**MANAGEMENT DISCUSSION AND ANALYSIS:**

During the year under the review the capital market was a period of profit booking. The company has liquidated its investment made in the shares. The operating income was Rs. 7198243/-. Since investment made in the equity shares are subject to greater risk and return, the company expects that with the improvement in the capital market the risk will decline and there will be more returns. Further capital market is subject to various internal and external factors such global economic scenario, political stability, economic policies of the government, tax factors affecting the capital market etc. Though the directors of the company have a wide experience in the field of capital market but the company has no control over the external factors while making investment. However due to their wide experience and critical analysis the company is taking steps to overcome the situation.

Statements made in the above Para in regard to projections, estimates and expectations may be "forward looking statements" within the meaning of applicable securities laws and regulations. Many unforeseen factors may come into play and affect the actual results which could be different from what Directors envisage in terms of future performance and outlook.
