The formula for sustainability revolves around three key elements – innovation, efficiency, and value.

➤ **When innovation is stimulated across every sector, new product processes, chemicals and stewardship practices evolve.**

➤ **When natural resources are efficiently utilised for human needs, a safer and effective environment is created.**

➤ **When the value is put on enhancing human health and protecting the environment, sustainability is always the after effect!**

Divi's has been instrumental in getting this formula of sustainable chemistry right, by committing our business model towards creating environmentally benign chemicals & processes and enhancing the quality of life all around us, thus leading to an all round sustainability – in our financial performance, environmental commitments and societal responsibilities!

Sustainable chemistry operates within the broad framework of sustainable development to maximise resource efficiency and create continuous value for stakeholders. The cover design resonates the broad idea of sustainable chemistry, wherein the infographics represent the elements that effectively contribute towards leadership that we as an organisation strive for.

INTRODUCING DIVIS

Founded in 1990, Divi's Laboratories is among the leading pharmaceutical companies in the world, based out of India, manufacturing Active Pharma Ingredients (APIs) and Intermediates. With four manufacturing facilities, market presence across several countries and a team of 9735 people, Divis continues to innovate to bring better manufacturing processes for facilitating affordable medicines.

Divis is engaged in manufacturing leading generic compounds, Nutraceutical ingredients and custom synthesis of APIs and intermediates for global innovator companies. Divis is among the largest pharmaceutical companies in India with a portfolio of 120 products across diverse therapeutic areas. The continuous innovation in processes is made possible with its three R&D centres comprising a team of well qualified people. It stays committed towards its goal of sustainable chemistry there by innovating processes and practices that protect and enhance human health and the environment.

COMMITTED TO SUSTAINABILITY

At Divis, commercial success and financial performance is integral to the Company's ability to provide meaningful and long-term benefits to the communities around our manufacturing facilities.

Our long-term business sustainability is built on foundation of our efforts towards environment and corporate social responsibility. We play an active role in supporting local communities with initiatives that are aligned to our long-term business goals.

We leverage our position among country's leading pharmaceutical companies and support several programmes and causes that bring a positive change in lives of the people.

CSR at Divis in its modern sense, requires us to operate responsibly taking into account the economic, social and environmental impacts, and address key sustainable development challenges across our projects.

Key pillars in CSR and sustainability strategy at Divis:

Promoting Education

Support to Differently-Abled

Preventive Healthcare

Animal Welfare &
Dairy Development

Building Rural Infrastructure

Safe Drinking Water

Swachh Bharat

Environmental Sustainability

Wellness at work

PROMOTING EDUCATION

At Divis, we have always believed in an inclusive and holistic development of future generations. Our effort towards stimulating learning across a wide stakeholder group is recognized and appreciated in several nation wide forums. We continue to strongly focus on promoting and supporting formal educational needs of children.

While we provide several tangible benefits, we also support education with a team of volunteers known as Vidya Volunteers. Divis pays honorarium to these volunteers who actively visit schools and provide education to several students.

INITIATIVES CONDUCTED DURING THE YEAR

Empowering students for education forms an important foundation of our sustainability goals. We conducted several activities to empower education among the students. Some of them being:

Health & Hygiene

Children across several villages lack proper nutrition in addition to having access to basic education. Those children who get education are often forced to drop out due to lack of nutrition. At Divi's, we realized this fact and made sincere efforts to enhance the nutrition levels of children.

Our '**once a day Horlicks**' programme helps plug the gap in nutrition levels for more than 6000 students across 60 villages. We distribute Horlicks sachets of 18 grams everyday to 60 schools across Krishna, Nalgonda, Visakhapatnam and Vijayanagaram districts at ₹6.44 Lakhs per month.

We also built toilets for girls and boys in several schools ensuring proper hygiene and sanitation levels.

To ensure that students stayed healthy and safe, we partnered with local doctors and conducted **health check-up camps at 56 schools** and also provided first-aid kits. This initiative ensured that diagnosis is given at the right time to prevent and protect the kids from any disease.

School necessities

We empowered education of several students by providing them with basic necessities of school supplies. During the year, we **distributed notebooks, school shoes, uniforms and school bags** to several students in 26 schools.

Empowering the talented

Children with passion and commitment always achieve greater heights. At Divi's, we do our best to motivate them to reach higher scale of success. We provide scholarships for professional courses to meritorious students and we also provide scholarships to differently-abled students.

During the year, we gave **scholarships worth ₹7.50 Lakhs to 108 students** in various schools. We provided scholarships to 12 students from the age of 6-11 and also supported differently-abled children to complete their education.

Strengthening the infrastructure

One of the primary reasons for lower literacy rate in rural areas is lack of infrastructure facilities at the ground level. Kachha walls, no ventilation, small rooms and lack of space for co-curricular activities often made children disinterested.

At Divis, we helped this cause in more ways than one. We constructed make-shift open schools for ensuring continuation of education for school drop-outs. We made provision for safety grills on windows and constructed toilets in some schools. We helped develop infrastructure at Anganwadi Centres in Yadadri Bhuvanagiri and Visakhapatnam region. We also renovated MPP School at Nemalikaluva. We also donated several dual desk benches to 17 ZPH schools in Siddipet constituency.

Transforming education standards

With the evolution of education and knowledge, it is imperative to upgrade to modern day education standards. At Divis, we helped students in 7 rural area schools by providing **digital education**. We created **digital class room** and conducted several training sessions for villagers and students from those regions. For example, we brought in bank managers to conduct classes on digital payments and empowered villagers with modern day banking system.

We **installed computer laboratories in 3 schools** with more than 50 computers. Computer training classes were conducted regularly.

Skill Development

We also constructed a dedicated skill development centre at Chippada, Visakhapatnam to empower the youth with right skills for their future employment and self-employment needs. With more than 100 young men and women trained till date, the skill development centre has brought in positive change to their lives.

EMPOWERING THE DIFFERENTLY-ABLED

As our country makes strides towards emerging as a great nation, there is an increasing need to create a sense of equality and protect rights of all. There still constitutes a sizeable portion of the country's population with psychological or physical conditions.

At Divis, we recognize their talent and abilities, value them and give them an opportunity to be treated equally. From supporting them with Braille text books to appointing teachers, we undertook several initiatives to enhance their true abilities and take them closer to their dreams and aspirations.

Netravidyalaya – A vision to the needy

Netravidyalaya is an educational institution for visually challenged. We provide assistance in various forms to the kids of this institute, empowering them to achieve their goals. During the year, we distributed 30 laptops to students of this institute and helped them reach their potential.

Some of the initiatives undertaken:

- ✔ Supplied Braille text books to the students of Govt Residential School for visually challenged
- ✔ Appointed additional teachers for Govt Residential school for visually challenged
- ✔ Extended admission support for continuing higher education (Intermediate & Degree)
- ✔ Established Computer Lab, Music Room and Health Room
- ✔ Created barrier free environment in the play ground
- ✔ Provided nutritious food to the students
- ✔ Conducted health check up camps
- ✔ Supplied 2 sets of uniforms to each student
- ✔ Provided utensils & water coolers
- ✔ Constructed toilets building
- ✔ Renovated kitchen

PREVENTIVE HEALTHCARE

Most of the people in rural India still suffer from basic and proper diagnosis for their medical needs. Unmet medical needs often lead to severe health issues and reduces their life expectancy significantly.

At Divi's, we undertook several preventive health care initiatives within the communities we operate thereby improving their sanitation.

Some of the initiatives during the year:

- ✔ Free Eye and Dental care camps
- ✔ ORT training and pulse polio campaigns
- ✔ Additional incentives for Family Planning
- ✔ Awareness campaigns on HIV/ AIDS, epidemics and malaria
- ✔ Fluorosis health camps
- ✔ Prevention camps for Japanese Encephalitis
- ✔ Donation of Gluco meters and strips to Government Hospitals

PROMOTING ANIMAL WELFARE

Holistic development is often unbalanced until it includes equal relevance and development programmes for the animals as well. Often it has been found that animal welfare is not mainstreamed in development policy.

Our social responsibility initiative included number of activities that helped promote animal welfare and their holistic development. Some of the initiatives included:

- ✔ Conducting knowledge-based veterinary camps
- ✔ Providing expert advise through camps on dairy development, cattle feed and animal welfare
- ✔ Providing necessary medicines through veterinary dispensaries
- ✔ Contributing medical equipment, vaccination and medicines to veterinary hospitals

BUILDING RURAL INFRASTRUCTURE

Infrastructure plays a crucial role in our country's economic development. Rural areas account for the largest part of our country's geographical region with lakhs of villages providing shelter to millions of people. It is extremely important to develop the rural infrastructure in order to develop the country as a whole.

At Divi's, we have made a conscious effort to contribute to the development of infrastructure in the rural parts of our country. We realized that there are many villages yet to be connected to towns and cities, hindering their overall development and growth. During the year, we undertook the following initiatives towards rural infrastructure development:

- ✔ Constructed roads, bus shelters, community halls, drains, dahana vaticas
- ✔ Renovated places of worship
- ✔ Dug agricultural bore wells
- ✔ Provided street lights and accessories
- ✔ De-silted tanks, canals & community ponds
- ✔ Distributed street lights
- ✔ Constructed drainages at appropriate places

SUJALAM – PROTECTED DRINKING WATER SCHEME

In India, particularly in remote villages, safe drinking water is still a distant reality. There aren't any set guidelines and standards for drinking water to protect people against both naturally-occurring and man-made contaminations. There still persist number of threats to drinking water, like, animal waste, underground waste, improper disposal of chemicals and other natural contaminations. These threats pose significant health risks to the lives of people.

Initially, our CSR team was focused on providing safe drinking water to more than **1,70,000 people across 45 villages** through installation of treatment plants. Project 'Sujalam' is an initiative that implements our plan to **provide protected drinking water**.

Under this initiative, we have installed dedicated RO plants, wherein villagers are **provided 'smart card' to get drinking water**. During the year, we installed 60 RO plants near the vicinity of our manufacturing facilities. This system has provided transparency and accountability at Gram Panchayat level.

Apart from the installation of RO plants, we also supplied clean and hygienic water cans to a number of people. We helped install a dedicated water storage facility at Chippada, Visakhapatnam. We also dug bore wells at a number of places for having running water, thereby helping farmers in farming and irrigation.

SWACHH BHARAT – AN INITIATIVE FOR CLEAN INDIA

Launched by the Prime Minister on the birth anniversary of Mahatma Gandhi on 2nd October 2014, this mission seeks to attain his vision of 'Clean India' by his 150th birth anniversary in 2019. This initiative aims to deliver goals of social transformation, like eliminating open defecation, manual scavenging, building clean sanitation solutions, solid waste management and greater awareness of cleanliness.

