MANAGEMENT DISCUSSION AND ANALYSIS

Economic Scenario

The year 2009-10 proved to be a year of global economic resurgence. The global economy, after faltering due to recession during 2008-09, witnessed an improvement, mainly on account of infusion of stimulus funds by respective countries. China and India led the recovery from the front, on account of huge domestic demand and continued thrust on infrastructure creation, further propelling demand within the core sectors. The US recovery, largely driven by fiscal and monetary stimulus, is expected to clock a GDP growth of 2.8% in 2010.

As per the advance estimates of GDP for 2009-10 released by the Central Statistical Organization (CSO), the Indian economy is expected to grow at 7.2% in 2009-10, with the industrial and the service sectors growing at 8.2 and 8.7% respectively, mainly driven by factors like rising per-capital income, urbanisation, favorable demographics, declining household size and increasing job security. Barring any problems caused by the country's fiscal vulnerability, growth is expected to strengthen in subsequent years, as it will continue to reap the benefits of the ongoing opening up of the economy and gradual improvements in infrastructure.

Business Outlook

The financial sectors globally witnessed a major upturn and supported by government interventions, many of the finance companies including banking institutions have managed to revive successfully world-wide. Conditions in India have also gradually improved supported by excellent results posted by most of the corporate. The financial sector in India has got a major role to play as demand for finance is gradually increasing in all major sectors especially infrastructure and housing development sectors. The equity markets also witnessed a major bounce-back and valuations have increased substantially. With SME playing a key role in the India development story, your company focus into MSME sector is going to pay off.
