The Company's sales on a standalone basis has shown nearly a 5% increase over the previous year.

The other income has shown a sharp rise primarily on account of gain on redemption of short term investments during the year.

Analysis of Expenses

Employee benefit expenses have shown a sharp increase over the previous year. This is primarily due to an increase in the employee count in India due to the expansion of the CGI and VR development divisions.

Depreciation has shown a sharp decrease due to lower capital expenditure incurred during the year.

Profitability

The company's profitability has reduced slightly due to the increase in employee expenses. However, the company expects to increase its profitability during the current year as a result of higher sales in the United States, Mexico, Europe, and India.

Dividend

In order to augment the ongoing expansion programs, the Directors have decided to plough back the profits into the system and regret inability to recommend dividend.

Business Overview

Business is changing. And izmo is showing the way

Plentiful bandwidth. Inexpensive Cloud Storage. Sophisticated Smartphones. Together, they are creating perpetually connected communities and seamless experiences, and izmo is shaping innovative marketing paradigms that enable businesses to navigate the new normal and win more customers.

Take PartsGorilla, for instance. It's your 800-pound gorilla driving accessories sales at dealerships. Nothing ever comes anywhere close to it as it pushes accessories to delighted customers, which is why dealerships are selling more accessories than ever, with stratospheric profit margins.

PartsGorilla is perfect at making accessories selection seamless and delightful, but connected communities demand much more from car dealers. Prospective car buyers now begin their journey months before they ever make contact with a dealership, and they expect dealerships to be active partners all the way.

To succeed, dealers now need to know the priorities and concerns of their prospects, as they start researching their vehicle, and be visible to them at every stage. Dealers need to streamline their operations and make the entire dealership client-facing. Dealers also need to plug every source of wasteful expenditure and exploit every revenue opportunity.

That's why we developed FrogData, the world's first data analytics platform for automotive retail.

FrogData. Bringing Data Driven Decision-making to Dealerships

FrogData helps dealers in taking decisions that drive dealerships in an insightful way, backed by actionable information constantly garnered from deep data analytics.

In other words, we connect the dots that open new sales opportunities, bring more revenue, drive up profits, and create more customer connections for dealers.

Deploying FrogData results in more deals, higher margins, improved employee and equipment utilization, high inventory turnover, higher lifetime customer loyalty, and much more.

FrogData is built on a state-of-the-art open architecture platform that can easily accommodate virtually any type of data. With the explosion of new technologies and the dwindling of old database platforms, it is

Board's Report

steadily becoming difficult to get such varied systems to "talk" to each other. FrogData solves this particular problem with its ability to accept any form of data from any type of system, new or old, and collating it in a centralized, easily usable database.

What's more, FrogData offers the flexibility to commence data analytics deployment at a scale and scope which is comfortable to dealers. They can start with just a few departments or the entire dealership in one shot.

Partnerships with DealerTrak, CDK, and Hunter Engineering make. FrogData even easier to adapt, for dealers.

izmoFx: Virtual Reality (VR) Experiences and CGI

If big data analytics brings business clarity across multiple layers and complex dimensions to dealerships, Virtual Reality (VR) is the great industry disruptor that can take the dealership experience to where the customers are.

By creating an immersive, hands-on experience for car shoppers that simulates reality, izmoVR has the potential to convert prospective customers into buyers than any other tool available. izmoVR utilizes advanced CGI technology within izmocars' proprietary VR Solution Platform to create a spectacular user experience at affordable costs. The izmoVR showroom solution, which can include dealer branding, is delivered using the lightweight, portable, and wireless Samsung Gear VR headset.

Delivering Immersive Experiences Anywhere

With izmoVR, dealers can deploy VR in the showroom, in the service wait area, or even on their website. Each interaction will invoke user interest and generate leads.

Users experience vehicles in a completely immersive manner and get information about features that are not usually possible in a traditional demo. For example, airbags are an unseen but important safety feature that consumers never see in the buying process. izmoVR can literally bring this to life within the VR presentation, wowing the user and helping them understand its impact better.

By creating a powerful, immersive, hands-on experience for car shoppers that simulates reality, izmoVR has the potential to move buyers down the sales funnel considerably faster than any other visual marketing tool available.