At Divi's, we took forward this initiative with passion for betterment of our country. Some of the initiatives taken up are:

- ✔ Swachh Bharat bins implemented from NH 5 to DIVIS Labs, Chippada across the main road
- ✔ Waste will be collected from "Biodegradable & Recyclable" bins from villages
- ✔ A tricycle has been provided to each Grama Panchayat for collection of waste in villages
- ✔ Monthly wages are paid to scavengers for regular cleaning of Swachh Bins in all locations
- ✔ Constructed community toilets and provided financial assistance for individual toilets in various Grama Panchayats

ENVIRONMENTAL SUSTAINABILITY

Our efforts towards protecting the environment have exponentially increased each year. We understand that environmental sustainability is an exercise of constant improvement and therefore have developed several initiatives to strengthen the environment within the communities and areas of our operation.

**At Divis, environmental sustainability
comprises of the following key pillars:**

Maintaining ecological balance

Waste management

Controlling emissions

Energy conservation

Maintaining ecological balance

During the year, we planted more than 2 lakh saplings around the sites of our operations. We provided solar power to street lights, schools, gram panchayats, offices and other government offices. We conducted several programmes for our team and nearby communities and promoted clean and green energy.

Waste management

Being in the business of chemistry, we continue to work towards ensuring efficient waste management. During the year, we carried out exhaustive review exercise across all our existing processes. The following initiatives helped us manage waste effectively:

E-Waste management

We structured our processes to stay committed to comply with E-waste (Management & Handling) Rules 2011. The actions for disposal of E-waste generated are in line with the said Rules.

Hazardous waste disposal

We adopted sincere steps towards co-processing the waste generated during our manufacturing processes. After identifying that some of the waste can be used as alternative fuel for cement production, we have partnered with cement plants near our operating facilities, thereby leading to complete thermal destruction of hazardous wastes, which were earlier incinerated in-house.

Water Management

Water continues to be of critical importance with increasing global warming across the world. At Divi's, we strive to recycle the water generated from the effluents after effective treatment. The purpose is to reduce fresh water intake and use recycled water. To further strengthen our promise, we have also implemented rain water harvesting facilities, enabling effective recharge of ground water levels.

Biogas plant

Our recent commissioning of bio-gas plant at our Visakhapatnam unit helped us process kitchen waste and leftover food from canteen. This helped generate electricity and serve cooking needs.

Controlling emissions

Air emissions are measured in our manufacturing units through continuous Online Ambient Air Quality Monitoring Stations placed in the facilities. These stations monitor Nox, Sox, Carbon monoxide, Voc among other gases. The system is connected to State Pollution Control Board server with the readings being displayed at entrance of the manufacturing units. With regular monitoring, all the actions carried out in our processes allow us to maintain the emission levels well within the permissible limits.

Energy conservation

The energy saving and efficiency measures undertaken during the year, helped achieve reduction of energy consumption. Among the actions carried out, the notable actions were: installation of energy efficient machines, introduction of LED lights and improvement in insulation of plants and workshops among others. We follow the Central Electricity Authority (CEA) Grid emission factors, the World Resources Institute (WRI) / World Business Council for Sustainable Development (WBCSD) GHG Protocol and the Inter-Governmental Panel on Climate Change (IPCC) guidelines to keep a check on our carbon footprint.

WELLNESS AT WORK

HEALTH & SAFETY

We ensure that our team stays in the good health and takes effective safety measures thereby ensuring higher work productivity. A dedicated work health programme is conducted to improve the health and safety outcomes of all employees.

Some of the key initiatives that were taken up:

- ♥ We continuously evaluate and optimize our processes to achieve 'Zero Accidents'
- ♥ Conduct intense studies regularly and install relevant safety processes
- ♥ Carry out detailed study on materials and processes to arrive at relevant engineering and safety controls
- ♥ Process Safety Vigilance Team actively participates in continuous monitoring of critical operations

Training

Upgradation of knowledge and skills are the most important aspects for overall development of employees. We conduct periodic training sessions, external trainings (on various aspects to derive higher efficiency levels) at our manufacturing sites. The best practices followed at Divis are also being shared to other API companies during several external conferences and interactive sessions conducted by regulatory bodies.

Some of the proactive measures undertaken during the year:

- a) Design and construction of isolated, dedicated manufacturing facilities for:
 - ♥ handling of Sodium Azide, which is a Shock Sensitive material
 - ♥ handling Hydrogenation reactions.
 - ♥ handling of Chloroform involved process / reactions.
- b) Upgradation of existing hazard Evaluation Laboratory with powder testing instruments.
- c) Introduction of Glove Boxes, FIBC handling, PTS, Hoppers, promoting Slurry transfers etc.
- d) Closed Catalyst handling for safe handling of pyrophoric catalysts
- e) Elimination of multiple number of drum handling activities to avoid the explosive atmosphere accumulation in the workplace by procuring the Materials in bulk tanks.
- f) Introduction of antistatic liners for packing of the Intermediates in order to avoid static hazards.
- g) Replacement of leaf filters with cricket filters.
- h) Extension of portable and fixed detection systems for storage and handling areas.
- i) Strengthening of procedures for measuring static electricity.
- j) Provided Panel rooms with better safety measures like Fire Retardant coatings, CO₂ suppression systems, smoke extraction systems etc.
- k) Introduction of explosion suppression bottles to powder transferring lines and HEPA filtered vacuum cleaners in powder processing areas.
- l) Procurement of Nitrogen compressors to make the insertion practise more robust.
- m) Introduction of in-line milling & sieving between filtration equipment and packing station for closed handling of powders i.e charging and offloading of powders is avoided.
- n) Introduction of fire retardant PPE & uniform wherever hazardous operations / activities are being carried.
- o) Shifted the inflammable day solvent tanks away from Production blocks for minimizing the inherent fire risks and eliminated flammable solvent charge tanks by arranging mass flow meters.

BUSINESS RESPONSIBILITY REPORT

Section A: General Information about the Company

- Corporate Identity Number (CIN) of the Company :**
L24110TG1990PLC011854
- Name of the Company :** Divi's Laboratories Limited
- Registered Address :** Divi Towers, 1-72/23(P)/DIVIS/303, Cyber Hills, Gachibowli, Hyderabad – 500 032, India
- Website :** www.divislab.com
- E-mail Id :** mail@divislab.com
- Financial Year reported :** April 2016 to March 2017
- Sector(s) that the company is engaged (industrial activity code-wise) :** Pharmaceuticals NIC Code : 2100
- List of three products/services that the Company manufactures/ provides :** NAPROXEN, GABAPENTIN, DEXTROMETHORPHAN HBr
- Total number of Locations where business activity is undertaken by the Company
 - Number of International Locations :** We have marketing offices for our Nutraceutical products in USA and Europe
 - Number of National Locations :** 4 manufacturing facilities and 3 R & D Centres. Refer Page No 3.
- Markets served by the Company – Local/State/National/ International :** Our major markets include United States of America (USA), Europe and Asia

Section B: Financial details of the Company

- Paid-up Capital (INR) :** ₹5309.37 lakhs
- Total Revenue (INR) :** ₹414175.31 Lakhs
- Total profit after taxes (INR) :** ₹105326.99 Lakhs
- Total spending on Corporate Social Responsibility (CSR) as percentage of profit after tax (%) :** 1.54%
- List of activities in which expenditure in 4 above has been incurred :** Refer Page No 71 & 72.

Section C: Other details

- Does the Company have any Subsidiary Company/ Companies?**
Yes
- Do the Subsidiary Company/ Companies participate in the BR Initiatives of the parent company? If yes, then indicate the number of such subsidiary company(s) :** Our Subsidiary Companies are closely integrated with our Corporate BR initiatives
- Do any other entity/entities (e.g. suppliers, distributors etc.) that the Company does business with, participate in the BR initiatives of the Company? If yes, then indicate the percentage of such entity/entities? [Less than 30%, 30-60%, More than 60%] :** Yes. We have a Code of Conduct for stakeholders, which we expect them to follow.

Section D: BR Information

1 Details of Director/ Directors responsible for BR

(a) Details of the Director/ Directors responsible for implementation of the BR policy/policies

DIN Number : 00005040
Name : Dr. Murali K. Divi
Designation : Chairman & Managing Director

(b) Details of the BR head

DIN Number : 00063843
Name : Mr. Madhusudhana Rao Divi
Designation : Whole-time Director
Telephone number : 91-40-23786339
e-mail id : kishore@divislab.com

3. Governance related to BR

- (a) **Indicate the frequency with which the Board of Directors, Committee of the Board or CEO to assess the BR performance of the Company. Within 3 months, 3-6 months, Annually, More than 1 year:** Annually
- (b) **Does the Company publish a BR or a Sustainability Report? What is the hyperlink for viewing this report? How frequently it is published? Yes, the company publishes a BR report annually. Web link:** <http://www.divislab.com/inside/pdf/Sustainability%20Report%202015.pdf>.

Principle 1: Businesses should conduct and govern themselves with Ethics, Transparency and Accountability

1. Does the policy relating to ethics, bribery and corruption cover only the company?

Does it extend to the Group/Joint Ventures/ Suppliers/Contractors/ NGOs /Others?

It extends to all our stakeholders like suppliers, customers, employees etc. Divi's Code of Ethics and Business Conduct is adopted pursuant to Clause 49 of the Listing Agreement with Stock Exchanges to set standards of corporate governance by complying with laws, rules and regulations and to fulfill the responsibilities to stakeholders and to set and implement high standards of transparency, integrity, accountability and corporate social responsibility in all dealings. Our Company is committed to maintaining the applicable standards of ethical conduct. Every Director, every member of the Senior Management and every employee reads and understands this Code and its application to the performance of his or her responsibilities.

Our policy prohibits the receipt of gifts particularly from individuals or firms with which the company has business dealings. Employees shall neither receive nor offer or make, directly or indirectly, any legal

payments, remuneration, gifts, donations or comparable benefits that are intended or perceived to obtain uncompetitive favors of the conduct of its business.

We have procedures and reporting system to deal with violations of this Code of Ethics which will result in disciplinary action.

2. **How many stakeholder complaints have been received in the past financial year and what percentage was satisfactorily resolved by the management? If so, provide details thereof, in about 50 words or so.**

We have not received any significant complaints from stakeholders in the last financial year.

Principle 2: Businesses should provide goods and services that are safe and contribute to sustainability throughout their life cycle

1. List up to 3 of your products or services whose design has incorporated social or environmental concerns, risks and/or opportunities.
- a) lopamidol
 - b) 2,4-Thiazole methylamine
 - c) 2-Acetyl-6-methoxy naphthalene
2. For each such product, provide the following details in respect of resource use (energy, water, raw material etc.) per unit of product(optional):
- (a) Reduction during sourcing/production/ distribution achieved since the previous year throughout the value chain?
 - (b) Reduction during usage by consumers (energy, water) has been achieved since the previous year?

