Business Model

We follow a unique asset-light business model, which allows us to leverage high profitability from a low-capital base. This model has helped us register significant growth even during a downturn in the hospitality sector. Our business is broadly classified under two models: Owned & Leased (O&L) and Room Chartering (RC).

Owned & Leased (O&L) Model

Out of the nine properties classified under the O&L Model, one of them is owned by 'The Byke' and the remaining eight are on a long-term lease. As on March 2017, we have a portfolio of 733 rooms, of which 80 rooms are owned by us. This model enabled us to undertake the modernisation of acquired resorts, thereby encouraging a steady increase in Average Room Rates (ARR) and Occupancy Rates (OR). With a strong brand and renewed momentum, we are leveraging this opportunity to grow at a rapid pace and aim to extend our presence across geographies.

Room Chartering (RC) Model

This model has helped us to strengthen our pan-India presence through chartering rooms across 60 cities in India. We capitalise on diverse peak seasons to maximise our revenue. In 2016-17, we sold 5.96 Lakhs room nights, as compared to 4.90 Lakhs in 2015-16.

MD's Message

2016 has been another exciting year for the Company. We continued to make significant progress towards our vision of realising our growth potential and creating long-term value for our shareholders. We had driven strong momentum in 2016 which helped us deliver excellent financial and operational performance in the last financial year.

We have gone into 2017-18 with confidence and in a position of strength. With a compelling and proven strategy that is delivering, we will continue to focus on building scale where it matters and is executing a strategy at pace.

Anil Patodia, Managing Director

Dear Shareholders,

This has been a historic year for the Indian economy. Recognising the need to formalise the economy, the government has taken some effective steps in that direction. Demonetisation of high-value currency notes in 2016 was the first of such steps followed by the recent roll out of the Goods and Services Tax (GST) that is bringing in the much-needed structural change. Though both these reforms have been criticised, in the long run, these have the potential to benefit all sectors, including ours.

Further, India's macroeconomic indicators have strengthened owing to a host of policy initiatives being undertaken to catalyse growth. This has resulted in improvements in the travel and tourism segment as well. The industry as a whole is witnessing robust growth in occupancy levels as demand is growing in tandem with the supply.

2016 has been another exciting year for the Company. We continued to make significant progress towards our vision of realising our growth potential and creating long-term value for our shareholders. We had driven strong momentum in 2016 which helped us deliver excellent financial and operational performance in the last financial year. Our focus on driving growth in markets, where we see the greatest opportunity, has paid off and this will continue to be a key part of our strategy in the coming years.

The government is taking several initiatives to encourage domestic as well as international tourism. These include policy/regulatory changes, infrastructural developments and promotional efforts. The measures introduced in the FY18 Budget for the tourism and hospitality sector are of an incremental nature. The proposal to develop special tourism zones is similar to the ongoing initiatives around the development of tourism circuits across the country, and the second edition of the 'Incredible India' campaign will also build upon the previous efforts towards the promotion of tourism. There are several factors that drive the market, including India's attractiveness as a medical tourism destination; steadily growing Meetings, Incentives, Conferences and Exhibitions (MICE) segment; and an increasing preference among millennials to travel.

Strengthening our Brand Portfolio

We strengthened our portfolio of brand during the year and focused on innovating and evolving our brand proposition. I have been particularly proud of the progress to develop, implement and execute our commercial strategy, by enhancing our brand portfolio, transforming our loyalty proposition and strengthening our direct channels – all underpinned by industry-leading technology.

With the adoption of the 'asset-light' strategy, the Company has aggressively added rooms in both the lease and room chartering businesses. During the year, we added properties in Jaipur, Udaipur and Mumbai. These expansion initiatives will help the Company to become a pan-India player. There has been a steady increase in the Occupancy Levels and Average Room Rent. The chartering business will continue to be strategic for the Company as it gives insights into tourist trends and also helps identify locations to expand. Also, under the RC model, the Company sold rooms night at a CAGR of 23% led by a strong agent network.

Our 'pure vegetarian' tag appeals to a larger set of consumers who are looking for affordable options that do not interfere with their cultural sensitivities. Awarded the 'Best Pure Vegetarian Hotel Chain in India' at the 11th Hospitality India & Explore the World Annual International Travel Awards, the Company prides itself in serving exclusive multi-cuisine vegetarian spread.

The Byke as a brand promises good quality at affordable pricing. We have, over the last 5 years, created a niche in the mid-market leisure tourism segment. We continue to focus on building that brand and on developing a strong marketing and distribution network, which are our key strengths.