Board's Report

izmoFx CGI

Computer generated imagery (CGI) can not only deliver greater cost savings but also faster speed- to-market and unlimited scope of reuse for automotive retail clients, from OEMs to dealers. Precisely because of this reason, the amount of regular photography of actual vehicles is steadily going down. Automotive OEMs have largely moved on to CGI and all related auto business websites are following suit.

The ability to place a vehicle in any location, any backdrop, any lighting, and any camera angle, which were previously unavailable with traditional photo-shoots, is too big an advantage to ignore. Changes that previously required a new photo-shoot, like a trim change or a different angle, are quite easy to accomplish with CGI, which makes vehicle photography obsolete.

In addition, CGI opens up possibilities for animated vehicle narrations, videos, as well as licensing for other markets like film, games, and other applications, all from the same CGI data.

CGI is a technically sophisticated three-step process that starts with vehicle scanning, 3D Build, and Render. The izmo CGI solution can also directly process manufacturer CAD data to create lifelike imagery of cars not yet available in the market.

izmo: a long tradition of innovation

PartsGorilla, FrogData, and izmoFx are the latest in a long series of trend-setting market innovations from izmo, starting from the izmoflix ver.1 which delivered the interactive automotive marketing experience to U S consumers as early as 2003. To this day, izmo remains invested in its global market leadership in the automotive retail space.

Meanwhile, izmo dealer websites continue to be the first choice of the world's leading automotive retailers and portals from North America to Europe to Asia. SalesVelocity, the izmo CRM suite, is also gaining traction with auto dealerships.

North America USA

After an initial projection of 16.7 million vehicles, major market watchers have increased their sales estimate for 2018 to 16.9 million vehicles, down from the 17.25 million vehicles sold last year. The market is continuing with a downward trend after the record-breaking sales of 17.6 million vehicles in 2016.

A significant market development is a shift in consumer tastes to SUVs, crossovers, and pickup trucks, which command higher transaction prices, and more profits for the automotive industry.

Board's Report

Even as we continue to acquire and engage top-tier clients like Microsoft, Mitsubishi Motors, Toyota, Ford Enterprise, Chevrolet Enterprise, Morpace, Jato Dynamics, and Avis in the photography and visual marketing space, we keep expanding into new possibilities, new territories, and new verticals.

With the combined market push of new products like FrogData, Online and Social Marketing products like FranchiseNow and izmoLeads, izmoAuto websites, and new avatars of existing market-leading products like izmoflix, we expect to see steady progress in the US market.

Mexico

Auto sales in Mexico dropped 8.4%, with 680,699 vehicles sold in the first half of the year. This is in line with the projections of the Mexican Association of Auto Dealers (AMDA), which predicts total sales of 1.45 million vehicles in 2018.

Your company continues to be the largest auto dealer website service provider in Mexico, serving Ford, Nissan, Honda, Infinity, Toyota, Acura, Porsche, Audi, Hyundai, Renault, Mazda, Suzuki, and Kia dealers, with OEM relations with global brands like Ford and Nissan. The company is also a strong presence in the 2-wheeler segment, with KTM and BMW websites.

New Opportunities: Defence Manufacturing

Make in India, Make for the World

Defence & Aerospace is one of the 10 Champion Sectors identified under the Make in India version 2.0 of the Government of India, due to their “potential to become global champions, drive double-digit growth in manufacturing and generate significant employment opportunities.” Capitalizing on this “Make in India” initiative, izmo is entering the defence manufacturing sector through its subsidiary, Hughes Precision Pvt. Ltd., with two major projects – manufacturing of ammunition and assault rifles.

Board's Report

The Opportunity

The global demand for reliable, high-quality arms, ammunition, and spares continues to be as high as ever, with The Stockholm International Peace Research Institute (SIPRI) data on the international arms trade showing a continuing growth trend in major conventional weapons, with the volume of transfers from 2013-2017 being 10% higher than it was over 2008-2012.

The five largest importers in 2013-17 were India, Saudi Arabia, Egypt, the UAE and China, receiving 35% of all arms imports. Countries like Vietnam, with close ties with India, increased their arms imports to become the world's 11th largest arms importer.