We constantly review our manufacturing processes aimed at optimum utilization of inputs and resources and improving the yields, which helped us in:

- o Overall yield improved significantly and this resulted in reduction of solvents
- o Eliminated usage of Chloroform and other Class 2 solvents
- o Recycling of intermediates from downstream stages
- o Wastage salts and effluent quantities reduced
- o Reagents mole ratio reduction
- o Reaction cycle times, temperatures reduced thereby savings in Energy

3. Does the company have procedures in place for sustainable sourcing (including transportation)?

(a) If yes, what percentage of your inputs was sourced sustainably? Also, provide details thereof, in about 50 words or so.

Yes, Divi's continuously puts efforts to increase sustainable sourcing of inputs. Supplier evaluation undergoes several processes by Purchase/Quality and EHS Representatives. On site audits/visits are made to review the practices followed at suppliers' site and towards this objective.

4. Has the company taken any steps to procure goods and services from local & small producers, including communities surrounding their place of work? If yes, what steps have been taken to improve their capacity and capability of local and small vendors?

Yes, Divi's procures, where available, goods and services from local and small producers. 43% of Divi's procurement is from domestic producers and 57% from international producers.

Divi has continuously put efforts to increase the procuring of goods and services by the local and small producers including surrounding communities and towards this objective, established a community based skill development centre for upgrading their skills and business growth, which helped source food and other items/services from the surrounding villages.

5. Does the company have a mechanism to recycle products and waste? If yes what is the percentage of recycling of products and waste (separately as <5%, 5-10%, >10%). Also, provide details thereof, in about 50 words or so.

Yes, we have a mechanism to recycle the process solvents and allow our wastes to recycle at authorized offsite facilities.

Divi's realized the best option of co-processing the hazardous wastes instead of incineration as the incineration process would still requires safe land fill of incinerator ash. The co-processing of hazardous substances as alternate fuel in cement industry is much beneficial option, whereby hazardous wastes are not only destroyed at higher temperature, but its inorganic content gets fixed with the clinker apart from using the energy content of the wastes.

- (a) Hazardous wastes generated as Organic/Distillation bottom residues which possess calorific value are sent to cement industry for recycle in their process kilns. Total 763 tons of organic solid wastes have been sent by the end of financial year for co-processing.
- (b) We also send acid effluent to fertilizer industry for urea preparation and alum industries for recycle.

(c) 70% of the organic/distillation bottom residues are sent to other industry for co-processing. The remaining waste being incinerated.

(d) The solvents used in the manufacturing process are recovered and re-used. >90% of the solvents are recovered & re-used by using Membrane Vapour Permeation System (MVPS) thus reducing indirect emissions to ~225 tCo₂e.

Principle 3: Businesses should promote the wellbeing of all employees

Our company promotes the well-being of all employees by providing equal opportunities and by providing facilities and a workplace environment that is safe, hygienic, humane and which upholds the dignity of the employees. We have systems and practices in place to ensure a harassment free work place where employees feel safe and secure in discharging their responsibilities. We provide access to necessary learning opportunities to our employees for up-gradation of their skills. We ensure timely payment of wages to our employees. We comply with all applicable national and state labor laws.

We encourage participation of employees through various committees. We have given due recognition to our employees by encouraging their participation in the statutory Works Committee under the Industrial Disputes Act 1947. We have set up statutory Grievance Redressal committee for the resolution of disputes arising out of individual grievances. The committee consists of equal number of members from the management and the employees. The statutory local committee for dealing with sexual harassment complaints of women employees is also in place.

Management is accessible at all points of time to redress grievances and complaints of employees as per defined procedures.

1. Please indicate the Total number of employees : 9735

2. Please indicate the Total number of employees hired on temporary/contractual/casual basis :

Total number of contract labor : 4020

3. Please indicate the Number of permanent women employees : 501

4. Please indicate the Number of permanent employees with disabilities: 19

5. Do you have an employee association that is recognized by management: We do not have any employee association or a registered trade union of workers. We recognize the statutory works committee formed with the representatives of employees and management under Section 3 of the Industrial Disputes Act, 1947.

6. What percentage of your permanent employees is members of this recognized employee association? Not applicable

7. Please indicate the Number of complaints relating to child labor, forced labor, involuntary labor, sexual harassment in the last financial year and pending, as on the end of the financial year.

No.	Category	No of complaints filed during the financial year	No of complaints pending as on end of the financial year
1.	Child labor/ forced labor/ involuntary labor	Nil	Nil
2.	Sexual harassment	Nil	Nil
3.	Discriminatory employment	Nil	Nil

8. What percentage of your under mentioned employees were given safety & skill up-gradation training in the last year?

- (a) Permanent Employees
- (b) Permanent Women Employees
- (c) Casual/Temporary/Contractual Employees
- (d) Employees with Disabilities

All the permanent employees including women employees, employees with disabilities and contract labor of manpower contractor undergo safety training once in every year.

We have five types of training namely Induction, Refresher, On-the-job, additional and special training. All new employees including contract labor are given induction training. Refresher training is conducted once in a year for every employee and contract labor on a regular basis. In addition to On-the-job training to employees for updating the job skills, additional and special training are imparted depending upon the need and requirement of the job. Development opportunities for our employees are customized as per their need and their functions. We have in-house skill enhancement training programs and externally supported skill up-gradation training programs for employees.

100% of employees are given training in health & safety, current good manufacturing practices, environmental management system and ethics.

Principle 4: Businesses should respect the interests of, and be responsive towards all stakeholders, especially those who are disadvantaged, vulnerable and marginalized.

1. Has the company mapped its internal and external stakeholders? Yes/No

Yes, we have identified the stakeholders, internal and external, who directly or indirectly influence our business operations. Our major stakeholders are as below:

- a. Employees
- b. Community & Society
- c. Investors & Shareholders
- d. Vendors, Suppliers & Distributors
- e. Government & regulators.

2. Out of the above, has the company identified the disadvantaged, vulnerable & marginalized stakeholders.

Yes. The main vulnerable stakeholders identified by us are local communities around our manufacturing sites. We have devised and implemented various welfare and development programs and livelihood and skill upgradation programs for them from time to time.

3. Are there any special initiatives taken by the company to engage with the disadvantaged, vulnerable and marginalized stakeholders. If so, provide details thereof, in about 50 words

Yes. Special initiatives are taken by the company to engage with the disadvantaged, vulnerable and marginalized stakeholders by providing books, educational material for visually challenged, scholarship and school infrastructure.

Principle 5: Businesses should respect and promote human rights

1. Does the policy of the company on human rights cover only the company or extend to the Group/Joint Ventures/Suppliers/Contractors/NGOs/Others?

Our policy on human rights extends across all the supply chain of our group including suppliers, contractors as well as the local communities and consumers.

2. **How many stakeholder complaints have been received in the past financial year and what percent was satisfactorily resolved by the management?**

We have not received any stakeholder complaints pertaining to this principle, during the financial year.

Principle 6: Business should respect, protect, and make efforts to restore the environment

1. **Does the policy related to Principle 6 cover only the company or extends to the Group/Joint Ventures/Suppliers/Contractors/NGOs/others.**

The Policy demonstrates our commitment to maintain a high standard of environmental protection, sharing of best practices, and providing a safe and healthy workplace. The policy is accessible to all our employees and interested parties and ensures the compliance. All our Indian locations are ISO 14001:2004 and OHSAS 18001:2007 certified. Our EHS Management System follows the cycle of 'Plan-Do-Check-Act'. Apart from the above, Divi's is planning to implement 'RC (Responsible Care) 14001:2015'. RC is an ETHIC-Self-imposed Management system, which in turn improves safety culture, public awareness and building of trust.

2. **Does the company have strategies/ initiatives to address global environmental issues such as climate change, global warming, etc? Y/N. If yes, please give hyperlink for webpage etc.**

Yes, Divi's Laboratories promotes and adopts 'green chemistry' processes for its products and services that consume less materials & energy, produce less waste and use less amount of harmful substances thus minimising impacts / risks.

We address the Environmental issues with the guiding principle of "Sustainable Development". We have well-equipped solvent recovery and effluent treatment plants at our facility premises for Recovery, Reuse and Recycling.

Green house gas emissions

Our main sources of greenhouse gas (GHG) emissions include direct emissions from Boiler operations, indirect emissions from electricity consumption & transportation of finished product. The stacks of incinerator, boilers and Ambient Air Quality stations are connected to the State Pollution Control Board server and the readings are displayed at the entrance of the company which is visible to everyone. There have been no deviations from the limits specified, according to the applicable norms. We follow the Central Electricity Authority

(CEA) Grid emission factors, the World Resources Institute (WRI)/ World Business Council for Sustainable Development (WBCSD) GHG Protocol, and the Inter-Governmental Panel on Climate Change (IPCC) Guidelines to track our carbon footprint.

Hydrogen:

Relocating Hydrogenation reactions to isolated area and in-house generation of Hydrogen resulted in

- o Reduction of inherent risk
- o Avoided 550,000 Valve Opening & Closings per year
- o 600,000 Nm3 of Hydrogen generated in-house
- o Eliminated handling of 90,000 cylinders per year
- o Reduced carbon footprint from indirect emissions, ~125 tCo2e

Waste Management:

We classify our waste generated as Hazardous and Non-Hazardous, according to government guidelines and such waste is segregated at source and disposed off to Government approved recyclers and vendors.

Stand-by Scrubbers & Online dosing systems are provided for Toxic Gas scrubbing systems to avoid / mitigate the unforeseen Toxic Gas leak / Emissions hazard. Globally, Open Effluent drains are eliminated by facilitating Closed (Pipeline) Effluent drains.

3. **Does the company identify and assess potential environmental risks? Y/N**

Yes, the company has Environment Management System (EMS) and HAZOP study processes, assess key environmental impacts to identify and assess potential environmental risks and implements appropriate controls to eliminate/mitigate the risks.

4. **Does the company have any project related to Clean Development Mechanism? If so, provide details thereof, in about 50 words or so. Also, if Yes, whether any environmental compliance report is filed?**

We currently do not have any Clean Development Mechanism (CDM) projects.

We devised our processes, installed equipment and periodically upgrade these, for recovery of raw materials / catalysts like Iodine, Bromine, Raney Nickel and Palladium. We also improved our processes for several products to eliminate the isolation and drying operations and modified reactors and gear boxes to reduce GHG emissions.

5. Has the company undertaken any other initiatives on – clean technology, energy efficiency, renewable energy, etc. Y/N. If yes, please give hyperlink for web page etc.

Yes, The Company utilises latest technologies and initiates its action towards Green Environment. Divi's EHS policy stresses on continuous technology and process upgradation to minimize risks and wastage by allocating resources for EHSMS. It gives utmost importance for conservation of energy with the objective of increased yields for the same quantity of inputs/energy by increasing overall system efficiency with modified techniques or achieve the same output for a reduced quantity of inputs/energy by minimizing the energy losses.

Optimum utilization of energy is achieved through energy efficient systems/equipment, energy efficient lighting and appropriate upgradation in the supporting utilities.