Our people are our greatest asset and they have taken us far. We will continue to invest in driving the efficiency and productivity of our teams through industry-leading practices.

Financial Performance

We delivered a stellar performance during the year by registering 17% growth in the revenue. The operating profit grew by 18% to ₹ 63 Crores, while the net profit touched ₹ 32 Crores. This performance by the Company came on the back of strategic initiatives taken over the last few years.

Over the last 4 years (FY13-17) our revenue has grown by 28% CAGR, touching ₹ 270 Crores in the previous fiscal. Profits, too, have grown at a 42% CAGR in the last 4 years. Additionally, we earned a spot on Forbes Asia's Best under a Billion list for the second time last year.

We have embarked on an exciting journey with a vision to have 25 properties across India by 2020. Our focus would be on acquiring larger properties and locations where we foresee a good mix of all revenue streams, whether it be tourism or F&B or corporate and social events. Keeping this in mind, we recently added one property each in Udaipur, Jaipur and Borivali. We expect significant revenue contribution from all streams in these properties.

Looking Ahead

We expect to commence into 2017-18 with confidence and in a position of strength. With a compelling and proven strategy that is delivering, we will continue to focus on building scale where it matters and is executing a strategy at pace. I would also like to thank all our esteemed stakeholders and bankers for their consistent support and look forward to their enthusiastic participation to achieve the aspirations of the organisation.

As we enter into a new phase of this exciting journey, on behalf of the entire team, I invite all our stakeholders to be a part of our remarkable story of growth and sustainability.

Best wishes,

Anil Patodia
Managing Director

BUSINESS OVERVIEW

Byke is an established brand in the mid-market segment; the company is well placed to benefit from the surging middle class population and growing disposable income, which is expected to lead to higher spending on tourism. The Company has a unique "asset-light" business model which allows it to leverage high profitability from a low capital. Also, it targets niche vegetarian segment where all its restaurants and banquets serve vegetarian food.

The business can be broadly classified into two segments: Owned & Leased (O&L) and Room Chartering (RC).

Own + Lease Business:

Under this business, the Company operates nine properties; of which 1 is owned (Byke Heritage, Matheran) and 8 are on a long-term lease under the "Byke" brand. Byke acquires properties on operating lease basis on a long-term basis (15-20 years). The refurbishment and rebranding is done during the rent free period of 3-6 months and re-branded under "Byke". Thereafter, the focus is on improving the profitability through better management, better marketing and distribution network and utilizing the full potential of F&B and events in these properties.

The Company sold 5,96,000 room nights (up from 4,90,877 in FY16) across around 60 cities in India.

In FY17, the property in Udaipur, Byke Riddhi Inn, became operational. The property has 52 rooms, banquet hall, conference room & party hall. Udaipur is a very prominent tourist location and also for destination weddings. During the year, one property was added each in Borivali and Jaipur. The Byke Grassfield Riviera (Jaipur) has 80 rooms and targets religious and leisure tourists, the Hotel Delotel (Mumbai) has 40 rooms and targets high density residential population for corporate and social events.

The company exited three of the properties - Byke Sunflower, Byke Vijaya and Byke Hidden Paradise - as there were not in line with our strategy to focus on larger properties going forward and not consistent with the other properties. Byke Sunflower is the owned property hence it has been leased out.

As on March 2017, the Company had 733 rooms under management under 9 properties.

Room Chartering Business:

Under this business, the Company charts third-party rooms at popular tourist and religious destinations across India during the location specific peak seasons. It leverages the pan India network of over 300 agents to successfully sell them. The business is scalable and gives flexibility to Byke in terms of properties and locations. Also, the segment helps in acquisition of new properties for the hotel segment based on tourist demand and attractions.

In FY17, the Company sold 5,96,000 room nights (up from 4,90,877 in FY16) across around 60 cities in India.

Meaning of Internal Financial Controls over Financial Reporting

A Company’s internal financial control over financial reporting is a process designed to provide Reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Company’s internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorisations of management and directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the Company’s assets that could have a material effect on the financial statements.

Inherent Limitations of International financial controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or Procedures may deteriorate.

Opinion

In our opinion, the company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31st, 2017, based on the internal control over financial reporting criteria established by the company considering the essential components of the internal control stated in the Guidance Note on Audit of internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

NOTE 1: Significant Accounting Policies

1.1 Basis of accounting and preparation of financial statements

These financial statements have been prepared to comply with the Accounting Standards referred to in the Companies (Accounting Standards) Rules, 2006 notified by the Central Government in exercise of the power conferred under sub-section (1) (a) of section 642 and the relevant provisions of the Companies Act, 1956 read with the Rule 7 of Companies (Accounts) Rules, 2014 in respect of section 133 of the Companies Act, 2013 (the "Act") and Accounting Standard-30 'Financial Instruments: Recognition and Measurement' issued by the Institute of Chartered Accountants of India to the extent it does not contradict any other accounting standard referred to in section 133 of the Act. The financial statements have been prepared on a going concern basis under the historical cost convention on accrual basis. The accounting policies have been consistently applied by the Company unless otherwise stated.

