MANAGEMENT DISCUSSION AND ANALYSIS

CAUTIONARY STATEMENT

Management Discussion and Analysis forming part of this Report is in compliance with Corporate Governance Standards incorporated in the listing agreement with Stock Exchanges and such statements may be forward-looking within the meaning of applicable securities laws and regulations. Actual results could differ laws and regulations. Actual results could differ materially from those expressed or implied. Important factors that could make a difference to the Company's operations include economic conditions affecting demand/supply and price conditions in the domestic and overseas markets in which the Company operates, changes in the Government regulations, tax laws and other statutes and other incidental factors.

COMPANY PROFILE

India is one of the leading players in egg production and the cost of producing egg in India is also cheap. India ranks fifth in the world. India is exporting egg powder, frozen egg yolk and albumen powder to Europe, Japan and other countries. Table eggs are mostly exported to middle east. The company uses predominantly local inputs and exporting its final products, changes in economies both locally and at international level affect the growth and performance of the company. The abnormal increase in the cost of ingredients used in the manufacture of poultry feeds put a tremendous pressure on the cost of producing eggs which will in turn have a direct bearing on the profitability of the company.

INDUSTRY PERFORMANCE

As only few companies in India are engaged in processed eggs business, data relating to performance of this industry are not available. The company operated its plant and produced 5468.335 MTs of egg powder & 1188.543 MTs of liquid eggs as against the installed capacity of the plant 6300 Mts. During the current financial year the situation of INR v US dollar took a reverse trend and it is expected that the company's operating margin would be improved to a significant level.

BUSINESS OUTLOOK

Pronouncements by several leading economists and Central Bankers across the world would suggest that the worst is over for the global economy. There are early, if feeble, signs of recovery in the US economy, which as a significant bearing on the other major economies including India. Even though headline inflation has been brought under control, the projected increase in government borrowing is likely to have an adverse impact on market liquidity and consequently, on interest rate. Your company, as in the past, will continue to pursue its objective of growth with quality. Your Company also continues to focus on new opportunities to improve profitability.

The year under review faced with the problem of unprecedented increase in egg prices. In this current financial year also the trend of increase in raw material price continued as there is a spurt in feed ingredients cost.

As the increase in feed ingredients cost experienced through out the world there is a corresponding upward movement in the final product price which neutralized the thread posed due to raw material price movements. The outlook of this industry appears to be bright by considering the present trend in movements in the end product price and raw material cost.

STRENGTH OF THE COMPANY

The entire production process of the company is well documented which helps the company to track causes for product complaints up to raw material sources level. The company also made significant investment in process related and residue labs to

be at par with international standards and now the company is resourced with facilities to make sample analysis in its lab and thereby obviating the need to get the sample analysis done in outside laboratories. The company's marketing subsidiary at Netherlands helps the company in servicing its customers and also provides required vital inputs for price negotiation and finalization of new contracts. The company's supply chain management is so effective which made the company to register itself as one of the preferred suppliers of renowned customers.

FUTURE PROSPECTS

The steadily increasing oil price remained the overriding concern of the company. In order to overcome this, the company is taking initiatives to shift to some other cheap fuels.

The future recovery in international prices will happen in tandem with the economic recovery in the US and the EU. The economic recovery will lead to higher demand for eggs pushing the price of eggs in these markets. Consequently the egg product prices will go up. On the other hand the egg producers are losing money which will affect the production capability, resulting in lower supply which will also lead to increase in egg prices. But the most important factor will be the economic recovery. Based on the past experience the industry will correct itself in the supply side in 6 months period to have better realization. Considering the economic situation, we expect normal price situation in one year.

OPPORTUNITIES

Indian economy has been, more or less, able to withstand tremors of global financial melt down. The Company has plans to penetrate into new markets which are untapped. Vast market for processed egg products is in existence in Russia and the company is taking efforts to enter in to such markets. The company is in the process of taking strategic action for tapping Russian markets.

The company's consistent quality in products and services was very much appreciated by our customers and we achieved good capacity utilization. We realized that we could get a better price from the customers directly. Our own subsidiary company, SKM Europe in the Netherlands to cater to the EU Market. As such, an exclusive distributor SKM Japan to cater to our Japanese customers. The rest of the market was serviced through several distributors and agents.

With the efforts of our partners in Europe and Japan the company was able to realize better prices and service the customers more precisely.

THREATS

The company recognizes that threats are inevitable in business and believe in identifying and reviving risks. Un-intercepted supply of raw materials at a competitive price is one of the threats that will pose risk on the profitability of the company. As the raw material cost is having direct correlation with feed cost, which predominantly uses agricultural commodities, climatic changes will affect the availability of feed ingredients. Supply of raw material will be affected during the period of monsoon failure and the company by making investment in its own farm resulted in de-risking the threat to a greater extent. It is forcing companies to plant operations effectively and produce quality products at lower costs.

EXCHANGE RISK

The change in exchange rate plays a major role in determining the realization in Rupee. The cross currency between Dollar and Euro also has an impact on the competitiveness of US offers in Europe and the exchange rate between Euro and Dollar to the Japanese Yen also plays an important role in deciding the competitiveness.

The impact of risks will be reduced through continuous monitoring, timely action and control measures by the company.

RISK MANAGEMENT

Risk is an integral part of the business process. To enhance the risk management process, the company has mapped the risks. A system has been formulated based on Balanced Score Card with various appropriate measures and accountabilities to identify, assess, priorities and mitigate the risks. Reports generated from the system are monitored regularly to ensure that appropriate corrective actions are taken.

INTERNAL CONTROL SYSTEM AND THEIR ADEQUACY

The company has proper and adequate systems of internal control to ensure protection of assets, proper financial & operating functions and compliance with the policies, procedures, applicable Acts and Rules. The company's internal controls are supplemented by sound internal audit practices. The Audit Committee at their meetings regularly reviews the financial, operating, internal audit & compliance reports to improve performance. The heads of various monitoring / operating cells are present for the Audit Committee meetings to answer queries raised by the Audit Committee.

INDUSTRIAL RELATION

The relationship between the management and employees continued to be cordial. The company is in the process of developing system for identification of contribution made by individual employees for rewarding them commensurate with their performance.

Income tax payable in india is determined in accordance with the provisions of the income tax act,1961. Tax expense relating to foreign operations is determined in accordance with tax laws applicable in countries where such operations are domiciled.

Minimum Alternative Tax (MAT) paid in accordance with the tax laws in india, which gives rise to future economic benefits in the form of adjustment of future income tax liability, is considered as an asset if there is convincing evidence that the company will pay normal income tax after the tax holiday period. Accordingly, MAT is recognised as an asset in the balance sheet when the asset can be measured reliably and it is probable that the future economic benefit associated with the asset will fructify.

Deferred tax expense or benefit is recognised on timing differences being the difference between the taxable income and accounting income that originate in one period and is likely to reverse in one or more subsequent periods. Deferred tax assets and liabilities are measured using the tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date.

In the event of unabsorbed depreciation and carry forward losses, deferred tax assets are recognised only to the extent that there is virtual certainty that sufficient future taxable income will be available to realise such assets. In other situations, deferred tax assets are recognised only to the extent that there is reasonable certainty that sufficient future taxable income will be available to realise these assets.

Advance taxes and provisions for current income taxes are presented in the balance sheet after off setting advance taxes paid and income tax provisions arising in the same tax jurisdiction for relevant tax paying units and where the company is able to and intends to settle the asset and liability on a net basis.