We also achieve water conservation by harvesting rain water, recycling process water, installing equipment and improving our processes to minimize water utilisation.

6. Are the Emissions/Waste generated by the company within the permissible limits given by CPCB/SPCB for the financial year being reported?

Yes, the emissions/waste generated by our manufacturing facilities are well within the permissible limits which is continuously ensured by effective online monitoring systems installed at several locations.

7. Number of show cause/ legal notices received from CPCB/SPCB which are pending (i.e. not resolved to satisfaction) as on end of Financial Year.

There were no show cause/ legal notices received from CPCB/SPCB in the reporting year.

Principle 7: Businesses, when engaged in influencing public and regulatory policy, should do so in a responsible manner

1. Is your company a member of any trade and chamber or association? If Yes, Name only those major ones that your business deals with:

- (a) National Safety Council
- (b) Pharmaceuticals Export Promotion Council of India
- (c) Bulk Drug Manufacturers Association

- (d) National Fire Protection Association
- (e) Swiss-Indian Chamber of Commerce
- (f) The Federation Of Telangana And Andhra Pradesh Chambers Of Commerce And Industry

2. Have you advocated/lobbied through above associations for the advancement or improvement of public good? Yes/No; if yes specify the broad areas (drop box: Governance and Administration, Economic Reforms, Inclusive Development Policies, Energy security, Water, Food Security, Sustainable Business Principles, Others)

No.

Principle 8: Businesses should support inclusive growth and equitable development

1. Does the company have specified programs/initiatives/projects in pursuit of the policy related to Principle 8? If yes details thereof.

Divi's strongly believe that Industrial Growth needs to be inclusive and contribute to the upliftment of the society around. As part of its CSR policy, the company has taken up several initiatives in this regard for the communities or villages around the manufacturing sites towards promoting rural education, women empowerment, support to differently abled, livelihood enhancement, rural development, preventive health care and safe drinking water. All our programs and initiatives have complemented and supported the development priorities of the local communities. No local community has been displaced due to our business and manufacturing operations.

2. Are the programs/projects undertaken through in-house team/ own foundation/external NGO/government structures/any other organization?

All the programs/ projects undertaken by Divi's are through in-house team. A separate department with qualified staff has been constituted for formulation, implementation and review of CSR activities.

3. Have you done any impact assessment of your initiative?

Yes. We measure the outcome of every initiative implemented for the community. The assessment helps us in the designing of new programs and initiatives to address the needs of local communities.

4. What is your company's direct contribution to community development projects - Amount in INR and the details of the projects undertaken.

The total expenditure incurred on community development initiatives during the financial year is ₹16.26 crores. The programs undertaken are as follows:

- (a) Construction of Reverse Osmosis plants
- (b) Plantation in villages and schools
- (c) Construction of toilets in schools for boys and girls and in villages
- (d) Livelihood enhancement programs for fishermen and rural community
- (e) Development of infrastructure in schools of local communities
- (f) Nutrition support programs to students of government rural schools
- (g) Livelihood enhancement programs for women
- (h) Set up skill development centre for rural women
- (i) Swach Bharat initiatives in villages

5. Have you taken steps to ensure that this community development initiative is successfully adopted by the community? Please explain in 50 words, or so.

The community development initiatives undertaken by Divi's are successfully adopted and continued by the local communities. All our CSR initiatives in community development aim at sustainability of the programs. We have adopted a collaborative and participatory approach in the formulation and implementation of community development program for ensuring continuity and sustainability. Some of our initiatives have exit strategy wherein we handover the program after operationalizing the same, to local administration for the community ownership.

Principle 9: Businesses should engage with and provide value to their customers and consumers in a responsible manner

1. What percentage of customer complaints/consumer cases are pending as on the end of financial year?

No pending complaints. The complaints are timely handled as per the internal SOP and responded to customers.

2. Does the company display product information on the product label, over and above what is mandated as per local laws? Yes/ No/N.A. /Remarks(additional information)

Yes, product information such as name and grade of the product, batch number, manufacturing date, re-test date, quantity, manufacturer name, manufacturing license number, manufacturing site address, storage and handling instructions, precautionary /hazard statements, disposal procedures etc are provided on the labels.

3. Is there any case filed by any stakeholder against the company regarding unfair trade practices, irresponsible advertising and/or anti-competitive behaviour during the last five years and pending as on the end of financial year. If so, provide details thereof, in about 50 words or so.

No

4. Did your company carry out any consumer survey/ consumer satisfaction trends?

Yes, customer feedback is taken and evaluated periodically.

MANAGEMENT DISCUSSION AND ANALYSIS

1. Industry Outlook

As per QuintilesIMS, Global spending on medicines will reach nearly \$1.5 trillion in 2021 growing at 4-7% per annum – slightly slower than the 5.9% growth over the past five years, with growth expected to be more uniform and predictable in nature. The continued growth of global medicine spending over the past decade and in the next five years will be more than double the amount spent on medicines over that fifteen year period. Over that timeframe, the drivers of medicine spending and growth have shifted from the blockbuster drugs of the late 1990's, to the volume-driven growth in pharmerging markets and the developed markets patent cliff, and over the next five years to a continued boom in innovation-driven spending growth for breakthrough immunology treatments across a range of diseases. The U.S. will continue to be the leading global market, growing at 6.9% over the past five years and expected to grow by 6-9% over the next five years.

Life sciences sector growth is closely tied to global health care expenditures which in 2017 and in successive years, are expected to be fuelled by increasing demand from ageing population and the prevalence of chronic and communicable diseases. Other potential growth drivers include improved (if uneven) economic activity in key geographies, especially developing nations in the Middle East and Asia; continuing industry consolidation and collaboration; and new business models enabled by scientific and technology advances.

North America and Europe are still the largest markets for India's pharma exports followed by other pharmerging economies. Quality and regulatory compliance and speedy delivery mechanism, along with competitive cost structure are the other important factors propelling the growth of the API contract manufacturing segment.

2. Company Overview

Divi's Laboratories Limited started off during 1990 as an R&D and consultancy company for development of commercial processes for Active Pharmaceutical Ingredients ("API") and intermediates. During 1994, the Company forayed into manufacturing operations for API and intermediates by setting up a multi-purpose manufacturing facility near Hyderabad with a modest initial investment of ₹71 crores.

Divi operates from its Headquarters and Registered Office at Hyderabad. The company now has four multi-purpose manufacturing facilities with all support infrastructure like Utilities, environment management and safety systems.

2.1 Manufacturing Facilities

Unit I:

The First facility is located at village Lingojigudem in Yadadri Bhuvanagiri District near Hyderabad (Telangana) which started

commercial operations during the year 1995, comprises 11 multi-purpose production blocks with finished product areas for APIs. Spread across 500 acres equipped with around 362 reactors totaling a capacity of 1762 m³ supported with all utilities and services; and has periodically been upgraded and modernised.

Export Oriented Unit:

This second manufacturing site is located at village Chippada, Bheemunipatnam Mandal, about 30 KM from the port city of Visakhapatnam (Andhra Pradesh) on the east coast situated on a 100-acre site. The Unit has 8 production blocks with around 232 reactors totaling a capacity of 1721 m³ with all utilities and services.

SEZ Unit:

Third facility is located at village Chippada situated on a sprawling 267-acre site which went into commercial operations during the year 2006 and is a Special Economic Zone (SEZ) Unit in Pharma Sector. The Unit has 9 production blocks with around 487 reactors totaling a capacity of 3244 m³ with all required utilities and infrastructure.

DSN SEZ Unit:

Fourth facility is located at the company's Pharma SEZ at village Chippada. The Unit has 6 production blocks with around 299 reactors totaling a capacity of 2846 m³ with all required utilities and infrastructure.

2.2 Research Centres

The company has Research Centers at Sanathnagar, Hyderabad and at the manufacturing sites. Research Centre at Sanathnagar primarily focuses on custom synthesis, contract research for MNC companies as also future generics involving processes like route design, route selection, establishing gram scale process and structural confirmation.

Research Centres at manufacturing sites work on process development and scale up from gram scale further through various stages of development, process optimization, impurity profile, pilot studies, pre-validation batches, validation of process and transfer of technology to Plant. These Centres also review improvement of processes and gives process support to the Plant from time to time.

2.3 Subsidiaries

The company has two subsidiaries M/s. Divi's Laboratories (USA) Inc., in the United States of America and M/s. Divi's Laboratories Europe AG in Switzerland for marketing its Nutra products and to provide a greater reach to customers within these regions.

3. Internal Control systems

The Company has in place adequate internal financial controls over financial reporting. It has adopted necessary policies and procedures for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, safeguarding of its assets, prevention and detection of frauds and errors, accuracy and completeness of the accounting records, and timely preparation of reliable financial information.

The Company maintains a system of well established policies and procedures for internal control of operations and activities and these are continually reviewed for effectiveness and also has adequate internal financial control processes over financial reporting. The internal control system is supported by qualified personnel and a continuous program of internal audit. The prime objective of such audits is to test the adequacy and effectiveness of all internal control systems laid down by the management and to suggest improvements.

We believe that the company's overall system of internal control is adequate given the size and nature of operations and effective implementation of internal control self assessment procedures and ensure compliance to policies, plans and statutory requirements.

Divi encourages and recognizes improvements in work practices. The company's internal control system and the internal financial control processes are reviewed by the Audit Committee periodically. The Management duly considers and takes appropriate action on the

recommendations made by the statutory auditors, internal auditors and the Audit Committee. They assess whether the controls are properly designed, implemented and working effectively and make recommendations on how to improve internal control. During the year, such controls were tested and no reportable material weakness in the design or operation was observed.

4. Risks and Concerns

Divi lays emphasis on risk management and has an enterprise-wide approach to risk management, which lays emphasis on identifying and managing key operational and strategic risks. Through this approach, the company strives to identify opportunities that enhance organisational values while managing or mitigating risks that can adversely impact its future performance.

The Company continues its initiatives aimed at assessment and avoidance of various risks affecting its business and towards cost control and efficiency across its businesses and functions, taking appropriate measures and reviewing them from time to time. The company's risk management and control procedures involve prioritization and continuing assessment of these risks and devise appropriate controls, evaluating and reviewing the control mechanism and redesigning it from time to time in the light of its effectiveness.

Risks and Risk Mitigation

4.1 Global markets

Divi is engaged in manufacture of generic APIs, custom synthesis of active ingredients for innovator companies, other specialty chemicals and nutraceuticals. The company is very selective in its product portfolio with a focus on export markets within the domain of its capabilities. As the company has significant exposure to export markets, and hence may have impact due to changing dynamics in the supply-chain of its products in the global market.

4.2 Competition

In order to stay competitive vis-a-vis its peers in Europe and US, the company lays great stress on leveraging its inherent skills and strengths in chemistry by building strong customer relationships supported by developed cost competitive and fast delivery structure. Divi continues to work towards optimizing and upgrading its plant capacities and capabilities at its multi-purpose manufacturing facilities and also adding additional capacities aimed at increasing business opportunities.

