

CLIMBING TO THE NEXT LEVEL

Granules India Limited | Annual Report 2012-13

Forward-looking statement

In this Annual Report we have disclosed forward-looking information to enable investors to comprehend our prospects and take informed investment decisions. This report and other statements - written and oral - that we periodically make contain forwardlooking statements that set out anticipated results based on the management's plans and assumptions. We have tried wherever possible to identify such statements by using words such as 'anticipates', 'estimates', 'expects', 'projects', 'intends', 'plans', 'believes', and words of similar substance in connection with any discussion of future performance.

We cannot guarantee that these forward looking statements will be realized, although we believe we have been prudent in assumptions. The achievement of results is subject to risks, uncertainties and even inaccurate assumptions. Should known or unknown risks or uncertainties materialize, or should underlying assumptions prove inaccurate, actual results could vary materially from those anticipated, estimated or projected. Readers should bear this in mind.

We undertake no obligation to publicly update any forward-looking statements, whether as a result of new information, future events or otherwise.

The rung of a ladder was never meant to rest upon, but only to hold a man's foot long enough to enable him to put the other somewhat higher.

RAPID CHANGES WITHIN THE PHARMA INDUSTRY WILL REQUIRE COMPANIES TO RE-STRATEGISE.

The global pharmaceutical industry is going through two critical shifts, making it imperative for companies to respond with speed and decisiveness.

A Diminishing Drug Pipeline

The global pharmaceutical industry's product pipeline is not being replenished with the same speed as before because global regulatory agencies such as the U.S. FDA are becoming increasingly demanding with new drug approvals. In addition, rising R&D costs are compelling pharmaceutical companies to pare back on R&D spending. The downturn in the R&D pipeline has been overshadowed by the unprecedented wave of products going off-patent which many companies have capitalised on. However, companies will find it difficult to replicate their success in the future since the number of drugs going off-patent is diminishing.

Increasing Quality Standards

Governments around the world are ramping up public healthcare facilities to support an aging population. Governments are insisting on higher quality standards while concurrently pushing for lower prices. The result is that pharmaceutical companies need to enhance value in a holistic way to stay competitive. This is increasing competition and means that what worked in the past may not be enough to ensure future success. The result is that only companies that leverage innovation will endure.

GRANULES IS READY FOR THE FUTURE. THE COMPANY'S BUSINESS MODEL PROMISES A SUSTAINABLE COMPETITIVE ADVANTAGE. TRANSLATING INTO ATTRACTIVE REVENUE GROWTH, MARGINS AND HIGH BARRIERS TO ENTRY.

FOCUS. SCALE. QUALITY. RELATIONSHIPS.

The global pharmaceutical industry is transforming with speed, making it imperative for players to adapt their business models to new scenarios.

At Granules, we have proactively evolved our business model in order to be competitive and profitable.

To address the challenges of a competitive environment, Granules has found the ideal combination of focus, scale, quality and relationships. A combination of these

business drivers will translate into growing revenues, manufacturing efficiency, enduring customer relationships and robust profitability.

In addition, this business model has raised business entry barriers, protecting our company from competition and translating into sustainable revenue.

MAKING IT POSSIBLE FOR THE COMPANY TO CLIMB TO THE NEXT LEVEL.

FOCUS

Over the last decade, a large number of drugs went off-patent. Instead of jumping from product to product to leverage short-term profits, we chose to focus on a select product portfolio. Our portfolio consists of safe, established products with a large, built-in user base with no alternatives. These products have been ignored by many pharmaceutical companies because the products are viewed as low-value commodities. However, we know there is tremendous opportunity in these products.

Our focus has enabled us to become manufacturing experts for our products. Through our Operational Excellence (OE) program, we have been able to establish unparalleled efficiencies that others cannot match. These efficiencies including increased productivity, reduced cycle time and lower wastage lets us offer a more cost-effective product which drives value for our customers.

MAKING IT POSSIBLE FOR THE COMPANY TO CLIMB TO THE NEXT LEVEL.

SCALE

In the volume-driven segment of the pharmaceutical industry, scale gives companies pricing power.

At Granules, we have progressively invested in adding capacities scale with the objective to leverage economies of scale and to ensure sufficient supply for our customers.

We are among the largest quality-conscious API manufacturers in the world by volume and possess the largest PFI facility in the industry along with one of the largest Finished Dosage capacities in the world. Our scale drives efficiencies throughout our process and empowers us to offer unmatched features such as a batch size of 11 million tablets and a six-ton PFI batch. Our focus on process innovation lets us leverage our scale which ultimately drives value for our customers.

MAKING IT POSSIBLE FOR THE COMPANY TO CLIMB TO THE NEXT LEVEL.

QUALITY

In an increasingly challenging industry, governments and consumers are insisting on lower prices while also demanding higher quality standards. At Granules, we have addressed this reality through corresponding infrastructure investments, operational excellence and a fully integrated manufacturing value chain. This has made it possible for us to run the manufacturing process with minimal operational and quality variations, which lets us be more cost effective.

While our products are considered to be commodities marked with surplus capacity, there is a shortage of high-quality material in the scale that leading customers demand. The result is that instead of the conventional under-cutting approach to win large orders, Granules has enhanced customer value through product quality and supply-based security.

MAKING IT POSSIBLE FOR THE COMPANY TO CLIMB TO THE NEXT LEVEL.

RELATIONSHIPS

In a fast-evolving global pharmaceutical industry, companies need to enter into alliances and partnerships in order to grow and leverage skill-sets.

At Granules, we have entered into strategic customer relationships to enhance our growth. We have partnered with brand owners and generics leaders so we can grow together. Our Company has become a dependable partner that customers can rely on. Our partnership approach lets us shift the conversation from solely focusing on price to other components including quality, service levels and dependability.

In addition, we have partnered with leading manufacturers such as Ajinomoto OmniChem and Hubei Biocause so we can drive more value for our customers. Our expertise throughout the manufacturing value chain translates into value for our customers and lets us become a one-stop solution.

Statement from the Managing Director

Dear shareholders,

In Fiscal Year 2013, we articulated what has been our guiding principle for the past several years into a vision statement. Our vision "To be the global leader in pharmaceutical manufacturing through process innovation and unparalleled efficiencies" distinguishes us from others within our industry. Our relentless focus on process innovation and manufacturing efficiencies has resulted in a sustainable, competitive advantage that has enabled us to become a market leader for our products and derive value that others cannot match.

The industry is on the cusp of a transformation that will require companies to reassess their business models in order to thrive. Governments and consumers are requiring higher

quality products while concurrently seeking lower prices.

In the past, companies could mitigate cost pressures by shifting their product portfolio as drugs went off patent. However, due to the diminishing patent portfolio, this option will not be as viable in the future. We believe the future leaders within the pharmaceutical space will be companies that have a focused product portfolio. Companies will need to focus on how they can leverage manufacturing efficiencies in order to offer meaningful value to customers.

We will benefit from this inevitable industry trend because operational excellence is part of our DNA. We have already demonstrated that we are able to derive value where others cannot and we will benefit as the emphasis on efficient manufacturing becomes paramount.

Year in Review

During FY13, our revenue grew a robust 17% to ₹764 Cr., primarily due to our ability to optimise our existing capacities. Our Formulation expansion was set back by several months due to a delay in civil construction and challenges we faced during the manufacturing scale-up.

Given our focus on innovation, we decided not to replicate our existing technologies and proceeded with new processes that would drive further value for our customers. Due to the delays at our PFI Facility, we were not able to capitalise on demand for our formulations. This hurt our profit margin in two ways. First, we had an

increase in API production but were unable to use that material for captive consumption and had to sell it in the domestic market. Second, we incurred costs to run the new formulation capacity including manpower without a concurrent increase in production.

