OVERVIEW OF COMPANY'S PERFORMANCE FOR THE YEAR 2016-2017:

Agrochemical Industry is facing challenging times currently due to drought year and tough market conditions. Crop yields have been impacted and farmer's net realization is also affected badly. To ward off the risk of monsoon and dropping agro-products prices, the company has been increasing its focus on Public Health Business and Export. These two areas will help in warding off the risks associated with agricultural business.

However, this year hopefully will end the back to back droughts faced in the years 2014, 2015 and low pest infestation in 2016. This being the main cause for lesser sales will come to an end soon.

The Subsidiary has made a wide range of diagnostic kits ranging from infectious diseases to oncology, which are being accepted by big names customers in diagnostic market. MANAGEMENT DISCUSSION AND ANALYSIS REPORT:

(a) Industry structure and developments

Agrochemical

India is the fourth largest global producer of agrochemicals after USA, Japan and China. The industry size was to the tune of USD 4.4 billion in FY15 and is expected to grow at 7.5% per annum to reach USD 6.3 billion by FY20. Approximately 50% of the demand comes from domestic consumers and the rest from exports. Global population is expected to cross 9 billion by 2050. Rising population has led to increasing food demand. India is the second most populous country in the world, with its population estimated to grow over time. To meet the food and nutrition needs of a growing population requires a sustainable approach that puts thrust on increasing productivity against a background of lower yields and decreasing farm sizes. It requires a push from all stakeholders - the farmer, the government and the industry collectively, so that the changing needs of the nation are met.

Increasing demand of food grains for the growing population and declining farmlands have intensified pressure for improving farm yields and reducing crop losses due to pest attacks. Agrochemicals play an immensely important role in agriculture and food security. The agrochemicals industry comprises of insecticides, weedicides, fungicides, plant growth promoters and regulators, fumigants and rodenticides as the major product segments. The industry is highly competitive and dynamic but fragmented. The Industry continues to grow in size; due to increase in use of Agro chemicals by farmers due to awareness, increase in farm gate prices of produce and also government schemes emphasis to farmers to increase yield per acre, and due to intensive farming of Pest prone crops like cotton, Chili, Paddy, Soyabean etc.

However, due to global warming and changing weather, erratic monsoon the industry trend becomes uncertain at times.

Molecular Diagnostic Kits Business

Life Sciences market has been growing at a reasonable pace. But now, with more emphasis on research by Govt. and also private companies, the molecular research market shall continue to expand.

For Molecular Diagnostic Market it's in the nascent stage in India and lot needs to be done to put molecular diagnosis in the routine diagnostic protocol, like awareness, development of infrastructure etc. Currently, the molecular diagnostic market is dominated by multinationals and highly metro centric. But with launch of cheaper indigenous kits and setting up of new PCR diagnostic centers in smaller towns, the reach to people will increase along with awareness, which will spark huge growth potential in coming years. In regard to this matter our subsidiary company's project has scaled up well and its diagnostics kits of several parameters are in good demand among the customers.

Molecular Diagnostics Performance

3B BlackBio BiotechIndia Ltd., an Indo-Spanish joint venture in the area of biotechnology molecular diagnostics (PCR based kits) achieved this growth through new and existing tests in diagnostics segment which caters to infectious diseases and oncology markets. Whereas there has been steady growth in the existing portfolio of infectious diseases markets, a surge in revenues has been observed with newly launched tests in oncology market. Unlike infectious diseases tests which are season dependent, oncology segment offers a steady growth throughout the year. Additionally, infectious disease segment attracts huge competition from foreign as well as domestic players; on the other hand oncology segment is still a new and upcoming segment with few serious competitors.

Adding to the results we have observed high growth in oncology segment in addition to steady growth in our existing portfolio of infectious diseases tests. We are launching few more oncology tests along with infectious tests in the coming FY' 17-18 which will add to our growth.

On customer relations, we are now trusted and preferred business partners with national hospitals and labs. We are also getting enquiries from overseas. We are confident of expanding to international markets which could be as early as coming FY' 17-18.

On building internal strength of the organization we are looking at our current growth which comes from our customer's trust, we have invested into R & D infrastructure and have hired some new talents to increase production capacities.

Further to above, 3B BlackBio's R&D under advanced stage of development are very strong, key parameters from Oncology to Blood Screening Kits are in pipeline which will be launched in 2017. All the kits are marketed under registered Brand TRUPCR.