The company lays emphasis on the three leverages it has in order to counter competition from its peers in Europe and US:

- o Being able to develop processes in the R&D using skilled scientists and professionals at competitive cost and speed of delivery
- o Creation of equivalent capacity at a much lower cost
- o Operating the infrastructure at competitive cost.

4.3 Regulatory Compliances

The company devotes significant importance to the regulatory compliances as it access advanced markets like Europe and USA for a major part of its business. Risks relating to regulatory compliances to such markets are inherent to the company's business. Divi has put in place appropriate systems, processes, operations and procedures to monitor and ensure consistent practice for compliance. The chemists and staff are periodically retrained so that they are fully aware of the latest quality testing procedures and norms. Divi has invested in extensive training to incorporate the cGMP into its operating systems. The company constantly reviews its policies and procedures to adhere conformity of the various global regulatory approvals for its manufacturing facilities.

4.4 Patent compliance

The company manufactures either patent-expired generics or undertakes custom synthesis of compounds for the innovator MNC companies. Divi continually reviews patent compliance in its process development of active ingredients and has a monitoring mechanism to validate non-infringement of the processes developed.

4.5 Employee Relations

To ensure sustained growth of the organization while augmenting our manpower, we put in place appropriate and continuing training skills in their functional areas. Employee relations are affable and harmonious with all round contribution and participation in the growth.

4.6 Financial Risks

With predominance of its exports, the company is exposed to financial risks comprising of risks relating to markets, credit, liquidity as well as foreign exchange and addresses them appropriately to mitigate or minimize these risks. Given the instability in the global, political and economic environment and the consequent volatility of foreign exchange, and events outside the control or horizon of Indian companies, it is becoming very difficult to accurately predict currency movements. In the long run, it appears the best way to manage currency fluctuations is to have a better geographic balance in revenue mix is factoring its competitive positioning, and to ensure a foreign currency match between liabilities and earnings.

Under the circumstances, currency actions by companies should be decided based on what is right from a competitiveness perspective, rather than from a treasury perspective. In any event, with the volatility, the company's approach is based more on minimizing risk rather than maximizing profits. The company is very cautious towards hedging as it has a cost as well as its own risks. The company continually reassesses the cost structure impacts of the currency volatility and engages with customers addressing such risks.

4.7 Insurance

The company's current and fixed assets as well as products are adequately insured against various risks like transit, fire and allied risks as also product liability.

4.8 Environment, health and safety

Divi's efforts, policies and values are directed in such a way that it adheres to all applicable regulations on the environment, employee health and safety while creating value for our stakeholders. Divi continually strives to optimize the resources and upgrade its processes in order to reduce the environmental impact of its processes, products and services.

5. Regulatory Filings/Approvals

Divi has triple Certifications ISO-9001 (Quality Systems), ISO-14001 (Environment Management Systems) and OHSAS-18001 (Occupational Health and Safety systems) for its manufacturing facilities and adheres to cGMP and standard operating practices in its manufacturing/operating activities and these certifications are renewed from time to time. The company has also obtained Food Safety System Certification (FSSC) 22000 for vitamins and carotenoids in liquid and power form. All the manufacturing sites have been inspected by US-FDA, EU and other agencies.

Divi has a total of 42 drug master files (DMFs) with US-FDA and 61 EDMFs with Europe and other agencies and 21 CEPs (Certificates of Suitability) issued by EDQM authorities. Divi has filed a total of 34 patents for generic products.

6. Business distribution

Our product portfolio comprises of two broad segments i) Generic APIs (active pharma ingredients) and Nutraceuticals and ii) Custom Synthesis of APIs, intermediates and specialty ingredients for innovator pharma giants.

The Company operates predominantly in export markets and has a broad product portfolio under generics and custom synthesis. Business has been growing decently across both these segments and is broadly equal distributed. Among Divi's well distributed products range, some of the components of the business is given below:

c) External factors

The Board may take into account any external factors while considering recommending dividend, such as:

- o Political, tax or regulatory changes relating to its business or declaration of dividend
- o Any material changes relating to the operations of the company or the economic and technological environment impacting the business of the company
- o Any significant change in the competitive conditions affecting the operations of the company which might require dynamic changes in operations or making significant investments.
- o Any restrictions on payment of dividends by virtue of any regulation as may be applicable to the Company at the time of declaration of dividend.

**d) Expectations of stakeholders / various classes of shares**

The Board, while deciding recommendation of dividend, shall also factor the expectations of the stakeholders while also taking into account the needs of business and consistency of a dividend payout.

e) Utilisation of retained earnings

Profits as earned by the company may either be retained in business for future business needs as detailed under b) above or may be distributed to the shareholders.

f) Manner of payout

- o Interim dividend, if any, may be declared by the Board.
- o Recommendation, if any, shall be done by the Board, usually at the Board meeting that considers and approves the annual financial statements
- o Dividend recommended by the Board shall be approved at the annual general meeting of the Company.
- o Payment of dividends shall be made within the stipulated time and in compliance with the regulations or the applicable laws.

g) Circumstances under which dividend may not be paid

The Board may in extraordinary circumstances like adverse market conditions, business uncertainty, inadequacy of profits etc., deviate from the policy parameters and may prune or not recommend dividend.

h) Multiple classes of shares

The factors, parameters and payment for dividend to different class of shares of the Company shall be similar to the policy formulated herein, and subject to the respective rights attached to each class of shares as per their terms of issue and in compliance with applicable regulations or laws.

Consolidated Accounts

As stipulated in the listing regulations and Companies Act, 2013, the consolidated financial statements have been prepared by the Company in accordance with the relevant accounting standards. The audited consolidated financial statements together with Auditors Report thereon form part of the Annual report.

Kakinada Project

Your company proposes to set up a new manufacturing facility at Kakinada in the state of Andhra Pradesh with an initial investment of ₹700 crores for augmenting capacities as also de-risking its operations; and in this regard, has approached the Government of Andhra Pradesh for allotment of suitable land. The Government has allotted 505 acres of land at Ontimamidi Village (Kona), Thondangi Mandal, East Godavari District, in the State of Andhra Pradesh and gave us advance possession of the land, pending procedural formalities. The company has spent an amount of ₹3435.22 lakhs during the year towards the cost of land and minor civil works at the site. Government has registered land of an extent of 351.72 acres in favour of the company.

While we started the preliminary procedures for securing the land and applications for permissions for setting up the facility, several farmers/earlier owners whose land has been acquired/resumed by the Government have filed writ petitions before the Hon'ble High Court of Telangana and Andhra Pradesh contesting such acquisition/resumption or seeking additional compensation. The company hopes that the Government would resolve the legal issue with the contestants paving the way for registration of the balance land after which the company would be able to set up its manufacturing facility.

Deposits

The Company has not accepted any deposits from public covered by provisions of Section 73 of the Companies Act, 2013.

Loans, Guarantees or Investments

During the year, the company has not given any loans or guarantees covered under the provisions of section 186 of the Companies Act, 2013.

The details of investments made by company are given in the notes to the financial statements.

STANDALONE FINANCIAL STATEMENTS

INDEPENDENT AUDITORS' REPORT

To
The Members of
DIVI'S LABORATORIES LIMITED

Report on the Standalone Ind AS Financial Statements

We have audited the accompanying standalone Ind AS financial statements of **DIVI'S LABORATORIES LIMITED** ("the Company"), which comprise the Balance Sheet as at 31st March, 2017, and the Statement of Profit and Loss (including Other Comprehensive Income), the Cash Flow Statement and the Statement of Changes in Equity for the year then ended, and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Standalone Ind AS Financial Statements

The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these standalone Ind AS financial statements that give a true and fair view of the state of affairs (financial position), profit or loss (financial performance including other comprehensive income), cash flows and changes in equity of the Company in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards (Ind AS) prescribed under Section 133 of the Act.

This responsibility also includes maintenance of adequate accounting records in accordance with provisions of the Act for safeguarding the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the standalone Ind AS financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these standalone Ind AS financial statements based on our audit.

We have taken into account the provisions of the Act, the accounting and auditing standards and matters which are required to be included in the audit report under the provisions of the Act and the Rules made thereunder.

We conducted our audit of the Standalone Ind AS financial statements in accordance with the Standards on Auditing specified under Section 143(10) of the Act. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the Standalone Ind AS financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and the disclosures in the standalone Ind AS financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the Standalone Ind AS financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal financial control relevant to the Company's preparation of the Standalone Ind AS financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of the accounting estimates made by the Company's Directors, as well as evaluating the overall presentation of the Standalone Ind AS financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Standalone Ind AS financial statements.

Opinion

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid standalone Ind AS financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India including the Ind AS, of the state of affairs (financial position) of the Company as at 31st March, 2017, and its profit (financial performance including other comprehensive income), its cash flows and the changes in equity for the year ended on that date.

Report on Other Legal and Regulatory Requirements

- As required by the Companies (Auditor's Report) Order, 2016 ("the Order"), issued by the Central Government of India in terms of Section 143(11) of the Act, we give in "Annexure A", a statement on the matters specified in paragraphs 3 and 4 of the Order.

2. As required by Section 143(3) of the Act, we report that:

- (a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purpose of our audit.
- (b) In our opinion proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books.
- (c) The Balance Sheet, the Statement of Profit and Loss, the Cash Flow Statement and Statement of Changes in Equity dealt with by this Report are in agreement with the books of account.
- (d) In our opinion, the aforesaid standalone Ind AS financial statements comply with the Indian Accounting Standards prescribed under Section 133 of the Act.
- (e) On the basis of written representations received from the directors as on 31st March, 2017 taken on record by the Board of Directors, none of the directors is disqualified as on 31st March, 2017 from being appointed as a director in terms of Section 164(2) of the Act.
- (f) With respect to the adequacy of the internal financial controls over financial reporting of the Company and the operating effectiveness of such controls, refer to our separate report in "Annexure B".
- (g) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us:

- i. The Company has disclosed the impact of pending litigations on its financial position in its standalone Ind AS financial statements – Refer Note No.43 to the financial statements;
- ii. The Company did not have any long-term contracts with material foreseeable losses and did not have any long-term derivative contracts as at 31st March, 2017;
- iii. There has been no delay in transferring amounts, required to be transferred, to the Investor Education and Protection Fund by the Company during the year ended 31st March, 2017.
- iv. ANNEXURE A TO INDEPENDENT AUDITORS' REPORT

Referred to in Paragraph 1 under the heading of 'Report on Other Legal and Regulatory Requirements' of our report of even date