Our capacities are on-line and we will continue to ramp up production as we receive customer approvals. While the delay in our expansion was frustrating, we believe over the long-run, our expanded capacities will offer us a competitive advantage and will further distinguish us within the industry. We believe our scale is an asset and that it allows us to cement relationships with key customers.

Climbing to the next level

Our Company is uniquely situated within the Pharmaceutical industry. Our vision has led us to follow an unconventional path that we believe offers sustainable revenues and a competitive advantage which we will continue to grow.

While we have made significant strides with our operations, we realise optimal performance is always a moving target. We are applying methods and best practices from our peers in the chemical industry in our factories. Implementing concepts such as continuous process manufacturing will provide us with tremendous opportunity and will let us increase the lead over our competitors.

We are also adding products to our portfolio in which we believe our manufacturing process gives us a competitive edge over current manufacturers. Since we are able to

We believe the future leaders within the pharmaceutical space will be companies that have a focused product portfolio. Companies will need to focus on how they can leverage manufacturing efficiencies in order to offer meaningful value to customers.

add value, we believe we can increase our market share in several products without sacrificing profitability.

Our relentless focus on efficiency has enabled us to drive value in products that many people are unable to profitability make. We have become synonymous with our products and continue to entrench ourselves which is why industry leaders are eager to continue working with us.

We are enthusiastic about Fiscal Year 2014 since our team will be ramping up production at our Formulation Unit. While this will certainly be an exciting year for us, I'm more pleased that our team has plans to ensure sustainable medium- and long-term revenue and profitably growth through our new technologies and our Granules-OmniChem Joint-Venture.

Sincerely

C. Krishna Prasad

MANAGEMENT DISCUSSION AND ANALYSIS

The Pharmaceutical Market

Global: Global medical spending is estimated to be around \$1,200 billion in 2016, a growth rate of 3%-6% over the next few years. Developed markets are expected to experience their lowest annual growth this year, at less than 1% or \$3 billion, and then rebound to \$18-20 billion in annual growth in the 2014-16 period.

The market for branded medicines is likely to experience 0%-3% annual growth through 2016 to \$615-\$645 billion, up from \$596 billion in 2011. In the major developed markets, branded medicine growth could be severely constrained at only \$10 billion over the five-year period due to patent expiries, increased cost-containment actions by payers and modest spending on newly launched products. Global generic spending is expected to increase from \$242 billion in 2011 to \$400-430 billion by 2016, fueled by volume growth in

pharmerging markets and the ongoing transition to generics in developed nations. The impact of patent expiries will be felt largely in the US whereas in Europe, limited savings from expiring patents are prompting policy shifts to encourage greater use of generics and lower reimbursement for these products.

The U.S. share of global spending is expected to decline from 41% in 2006 to 31% in 2016, while the share of spending from the top five European countries is expected to decline from 19% to 13%. Meanwhile, 17 high growth emerging markets are likely to contribute 30% of the total spending by 2016 as compared to 14% in 2006.

Granules' Product Overview

Granules focuses on pharmaceutical products with high API and/or finished dosage volume requirements. In many high-volume pharmaceutical products,

there are dozens of suppliers leading to oversupply. While there are large surpluses, high quality material for the regulated markets is in short supply and can only be serviced by a handful of suppliers.

Customers in the regulated markets and an increasingly growing number of customers in the semi-regulated markets require high-quality supplies. These customers value supply-based security and quality over pricing. Customers generally work closely with their suppliers' regulatory and quality control departments; once they select a supplier, the customer usually stays with the supplier for years and only periodically reviews alternatives.

Due to increased accountability and consumer pressure, countries in the semi-regulated markets are implementing tighter controls and demanding increased stringent quality parameters.

Granules is among the leading producers of Paracetamol and Ibuprofen; the Company is also a reputed Metformin producer.

Analgesics market

The analgesics market, which focuses on pain relief, is one of the largest segments of the healthcare industry with sales worth approximately \$31 billion. The market is growing at a 2.7% CAGR. Going ahead, growth will be driven by an ageing population suffering chronic ailments and lifestyle diseases arising out of sedentary jobs.

Granules is among the leading producers of Paracetamol and Ibuprofen; the Company also competes in the Naproxen market. Paracetamol accounts for 58% of the analgesic market by volume and is widely used all over the world. Ibuprofen is the fastest growing product in the sector and is expected to surpass Aspirin, which is not growing as fast as it used to be. There are no analgesic products expected to replace the current leaders.

Paracetamol

Paracetamol, also known as acetaminophen, is used to reduce body pains, headaches and lower fevers. The Paracetamol market continues to grow but there are signs of consolidation within the industry and increasing challenges for Chinese Paracetamol manufacturers. While many of these manufacturers targeted the emerging markets, which offer lower margins, manufacturers were able to gain market share and grow profits. However, many of the advantages that Chinese manufacturers had including an undervalued Chinese currency, low

employment costs and favourable interest rates are diminishing which has added pressures. In order to combat inflation, the Chinese government has let the RMB appreciate. During FY13, the RMB appreciated 1.5% which is slightly lower than the 3.0% appreciation in FY12. Due to the appreciation, the cost advantage from Chinese manufacturers has been greatly diminished which has added pressure for many manufacturers. In addition, labour and energy costs in China have increased by double-digits, which are adding further pressure for companies. Also, there is an increasing focus on quality from companies in the emerging markets which is resulting in extra costs for many Chinese manufacturers since they must adjust their processes to adhere to more stringent standards. Due to these pressures, several Chinese manufacturers have shut down while others have sold their facilities to larger players. Due to the diminishing value proposition from Chinese manufacturers, many customers in the emerging markets are qualifying Indian manufacturers which has resulted in higher capacity utilisation in FY13.

Ibuprofen

Ibuprofen is primarily used for arthritis relief and fever reduction. The drug is popular in North America and Western Europe, which account for nearly 60% of global sales. Ibuprofen is a more complex analgesic to manufacture compared to Paracetamol which is

why there are not as many suppliers. There are six primary manufacturers in the Ibuprofen market, which is growing in the mid-to-high single digits. The drug is becoming more popular due to an ageing population that wants to maintain their lifestyle. The Ibuprofen market, which faced pricing pressures in FY11 due to new capacity, has rebounded. Due to strong demand, pricing has increased in FY13 and appears to have stabilised.

