Management Discussion and Analysis

Industrial Review:

The Indian (IT) industry has played a key role in putting India on the global map. The IT sector has become one of the most significant growth catalysts for the Indian economy. In addition to fuelling India's economy, this industry is also positively influencing the lives of its people through an active direct and indirect contribution to various socio-economic parameters such as employment, standard of living and diversity. The industry has played a significant role in transforming India's image from a slow moving bureaucratic economy to a land of innovative entrepreneurs and a global player in providing world class technology solutions and business services

The Indian IT Sector has identified its economic destiny during the recent years with great clarity along with the changing economic and business conditions, rapid technological innovation, proliferation of the internet and globalization, which are creating an increasingly competitive market environment that is driving corporations to transform the manner in which they operate.

Financial Review:

During the year under review, the Company has achieved a total income of Rs.7.20 Lacs as against Rs.5.04 Lacs during the last year.

Opportunities and Threats:

The IT industry has great scope for people as it provides employment to technical and non-technical graduates and has the capability to generate huge foreign exchange inflow for India. Foreign countries get benefits in terms of labour costs and business processes. We are broadening the range of services being provided to the customers, which is resulting in more off shoring. Talent acquisition, development and retention initiatives taken by the company have brought down the employee attrition rates, thereby providing more stability to the employees and increasing their job commitment. Our Company has the ability to design, develop, implement and maintain advanced technology platform and solutions to address business and client needs has become a competitive advantage and a priority for corporations worldwide. Currently, the prevalence of multiple technology platforms and a greater emphasis on network security and redundancy have increased the complexity and cost of IT system, need for more dynamic technology solutions and the increased complexity, cost and risk associated with experience in leveraging technology to help improve efficiency and security.

There are various opportunities for the IT Companies as the Govt. has provided incentives including tax holiday and competitive duty structures by providing infrastructure support through organizations such as software technology parks. Again, the number of internet entities are also increasing at the faster rate, adding to this, the industry is perfectly poised to tap new opportunities in the off shoring and domestic segments for greater wealth and IP creation for the country and with household consumer across income segments and geographies being exposed to technology through mobile penetration, B2C applications (Railway reservation, e-Chaupal, NSE, etcetra), the IT sector is deemed to prosper in the years ahead.

As against the opportunities there are certain threats from the Union Budget's proposal as an increase in the excise duty to 10 percent from the existing 8 percent which will raise the hardware prices and also components such as microprocessors, floppy disk drives, hard disk drive, flash drive, CD/DVD and combo drive meant for external use will now attract 4 per cent excise duty as a result prices go up for them too.

The budget proposes to raise the minimum alternative tax (MAT) rate from 15 per cent to 18 per cent as a result of which all IT companies now have to pay a minimum of 18 per cent tax irrespective of the fact that they operated under the Software Technology Parks of India or the Special Economic Zones or not.

Moreover, the information technology sector was severely impacted by worldwide recession during 2009, but in 2010 the sector had shown signs of recovery. Having said this, other macroeconomic factors like liquidity crunch, higher interest rates and emergence of other low-cost destinations have played a significant impact on the growth of this sector in India. Plus the Lack of products / solutions / services from emerging companies segment have also severally effected the IT sector and in times like these , the sector is looking for the central government towards its continued support on the policy front as well as relaxing certain procedures on direct and indirect taxes.

Outlook:

The Indian information technology sector continues to be one of the sunshine sectors of the Indian economy showing rapid growth and promise. IT will bring about a drastic improvement in the quality of life as it impacts application domains and global competitiveness. Technologies that are emerging are Data Warehousing and Data Mining. They involve collecting data to find patterns and testing hypothesis in normal research. Software services that are being used in outsourcing will go a long way.

IT will continue to gain momentum. Indian information technology (IT) market is expected to grow at around 15.5 per cent, on the back of growing investor confidence and favorable initiatives taken by the government. The Company's Philosophy is based on customized services which are solely depended on individual customers requirement with the use of latest technology.

With its advance technology, competitive strength and cordial relationship, the company is expected to meet the growing demands of the industry.

Internal Control System and their adequacy:

The company has proper and adequate system of internal Control System to safeguard of the assets of the company against the loss from unauthorized use and disposition. Company internal control system also ensures that all transactions are recorded properly.

The Management continuously reviews the internal control system. The review include overseeing adherence to management policy, safeguarding the assets of the company and the ensuring the preparation of timely and accurate financial information. The philosophy we have with regard to internal control systems and their adequacy has been formulation of effective systems and their strict implementation to ensure that assets and interests of the Company are safeguarded; checks and balances are in place to determine the accuracy and reliability of accounting data.

Our Company has designed the system of internal control to eliminate the risk of failure to achieve business objectives. The Board has reviewed the effectiveness of internal controls during the year.

There are policies and procedures for the reporting by employees and the resolution of suspected fraudulent activities. It is the policy of the Company to employ staff and management of high integrity, to train them appropriately to gain the latest information on the development in the IT sector.

Risk and Concerns:

The IT Industry in India has remained at the forefront of the outsourcing industry and actually has become an enabler for industry growth through expansion of Indian off shoring firms into other countries. Offshore service centers are spawning in the country due to operational excellence with low delivery cost, quality leadership, abundant skilled resources and a conducive business environment. The effective use of offshore technology services offers a variety of benefits, including lower cost of ownership of IT infrastructure, lower labor costs, improved quality and innovation, faster delivery of technology solutions and more flexibility in scheduling.

The success of the organization is largely dependant upon highly skilled technology professionals and the ability of our company to hire, attract, motivate, retain and train these personnel which becomes very difficult as the

corporations are reluctant to expand their internal IT departments and increase costs. These factors have increased corporations' reliance on their outsourced technology service providers and are expected to continue to drive future growth for outsourced technology services.

Human Resources Management and Industrial relations:

The thrust of your Company's human resource development efforts is to create a responsive and market-driven organization. In pursuit of your Company's strategy to create new engines of growth, human resource strategies continue to focus on the development of distributed leadership at all levels in the organization. We believe to create trust, transparency and teamwork improved employee productivity at all levels. Our commitment to harmonious industrial relations resulted in enhancing effectiveness of operations.