- 1 (a) The company has maintained proper records showing full particulars, including quantitative details and situation of Fixed Assets.
- (b) The fixed assets have been physically verified by the management according to the phased programme designed to cover all the fixed assets on rotation basis. In respect of fixed assets verified according to this programme, which is considered reasonable, no material discrepancies were noticed on such verification.
- (c) According to the information and explanations given to us and on the basis of our examination of the records of the Company, the title deeds of immovable properties are held in the name of the Company.
- 2 The inventories of the company have been physically verified by the Management during the year at reasonable intervals except stocks lying with others which have been verified with reference to confirmations, certificates and other relevant documents where available. The discrepancies noticed on physical verification of stocks as compared to book records, which in our opinion were not material, have been properly dealt with in the books of account.
- 3 The Company has not granted any loans, secured or unsecured, to companies, firms, limited liability partnerships or other parties covered in the register maintained under Section 189 of the Companies Act, 2013 ("the Act"). Therefore, the provisions of Clause 3(iii), (iii)(a), (iii)(b) and (iii)(c) of the Order are not applicable to the Company.
- 4 The Company has not granted any loans or made any investments, or provided any guarantees or security to the parties covered under Section 185 and 186 of the Act. Therefore, the provisions of Clause 3(iv) of the Order are not applicable to the Company.
- 5 The Company has not accepted any deposits from the public within the meaning of Sections 73, 74, 75 and 76 of the Act and the rules framed there under to the extent notified.
- 6 We have broadly reviewed the books of account maintained by the company in respect of products where, pursuant to the Rules made by the Central Government of India, the maintenance of cost records has been prescribed under Sub-section (1) of Section 148 of the Act and are of the opinion that prima facie, the prescribed accounts and records have been maintained and are being made up. We have not, however, made a detailed examination of the records with a view to determine whether they are accurate or complete.
- 7 (a) According to the records of the Company and as per the information and explanations given to us, the company is generally regular in depositing undisputed statutory dues including provident fund, employees state insurance, income tax, sales tax, service tax, duty of customs, duty of excise, value added tax, cess and any other statutory dues applicable to it with appropriate authorities. In respect of these statutory dues, there are no outstanding dues as on 31.03.2017 which are outstanding for a period of more than six months from the date they became payable.
- (b) According to the records of the Company and as per the information and explanations given to us, there are no dues of sales tax or value added tax which has not been deposited on account of dispute as on 31.03.2017, except income tax, service tax, duty of customs and duty of excise the details of which are as given below:

ANNEXURE B TO INDEPENDENT AUDITORS' REPORT

Referred to in Paragraph 2(f) under the heading of 'Report on Other Legal and Regulatory Requirements' of our report of even date

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of DIVI'S LABORATORIES LIMITED ("the Company") as of 31st March, 2017 in conjunction with our audit of the standalone Ind AS financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31st March, 2017, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India

NOTES TO STANDALONE FINANCIAL STATEMENTS

for the year ended 31st March, 2017

1. Background:

- 1.1** Divi's Laboratories Limited (Divi's), (the 'company') is a company limited by shares, incorporated and domiciled in India. The company is engaged in the manufacture of Active Pharmaceutical ingredients (API's) and Intermediates with predominance of exports. Divi's, through its Custom synthesis business, supports innovator pharma companies for their patented products business from gram scale requirements for clinical trials to launch as well as late life cycle management.
- 1.2** The Financial statements are approved for issue by the Company's Board of Directors on May 26, 2017.

2. Significant Accounting Policies

This note provides a list of the significant accounting policies adopted in the preparation of these financial statements. These policies have been consistently applied to all the years presented, unless otherwise stated.

2.1 Basis of Preparation:

(i) Compliance with Ind AS

The financial statements comply in all material aspects with Indian Accounting Standards (Ind AS) notified under section 133 of the Companies Act, 2013 (the Act), Companies (Indian Accounting Standards) Rules, 2015 and other relevant provisions of the Act.

The financial statements up to the year ended 31 March 2016 were prepared in accordance with the accounting standards notified under the Companies (Accounting Standards) Rules, 2006 (as amended) and other relevant provisions of the Act.

These financial statements are the first financial statements of the Company under Ind AS. Refer note 46 for an explanation on how the transition from previous GAAP to Ind AS has affected the Company's financial position, financial performance and cash flows. Financial statements are presented in Indian rupees rounded off to the nearest lakh.

(ii) Historical cost convention

The financial statements have been prepared on a historical cost basis, except for the following:

- o Certain financial assets and liabilities that are measured at fair value; (refer accounting policy regarding financial instruments)
- o Defined benefit plans – plan assets measured at fair value

(iii) Current and non-current classification

An asset is classified as current if:

- (i) It is expected to be realized or sold or consumed in the Company's normal operating cycle;
- (ii) It is held primarily for the purpose of trading;
- (iii) It is expected to be realized within twelve months after the reporting period; or
- (iv) It is cash or a cash equivalent unless it is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

A liability is classified as current if:

- (i) It is expected to be settled in normal operating cycle;
- (ii) It is held primarily for the purpose of trading;
- (iii) It is expected to be settled within twelve months after the reporting period;
- (iv) It has no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

All other liabilities are classified as non-current.

The operating cycle is the time between acquisition of assets for processing and their realization in cash and cash equivalents. Based on the nature of products and time between acquisition of assets for processing and their realization in cash and cash equivalents, the Company has ascertained its operating cycle as 12 months for the purpose of current/non-current classification of assets and liabilities.

2.2 Segment Reporting:

Operating segments are reported in a manner consistent with the internal reporting provided to the Chief Operating Decision Maker. The Chairman and Managing Director has been identified as being the Chief Operating Decision Maker. Refer Note 40 for the segment information presented.

2.3 Foreign currency translation:

(i) Functional and presentation currency

Items included in the financial statements of the Company are measured using the currency of the primary economic environment in which the entity operates ('the functional currency'). The financial statements are presented in Indian rupee (₹), which is Divi's functional and presentation currency.

NOTES TO STANDALONE FINANCIAL STATEMENTS

for the year ended 31st March, 2017

(ii) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies at year end exchange rates are generally recognised in statement of profit and loss.

Non-monetary items that are measured in terms of historical cost in a foreign currency, using the exchange rate at the date of the transaction. Non-monetary items that are measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. Translation differences on assets and liabilities carried at fair value are reported as part of the fair value gain or loss. For example, translation differences on non-monetary assets and liabilities such as equity instruments held at fair value through profit or loss are recognised in statement of profit and loss as part of the fair value gain or loss and translation differences on non-monetary assets such as equity investments classified as Fair value through other comprehensive income (FVOCI) are recognised in other comprehensive income.

2.4 Revenue recognition:

Revenue is measured at the fair value of the consideration received or receivable. Amounts disclosed as revenue are inclusive of excise duty and net of returns, trade allowances, rebates, value added taxes and amounts collected on behalf of third parties.

(i) Revenue from Sale of Goods:

Revenue from sale of goods is recognised when the significant risks and rewards of ownership have been transferred to the buyer, revenue can be measured reliably, the costs incurred can be measured reliably, it is probable that the economic benefits associated to the transaction will flow to the entity and there is no continuing management involvement with the goods. Transfer of risks and rewards vary depending on the individual terms of contract of sale. Revenue from sale of goods is stated inclusive of excise duty and net of returns, trade allowances, rebates, sales tax and amounts collected on behalf of third parties.

(ii) Revenue from Sale of Services:

Revenue from Sale of services is recognised as per the terms of the contracts with customers when the related services are performed or the agreed milestones are achieved.

(iii) Dividend Income:

Dividend income on investments is accounted for when the right to receive the payment is established, which is generally when shareholders approve the dividend.

(iii) Interest Income:

For all financial instruments measured at amortised cost, interest income is recognised using the effective interest rate (EIR), which is the rate that exactly discounts the estimated future cash payments or receipts through the expected life of the financial instrument or a shorter period, where appropriate, to the net carrying amount of the financial asset. Interest income is included in Other Income in the Statement of Profit and Loss.

2.5 Income Taxes:

The income tax expense or credit for the period is the tax payable on the current period's taxable income based on the applicable income tax rate for each jurisdiction adjusted by changes in deferred tax assets and liabilities attributable to temporary differences and to unused tax losses.

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the end of the reporting period. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the end of the reporting period and are expected to apply when the related deferred income tax asset is realized or the deferred income tax liability is settled.

Deferred tax assets are recognised for all deductible temporary differences and unused tax losses only if it is probable that future taxable amounts will be available to utilize those temporary differences and losses.

Deferred tax liabilities are not recognised for temporary differences between the carrying amount and tax bases of investments in subsidiaries where the Company is able to control the timing of the reversal of the temporary differences and it is probable that the differences will not reverse in the foreseeable future.

Deferred tax assets are not recognised for temporary differences between the carrying amount and tax bases of investments in

NOTES TO STANDALONE FINANCIAL STATEMENTS

for the year ended 31st March, 2017

subsidiaries where it is not probable that the differences will reverse in the foreseeable future and taxable profit will not be available against which the temporary difference can be utilized.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and liabilities and when the deferred tax balances relate to the same taxation authority. Current tax assets and tax liabilities are offset where the entity has a legally enforceable right to offset and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

Current and deferred tax is recognised in profit or loss, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case, the tax is also recognised in other comprehensive income or directly in equity, respectively.

For operations carried out in Special Economic Zones which are entitled to tax holiday under the Income tax Act, 1961 no deferred tax is recognised in respect of timing differences which reverse during the tax holiday period, to the extent company's gross total income is subject to the deduction during the tax holiday period. Deferred tax in respect of timing differences which reverse after the tax holiday period is recognised in the year in which timing differences originate.

Deferred Tax Assets include Minimum Alternative Tax (MAT) paid in accordance with the tax laws in India, which is likely to give future economic benefits in the form of availability of set off against future income tax liability. Accordingly, MAT is recognized as deferred tax asset in the Balance sheet when the asset can be measured reliably and it is probable that the future economic benefit associated with the asset will be realized.

2.6 Impairment:

Assets are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs of disposal and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash inflows which are largely independent of the cash inflows from other assets or groups of assets (cash-generating units). Non-financial assets other than goodwill that suffered an impairment are reviewed for possible reversal of the impairment at the end of each reporting period.

2.7 Cash and cash equivalents:

For the purpose of presentation in the statement of cash flows, cash and cash equivalents includes cash on hand, deposits held at call with

financial institutions, other short-term, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value, and bank overdrafts. Bank overdrafts are shown within borrowings in current liabilities in the balance sheet.

2.8 Trade receivables:

Trade receivables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method, less provision for impairment.

2.9 Inventories:

Raw materials and stores, work-in-progress, traded and finished goods are stated at the lower of cost, calculated on weighted average basis, and net realizable value. Cost of raw materials and stores comprise of cost of purchase. Cost of work-in-progress and finished goods comprises direct materials, direct labour and an appropriate proportion of variable and fixed overhead expenditure, the latter being allocated on the basis of normal operating capacity. Cost of inventories also include all other cost incurred in bringing the inventories to their present location and condition. Costs of purchased inventory are determined after deducting rebates and discounts. Net realizable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale. Items held for use in the production of inventory are not written below cost if the finished product in which these will be incorporated are expected to be sold at or above cost.