Anti-Diabetic Market

The anti-diabetic market is extremely lucrative due to the growing number of people with diabetes. The number of people with diabetes is expected to grow from 246 million in 2008 to 380 million by 2025. The emerging markets are expected to be a major

source of new diabetes cases as they adapt Western lifestyles. There are multiple classes of drugs to treat diabetes which range from cheap, first-line therapy to expensive, advanced therapies

► **Biguanides:** The most popular drug in this category is Metformin, which lowers glucose levels. This is often used as the first response for Type II diabetes

► **DPP-4 Inhibitors:** This is the latest generation of diabetes drugs and over the next decade, several products will be released

Diabetic cases are spread evenly throughout the world and there is a large opportunity for cost effective medication

Metformin

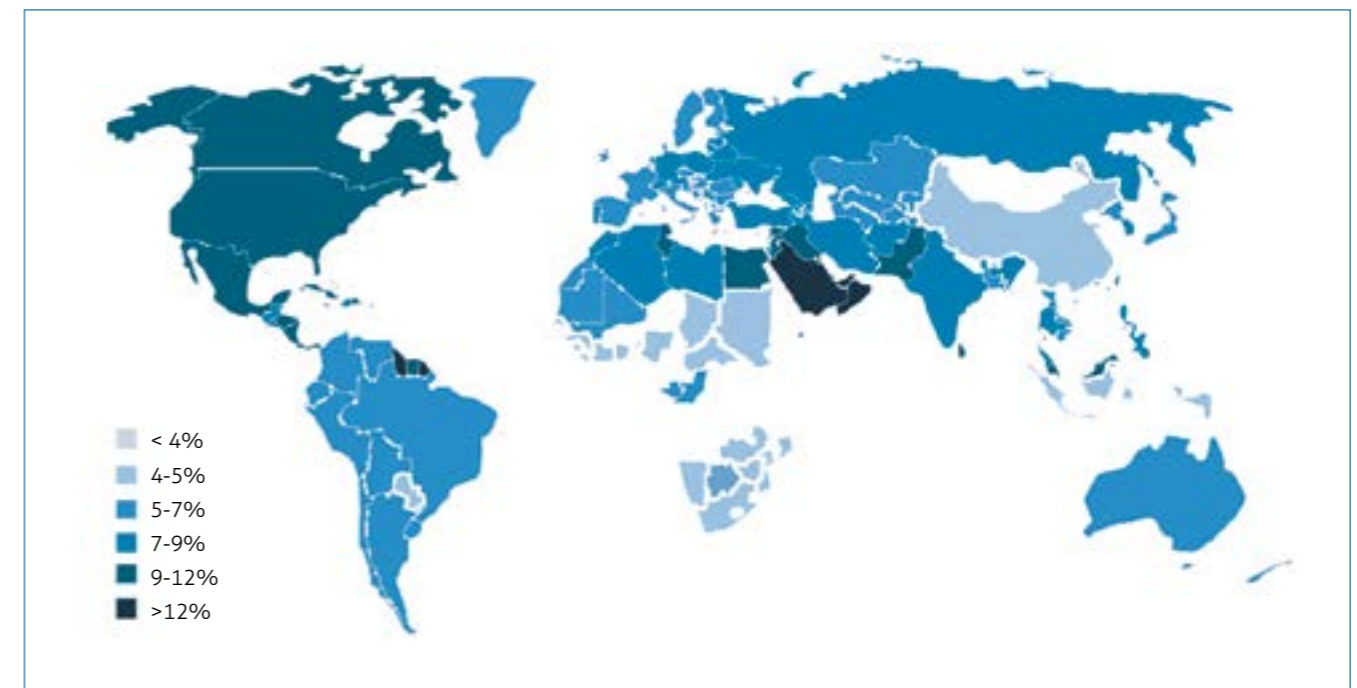

Metformin, a prescription drug, is the first biguanide oral anti-diabetic agent to be approved by the U.S. FDA after phenformin (phenethylbiguanide) was banned in the U.S. in 1977. Due to its relatively low cost and high-effectiveness, metformin is often used as a first-line therapy for patients with type-II diabetes

Annual production capacity for metformin is approximately 65,000 tonnes. Due the rising number of diabetic patients in the world, demand for Metformin is increasing and multiple suppliers are increasing capacity in order to meet global demand. The market is growing in the mid-teens and is expected to maintain the growth rate for the foreseeable future.

BUSINESS OPERATIONS

Granules has a presence across the pharmaceutical manufacturing value chain. The Company's operations are spread across four facilities – three in India and one in China.

* On standalone basis

Active Pharmaceutical Ingredients (API)

The Company's API vertical continued to report double-digit growth despite the markets for most of these products reporting single-digit growth. Granules entered this segment in 1984 through the manufacture of Paracetamol APIs and expanded into other products like Ibuprofen and Metformin. Over the decades, the

Company emerged among premier global API manufacturers due to a combination of scale, quality, compliance and reliability.

The Company has three API facilities; two located in India and a third in China. Due to a delay in the Gagillapur expansion, the Company marketed a larger quantity of APIs in FY13 but anticipates that its APIs will be progressively consumed largely for captive consumption in the future. The API vertical will continue to be critical to the Company's success since it will continue to represent the starting point of the Company's PFI and FD verticals.

FY13 Highlights,

- ▶ API revenues increased 40% from ₹181 Cr. in FY12 to ₹252 Cr.
- ▶ Several initiatives to increase API capacity were implemented, a number of these finishing in late Q4FY12. The additional capacity was utilised in FY13.
- ▶ The delay in the Gagillapur Formulation expansion resulted in an increase API sales; APIs will be used more for captive consumption in FY14.

Pharmaceutical Formulation Intermediates (PFI)

Granules pioneered the concept of commercialising PFIs, saving customers the need to manufacture their own PFIs and leaving them free to focus on finished dosage manufacture and marketing.

Granules entered this business segment in the early-90s following

an insight that most APIs were not suitable for compression in their crystalline or amorphous forms because they lacked the necessary binding, lubricating and disintegrating properties. This made it necessary for APIs to be granulated first to enhance functionality. Manufacturers would be able to granulate but not able to derive operational efficiencies if they focused on dozens of products or if they only produced the product for only a few days at a time. This pulled down the overall return from their investments especially because PFI manufacture accounts for 80% of the total cost of a finished dosage.

The Company, through its PFI facilities at Gagillapur and Jeedimetla, is a leader in manufacturing PFIs and has the world's largest capacity. The manufacturing facility uses high-shear and fluid-bed granulation processes with a 6 ton batch size, the largest in the industry.

FY13 Highlights

- ▶ Revenue increased 10% from ₹197 Cr. in FY12 to ₹216 Cr.
- ▶ The Company commercialised its Gagillapur facility expansion in March 2013; customer validations commenced in March 2013 and are expected to be completed in FY14.

Finished Dosages (FD)

At Granules, the manufacture of finished dosages represents the apex of the value chain. The Company entered this business in FY09 with an installed capacity of six billion tablets. The business accounts for 31% of the Company's revenues.

Granules' finished dosage facility in Gagillapur comprises automated processes, robust infrastructure and superior quality systems that efficiently produce finished dosages. Granules offers multiple finished dosage forms comprising tablets, caplets and press fit capsules in bulk, blister packs and bottles. The Company is the only Indian pharmaceutical player to manufacture press-fit (rapid release tablets) dosages and among the few in India to

manufacture bi-layered tablets.

FY13 Highlights

- ▶ Revenue increased 14% from ₹185 Cr. in FY12 to ₹213 Cr.
- ▶ The Company commercialised the expansion of its Gagillapur facility, which substantially increased capacity from March 2013 onwards. Customer validations started in March 2013 and are expected to finish in FY14.

Supply Chain

In the business of pharmaceutical manufacture involving the management of diverse raw materials at one end and dispatch of a number of end products on the other, success is derived from an ability to manage the supply chain with the objective to ensure the lowest costs and timely material availability.

During the year under review, the Company strengthened its supply

chain management through various initiatives:

- ▶ Widened its vendor base across APIs, excipients and packaging material to provide for its expanded capacity
- ▶ Strengthened service level agreements with vendors to ensure adequate and timely input availability.
- ▶ Secured input availability for expanded formulation capacities

Operational Excellence

the objective to reduce the effective capital cost per tonne to well below the industry benchmark.

It is with this objective that the Company's operational excellence programme was commissioned in 2008 focusing on production efficiency, process fine-tuning, yield improvement and waste reduction.

The OE programme revolves around the Lean Six Sigma framework to ensure that the every customer consistently gets the desired product

quality and in the adequate quantity, in time, every time. At Granules, the success of the OE initiative helped unlock production capacities across all the manufacturing units accompanied by significant quality and efficiency improvements, reduction in waste generation and input optimisation - at only a marginal investment.

