i. Economic Review

FY2012 was a challenging year for the economies around the world. The Indian economy had its own sets of challenges during the year. It dealt with issues like high inflation, tightening monetary policy, weakening industrial growth and investments, lack of direction in government policies, depreciating rupees and high crude oil prices. This laid to a slowdown in the overall growth of the economy. India is expected to gain back its growth momentum in the medium term owing to higher savings and easing inflationary pressures which would lead to capital formation and fresh investments

ii. Industry Review

Real Estate is one of the three primary needs of mankind with food and clothing being the other two. The demand for real estate though un-questionable is driven by many factors including affordability, market sentiments, availability of loans etc. the supply side is

influenced by regulatory policies, liquidity, availability of skilled and unskilled resources etc.

Owing to the impact of the challenging macro economic factors, FY 2012 was quiet challenging for the sector. It faced difficulties in terms of funding, rising costs, labour shortage and regulatory issues, hampering project execution.

iii. Opportunities and Threats

The growth in infrastructure sector is being driven by various factors, which include political will and policies to enhance the quantum of investments in the infrastructure segment. To encourage private sector participation in the sector, the Government has announced several tax breaks for investments. Laws have been enacted to improve the finances of utilities and make their management more transparent, so as to improve returns on these facilities.

While the management of your Company continues to leverage the opportunities, it also foresees the following challenges:

- Availability of skilled resources and acquisition and retention of highly talented workforce which would ensure quality execution.
- Frequent amendments in regulations which makes it difficult to plan and execute.
- Lack of supporting infrastructure such as roads, highways, electricity, etc. that can hamper the growth of real estate as it thrives on availability of good infrastructure.
- Inflationary pressures which would increase raw material / labour cost.

iv. Outlook

Real Estate and infrastructure development is pivotal for the development of Indian Economy where substantial investment takes place. This industry is one of the largest employers of labor, other technical and non technical manpower. There is a significant demand for quality and affordable housing in India. With factors like emerging middle class, youth actively looking for owning a house early in the life, the demand for

residential housing is expected to grow manifold in the time to come.

We foresee during couple of quarters, we expect that the economy will continue to perform well. We believe that the fundamentals of the Indian real estate markets are sound and will generate robust, long terms sustainable demand for premium /affordable residential as well as commercial spaces.

v. Risks and Concern

The Company aims to understand, measure and monitor the various risks to which it is exposed and to ensure that it adheres, as far as reasonably and practically possible, to the policies and procedures established by it to mitigate these risks

In addition there is a strong competition from the existing players in this sector.