2.10 Investments and other financial assets:

(i) Classification:

The Company classifies its financial assets in the following measurement categories:

- o Those to be measured subsequently at fair value (either through other comprehensive income, or through profit or loss), and
- o Those measured at amortised cost.

The classification depends on the entity's business model for managing the financial assets and the contractual terms of the cash flows.

For assets measured at fair value, gains and losses will either be recorded in profit or loss or other comprehensive income. For investments in debt instruments, this will depend on

NOTES TO STANDALONE FINANCIAL STATEMENTS

for the year ended 31st March, 2017

the business model in which the investment is held. For investments in equity instruments, this will depend on whether the Company has made an irrevocable election at the time of initial recognition to account for the equity investment at fair value through other comprehensive income. The Company reclassifies debt investments when and only when its business model for managing those assets changes.

(ii) Measurement

At initial recognition, the Company measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at fair value through profit or loss are expensed in profit or loss.

Debt instruments

Subsequent measurement of debt instruments depends on the Company's business model for managing the asset and the cash flow characteristics of the asset. There are three measurement categories into which the Company classifies its debt instruments:

Amortised cost: Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortised cost. A gain or loss on a debt investment that is subsequently measured at amortised cost and is not part of a hedging relationship is recognised in profit or loss when the asset is derecognised or impaired. Interest income from these financial assets is included in Other income using the effective interest rate method.

Fair value through other comprehensive income (FVOCI): Assets that are held for collection of contractual cash flows and for selling the financial assets, where the assets' cash flows represent solely payments of principal and interest, are measured at FVOCI. Movements in the carrying amount are taken through OCI, except for the recognition of impairment gains or losses, interest revenue and foreign exchange gains and losses which are recognised in profit and loss. When the financial asset is derecognised, the cumulative gain or loss previously recognised in OCI is reclassified from equity to profit or loss and recognised in other gains/(losses). Interest income from these financial assets is included in other income using the effective interest rate method.

Fair value through profit or loss: Assets that do not meet the criteria for amortised cost or FVOCI are measured at fair value through profit or loss. A gain or loss on a debt investment that

is subsequently measured at fair value through profit or loss and is not part of a hedging relationship is recognised in profit or loss and presented net in the statement of profit and loss within other gains/(losses) in the period in which it arises. Interest income from these financial assets is included in other income.

Equity instruments

The Company subsequently measures all equity investments at fair value. Where the Company's management has elected to present fair value gains and losses on equity investments in other comprehensive income, there is no subsequent reclassification of fair value gains and losses to profit or loss. Dividends from such investments are recognised in profit or loss as other income when the Company's right to receive payments is established.

Changes in the fair value of financial assets at fair value through profit or loss are recognised in other income in the statement of profit and loss. Impairment losses (and reversal of impairment losses) on equity investments measured at fair value are not reported separately from other changes in fair value.

(iii) Impairment of financial assets

The Company assesses on a forward looking basis the expected credit losses associated with its assets carried at amortised cost and FVOCI debt instruments. The impairment methodology applied depends on whether there has been a significant increase in credit risk. Note 38 details how the Company determines whether there has been a significant increase in credit risk.

For trade receivables only, the Company applies the simplified approach permitted by Ind AS 109 Financial Instruments, which requires expected lifetime losses to be recognised from initial recognition of the receivables.

(iv) Derecognition of financial assets

A financial asset is derecognized only when

- The Company has transferred the rights to receive cash flow from the financial asset or
- retains the contractual rights to receive the cash flows of the financial assets, but assumes a contractual obligation to pay cash flows to one or more recipients.

Where the entity has transferred an asset, the Company evaluates whether it has transferred substantially all risks and rewards of ownership of the financial asset. In such cases,

NOTES TO STANDALONE FINANCIAL STATEMENTS

for the year ended 31st March, 2017

the financial asset is derecognized. Where the entity has not transferred substantially all risks and rewards of ownership of the financial asset is not derecognized.

Where the entity has neither transferred a financial asset nor retains substantially all risks and rewards of ownership of the financial asset, the financial asset is derecognised if the Company has not retained control of the financial asset. Where the Company retains control of the financial asset, the asset is continued to be recognised to the extent of continuing involvement in the financial asset.

2.11 Offsetting financial instruments:

Financial assets and liabilities are offset and the net amount is reported in the balance sheet where there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis or realize the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the Company or the counterparty.

2.12 Property, Plant & Equipment:

Freehold land is carried at historical cost. All other items of property, plant and equipment are stated at historical cost less depreciation. Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of any component accounted for as separate asset is derecognized when replaced. All other repairs and maintenance are charged to profit or loss during the reporting period in which they are incurred.

Capital work-in-progress includes cost of property, plant and equipment under installation/under development as at the balance sheet date.

(i) Transition to Ind AS

On transition to Ind AS, the Company has elected to continue with the carrying value of all its property, plant and equipment recognized as at 1st April 2015 measured as per the previous GAAP and use that carrying value as the deemed cost of the property, plant and equipment.

(ii) Depreciation methods, estimated useful lives and residual value

Depreciation on fixed assets is provided on straight-line basis at the rates arrived at based on the useful lives prescribed in Schedule II of the Companies Act, 2013. The company follows the policy of charging depreciation on pro-rata basis on the assets acquired or disposed off during the year.

The residual values are not more than 5% of the original cost of the asset. The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at the end of each reporting period. An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

Gains and losses on disposal are determined by comparing proceeds with carrying amount. These are included in profit or loss within other income.

2.13 Intangible Assets:

(i) Computer software

Costs associated with maintaining software programmes are recognised as an expense as incurred. Development costs that are directly attributable to the design and testing of identifiable and unique software products controlled by the Company are recognised as intangible assets when the following criteria are met:

- o it is technically feasible to complete the software so that it will be available for use
- o management intends to complete the software and use or sell it
- o there is an ability to use or sell the software
- o it can be demonstrated how the software will generate probable future economic benefits
- o adequate technical, financial and other resources to complete the development and to use or sell the software are available and;
- o the expenditure attributable to the software during its development can be reliably measured

(ii) Amortization methods and periods

The Company amortizes intangible assets over a period of 3 years based on their estimated useful lives.

NOTES TO STANDALONE FINANCIAL STATEMENTS

for the year ended 31st March, 2017

(iii) Transition to Ind AS

On transition to Ind AS, the Company has elected to continue with the carrying value of all of intangible assets recognized as at 1st April 2015 measured as per the previous GAAP and use that carrying value as the deemed cost of intangible assets.

2.14 Trade and Other Payables:

These amounts represent liabilities for goods and services provided to the company prior to the end of financial year which are unpaid. Trade and other payables are presented as current liabilities unless payment is not due within 12 months after the reporting period. They are recognized initially at their fair value and subsequently measured at amortized cost using the effective interest method.

2.15 Borrowings:

Borrowings are initially recognized at fair value, net of transaction cost incurred. Borrowings are subsequently measured at amortized cost. Any difference between the proceeds (net of transaction costs) and the redemption amount is recognized in profit or loss over the period of the borrowings using the effective interest method. Fees paid on the establishment of loan facilities are recognized as transaction costs of the loan to the extent that it is probable that some or all of the facility will be drawn down. In this case, the fee is deferred until the draw down occurs. To the extent there is no evidence that it is probable that some or all the facility will be drawn down, the fee is capitalized as a prepayment for liquidity services and amortized over the period of the facility to which it relates.

Borrowings are classified as current liabilities unless the Company has an unconditional right to defer settlement of the liability for at least 12 months after the reporting period. Where there is a breach of a material provision of a long-term loan arrangement on or before the end of the reporting period with the effect that the liability becomes payable on demand on the reporting date, the entity does not classify the liability as current, if the lender agreed, after the reporting period and before the approval of financial statements for issue, not to demand payment as consequence of the breach.

2.16 Borrowing Cost:

General and specific borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalized during the period of time that is required to complete and prepare the asset for its intended use or sale. Qualifying assets are assets that necessarily take a substantial period of time to get ready for their intended use or sale.

Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing cost eligible for capitalization. Other borrowings costs are expensed in the period in which they are incurred.

2.17 Provisions:

Provisions are measured at the present value of management's best estimate of the expenditure required to settle the present obligation at the end of the reporting period. The discount rate used to determine the present value is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The increase in the provisions due to the passage of time is recognized as interest expense. Provision for litigation related obligation represents liabilities that are expected to materialize in respect of matters in appeal.

2.18 Employee benefits:

(i) Short-term obligations

Liabilities for wages and salaries, bonus, ex-gratia etc. that are expected to be settled wholly within 12 months after the end of the period in which the employees render the related service are recognized in respect of employees' services up to the end of the reporting period and are measured at the amounts expected to be paid when the liabilities are settled. The liabilities are presented as current employee benefit obligations in the balance sheet.

(ii) Other long-term employee benefit obligations

The liabilities for earned leave are not expected to be settled wholly within 12 months after the end of the period in which the employees render the related service. They are therefore measured as the present value of expected future payments to be made in respect of services provided by employees up to the end of the reporting period using the projected unit credit method. The benefit are discounted using the market yields at the end of the reporting period that have terms approximating to the terms of the related obligations. Remeasurements as a result of the experience adjustments and changes in actuarial assumptions are recognized in profit or loss.

The obligations are presented as current liabilities in the balance sheet if the entity does not have an unconditional right to defer settlement for at least twelve months after the reporting period, regardless of when the actual settlement is expected to occur.

NOTES TO STANDALONE FINANCIAL STATEMENTS

for the year ended 31st March, 2017

(iii) Post-employment obligations

The Company operates the following post-employment schemes:

- (a) Defined benefit plans such as gratuity and;
- (b) Defined contribution plans such as provident fund.

(a) Defined benefit plans-Gratuity obligations

The liability or assets recognized in the balance sheet in respect of defined benefit gratuity plans is the present value of the defined benefit obligations at the end of the reporting period less the fair value of plan assets. The defined benefit obligation is calculated annually by actuaries using the projected unit credit method.

The present value of the defined benefit obligation denominated in INR is determined by discounting the estimated future cash outflows by reference to market yields at the end of the reporting period on government bonds that have terms approximating to the terms of the related obligation. The benefits which are denominated in currency other than INR, the cash flows are discounted using market yields determined by reference to high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms approximating to the terms of the related obligation.

The net interest cost is calculated by applying the discount rate to the net balance of the defined benefit obligation and the fair value of plan assets. This cost is included in employee benefit expense in the statement of profit and loss.

Remeasurement gains and losses arising from experience adjustments and change in actuarial assumptions are recognized in the period in which they occur, directly in other comprehensive income. They are included in retained earnings in the statement of changes in equity and in the balance sheet.