The Company successfully increased production with minimal expenditure, which strengthened its ROCE and spread costs across a wider base.

In a competitive capital-intensive business like pharmaceutical manufacture, success is derived from an ability to derive a higher output than the rated capacity with

Human Resources

In a business where intellectual capital represents the difference between the successful and the average, it is imperative to invest in knowledge, capability and experience for ensuring sustainable success. The success of the Company's room strategy depends on the

implementation capability of its team.

The HR Team has created a 'Centre of Excellence' to ensure teams collaborate in order to enrich the overall working culture, inculcate the right practices and foster holistic work ethics.

Quality Assurance

In a business as critical as that of pharmaceutical manufacture where the quality of our end product has a direct impact on human health, there is a premium on the ability

to maintain a high quality standard dictated by demanding regulatory authorities – batch after batch, across time.

At Granules, this need to match the best global quality standards is reflected in the following:

- ▶ The Bonthapally and Gagillapur are largely close system operations with PLC controls and Level-II automation, minimising any need for human intervention

▶ Approvals from global regulatory authorities of stringent regulated markets – the U.S. FDA, MHRA, EDQM, Infarmed (EU), WHO GMP, KFDA, HHA (Germany), TPD-Canada, MCC and TGA.

The effectiveness of the Company's quality commitment is reflected via an important reality - Granules has the unique distinction of possessing among one of the best quality-assurance-to-production ratios in the world.

Marketing

The Company has increased sales for 20 consecutive years. In addition, the Company generates majority

of its revenues from the regulated markets, resulting in stable customer relationships. Granules continues to invest in its marketing team; the Company has marketing executives and representatives in India, the U.S., U.K., Colombia and China to service the growing needs of more than 300 customers.

The Company created a multi-

locational customer management team to interact with customers at different hierarchies to maximise customer satisfaction. The team comprises experienced professionals who understand the unique dynamics of the markets of their presence and possess a deep technological understanding of Granules' product portfolio as well as customer needs.

Opportunities and Threats

The Company has several opportunities and threats. The Company's biggest opportunity is the expansion of its Finished Dosage Division. The Division has grown in double digits since its inception in FY09 and the Company expects strong performance. The Company recently increased its Finished Dosage and PFI capacities in order to meet the demands of its customers. If the Company can execute orders on time and with proper quality, there is an opportunity to significantly grow the business. The Company also faces internal and external threats. Due to the Company's scale, quality rejections can have an impact particularly since the Company has a batch size of 6 tons in its PFI Facility. Also, the Company faces competition from

numerous competitors and faces the possibility of being undercut on pricing which might hurt sales and profits.

Internal control systems and their Adequacy

The Company's internal control and documented procedures encompass the globally-best financial and operating procedures which provide proper accounting control, monitor the Company's economic viability and efficiency and protects its assets from unauthorised use or losses and ensure the reliability of financial and operational information. The Audit Committee of the Board of Directors reviews future plans, significant audit findings and adequacy of internal controls, as well as compliance with accounting standards on a regular basis.

ANALYSIS OF FINANCIAL STATEMENTS

The Company recorded a higher topline and increased profits in FY13 due to increased capacity utilisation and product mix.

Snapshot

A) Analysis of the Statement of Profit and Loss

Revenue from Operations

The Company had double-digit growth in all three product segments, APIs, PFIs and Finished Dosages. While all the segments grew, the API segment constituted the largest portion of the revenue mix in FY13. Due to the delay in the Formulation Expansion, more APIs were sold instead of being used for captive consumption. The Company sold a large portion of its API in the domestic market in FY13 which led to an increase in overall domestic sales. The Company has strong backorders for its Formulation Division and expects an increase in sales in FY14 once the new capacity is on-line.

Revenue by product (%)

Revenue by geography (%)

Operating costs

Operating costs increased 17.6% over the previous year which is in-line with revenue growth. The increase in operating costs was primarily due to the rising energy costs, cost of key inputs, employee costs and marketing expenses. In order to mitigate energy costs, the Company focused on implementing Open Access Power at all of its Indian Facilities. At the end of FY13, the Company was still in the process of implementing the system but finished implementation in Q1FY14.

EBIDTA

EBIDTA increased 7.96% from ₹80.66 Cr in FY12 to ₹87.08 Cr. in

FY13 although the absolute margin fell 95 bps to 11.35% in FY13. This was primarily due two reasons. First, instead of using its additional APIs for captive consumption, the Company sold more APIs in FY13 which has a lower profit margin than Formulations. Second, the Company's Formulation Expansion was delayed in FY13 and faced scale-up issues after its completion. The Company had additional expenses including increased manpower at the facility without a concurrent increase in production.

Interest

Interest liability increased 4.0% from ₹17.0 Cr. in FY12 to ₹17.7 Cr. in FY13

consequent to an increase in the Company's debt portfolio. While there was an increase, the interest cover got strengthened from 4.8x to 4.9x over the same period, reflecting the Company's ability to repay its interest liabilities.

Net profit

The Company earned a net profit of ₹32.6 Cr. in FY13 vs. ₹30.0 Cr. in FY12, an increase of 8.7%. In line with the net profit, the basic earnings per share increased from ₹14.93 to ₹16.21 over the same period.

	FY12		FY13		Growth as a percentage of sale %
	Amount (₹Cr.)	Proportion of total expenses (%)	Amount (₹Cr.)	Proportion of total expenses (%)

TOTAL	612.4		720.1		

B) Analysis of the Balance Sheet

Capital employed

The capital employed in the business increased 32.7% from ₹348.2 Cr. as on March 31, 2012 to ₹462.0 Cr. as on March 31, 2013. The increase was due to an increase in external debt to fund the expansion in the Formulation Facility and addition to the reserves and surplus balance.

Shareholder's funds

Shareholders' funds increased 12.1% from ₹245.1 Cr. as on March 31, 2012 to ₹274.9 Cr. as on March 31, 2013. This increase was primarily due to the addition to reserves and surplus; the marginal increase in its equity capital was consequent to the shares issues on exercise of the employee stock options. The book value per share

increased from ₹122.17 as on March 31, 2012 to ₹136.41 as on March 31, 2013

Loan funds

Reliance on external increased 45% due to two reasons:
 ▶ Partially financing the expansion of the PFI and Finished Dosages Facilities
 ▶ An increase in working capital to meet the needs of a growing business

In FY13, the Company increased its foreign currency debt exposure, for long-term debt, to optimise interest costs. Despite the increase in the debt quantum, the Company's debt-equity stood at a healthy 1.4 x as on March 31, 2013. Excluding working capital loans, the debt-equity ratio was 1.1x as on March 31, 2013.

Fixed Assets

The addition to the gross block marks the capitalisation of a part of the PFI and FD capacity enhancement initiative and routine capital expenditure for sustaining efficiencies of its existing operating facilities.

Working Capital Management
 Growth in the business operations increased the working capital requirement. Net current assets grew 11% from ₹260.3 Cr. as on March 31, 2012 to ₹288.9 Cr. as on March 31, 2013. The current ratio strengthened and stood at 1.4x as on March 31, 2013 against 1.2x as on March 31, 2012.

Debt Reconciliation (₹Cr.)

