 2010. Real estate investments account for majority of the total construction investments. Demand-supply gap for residential housing, favourable demographics, rising affordability levels, availability of financing options as well as fiscal benefits available on availing of home loan are the key drivers supporting the demand for residential construction. In addition to this, demand for office space from IT/BPO segment is expected to continue due to emergence of India as a preferred outsourcing destination. Also, boom in organized retail is expected to result in huge demand for real estate construction. As per the ASSOCHAM, the Indian real estate industry size is pegged at US\$ 16 bn and growing at the rate of 30% per annum.

Industry structure & Development :

India is the second largest producer of food in the world. Whether it is canned food, processed food, food grains, dairy products, frozen food etc, the Indian agro industry has a huge potential, the significance and growth of which will never cease. A few years ago, companies struggled to sell packaged foods and food supplements. But now it is much easier to break into the Indian market because of a younger population, higher incomes, new technologies and a growing middle class, estimated at 50 million households. An average Indian spends around 53 per cent of his/her income on food. The domestic market for processed foods is not only huge but is growing fast in tandem with the economy. It is estimated to be worth \$90 billion. Processed Food Manufacturing companies are required to be persistent and must adapt products to the Indian cultural preferences. With modernization, innovation and incorporation of latest trends and technology in the entire food chain as well as agro-production, the total production capacity of agro products in India and the world is likely to double by the next decade.

Wellness Noni Limited

Opportunities & Threats :

The company deals in Noni based Fruit Juice Concentrate goods like health drink; Noni based processed food products. There is a positive support from the Government for manufacturing of Agro based processed food products. Moreover, the Indian Government is providing stimulus wherever possible by cutting taxes and duties and granting of Subsidies, in order to increase the consumption among the consumer fraternity. Since the company is manufacturing Agro based processed food products, timely availability of raw material and failure of crops is a threat to your Company.

Segment-wise analysis :

Your company is concentrating in only one segment i.e., Manufacturing and trading of Agri based Food Products.

Outlook

The scenario is rapidly changing nationally and internationally. In the domestic market with growing urbanization, burgeoning middle class, rising income, emergence of organized retailing, the consumer mindset and preferences are evolving towards value-added packaged and branded products. The international scenario for processed and packaged fruits and fruit supplements, vegetables is also undergoing a remarkable shift. India's capacity to produce international quality products is turning international demand to India.

The company is planning to introduce lot of noni base cosmetic products and those products are having good market both domestic and international market.

Our endeavour to drive organic growth is driven by a two pronged strategy. Firstly we are focusing on expanding the number and variety of products offered to customers across categories based upon focused research and consumer feedback. Secondly, our thrust is on enhancing distribution and presence in the country.

Risks and Concerns :

The key risks that affect the functioning of the company and are considered for risk management activities are :

- * Seasonal Fluctuations/Failure of Crops
- * Economic depression and inflation
- * Shelf life of the products of the company
- * Availability and cost of power
- * Inadequate cold chain storage infrastructure
- * Weak Supply Chain

Internal control systems and their adequacy :

Your company has in place, adequate internal control systems and procedures commensurate with the size and nature of our business. The system is designed to adequately ensure that financial and other records are reliable for preparing information and other data and for maintaining accountability of assets.