Global share of major arms exports, 2013-17

Global share of major arms imports, 2013-17

The Global Arms Import-Export Gap: While India is the Largest Importer of Arms, the country is yet to claim a significant market share in arms exports

India is the largest importer of major arms in 2013-17 and accounted for 12 per cent of the global arms imports. India's arms imports increased 24% between 2008-12 and 2013-17, with Russia accounting for 62%. In the same period, arms imports from the USA increased by 557%, making it India's second largest arms supplier.

Share of world military expenditure.

Board's Report

India also owns the world's third largest armed forces, and recently overtook the UK as the fifth-largest defence spender in the world in 2017 at \$52.5 billion, according to the "Military Balance 2018" report by the International Institute for Strategic Studies (IISS). Presently, about 60% of defence related requirements of the Indian Armed Forces are met by imports, which offers a huge opportunity for eventual import substitution.

The "Make in India, Make for the World" initiative by izmo is aimed at capitalizing on India's huge arms trade deficit by manufacturing several categories of high-quality arms, spares, and ammunition which adhere to NATO certification with DODIC numbers.

As of now, izmo has entered into extensive partnerships with Global defence OEMs, to set up the first of the proposed defence manufacturing plants, namely ammunition manufacturing and assault rifles manufacturing.

Manufacturing Friendly Government Policies

In addition to the "Make in India" initiatives, the 2011 Defence Production Policy of the Government of India encourages indigenous manufacturing of defence equipment, and defence Procurement Procedure (DPP) has been amended in 2016 to encourage indigenous design, development, and manufacture of arms, as well as the transfer of technology.

The Government of India licensing norms has also been liberalized to encourage private participation in defence manufacturing. The initial validity period of industrial licenses has been increased from 3 to 15 years, with a provision to grant an extension for a period of 3 years.

Global Arms, Ammunition, Equipment, and Spares Hub

Apart from strengthening India's armament sourcing capabilities, the new izmo initiative will help the company to develop its defence manufacturing division into a global hub for arms and equipment procurement.

The first project envisaged primarily for export is the production of military caliber ammunition. The license is expected shortly and commercial production expected to commence in March 2019 in Goa.

Hughes Precision Manufacturing Pvt. Ltd. is collaborating with JSC Concern Kalashnikov, makers of the AK 47 rifle, for a world-class assembly facility for the AK 100 Series rifles / Carbines and its various modifications under the "Make In India" initiative. JSC Concern Kalashnikov will provide all the relevant technical assistance and advice to set up the facility. A Letter of Intent has been issued on the 20th of February 2018.

An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of the accounting estimates made by the Company's Directors, as well as evaluating the overall presentation of the standalone financial statements.

I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my audit opinion on the standalone financial statements.

Annexure to the Independent Auditor's Report

Annexure - A to the Auditors' Report

(Referred to in paragraph 1(f) under 'Report on Other Legal and Regulatory Requirements' section of our report to the members of **Izmo Limited** of even date)

Report on the Internal Financial Controls Over Financial Reporting under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

I have audited the internal financial controls over financial reporting of **IZMO Limited** ("the Company") as of 31 March 2018 in conjunction with my audit of the standalone financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Board of Directors of the Company is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

My responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on my audit. I conducted my audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that I comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal

financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

My audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. My audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

I believe that the audit evidence I have obtained, is sufficient and appropriate to provide a basis for my audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of standalone financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls

Annexure to the Independent Auditor's Report

over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In my opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31 March 2018,

based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

3.1 Transition to Ind AS:

These are the Company's first financial statements prepared in accordance with Ind AS notified under the Companies (Indian Accounting Standards) Rules, 2015. The adoption of Ind AS was carried out in accordance with Ind AS 101 - 'First-time Adoption of Indian Accounting Standards' using transition date as April 1, 2016.

Ind AS 101 requires that all Ind AS be consistently and retrospectively applied for fiscal years presented. The Company has prepared Opening Balance Sheet on the transition date and subsequent financials based on the accounting policies set out in Note-2.

In preparing these financials, the Company has availed following exemptions in the transition from previous GAAP to Ind AS in accordance with Ind AS 101.