	As on March 31, 2012	As on March 31, 2013
Long-Term Debt	88.1	175.5
Short-Term Debt	102.1	85.5
Current maturities of long-term debt (payable in 2013-14)	13.5	9.5

C) Analysis of the Cash Flow Statement

The Company had an improvement in liquidity, reflected in cash flow from operations increasing to ₹92.2 Cr. in FY13 compared to ₹25.6 Cr. in FY12, an increase of 360%. This was achieved due to enhanced operating

efficiencies coupled with stringent working capital management.
 In addition to internal generation, the Company funded investments through long-term loans including ₹99.0 Cr. in FY13; the increase in day-to-day

fund requirements was met by short-term facilities. The commissioning of the new PFI and FD facilities in FY14 will improve the Company liquidity position.

MANAGING BUSINESS UNCERTAINTIES

Every Company is under threat from unforeseen contingencies which can hamper its business prospects. At Granules, we understand the impact of industry uncertainties and their possible outcomes. We leverage this deep knowledge to undertake proactive counter-measures that strengthen our viability across verticals, products, geographies and market cycles

1

The Company's margins could face pressure due to competition

Risk mitigation:

The Company has focused on growing its formulation business. In FY13, the Company augmented its Finished Dosage Facility as well as its PFI facility. Due to the strong demand, this new capacity has been allocated to customers. Also, the Company is working with brand leaders as well as generics leaders who value long-term partnerships instead of solely focusing on price. The Company is also expanding its revenue in regulated markets, where due to their high switching costs, the entry of fresh competition is limited.

2

Excessive dependence on one geographic region could impact revenue in the event of a localised downturn.

Risk mitigation:

The Company enjoys a global footprint extending over 65 countries. No region accounted for more than 35% of sales.

Regulated markets: The Company's facilities are certified by authorities of all regulated markets. Sales in regulated markets accounted for 64% of the Company's revenues in FY13.

3

Huge capacity expansions could challenge business management capabilities.

Risk mitigation:

The Company's holistic investment across people, plant, processes and technology makes it possible to seamlessly manage its expanded operations.

Equipment investment: The focus on manufacturing excellence prompted the Company to invest in best-in-class, first-of-its-kind automation in India, which reduces the need for sizeable additions in terms of manpower.

People investment: The Company invested in skilled professionals handpicked from the best in the industry. The Company trained these professionals in the use of contemporary equipment facilitating a strong plant-people bond necessary for efficient operations.

4

The Company may not be able to sustain its growth momentum.

Risk mitigation:

The Company's medium-term plan comprises capacity enhancement, devising new products and forging business alliances.

The Company's new formulation capacity has been earmarked by multiple customers which will result in steady growth over the next several years. Also, the Company's JV, Granules-OmniChem's manufacturing facility will finish construction in FY14. The Company expects regulatory approvals in FY16 which will result in new revenue streams.

5

The Company could be stretched to fund its growth plans.

Risk mitigation:

The Company has mobilised large funds from global financial institutions, which could stretch its repayment capability.

Financial statements: The Company's debt was ₹321 crore as on March 31, 2013; debt-equity ratio was 1.4x on that date, while interest cover was at 4.9x in 2012-13, making it possible to mobilise additional low-cost funds, when needed. The Company's business liquidity and strong financial statements will enable it to mobilise low-cost funds.

Expansions

During FY12, the Company commenced work on an expansion at its Gagillapur facility. The expansion involved a capacity expansion in the PFI and Finished Dosage facilities. The expansion mainly focused on efficient design and output in terms of material transfer and automation.

Upon completion of the PFI module, the Company faced initial scale up issues. The problems were addressed by the technical team along with outside consultants. The Finished Dosage (FD) facility was expanded from an existing capacity of 6 billion doses to 18 billion doses. Both expansions were done in an existing facility and did not require further regulatory approvals and will be used for manufacturing products for the regulated markets after completion of trials and necessary approvals from relevant customers.

In addition, during FY13, the Company completed an upgrade of its existing warehouse and also commenced construction of a new warehouse at its Gagillapur facility. The existing Finished Goods and Raw Material Warehouses were modified with a mobile racking system which has increased capacity. The construction of a new warehouse commenced in FY13 at Gagillapur; construction is expected to be completed in FY14.

Research & Development

The Company is committed to building a sound base for sustained growth both in API, PFI and FD businesses through the development of innovative, future-oriented technologies, intellectual property protection and engineering technologies in stable-ops by leveraging our collective R&D expertise resulting in value for all stakeholders. R&D at Granules India Limited represents an effective edge, reflected in the introduction of pioneering products and processes towards a superior price value proposition. Our R&D primarily caters to our in-house product development requirements for both PFI and Finished Dosage products. Subsidiary Companies

The Company does not have any material non-listed Indian subsidiary company and hence, the requirement of inducting an Independent Director on the Board of Directors of the subsidiary company in terms of clause 49 III of the listing agreement does not arise. However, the Company has two foreign subsidiaries namely, Granules USA Inc and Granules Singapore Pte Ltd.

Disclosures

During the year, there were no materially significant related party transactions, which could have potential conflict with the Company's interests at large. The register of contracts / arrangements containing the transactions in which the Directors are interested is placed before the Board regularly for its approval. Statement in summary form of transactions with related parties is placed before the audit committee for review. In compliance with the accounting standard 18, transactions with related parties are disclosed in the notes to accounts.

- The Company has a Risk Management Procedure in place which is reviewed periodically. Risk management is carried out to ensure the Company is not overly dependent on a particular product, customer or geography. In addition, the above facilitates not only in risk assessment and timely rectification but also helps in minimisation of risk associated with any strategic, operational, and financial and compliance risk across all business operations.
- The Company complied with the requirements of the Stock Exchanges, SEBI and other statutory authorities on all matters related to capital markets; no penalties or strictures were imposed on the Company by the Stock Exchanges or SEBI or any other statutory authorities relating to the above. The Company is involved in a legal case related to disputes over title to shares arising in the ordinary course of share transfer operations; however, this is not material in nature.

iii) The Managing Director and the Chief Financial Officer have certified to the Board, the compliance of matters specified in clause 49V of the Listing Agreement, the same forms part of this Corporate Governance Report. The certificate has been reviewed by the Audit Committee and taken on record by the Board at the meeting held on April 25, 2013.

iv) The Company has laid down a "Code of Conduct" for the Directors and the Senior Management Personnel. The code has been posted on the website of the Company. The members of the Board and Senior Management Personnel of the Company have affirmed compliance with the Code of Conduct as at March 31, 2013. A declaration to this effect signed by Mr. C. Krishna Prasad, Managing Director is given in Annexure to this report.

v) All the mandatory requirements of clause 49 of the Listing Agreement on Corporate Governance have been complied with.

vi) Secretarial Audit

A qualified practicing Company Secretary carried out secretarial audit to reconcile the total admitted capital with the National Securities Depository Limited (NSDL) and the Central Depository Services (India) Limited (CDSL) and the total issued and listed capital. The secretarial audit report confirms that the total paid-up capital was in agreement with the total number of shares in physical form and the total number of dematerialised shares held with NSDL and CDSL.

Means of Communication

Effective communication of information is an essential component of corporate governance. It is a process of sharing information, ideas, thoughts, opinions and plans to all stakeholders which promotes management - shareholder relations. The Company regularly interacts with shareholders through multiple channels of communication such as results announcement, annual report, media releases, company's website and subject specific communications.

The quarterly, half-yearly and annual financial results of the Company are communicated to the stock exchanges immediately after the same are approved by the Board and are published in the prominent English and Telugu newspapers namely, Business Standard, (Hyderabad, Mumbai, Delhi, Bangalore, Chennai, Kolkata and Ahmedabad edition) and Surya (Regional edition). Granules India Limited

Significant accounting policies and Notes to audited Financial statement

CORPORATE INFORMATION

Granules India Limited (the Company) is a public domiciled in India and incorporated under the Companies Act, 1956. Its shares are listed on two Stock Exchanges in India. The Company is engaged in the manufacturing and selling of Active Pharmaceutical Ingredients (APIs), Pharmaceutical Formulation Intermediates (PFIs) and Finished Dosages (FDs). The Company caters to both domestic and international markets.