All assets and liabilities have been classified as current or non-current as per the Company's normal operating cycle and other criteria set out in the Schedule III to the Companies Act, 2013. Based on the nature of products and services and the time between the acquisition of assets for processing and their realisation in cash and cash equivalents, the Company has ascertained its operating cycle as 12 months for the purpose of current – non current classification of assets and liabilities.

1.2 Use of estimates

The preparation of the financial statements in conformity with Indian GAAP requires the Management to make estimates and assumptions considered in the reported amounts of assets and liabilities (including contingent liabilities) and the reported income and expenses during the year. The Management believes that the estimates used in preparation of the financial statements are prudent and reasonable. Future results could differ due to these estimates and the differences between the actual results and the estimates are recognised in the periods in which the results are known / materialise.

1.3 Inventories

Inventories are valued at the lower of cost (on weighted average basis) and the net realisable value after providing for obsolescence and other losses, where considered necessary. Cost includes all charges in bringing the goods to the point of sale, including octroi and other levies, transit insurance and receiving charges.

1.4 Cash and cash equivalents (for purposes of Cash Flow Statement)

Cash comprises cash on hand and demand deposits with banks. Cash equivalents are short-term balances (with an original maturity of three months or less from the date of acquisition), highly liquid

investments that are readily convertible into known amounts of cash and which are subject to insignificant risk of changes in value.

1.5 Cash flow statement

Cash flows are reported using the indirect method, whereby profit / (loss) before extraordinary items and tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from operating, investing and financing activities of the Company are segregated based on the available information.

1.6 Depreciation and amortisation

With the applicability of Companies Act, 2013 with effect from April 1, 2014, depreciation / amortisation is provided on the 'straight line' method unless otherwise mentioned, pro-rata to the period of use of assets, based on the useful lives as specified in Part C of Schedule II to the Companies Act, 2013.

Depreciation on additions/ deletions to fixed assets is calculated pro-rata from/ up to the date of such additions/ deletions.

Assets individually costing ₹ 5,000 or less are fully depreciated in the year of purchase.

Depreciation on additions to fixed assets is provided on pro-rata basis from the date of put to use of assets.

1.7 Tangible fixed assets

Tangible Fixed assets are carried at cost less accumulated depreciation and impairment losses, if any. The cost of fixed assets includes interest on borrowings attributable to acquisition of qualifying fixed assets up to the date the asset is ready for its intended use and other incidental expenses incurred up to that date.

Capital work-in-progress:

Projects under which assets are not ready for their intended use and other capital work-in-progress are carried at cost, comprising direct cost, related incidental expenses and attributable interest.

1.8 Impairment of assets

The carrying values of assets / cash generating units at each Balance Sheet date are reviewed for impairment. If any indication of impairment exists, the recoverable amount of such assets is estimated and impairment is recognised, if the carrying amount of these assets exceeds their recoverable amount. The recoverable amount is the greater of the net selling price and their value in use. Value in use is arrived at by discounting the future cash flows to their present value based on an appropriate discount factor. When there is indication that an impairment loss recognised for an asset in earlier accounting periods no longer exists or may have decreased, such

Accompanying Notes to the Financial Statements

as at March 31, 2017

reversal of impairment loss is recognised in the Statement of Profit and Loss, except in case of revalued assets.

1.9 Revenue recognition

Revenue / Income and Cost/Expenditure are generally accounted on accrual as they earned or incurred, except in case of significant uncertainties. Interest and other income are accounted on accrual basis. Dividend income is accounted for when the right to receive it is established.

1.10 Investments

Long-term investments are carried individually at cost less provision for diminution, other than temporary, in the value of such investments. Current investments are carried individually, at the lower of cost and fair value. Cost of investments include acquisition charges such as brokerage, fees and duties etc.

1.11 Employee benefits

- (a) All employee benefits falling due within twelve months of rendering the services are classified as short term employee benefits. Benefits like salaries, wages, short term compensated absences etc. and the expected cost of bonus, ex-gratia are recognised in the period in which the employee renders the related service.
- (b) Retirement benefits in the form of Provident Fund and Employees State Insurance Scheme are defined contribution schemes and the contributions are charged to the Statement of Profit & Loss of the period when the contributions to the respective funds are due.
- (c) Gratuity liability is a defined benefit obligation and is provided for on the basis of an actuarial valuation on projected unit credit method made at the end of each financial period.
- (d) Actuarial gains and losses in respect of gratuity is charged to the Statement of Profit & Loss.

