Management Discussion & Analysis

Overview of the Economy

1. INDUSTRY STRUCTURE AND DEVELOPMENTS:

Software and computing technology are transforming businesses in every industry around the world in a very profound and fundamental way. The continued reduction in the unit cost of hardware, the explosion of network bandwidth, advanced software technologies and technology-enabled services are fuelling the rapid digitization of business processes and information. Traditional business models are being disrupted in every industry with digital and software-based business models. This disruption is characterized by highly desirable user experiences, an extreme scale-of-cost performance that has become available in computing infrastructure and disintermediation of the supply chain. Leveraging technologies and models of the digital era to both extend the value of existing investments and, in parallel, transform and future-proof their businesses is increasingly becoming a top priority for business leaders. This duality – to renew existing core businesses and innovate new businesses – is the essence of what companies are faced with as strategic imperatives today.

From an IT perspective, the renewal translates to harnessing the efficiency of distributed cloud computing, enabling legacy systems for mobile and sensor access, extracting value out of digitized data, keeping systems relevant and optimizing the costs of building and running technology systems. And as businesses look to new areas and new economics, new and intelligent systems are required to be built with next-generation technologies and with exponentially superior cost-benefit performance.

The rapid pace at which technology is changing and the need for highly-skilled professionals in both the renewed and new technology areas are driving businesses to rely on third parties to realize their IT transformation. Several technology solution and service providers have emerged over the years, offering different models for clients to consume their solution and service offerings?

- Technology consulting companies – who take on niche and time bound projects for their clients
- Global IT outsourcing companies – who leverage global talent pools to systematically optimize the IT operations of clients

- Business process outsourcing firms – who leverage global talent pools to manage the outsourced core business processes of their clients
- Software firms – who provide licensed software that enable the automation of business processes
- Specialty platform and Software-As-A-Service companies – who provide utility-based models for clients to consume software features
- Data analytics companies – who specialize in designing, analyzing and reporting insights from the vast amount of data that corporations are collecting about their customers, operations and markets
- Internal IT departments of the companies themselves – usually cost centers for the corporations

There is an increasing need for highly-skilled technology professionals in the markets in which we operate and in the industries to which we provide services. At the same time, companies are reluctant to expand their internal IT departments and increase costs. These factors have increased the reliance of companies on their outsourcing service providers and are expected to continue to drive future growth for outsourcing services. We believe that because the effective use of offshore technology services offers lower total costs of ownership of IT infrastructure, lower labor costs, improved quality and innovation and faster delivery of technology solutions, companies are increasingly turning to offshore technology service providers. The key factors contributing to the growth of IT and IT-enabled services in India include high-quality delivery, significant cost benefits and the availability of a large and growing skilled and English-speaking IT professionals. Our proven Global Delivery Model, our comprehensive end-to-end solutions, our commitment to superior quality and process execution, our long-standing client relationships, and our ability to scale and to service clients across industries make us one of the leading offshore service providers in India.

Global Delivery Model

Our Global Delivery Model is based on a scalable infrastructure that results in multiple efficiencies for our clients. I. Significant accounting policies

1.1 Basis of preparation of financial statements

These financial statements are prepared in accordance with Indian Generally Accepted Accounting Principles (GAAP) under the historical cost convention on the accrual basis. GAAP comprises mandatory accounting standards as prescribed under Section 133 of the Companies Act, 2013 ('the Act') read with Rule 7 of the Companies (Accounts) Rules, 2014, the provisions of the Act (to the extent notified) and guidelines issued by the Securities and Exchange Board of India (SEBI). Accounting policies have been consistently applied except where a newly issued accounting standard is initially adopted or a revision to an existing accounting standard requires a change in the accounting policy hitherto in use.

1.2 Use of estimates

The preparation of the financial statements in conformity with GAAP requires the Management to make estimates and assumptions that affect the reported balances of assets and liabilities and disclosures relating to contingent liabilities as at the date of the financial statements and reported amounts of income and expenses during the period. Examples of such estimates include computation of percentage of completion which requires the Company to estimate the efforts or costs expended to date as a proportion of the total efforts or costs to be expended, provisions for doubtful debts, future obligations under employee retirement benefit plans, income taxes, post-sales customer support and the useful lives of fixed tangible assets and intangible assets. Accounting estimates could change from period to period. Actual results could differ from those estimates. Appropriate changes in estimates are made as the Management becomes aware of changes in circumstances surrounding the estimates. Changes in estimates are reflected in the financial statements in the period in which changes are made and, if material, their effects are disclosed in the notes to the financial Statements.

Depreciation for assets purchased / sold during a period is proportionately charged. Intangible assets are amortized over their respective individual estimated useful lives on a Written down Value basis, commencing from the date the asset is available to the Company for its use. The Management estimates the useful lives for the other fixed As Follows:
