MANAGEMENT DISCUSSION AND ANALYSIS

Industry Structure and Development

According to NASSCOM India continues to be a premier destination for global sourcing of IT and enabled services, accounting for around 52% share in the global sourcing market during the financial year 2014. Exports from India are estimated to cross Rs. 115bn in financial year 2014. The growth in export markets is expected to be in ability to offer solutions that integrate new business models such as SMAC (Social, Mobile, Analytics and cloud) with traditional offerings and improvement in demand scenario with signs of revival in global economy SMAC based integrated offerings is expected to change the way business is to be done in the near future. This represents an attractive opportunity for Indian IT vendors. As per NASSCOM, the combined potential of SMAC based technologies is estimated to be between US \$ 70bn to 200bn over the next 3 years.

Big data is increasingly evolving as an indispensable tool to manage and run the business efficiently. India is well placed to tap this opportunity due to its proven IT strengths and analytics capabilities. As per NASSCOM India's big data industry is estimated to reach US \$ 1bn by 2015, increasing at a remarkable CAGR of over 10% from US \$ 200mn in 2014. The government sector continues to be the largest contributor of revenue in domestic market, with increased trust on e-governance initiatives

Opportunities, Threats, Risks and Concerns:

While the domestic market shows signals of increased IT spend by government agencies, large operators of the industry only are able to address these big sized opportunities since they have the capacity built up with good cash reserves. Even multinational IT players are in the race to take up large deals which require substantial investment. Therefore smaller companies with limited or scarce resources certainly are continuing to remain at a disadvantageous position handicapped and have difficulty in reaching their targets. Our company too, has the same limitation.

Outlook

The Company's aim is to optimally utilize its resources and grabbing all the possible opportunities for achieving the end result of the organization for the year and for long run sustainability. Investment in research is needed to come up with new products and to give tough competition to competitors.

Operations of the Company

The Company has not been carrying on its operations due to lack of orders except some training programmes and back-to-back contract on behalf of others. The Company is exploring various sources to get software contracts.

Internal Controls and Their Adequacies

The Company is endeavoring to place all the controlling systems to have proper control and accountability on the operations at each level.

Human Resources / Industrial Relations
