ANNEXURE II : MANAGEMENT DISCUSSION AND ANALYSIS

Overall Review:

India is the one of the world's largest producers of textiles and garments. India's textiles industry is one of the strong pillars of the national economy. It is also one of the largest contributing sectors of India's exports worldwide. The textiles industry contributes nearly 14% of the total industrial production of the Country. It also contributes around 4% to the GDP of the country, employs 45 million people and accounts for nearly 11% share of the country's total exports. Thus the textiles industry plays a crucial role through its contribution to industrial output, employment generation, and the export earnings of the country. The textile sector is the second largest provider of employment after agriculture.

With a view to promote the textile industry, Government of India has introduced several incentives and policies in the Union Budget 2012-13. Apart from continuing major schemes the budget has taken many measures to assure affordable credit, technology upgradation, skill development and duty relief to keep the industry competitive. With 100 per cent foreign direct investment (FDI) allowed in the textile sector under the automatic route there is abundant scope for boom in the textile industry with the retailers across the world looking for options of increasing their sourcing from the Indian markets. Indian manufacturers are also pro-actively working towards enhancing their capacities to fulfill this increased demand.

A. INDUSTRIAL STRUCTURE AND DEVELOPMENT:

The Textile Policy of 1985 and Economic Policy of 1991 focusing in the direction of liberalisation of economy and trade had accelerated the growth in textile industry in 1990s. The opening up of economic gave the much-needed thrust to the Indian textile industry, which was now successfully become one of the largest in the world. The vast pool of skilled and unskilled workers, availability of labour at low costs, strong base for production of raw materials characterize the textile industry in India. In the liberalized post-quota period, India has emerged as a major sourcing destination for buyers from all over the globe as the Indian textile industry is very diverse in size, manufacturing facility, type of apparel produced, quantity and quality of output, cost, and requirement for fabric etc.

To meet the challenges of post liberalization period, the Government of India initiated a reforms process in the form of textile policies which aimed at promoting large capital investments; reduce cumbersome procedures associated with the tax regime, etc. The main objective of these textile policies is to make available adequate raw materials and to build state of the art production capacities and achieve a pre-eminent global standing in manufacture and export of all types of textiles. With a view to raise India's share in the global textiles trade, the Ministry of Textiles proposes 40 new textile parks. Set up under the Scheme for Integrated Textile Parks (SITP), this initiative will not only make the industry cost competitive, but will also enhance manufacturing capacity in the sector. Further, the growth of technical textiles is poised to increase from present 11% to 20% in next five years span.

Textile industry now has the opportunity to realize its potential fully. It provides one of the most basic needs of people and holds importance maintaining sustained growth for improving quality of life.

B. OPPORTUNITY AND THREATS:

The potential size of the Indian textile industry is expected to reach US\$220 Billion by 2020. A strong raw material production base, a vast pool of skilled and unskilled personnel, cheap labour, good export potential and low import content are some of the salient features of the Indian textile industry. We expect a huge growth in demand of our products in the upcoming years owing to the total Indian urban population which currently stands at 307 million which will provide huge growth opportunities. The Company predicts good market demand of the products which shall improve the margins of the Company substantially.

On the flip side the Indian textile industry faces a host of constraints such as Fragmented structure with the dominance of the small scale sector, high power costs, rising interest rates and transaction costs and unfriendly labour laws. India's textile industry urgently needs to diversify beyond its traditional markets of the US and Europe to remain competitive in the wake of the global economic downturn. Additionally the industry is vulnerable to its overdependence on western markets and had not sufficiently embraced new technology to remain competitive against China, Korea and Indonesia. Moreover the textile industry is fiercely competitive and this remains as one of the major concerns as the threat of competition arises from organized as well as disorganized sector.

Outlook:

The outlook for the textile industry remains cautious due to subdued demand although margins are expected to benefit from softening raw material prices. We are introducing new products from time to time to cater to consumer need and in the process we aim not only at Domestic but also International recognition. Jindal continuously works towards its competitive strength and making customer relationship cordial so that the Company overcomes the competition and remains successful globally. The Company is confident of improving margins.

C. RISK AND CONCERNS:

High inflation could adversely impact the domestic demand coupled with high cost of major input, such as cotton, large scale imports of cheap varieties of denim, and intense competition in domestic and export markets due to large scale over capacity. The Company also faces risk on account of foreign exchange fluctuations and continuous volatility on this front. As the business of the company is spread across the world, any change in policy of various governments, business legislation and such other operating risk exists.

Moreover the use of outdated manufacturing technology from the low end suppliers and inefficient supply chain management still remains a cause of concern. Additionally, this sector is still unorganized at many levels and needs a lot more government reforms for further improvisation.

D. INTERNAL CONTROL SYSTEM:

The company has in place an elaborate internal control system to ensure proper authorization and accounting of transactions and also for protecting company's assets against losses. The internal auditors check controls periodically and their report are reviewed by the management and the audit committee from time to time. During the year, the internal Auditor carried out quarterly reviews of different business aspects of internal controls to examine the adequacy and to suggest improvement. The Company also has a well laid out policy to maintain the highest standards of environment, safety and health while maintaining operational integrity.

E. FINANCIAL OPERATING PERFORMANCE:

During the year under review, the operations of the Company remained excellent. The total sale of the Company was Rs.60596.57 Lacs as against Rs. 50299.68 Lacs during the last Year. Profit before Depreciation and tax Rs 2603.71 Lacs as compared to Rs. 2260.85 Lacs during the last year.

F. HUMAN RESOURCE MANAGEMENT AND INDUSTRIAL RELATIONS:

The Company has maintained harmonious and cordial relations in the manufacturing facilities. Here at Jindal, we acknowledge the fact that human resources are an invaluable asset to the company and are the key to company's growth and success. We respect the Diversity of the employees and believe in providing equal opportunities to everyone on the board. Being a Textile company we understand the importance of the changing scenarios and we offer our employees with corporate training workshops and seminars to help them keeping updated with the latest trends. Strict working hours and corporate policies as per the Government of India's Labour laws makes Jindal a good choice for people to work. We offer best compensation and benefit to our employee's to keep them motivated to continuously

provide higher performance for the company. The company is also committed to provide the right environment to its employees to work and to inculcate a sense of pride.

G. CAUTIONARY STATEMENTS:

27.1 SIGNIFICANT ACCOUNTING POLICES:

A) METHODOLOGY OF ACCOUNTING

The Accounts have been prepared as per historical cost convention on an accrual basis.

B) USE OF ESTIMATES

C) FIXED ASSETS

Fixed Assets are stated at their cost of acquisition including expenses less accumulated depreciation and impairment losses.

As asset is considered as impaired in accordance with Accounting Standard 28 on “impairment of Assets,” when at balance sheet date there are indications of impairment and the carrying amount of the asset, or where applicable the cash generating unit to which the asset belongs, exceeds its recoverable amount (i.e. the higher of the asset’s net selling price and value in use). The carrying amount is reduced to the recoverable amount and the reduction is recognized as an impairment loss in the profit and loss account.

D) INVESTMENTS

Investments are classified as current or long-term in accordance with the Accounting Standard 13 on “Accounting for Investments”.

Current Investments are carried at the lower of cost or quoted / fair value, computed category wise. Long Term Investments are stated at cost. Provision for diminution in the value of long term investment made only if such a decline is other than temporary in the opinion of the management.

E) INVENTORIES

(a) Raw Materials, Work in Process and consumables are valued at cost.

(b) Inventories of finished goods are valued at lower of cost or market value.

F) PRELIMINARY AND PUBLIC ISSUE EXPENSES

H) DEPRECIATION

Depreciation is provided on straight line method in accordance with provision of section 205(2)(b) and at the rates prescribed in schedule XIV of the Companies Act, 1956 and any amendment there to from time to time, on pro rata basis with respect to the period of use. Depreciation on New assets purchased is provided from the beginning of the next month after the end of the month in which addition to new assets has taken place, or the date of putting the assets to the use, whichever is later.

D) FOREIGN EXCHANGE TRANSACTIONS

- a. Transactions denominated in foreign currencies are normally recorded at the exchange rate prevailing at the time of settlement of transactions. Foreign currency transactions remaining unsettled at the end of the year are recorded at the rate prevailing as on 31st March 2013.

Pursuant to the notification of the Companies (Accounting Standards) Amendment Rules 2006 on 31.03.2013, which amended Accounting Standard 11 on “The Effects of changes in Foreign Exchange Rates”, exchange differences relating to long-term monetary items are dealt with in the following manner. Exchange differences relating to long-term monetary items, arising during the year, in so far as they relate to the acquisition of a depreciable capital asset are added to/deducted from the cost of the asset and depreciated over balance life of the asset.

J) CONTINGENT LIABILITY

As no contingency is likely to be materialised into liability after the year end till the finalisation of accounts and have material effect on the position stated in Balance Sheet, no provision was made in terms of Accounting Standard 29 on “Provisions, Contingent Liabilities and Contingent Assets”.

K) PROVISION FOR CURRENT & DEFERRED TAX