1. SIGNIFICANT ACCOUNTING POLICIES

1.1 Basis of preparation

The accounts have been prepared and presented under the historical cost convention method on the accrual basis of accounting in accordance with the accounting principles generally accepted in India and comply with the Accounting Standards issued by Institute of Chartered Accountants of India (ICAI) to the extent applicable.

1.2 Use of estimates

The preparation of financial statements in conformity with Indian GAAP requires the management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the disclosure of contingent liabilities, at the end of the reporting period. Although these estimates are based on the management's best knowledge of current events and actions, uncertainty about these assumptions and estimates could result in the outcome requiring a material adjustment to the carrying amounts of assets or liabilities in future periods.

1.3 Tangible Fixed Assets

Fixed Assets are stated at cost less accumulated depreciation Cost is inclusive of duties & taxes (net of CENVAT / VAT), incidental expenses and erection / commissioning expenses.

1.4 Depreciation on tangible fixed assets

Depreciation on fixed assets is provided on straight-line method at the rates specified in Schedule XIV of the Companies Act, 1956. The depreciation on incremental value arising from the revaluation of the fixed assets is charged to revaluation reserve account.

1.5 Expenditure during construction period

Expenditure (including finance cost relating to borrowed funds for construction or acquisition of fixed assets) incurred on projects under implementation are treated as Preoperative expenses pending allocation to the assets and are shown under "Capital Work in Progress" and the same are apportioned to fixed assets on commencement of commercial production.

1.6 Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost. The cost of intangible assets acquired in an amalgamation in the nature of purchase is their fair value as at the date of amalgamation. Following initial recognition, intangible assets are carried at cost less accumulated amortization and accumulated impairment losses, if any. Internally generated intangible assets, excluding capitalized development costs, are not capitalized and the expenditure is reflected in the statement of profit and loss in the year in which the expenditure is incurred.

Intangible assets are amortized on a straight line basis over the estimated useful economic life. The Company uses a rebuttable presumption that the useful life of an intangible asset will not exceed ten years from the date when the asset is available for use. If the persuasive evidence exists to the affect that the useful life of an intangible asset exceeds ten years, the Company amortizes the intangible asset over the best estimate of its useful life. Such intangible assets

Significant accounting policies and Notes to audited Financial statement (Contd.)

and intangible assets not yet available for use are tested for impairment annually, either individually or at the cash-generating unit level. All other intangible assets are assessed for impairment whenever there is an indication that the intangible asset may be impaired.

The amortization period and the amortization method are reviewed periodically. If the expected useful life of the asset is significantly different from previous estimates, the amortization period is changed accordingly. If there has been a significant change in the expected pattern of economic benefits from the asset, the amortization method is changed to reflect the changed pattern. Such changes are accounted for in accordance with AS 5 Net Profit or Loss for the Period, Prior Period Items and Changes in Accounting Policies.

Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the statement of profit and loss when the asset is derecognized.

1.7 Investments:

Long-term investments and investments in subsidiary companies are carried at cost. Provision for diminution in value is made whenever necessary in accordance with the Accounting Standards in force.

1.8 Valuation of Inventories:

- a) Inventories are valued at the lower of cost or net realizable value.
- b) Inventories of raw material, consumables and stores and spares are valued at cost as per FIFO method. Cost does not include duties and taxes that are subsequently recoverable.
- c) Cost for the purpose of finished goods and material in process is computed on the basis of cost of material, labour and other related overheads.
- d) Goods in transit are stated at costs accrued up to the date of Balance Sheet.
- e) Stocks with consignment agents are stated at costs accrued up to the date of the Balance Sheet.

1.9 Government grants:

Government grants received in the nature of promoter's contribution and where no repayment is ordinarily expected are treated as capital reserve.

1.10 Foreign Exchange:

Foreign exchange transactions are recorded at the exchange rates prevailing at the time of transactions or at contracted rates. Current assets and current liabilities are translated at values prevailing at the Balance Sheet date. Gains/Losses, if any, arising thereby are recognized in the respective revenue or expense accounts. The foreign exchange variances resulting on account of loans used to acquire fixed assets are accounted as part of fixed assets.

1.11 Revenue Recognition:

- a) Revenue from sales is recognized when significant risk and rewards in respect of ownership of the products are transferred.
- b) Revenue from domestic sales is recognized on dispatch of products from the factory of the Company and in case of consignment sale, on further sale made by the agents.
- c) Revenue from export sales is recognized on the basis of dates of Bill of Lading.

Significant accounting policies and Notes to audited Financial statement (Contd.)

1.12 Research and Development expenses:

- 1.12.1 Research costs not resulting in any tangible property/equipment are charged to revenue as and when incurred.
- 1.12.2 Know-how / product development costs incurred on an individual project are carried forward when its future recoverability can reasonably be regarded as assured. Any expenditure carried forward is amortized over the period of expected future benefits from the related project, not exceeding ten years.
- 1.12.3 The carrying value of know-how / product development costs are reviewed for impairment annually when the asset is not yet in use and otherwise when events or changes in circumstances indicate that the carrying value may not be recoverable.

1.13 Employee Retirement Benefits:

- 1.13.1 Defined Contributions Plan: Contributions paid/payable to the defined contribution plan of Provident Fund for certain employees covered under the scheme are recognized in the Profit and Loss account each year. The Company makes contributions to a State operated contribution scheme for certain employees at a specified percentage of the employees' salary. The Company has an obligation only to the extent of the defined contribution.
- 1.13.2 Defined Benefit Plan: Gratuity for certain employees is covered under a scheme of Life Insurance Corporation of India (LIC) and contributions in respect of such scheme are recognized in the Profit and Loss account. The liability as at the Balance Sheet date is provided for based on the actuarial valuation carried out in accordance with revised Accounting Standard 15 as at the end of the year/period.
- 1.13.3 Other long term employee benefits: Other long term employee benefits comprise of leave encashment which is provided on the actuarial valuation carried out in accordance with revised Accounting Standard 15 as at the end of the year/period.

1.14 Borrowing costs:

Borrowing costs incurred in relation to the acquisition and constructions of assets are capitalized as part of the cost of such assets up to the date when such assets are ready for intended use. Other borrowing costs are charged as an expense in the year in which they are incurred.

1.15 Income tax expense:

1.15.1 Current Tax Expense

The Current charge for income tax is calculated in accordance with the tax regulations.

1.15.2 Deferred Tax Expense

Deferred income tax reflects the impact of timing difference between accounting income and tax income for the year / period. Deferred tax is measured based on the tax rates and the tax laws enacted at the Balance Sheet date. Deferred tax asset is recognized only to the extent of certainty of realization of such asset.

1.16 Measurement of EBITDA

As permitted by the Guidance Note on the Revised Schedule VI to the Companies Act, 1956, the Company has elected to present earnings before interest, tax, depreciation and amortization (EBITDA) as a separate line item on the face of the statement of profit and loss. The Company measures EBITDA on the basis of profit/ (loss) from continuing operations. In its measurement, the Company does not include depreciation and amortization expense, finance costs and tax expense.

