Management Discussions and Analysis Report

Pursuant to Clause 49 of the Listing Agreement, a report on Management Analysis Report, as an annexure to the Directors' Report is give below:

A. Industry Backdrop and Company Outlook

The Indian economic situation ran out of steam as a result of the economic and financial crisis, although India is traditionally strongly focussed on the domestic market and the economic development consequently depends primarily on the domestic situation. Therefore, the financial crisis generally had less effect on India than on nations with a stronger export focus.

In order to give the stagnating economic growth new impetus, three economic stimulus packages have been created. In particular, funding is being injected into infrastructure projects. Now, a recovery is being anticipated again; the prognoses were revised upwards. The economic activity is increasing again and the confidence of companies and consumers is rising. A GDP increase of 6.4 percent is expected, after 5.4 percent in the previous year. In addition, a real percentage increase of 7.4 percent is being forecast in the industrial sector, including the building sector.

The wire industry in India is heavily dependent on the automotive, telecommunication and construction industries as the main customers. The rapid growth of these industries in the last few years has led to an annual growth of approximately 25 percent in the wire and cable industry. As a result of the financial crisis, this growth has temporarily stalled. As a result, the forecasts for the wire industry are dependent on how these industries continue to develop. During the year, the wire production declined in most sectors but is now looking forward to a recovery.

The building sector in India has re-established after a six-month period of weakness. In the current five year plan, it is expected to grow by an average of 10% per annum. Lately, the industry has recorded a growth of 7 percent. The public sector deals with about two thirds of investments. As the Indian government is focussing primarily on public-private partnerships with major infrastructure projects, the ratio will switch in favour of the private sector.

With an investment need of about 450 billion US\$, the infrastructure construction is the growth engine of the construction industry; the development of the transport network, in particular, is an absolute priority of the government. The demand for office space is currently stagnating, but should pick up. In terms of private residential construction, companies are increasingly focussing on the low-price market segment; Indian urban areas, alone, are currently short of about 25 million apartments.

While the sales figures in the automobile industry were characterized by uncertainties about the effects on the financial crisis, the Indian automobile industry has been slowing recovering. In total, the annual sales of cars has doubled in the last 5 years. According to the association of Indian automobile manufacturers, the growth will double or even triple. The government published an Automotive Mission Plan, where the objective is to double the automobile industry's contribution to the GDP and to create 25 million new workplaces in the industry.

Your company is in the process of revamping the existing business model by analyzing various plans of establishing new industry for wire manufacture.

B. Internal Control Systems and their adequacy

The company has adequate internal control systems commensurate with the size of its operations and for the purpose of exercising adequate controls on the day-to-day operations. Systems are regularly reviewed to ensure effectiveness.

C. Material Developments in Human Resources / Industrial Relations

Human resource development is a primary area of focus for the Company. The company recruited senior level and other functional specialists during the year. The Human relations in the organization have been cordial. The total number of persons employed in the company as on March 31, 2011 were 5.

D. Discussion on Financial Performance with respect to operational performance

The company has not yet started the commercial operations as the management is drawing various plans to start the business activity either in the existing wires sector or in the proposed information technology sector. However due to

no commercial operations the company's accumulated losses are more than 50% of the net worth of the company as on the financial year end.

E. Opportunities and Threats

The opportunities for the wire industry is growing on day-to-day basis with increasing construction and infrastructure demands.

The major threat to the existing wire sector and the proposed information technology sector are the international markets which directly dictate the norms.

Declaration regarding compliance with the code of conduct and ethics policy of the company by Board Members and senior management personnel

This is to confirm that the company has adopted code of conduct and Ethics policy for the Board of Directors and Associates of the Company, which is available at the Registered office of the company.

I, P Pavan Kumar, declare that the Board of directors and senior management personnel have affirmed compliance with the Code of Conduct and Ethics Policy of the Company.