With all these parameters fully commercialized in 2017-18 the top line and bottom line will show a speedy growth.

(b) Outlook & Opportunities

Industry offer good opportunity for growth, due to increase in use of Agro chemicals by farmers and due to intensive farming of Pest prone crops like cotton, Chili, Paddy, Soyabean etc..

Good export potential to adjoining countries exists, which has to be tapped and company is continuously getting new products registered in these countries to encash this opportunity.

Life Sciences market offer good opportunity with increased emphasis on research by Govt. and also private companies, the molecular research market shall continue to expand.

For Molecular Diagnostic Market it is in the nascent stage in India and lot needs to be done to put molecular diagnosis in the routine diagnostic protocol, like awareness, development of infrastructure etc. Currently, the molecular diagnostic market is dominated by multinationals and highly metro centric. But with launch of cheaper indigenous kits and putting of new PCR diagnostic centers in smaller towns, the reach to people will increase along with awareness, which will spark huge growth potential in coming year. The subsidiary company's business has scaled up well and its diagnostics kits of several parameters are in good demand among the customers. 3B BlackBio Biotech India Limited will soon be launching further new diagnostics kits in Oncology and Infections sector which are being demanded by the existing customers.

(c) Segment-wise or product-wise performance

Segment wise performance is not applicable as total revenue from any other segment apart from Agrochemical is not more than 10% this year.

(d) Risk and concerns

The Industry is depended on monsoon and pest attack. With global warming weather pattern is becoming unpredictable. Agrochemical sector is monsoon dependent, but as your company is covering a wide geographic area and multiple crop products this vagary is warded off to quite a lot extent.

To some extent the ill effect can be ward off by focusing on irrigated areas, institutional business / warehousing corporation / public health program / exports.

Development of Molecular diagnostic market / Life Sciences is a slow process, as it requires investments to create new set ups / convince existing customers with free samples to switch there supplier and brand establishing by word of mouth. Thus, one needs to survive for a long time period in this market to reap the rewards.

(e) Internal control Systems and their adequacy:

The company has an elaborate system of internal controls to ensure optimal utilization of company's resources and protection thereof, facilitating accurate and speedy compilation of accounts and management information reports and compliance with laws and regulations. The company has a well defined organization structure, authority levels and internal guidelines and rules for conducting business transactions. The internal Auditors' and company's internal audit department conduct regular audits to ensure adequacy of internal control system, adherence to management instruction and compliance with laws and regulations of the country as well as to suggest improvements.

(f) Discussion on financial performance with respect to operational performance

Agrochemical Industry is facing challenging times currently due to back to back drought year and tough market conditions. Crop yields have been impacted and farmer's net realization is also affected badly. Still the sales turnover is Rs 1300.65 lac which is marginally lower by 17.15 % as compared to last year which was Rs 1569.96 lac and a slight growth in PBT of 7.53% is seen, as it stands to be Rs 27.13 lac as compared to last year which was Rs 25.23 lac.

To ward off the risk of monsoon and dropping agro-products prices, the company has been increasing its focus on Public Health Business and Export. These two areas will help in warding off the risks associated with agricultural business.

However, this year hopefully the agricultural business will do well as several forecasts have predicted good monsoon. This year will end the back to back drought faced from the last three years by the industry.

The subsidiary has made a wide range of diagnostic kits ranging from infectious diseases to oncology, which are being accepted by big names customers in diagnostic market. In times to come this subsidiary would become a market leader. Molecular Diagnostic Business sales grew by 92% and EBITDA grew from Rs 49.39 lac to Rs 150.56 lac ; NP grew from Rs 14.79 lac to Rs 90.20 lac. This trend is expected to continue this year also.

(g) Human Resources

The Company firmly believes that Human Resources and knowledge capital are vital for business success and creating value for stakeholders. The Company recognizes the fact that people drive business success, strengthening its efforts to build leadership at all levels. The industrial relations at both the units have remained quite cordial with total dedicated efforts from employees.

The total number of employees as on 31st March, 2017 was 54.

Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion and best of the information and according to the explanations given to us the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2017, based on internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note.

Management's Responsibility for Internal Financial Controls

The respective Board of Director's of the Holding Company and its Subsidiary are responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by these entities considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the Guidance note) issued by the Institute of Chartered Accountants of India". These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Group's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, to the best of our information and explanation given to us the Group has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2017, based on internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note.