Corporate Information

Granules India Limited (the Company) is a public domiciled in India and incorporated under the Companies Act, 1956. Its shares are listed on two Stock exchanges in India. The Company is engaged in the manufacturing and selling of Active Pharmaceutical Ingredients (APIs), Pharmaceutical Formulation Intermediates (PFIs) and Finished Dosages (FDs). The Company caters to both domestic and international markets.

1. SIGNIFICANT ACCOUNTING POLICIES

1.1 Principles of consolidation

The financial statements are prepared in accordance with the principles and procedures required for the preparation and presentation of consolidated financial statements as laid down on the accounting standards on Consolidated Financial Statements by the ICAI. The financial statements of the parent Company, Granules India Limited, GIL Lifesciences Private Limited, Granules Singapore PTE Ltd, Granules USA Inc and Granules Biocause Pharmaceutical Co. Limited (50% Joint-Venture), Granules Omnichem Pvt.Ltd (50% Joint-Venture), have been combined on a line-by-line basis by adding together book values of like items of assets, liabilities, income and expenses after eliminating intra-group balances and transactions and resulting unrealized gains / losses. Exchange differences resulting from the difference due to transactions of foreign currency assets and liabilities in subsidiary companies are disclosed as a foreign currency translation adjustment. The consolidated financial statements are prepared applying uniform accounting policies for like transactions and other events in similar circumstances in use at the parent and subsidiary Company.

1.2 Basis of preparation

The accounts have been prepared and presented under the historical cost convention method on the accrual basis of accounting in accordance with the accounting principles generally accepted in India and comply with the Accounting Standards issued by Institute of Chartered Accountants of India (ICAI) to the extent applicable.

1.3 Use of estimates

The preparation of financial statements in conformity with Indian GAAP requires the management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the disclosure of contingent liabilities, at the end of the reporting period. Although these estimates are based on the management's best knowledge of current events and actions, uncertainty about these assumptions and estimates could result in the outcome requiring a material adjustment to the carrying amounts of assets or liabilities in future periods.

1.4 Tangible Fixed Assets:

Fixed Assets are stated at cost less accumulated depreciation Cost is inclusive of duties & taxes (net of CENVAT / VAT), incidental expenses and erection / commissioning expenses.

1.5 Depreciation on tangible fixed assets:

Depreciation on fixed assets is provided on straight-line method at the rates specified in Schedule XIV of the Companies Act, 1956. The depreciation on incremental value arising from the revaluation of the fixed assets is charged to revaluation reserve account.

1.6 Expenditure during construction period:

Expenditure (including finance cost relating to borrowed funds for construction or acquisition of fixed assets) incurred on projects under implementation are treated as Preoperative expenses pending allocation to the assets and are shown under "Capital Work in Progress" and the same are apportioned to fixed assets on commencement of commercial production.

Significant accounting policies and Notes to audited Consolidated Financial statement (contd.)

1.7 Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost. The cost of intangible assets acquired in an amalgamation in the nature of purchase is their fair value as at the date of amalgamation. Following initial recognition, intangible assets are carried at cost less accumulated amortization and accumulated impairment losses, if any. Internally generated intangible assets, excluding capitalized development costs, are not capitalized and the expenditure is reflected in the statement of profit and loss in the year in which the expenditure is incurred.

Intangible assets are amortized on a straight line basis over the estimated useful economic life. The Company uses a rebuttable presumption that the useful life of an intangible asset will not exceed ten years from the date when the asset is available for use. If the persuasive evidence exists to the affect that the useful life of an intangible asset exceeds ten years, the Company amortizes the intangible asset over the best estimate of its useful life. Such intangible assets and intangible assets not yet available for use are tested for impairment annually, either individually or at the cash-generating unit level. All other intangible assets are assessed for impairment whenever there is an indication that the intangible asset may be impaired.

The amortization period and the amortization method are reviewed periodically. If the expected useful life of the asset is significantly different from previous estimates, the amortization period is changed accordingly. If there has been a significant change in the expected pattern of economic benefits from the asset, the amortization method is changed to reflect the changed pattern. Such changes are accounted for in accordance with AS 5 Net Profit or Loss for the Period, Prior Period Items and Changes in Accounting Policies.

Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the statement of profit and loss when the asset is derecognized.

1.8 Investments:

Long-term investments and investments in subsidiary companies are carried at cost. Provision for diminution in value is made whenever necessary in accordance with the Accounting Standards in force.

1.9 Valuation of Inventories:

- a) Inventories are valued at the lower of cost or net realizable value.
- b) Inventories of raw material, consumables and stores and spares are valued at cost as per FIFO method. Cost does not include duties and taxes that are subsequently recoverable.
- c) Cost for the purpose of finished goods and material in process is computed on the basis of cost of material, labour and other related overheads.
- d) Goods in transit are stated at costs accrued up to the date of Balance Sheet.
- e) Stocks with consignment agents are stated at costs accrued up to the date of the Balance sheet.

1.10 Government Grants:

Government grants received in the nature of promoter's contribution and where no repayment is ordinarily expected are treated as capital reserve.

1.11 Foreign Exchange:

Foreign exchange transactions are recorded at the exchange rates prevailing at the time of transactions or at contracted rates. Current assets and current liabilities are translated at values prevailing at the Balance Sheet date. Gains/Losses, if any, arising thereby are recognized in the respective revenue or expense accounts. The foreign exchange variances resulting on account of loans used to acquire fixed assets are accounted as part of fixed assets.

1.12 Revenue Recognition:

- a) Revenue from sales is recognized when significant risk and rewards in respect of ownership of the products are transferred.
- b) Revenue from domestic sales is recognized on dispatch of products from the factory of the Company and in case of consignment sale, on further sale made by the agents.
- c) Revenue from export sales is recognized on the basis of dates of Bill of Lading.

Significant accounting policies and Notes to audited Consolidated Financial statement (contd.)

1.13 Export Benefits:

Advance licenses are issued to the Company under the Advance License Scheme [Duty Exemption Entitlement Certificate (DEEC Scheme)] / duty entitlement credited under the Duty Entitlement Pass Book Scheme (DEPB Scheme) on the export of the goods manufactured by it. Whenever export sales are made by the Company, pending receipt of imported duty-paid raw materials under the DEEC / DEPB Schemes, the cost of domestic raw materials actually consumed for the purpose of such exports is compensated and / or matched by accruing the value of the benefit under the DEEC / DEPB Scheme.

1.14 Research and development expenses:

- 1.14.1 Research costs not resulting in any tangible property/equipment are charged to revenue as and when incurred.
- 1.14.2 Know-how / product development costs incurred on an individual project are carried forward when its future recoverability can reasonably be regarded as assured. Any expenditure carried forward is amortized over the period of expected future benefits from the related project, not exceeding ten years.
- 1.14.3 The carrying value of know-how / product development costs are reviewed for impairment annually when the asset is not yet in use and otherwise when events or changes in circumstances indicate that the carrying value may not be recoverable.

1.15 Employee Retirement Benefits:

- 1.15.1 Defined Contributions Plan: Contributions paid/payable to the defined contribution plan of Provident Fund for certain employees covered under the scheme are recognized in the Profit and Loss account each year.
The Company makes contributions to a State operated contribution scheme for certain employees at a specified percentage of the employees' salary. The Company has an obligation only to the extent of the defined contribution.
- 1.15.2 Defined Benefit Plan: Gratuity for certain employees is covered under a scheme of Life Insurance Corporation of India (LIC) and contributions in respect of such scheme are recognized in the Profit and Loss account. The liability as at the Balance Sheet date is provided for based on the actuarial valuation carried out in accordance with revised Accounting Standard 15 as at the end of the year/period.
- 1.15.3 Other long term employee benefits: Other long term employee benefits comprise of leave encashment which is provided on the actuarial valuation carried out in accordance with revised Accounting Standard 15 as at the end of the year/period.