1.12 Borrowing costs

Borrowing costs that are attributable to the acquisition or construction of qualifying assets are capitalised as part of the cost of such assets. A qualifying asset is one that necessarily takes substantial period of time to get ready for its intended use. All other borrowing costs are charged to Statement of Profit & Loss.

1.13 Segment reporting

Based on the guiding principles stated in Accounting Standard 17 "Segment Reporting", the management does not recognise any distinguishable component of the Company. Hence the disclosure requirements of AS-17 in this regard is not applicable.

1.14 Lease

Where the Company as a lessor leases assets under finance leases, such amounts are recognised as receivables at an amount equal to the net investment in the lease and the finance income is recognised based on a constant rate of return on the outstanding net investment.

Assets leased by the Company in its capacity as lessee where substantially all the risks and rewards of ownership vest in the Company are classified as finance leases. Such leases are capitalised at the inception of the lease at the lower of the fair value and the present value of the minimum lease payments and a liability is created for an equivalent amount. Each lease rental paid is allocated between the liability and the interest cost so as to obtain a constant periodic rate of interest on the outstanding liability for each year.

Lease arrangements where the risks and rewards incidental to ownership of an asset substantially vest with the lessor are recognised as operating leases. Lease rentals under operating leases are recognised in the Statement of Profit and Loss on a straight-line basis.

1.15 Earnings per share

Basic earnings per share is computed by dividing the profit / (loss) after tax (including the post tax effect of extraordinary items, if any) by the weighted average number of equity shares outstanding during the year. Diluted earnings per share is computed by dividing the profit / (loss) after tax (including the post tax effect of extraordinary items, if any) as adjusted for dividend, interest and other charges to expense or income relating to the dilutive potential equity shares, by the weighted average number of equity shares considered for deriving basic earnings per share and the weighted average number of equity shares which could have been issued on the conversion of all dilutive potential equity shares. Potential equity shares are deemed to be dilutive only if their conversion to equity shares would decrease the net profit per share from continuing ordinary operations. Potential dilutive equity shares are deemed to be converted as at the beginning of the period, unless they have been issued at a later date. The dilutive potential equity shares are adjusted for the proceeds receivable had the shares been actually issued at fair value (i.e. average market value of the outstanding shares). Dilutive potential equity shares are determined independently for each period presented. The number of equity shares and potentially dilutive equity shares are adjusted for share splits / reverse share splits and bonus shares, as appropriate.

1.16 Taxes on income

Current tax is the amount of tax payable on the taxable income for the year as determined in accordance with the provisions of the Income Tax Act, 1961.

Accompanying Notes to the Financial Statements

as at March 31, 2017

Minimum Alternate Tax (MAT) paid in accordance with the tax laws, which gives future economic benefits in the form of adjustment to future income tax liability, is considered as an asset if there is convincing evidence that the Company will pay normal income tax. Accordingly, MAT is recognised as an asset in the Balance Sheet when it is probable that future economic benefit associated with it will flow to the Company.

Deferred tax is recognised on timing differences, being the differences between the taxable income and the accounting income that originate in one period and are capable of reversal in one or more subsequent periods. Deferred tax is measured using the tax rates and the tax laws enacted or substantially enacted as at the reporting date. Deferred tax liabilities are recognised for all timing differences. Deferred tax assets in respect of unabsorbed depreciation and carry forward of losses are recognised only if there is virtual certainty that there will be sufficient future taxable income available to realise such assets. Deferred tax assets are recognised

for timing differences of other items only to the extent that reasonable certainty exists that sufficient future taxable income will be available against which these can be realised. Deferred tax assets and liabilities are offset if such items relate to taxes on income levied by the same governing tax laws and the Company has a legally enforceable right for such set off. Deferred tax assets are reviewed at each Balance Sheet date for their realisability.

1.17 Provision and Contingencies

A provision is recognised when the Company has a present obligation as a result of past events and it is probable that an outflow of resources will be required to settle the obligation in respect of which a reliable estimate can be made. Provisions (excluding retirement benefits) are not discounted to their present value and are determined based on the best estimate required to settle the obligation at the Balance Sheet date. These are reviewed at each Balance Sheet date and adjusted to reflect the current best estimates. Contingent liabilities are disclosed in the Notes.