Optional Exemptions:

a) Deemed Cost:

Property, plant and equipment and intangible assets were carried in the balance sheet prepared under previous GAAP as at March 31, 2016. The Company has elected to regard such carrying amount as deemed cost at the date of transition i.e. April 01, 2016.

Under previous GAAP, investment in subsidiaries, joint venture and associate were stated at cost and provisions made to recognise the decline, other than temporary. Under Ind AS, the Company has elected to regard such carrying amount as at March 31, 2016 as deemed cost at the date of transition.

b) Share-based payment:

The Company is allowed to apply Ind AS 102, Share-Based Payment, to equity instruments that remain unvested as of transition date. The Company has elected to avail itself of this exemption and apply the requirements of Ind AS 102 to all such grants under the ESOP 2013 Plan. Accordingly, these options have been measured at fair value.

The excess of stock compensation expense measured using fair value over the cost recognized under previous GAAP has been adjusted in 'ESOP Outstanding Account', with the corresponding impact taken to the retained earnings as on the transition date.

c) Designation of previously recognized financial instruments

Under Ind AS 109, at initial recognition of a financial asset, an entity may make an irrevocable election to present subsequent changes in the fair value of an investment in an equity instrument in other comprehensive income. Ind AS 101 allows such designation of previously recognized financial assets, as 'fair value through other comprehensive income' on the basis of the facts and circumstances that existed at the date of transition to Ind AS.

Accordingly, the Company has designated its investments in certain equity instruments at fair value through other comprehensive income on the basis of the facts and circumstances that existed at the date of transition to Ind AS.

3.2 The following statement provides first-time Ind AS adoption reconciliation that quantifies the significant differences arising on account of transition from previous GAAP to Ind AS

(c) **Sensitivity Analysis:**

Significant Actuarial Assumptions for the determination of the defined benefit obligation are discount rate, expected salary increase and employee turnover. The sensitivity analysis below, has been determined based on possible effect of changes of an assumption occurring at end of the reporting period, while holding all other assumptions constant.

(Rs. In lakhs)

Particulars	March 31, 2018		March 31, 2017	
	Decrease	Increase	Decrease	Increase
Change in discounting rate (delta effect of +/- 1.0%)	119.00	102.10	95.26	81.35
Change in rate of salary increase (delta effect of +/- 1.0%)	103.13	117.70	82.24	93.66
Change in rate of Mortality (delta effect of +/- 0.5%)	109.94	109.99	87.79	87.81
Change in rate of Attrition (delta effect of +/- 0.5%)	109.77	110.14	87.72	87.87

These plans typically expose the Company to actuarial risks such as: investment risk, interest risk, longevity risk and salary risk.

Investment risk: The present value of the defined benefit plan liability is calculated using a discount rate which is determined by reference to market yields at the end of the reporting period on government bonds.

Interest risk: A decrease in the bond interest rate will increase the plan liability; however, this will be partially offset by an increase in the return on the plan assets.

Longevity risk: The present value of the defined benefit plan liability is calculated by reference to the best estimate of the mortality of plan participants both during and after their employment. An increase in the life expectancy of the plan participants will increase the plan's liability.

Salary risk: The present value of the defined plan liability is calculated by reference to the future salaries of plan participants. As such, an increase in the salary of the plan participants will increase the plan's liability.

Annexure - A to the Auditors' Report

(Referred to in paragraph (f) under 'Report on Other Legal and Regulatory Requirements' section of my report to the Members of **Izmo Limited** of even date)

Report on the Internal Financial Controls Over Financial Reporting under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

In conjunction with my audit of the consolidated financial statements of the Company as of and for the year ended March 31, 2018, I have audited the internal financial controls over financial reporting of **Izmo Limited** (herein referred to as 'the Company') and its subsidiary companies, which are companies incorporated in India, as of that date.

Management's Responsibility for Internal Financial Controls

The Board of Directors of the Company and its subsidiary companies, which are companies incorporated in India, are responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the respective companies considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the respective company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditors' Responsibility

My responsibility is to express an opinion on the internal financial controls over financial reporting of the Company and its subsidiary companies, which are companies incorporated in India, based on my audit. I conducted my audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting ("the Guidance Note") issued by the Institute of Chartered Accountants of India and the Standards on Auditing, prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that I comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial

reporting was established and maintained and if such controls operated effectively in all material respects.

My audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. My audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

I believe that the audit evidence I have obtained, is sufficient and appropriate to provide a basis for my audit opinion on the Company's internal financial controls system over financial reporting of the Company and its subsidiary companies, which are companies incorporated in India.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material

misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In my opinion and to the best of my information and according to the explanations given to me, the Company and its subsidiary companies, which are companies incorporated in India, have, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial

controls over financial reporting were operating effectively as at March 31, 2018, based on the internal control over financial reporting criteria established by the respective companies considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

These are the Company's first financial statements prepared in accordance with Ind AS notified under the Companies (Indian Accounting Standards) Rules, 2015. The adoption of Ind AS was carried out in accordance with Ind AS 101 - 'First-time Adoption of Indian Accounting Standards' using transition date as April 1, 2016.

Ind AS 101 requires that all Ind AS be consistently and retrospectively applied for fiscal years presented. The Company has prepared Opening Balance Sheet on the transition date and subsequent financials based on the accounting policies set out in Note-2.

In preparing these financials, the Company has availed following exemptions in the transition from previous GAAP to Ind AS in accordance with Ind AS 101.

Optional Exemptions:

a) Deemed Cost:

Property, plant and equipment and intangible assets were carried in the balance sheet prepared under previous GAAP as at March 31, 2016. The Company has elected to regard such carrying amount as deemed cost at the date of transition i.e. April 01, 2016.

Under previous GAAP, investment in subsidiaries, joint venture and associate were stated at cost and provisions made to recognise the decline, other than temporary. Under Ind AS, the Company has elected to regard such carrying amount as at March 31, 2016 as deemed cost at the date of transition.

The Company is allowed to apply Ind AS 102, Share-Based Payment, to equity instruments that remain unvested as of transition date. The Company has elected to avail itself of this exemption and apply the requirements of Ind AS 102 to all such grants under the ESOP 2013 Plan. Accordingly, these options have been measured at fair value.

The excess of stock compensation expense measured using fair value over the cost recognized under previous GAAP has been adjusted in 'ESOP Outstanding Account', with the corresponding impact taken to the retained earnings as on the transition date.

c) Designation of previously recognized financial instruments

Under Ind AS 109, at initial recognition of a financial asset, an entity may make an irrevocable election to present subsequent changes in the fair value of an investment in an equity instrument in other comprehensive income. Ind AS 101 allows such designation of previously recognized financial assets, as 'fair value through other comprehensive income' on the basis of the facts and circumstances that existed at the date of transition to Ind AS.

(c) **Sensitivity Analysis:**

Significant Actuarial Assumptions for the determination of the defined benefit obligation are discount rate, expected salary increase and employee turnover. The sensitivity analysis below, has been determined based on possible effect of changes of an assumption occurring at end of the reporting period, while holding all other assumptions constant.

(Rs. in Lakhs)

Particulars	March 31,2018		March 31,2017	
	Decrease	Increase	Decrease	Increase
Change in discounting rate (delta effect of +/- 1.0%)	119.00	102.10	95.26	81.35
Change in rate of salary increase (delta effect of +/- 1.0%)	103.13	117.70	82.24	93.66
Change in rate of Mortality (delta effect of +/- 0.5%)	109.94	109.99	87.79	87.81
Change in rate of Attrition (delta effect of +/- 0.5%)	109.77	110.14	87.72	87.87

These plans typically expose the Company to actuarial risks such as: investment risk, interest risk, longevity risk and salary risk.

Investment risk: The present value of the defined benefit plan liability is calculated using a discount rate which is determined by reference to market yields at the end of the reporting period on government bonds.

Interest risk: A decrease in the bond interest rate will increase the plan liability; however, this will be partially offset by an increase in the return on the plan assets.

Longevity risk: The present value of the defined benefit plan liability is calculated by reference to the best estimate of the mortality of plan participants both during and after their employment. An increase in the life expectancy of the plan participants will increase the plan's liability.

Salary risk: The present value of the defined plan liability is calculated by reference to the future salaries of plan participants. As such, an increase in the salary of the plan participants will increase the plan's liability.