1.16 Borrowing costs:

Borrowing costs incurred in relation to the acquisition and constructions of assets are capitalized as part of the cost of such assets up to the date when such assets are ready for intended use. Other borrowing costs are charged as an expense in the year in which they are incurred.

1.17 Income tax expense:

1.17.1 Current Tax Expense

The Current charge for income tax is calculated in accordance with the tax regulations.

1.17.2 Deferred Tax Expense

Deferred income tax reflects the impact of timing difference between accounting income and tax income for the year / period. Deferred tax is measured based on the tax rates and the tax laws enacted at the Balance Sheet date. Deferred tax asset is recognized only to the extent of certainty of realization of such asset.

1.18 Measurement of EBITDA

As permitted by the Guidance Note on the Revised Schedule VI to the Companies Act, 1956, the Company has elected to present earnings before interest, tax, depreciation and amortization (EBITDA) as a separate line item on the face of the statement of profit and loss. The Company measures EBITDA on the basis of profit/ (loss) from continuing operations. In its measurement, the Company does not include depreciation and amortization expense, finance costs and tax expense.

- Institutionalizing the "Theory of Constraints (TOC)" based project management system for filing stage as well for launch stage for improvement of due date performance, reducing of the cycle time, increases in the number of projects delivered by the teams both in filing as well as launch stage.
- Setting-up a process for identifying, developing and partnering with specialists/companies for strengthening the technology capabilities

- Setting-up a process for collaboration with relevant experts outside and accessing them on need basis to help the projects progress smoothly

- Identification of areas which are critical for success in API and finished dosages etc.,

Brief profile of Mr. Kolli Basava Sankar Rao, the nature of his expertise in specific functional areas as stipulated under clause 49 of the listing agreement with the stock exchanges, are provided in the section on Corporate Governance in this Annual Report. Members are requested to refer to the said section of the Corporate Governance Report. The copy of relevant resolution of the Board with respect to appointment of Mr. Kolli Basava Sankar Rao is available for inspection by Members at the Registered Office of the Company during business hours on any working day till the date of the forthcoming Annual General Meeting.

Mr. Kolli Basava Sankar Rao has confirmed that he is not disqualified from being appointed as Director under Section 274(1)(g) of the Act. Approval of the shareholders is sought by way of Ordinary Resolution in the Annual General Meeting for his appointment as Director.

The Board recommends the resolution as set out in Item no. 6 of the accompanying Notice for approval of the Members.

Except Mr. Kolli Basava Sankar Rao who is interested in the matter relating to his appointment, no other Director of the Company is in any way concerned / interested in this resolution.

ITEM NO. 7

Mr. Harsha Chigurupati has been with Granules since 2005 and served as CMO from 2006-2010. He joined the Board of the Company on July 26, 2010 as an Additional Director and was appointed as an Executive Director of the Company for a period of 5 (five) years with effect from August 1, 2010 on a remuneration of Rs. 36 lacs per annum.

Mr. Harsha Chigurupati since his association with the Company has implemented various new initiatives and strategies to strengthen the Marketing Department. Mr. Harsha Chigurupati has been focusing on proactive business development and strengthening the Company's geographic presence by entry into new markets on the one side and penetrating deeper into the existing ones on the other side. He has contributed to enhancement of Company's presence in the global market, particularly, the regulated markets. His contribution led to the addition of new customers including global branded MNCs. As an Executive Director,

Mr. Chigurupati is responsible for the standalone operations of the Company including the Profit & Loss.

Mr. Harsha Chigurupati has been growing in the Company steadily and giving positive reserves and accordingly, his position and compensation payable to him are reviewed from time to time commensurate to his experience, exposure, qualifications, relevance and results. Considering these factors, the Board at its meeting held on 25th April, 2013 decided to increase the remuneration of Mr. Harsha Chigurupati as specified in the resolution however, subject to the approval of the members. The revised remuneration payable to Mr. Harsha Chigurupati has been approved by the Compensation & Remuneration Committee at its meeting held on April 24, 2013.

In view of the above, there is a necessity to pass appropriate resolutions in partial modification of the resolutions passed in the Annual General Meeting held on September 27, 2010 for effecting the increase in the remuneration being paid to Mr. Harsha Chigurupati, the Executive Director of the Company. In compliance with the provisions of section 198, 309 and 310 read with Schedule XIII and other applicable provisions if any of the Companies Act, 1956, the revised remuneration as specified in the resolution is now placed before the members for their approval and the same is set out under Item No.7 of the Notice. There is no change in the other terms and conditions of the appointment of Mr. Harsha Chigurupati as the Executive Director of the Company.

The members are requested to pass the relevant resolutions unanimously.

None of the Directors except Dr. C. Nageswara Rao, Chairman, Mr. C. Krishna Prasad, Managing Director, Mrs. C. Uma Devi, Executive Director and Mr. Harsha Chigurupati himself, in relation to the said resolution is in any way concerned / interested in this resolution.

ITEM NO. 8

Section 309(4) of the Companies Act, 1956 provides that in the case of a Director who is not the Managing Director nor Whole-Time Director / Executive Director, the Company may, by Special Resolution, authorize the payment of commission not exceeding 1 percent of the net profits per year for a period of five years in addition to the sitting fees for attending meetings of the Board and Committees. The Non-Executive Directors of your Company bring with them significant professional expertise and rich experience across a wide spectrum of functional areas such as marketing, technology, corporate strategy, information systems and finance. The experience of the Non-Executive Directors has helped the Company in achieving multifold growth. The

Non-Executive Directors have been devoting considerable time to the Company. The Board therefore felt necessary that adequate compensation should be given to the Non-Executive Directors of the Company so as to compensate them for their time and efforts and also, to retain and attract the pool of talent for the growth and prosperity of the Company.

The Compensation and Remuneration Committee in its meeting held on 24th April, 2013 considered the payment of remuneration to the Non-Executive Directors and approved the payment of commission to them on the net profits of the Company at the rate not exceeding one percent per annum for five years from 01-04-2013 and accordingly, recommended the same to the Board of Directors. The Board of Directors of the Company at their meeting held on 25th April, 2013 resolved for payment of commission to the Non-Executive Directors of the Company at the rate not exceeding 1% of the net profits as computed in the manner laid down under 309(4) read with sections 198, 349 and 350 of the Act in addition to the sitting fees to which they are entitled however, subject to the requisite approval of the same by the members. The said proposal for payment of commission requires the approval of shareholders by way of Special Resolution in accordance with the provisions of Section 309(4) of the Companies Act, 1956. This shall have effect for five years commencing from 1st April, 2013. The said quantum of one percent commission will be apportioned amongst the Non-Executive Directors of the Company as approved by the Board on the recommendation of Compensation & Remuneration Committee from time to time.

Dr. C. Nageswara Rao, Mr. L. S. Sarma, Mr. A. P. Kurian, Mr. C. Parthasarathy, Dr. Krishna Murthy Ella, Mr. A. Arun Rao and Mr. K.B. Sankara Rao, Non-Executive Directors of the Company are individually interested in the resolution only to the extent of commission proposed to be payable to them individually. Mr. C. Krishna Prasad, Mrs. C. Uma Devi and Mr. Harsha Chigurupati being relatives of Dr. C. Nageswara Rao are also interested in the resolution only to the extent of commission proposed to be payable to Dr. C. Nageswara Rao. In view of the above, the members are requested to pass the above resolutions as Special Resolutions unanimously.