Changes in the present value of the defined benefit obligation resulting from plan amendments or curtailments are recognized immediately in profit or loss as past service cost.

(b) Defined contribution plans

The Company pays provident fund contributions to publicly administered funds as per local regulations. The Company has no further payment obligations once the contributions have been paid. The contributions are accounted for as defined contribution plans and the

contributions are recognized as employee benefit expense when they are due.

2.19 Dividends:

Provision is made for the amount of any dividend declared, being appropriately authorized and no longer at the discretion of the entity, on or before the end of the reporting period but not distributed at the end of the reporting period. Proposed dividend is recognised as a liability in the period in which it is declared by the Company, usually when approved by shareholders in a general meeting or paid.

2.20 Contribution to equity:

Equity shares are classified as equity. Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction, net of tax, from the proceeds.

2.21 Earnings per share:

(i) Basic earnings per share

Basic earnings per share is calculated by dividing:

- o The profit attributable to owners of the Company
- o By the weighted average number of equity shares outstanding during the financial year, adjusted for bonus elements in equity shares issued during the year.

(ii) Diluted earnings per share

Diluted earnings per share adjusts the figures used in the determination of basic earnings per share to take into account:

- o The after 'income-tax' effect of interest and other financing costs associated with dilutive potential equity shares, and
- o The weighted average number of additional equity shares that would have been outstanding assuming the conversion of all dilutive potential equity shares.

2.22 Excise duty:

Excise duty collected on sales is included in Gross Sales. Excise duty paid/payable on sales is shown as an item of expense. Value of closing stock of finished goods include excise duty paid/payable on such stocks wherever applicable.

2.23 Leases:

At the inception of a lease, the lease arrangements is classified as either a finance lease or an operating lease, based on the substance of the lease arrangement.

NOTES TO STANDALONE FINANCIAL STATEMENTS

for the year ended 31st March, 2017

As a Lessee:

Leases of property, plant and equipment where the Company, as lessee, has substantially all the risks and rewards of ownership are classified as finance leases. Finance leases are capitalised at the lease's inception at the fair value of the leased property or, if lower, the present value of minimum lease payments. The corresponding rental obligations, net of finance charges, are included in borrowing or other financial liabilities as appropriate. Each lease payment is allocated between the liability and finance cost. The finance cost is charged to profit or loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period.

Leases in which a significant portion of the risks and rewards of ownership are not transferred to the Company as lessee are classified as operating leases. Payments made under operating leases (net of any incentives received from lessor) are charged to profit or loss on straight-line basis over the period of the lease unless the payments are structured to increase in line with expected general inflation to compensate for the lessor's expected inflationary cost increases.

As a Lessor:

Lease income from operating leases where the Company is a lessor is recognised in other income on straight-line basis over the lease term unless the receipts are structured to increase in line with expected general inflation to compensate for the expected inflationary cost increases. The respective leased assets are included in the balance sheet based on their nature.

Deposits provided to Lessor:

The Company is generally required to pay refundable security deposits in order to obtain property leases from various lessors. Such security deposits are financial assets and are recorded at fair value on initial recognition. The difference between the initial fair value and the refundable amount of deposit is recognised as lease prepayments. The initial fair value is estimated as the present value of the refundable amount of security deposit, discounted using the market interest rates for similar instruments.

Subsequent to initial recognition, the security deposit is measured at amortised cost using the effective interest method with carrying amount increased over the lease period up to the refundable amount. The amount of increase in the carrying amount of deposit is recognised as interest income. The lease repayment is amortised on straight-line basis over the lease term as lease rentals expense.

2.24 Research and Development:

Revenue expenditure on research and development is expensed in the period in which it is incurred. Capital expenditure on research and development is shown as addition to fixed assets.

2.25 Contingent Liability & Commitments:

Contingent liability is disclosed in the case of:

- o a present obligation arising from past events, when it is not probable that an outflow of resources will be required to settle the obligation;
- o a present obligation arising from past events, when no reliable estimate possible;
- o a possible obligation arising from past events, unless the probability of outflow of resources is remote.

Commitments include the amount of purchase order (net of advances) issued to parties for completion of assets.

2.26 Critical estimates and Judgements:

The preparation of financial statements requires the use of accounting estimates which, by definition, will seldom equal the actual results. Management also needs to exercise judgement in applying the Company's accounting policies.

This note provides an overview of the areas that involved a higher degree of judgement or complexity, and of items which are more likely to be materially adjusted due to estimates and assumptions turning out to be different than those originally assessed. Detailed information about each of these estimates and judgements is included in relevant notes together with information about the basis of calculation for each affected line item in the financial statements.

The areas involving critical estimates or judgements are:

- (i) Estimation of current tax expense and payable
- (ii) Estimation of defined benefit obligations
- (iii) Allowance for uncollected accounts receivable and advances-Trade receivables do not carry any interest and are stated at their nominal value as reduced by appropriate allowances for estimated irrevocable amounts. Individual trade receivables are written off when management deems them not to be collectible. Impairment is made on the expected credit losses, which are the present value of the cash shortfall over the expected life of the financial assets.

Estimates and judgements are continually evaluated. They are based on historical experience and other factors, including expectations of future events that may have a financial impact on the Company and that are believed to be reasonable under the circumstances.

(i) Post-employment obligations- Gratuity

The company provides for gratuity for employees in India as per the payment of Gratuity Act, 1972. Employees who are in continuous service for a period of 5 years are eligible for gratuity. The amount of gratuity payable on retirement/termination is the employees last drawn basic salary per month computed proportionately for 15 day's salary multiplied for the number of years of service. The gratuity plan is a funded plan and the Company makes contributions to recognized fund in India. The company does not fully fund the liability and maintains a target level of funding to be maintained over a period of time based on estimations of expected gratuity payments.

Significant estimates: Actuarial assumptions and sensitivity

The significant actuarial assumptions were as follows:

	As at 31st March, 2017	As at 31st March, 2016	As at 1st April, 2015
Discount rate	7%	8%	8%
Salary growth rate	6%	6%	4%
Attrition Rate	1% to 3% depending on age	1% to 3% depending on age	1% to 3% depending on age
Retirement Age	60years	60years	60years
Average Balance Future Services	30years	30years	31years
Mortality Table	IALM(2006-08)	IALM(2006-08)	IALM(2006-08)

Sensitivity analysis

The sensitivity of the defined benefit obligation to changes in the weighted principal assumptions is:

Particulars	31st March, 2017
Defined Benefit Obligation	1714.40
Discount rate:(% change compared to base due to sensitivity)	
Increase : +1%	1527.89
Decrease: -1%	1939.43
Salary Growth rate:(% change compared to base due to sensitivity)	
Increase : +1%	1934.51
Decrease: -1%	1522.87
Attrition rate:(% change compared to base due to sensitivity)	
Increase : +50%	1826.72
Decrease: -50%	1588.76
Mortality rate:(% change compared to base due to sensitivity)	
Increase : +10%	1715.71
Decrease: -10%	1713.13

The above sensitivity analysis are based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions, the same method (present value of the defined benefit obligation calculated with the projected unit credit method at the end of the reporting period) has been applied as when calculating the defined benefit liability recognised in the balance sheet. The methods and types of assumptions used in preparing the sensitivity analysis did not change compared to the prior period.

Defined benefit liability and employer contributions

The Company has purchased insurance policy to provide for payment of gratuity to the employees. Every year, the insurance company carries out a funding valuation based on the latest employee data provided by the Company. Any deficit in the assets arising as a result of such valuation is funded by the Company. The company considers that the contribution rate set at the last valuation date is sufficient to eliminate the deficit over the agreed period and that regular contributions, which are based on service costs will not increase significantly.

The weighted average duration of the defined benefit obligation is 20.77 years. The expected cash flows over the next years is as follows:

Particulars	Less than a year	Between 2-5 years	Between 6-10 years	Over 10 years	Total
As at 31-Mar-17					
Defined benefit obligation-gratuity	92.53	63.78	300.11	5163.52	5619.95

Risk exposure

Through its defined benefit plans, the company is exposed to a number of risks, the most significant of which are detailed below:

Interest Rate Risk: The plan exposes the Company to the risk of fall in interest rates. A fall in interest rates will result in an increase in the ultimate cost of providing the above benefit and will thus result in an increase in the value of the liability.

Salary Escalation Risk: The present value of the defined benefit plans calculated with the assumption of salary increase rate of plan participants in future. Deviation in the rate of increase of salary in future for plan participants from the rate of increase in salary used to determine the present value obligation will have a bearing on the plan's liability.

Demographic Risk: The Company has used certain mortality and attrition assumptions in valuation of the liability. The Company is exposed to the risk of actual experience turning out to be worse compared to the assumption.

Regulatory Risk: Gratuity benefits is paid in accordance with the requirements of the Payment of Gratuity Act, 1972 (as amended from time to time). There is a risk of change in regulations requiring higher gratuity payouts (eg. Increase in the maximum limit on gratuity).

Asset Liability Mismatching or Market Risk: The duration of the liability is longer compared to duration of assets, exposing the Company to market risk for volatilities/fall in interest rate.

Investment Risk: The probability and likelihood of occurrence of losses relative to the expected return on any particular investment.

Asset Volatility: The plan liabilities are calculated using a discount rate set with reference to bond yields; if plan assets under perform this yield, this will create a deficit. Most of the plan asset investments are in fixed income securities with high grades and in government securities. A portion of the fund is invested in equity securities and in alternative investments which have low correlation with equity securities. The equity securities are expected to earn a return in excess of the discount rate and contribute to the plan deficit. The company has a risk management strategy where the aggregate amount of risk exposure on a portfolio level is maintained at a fixed range. Any deviations from the range are corrected by rebalancing the portfolio. The company intends to maintain the investment mix in the continuing years.

Changes in bond yields: A decrease in bond yields will increase plan liabilities, although this will be partially off-set by an increase in the value of the plan's bond holdings.

The Company makes contribution to a scheme administered by the Life Insurance Corporation of India ('LIC') to discharge gratuity liabilities to the employees. The Company actively monitors the investment positions and ensures the same is adequately managed within an asset-liability matching (ALM) framework. The company actively monitors how the duration and the expected yield of the investments are matching the expected cash outflows arising from the employee benefit obligations. The company has not changed the processes used to manage its risks from previous periods. A large portion of assets in 2017 consists of government and corporate bonds, although the company also invests in equities, cash and mutual funds. The company believes that equities offer the best returns over the long term with an acceptable level of risk. The majority of equities are in a globally diversified portfolio of international blue chip entities, with a target of 60% equities held in India. The plan asset mix is in compliance with the requirements of the respective local regulations.

Note 37: Fair Value Hierarchy

The following table presents the fair value hierarchy of assets and liabilities:

	Level	As at 31st March, 2017	As at 31st March, 2016	As at 1st April, 2015
Financial Assets:				
a) Measured at fair value through profit or loss				
(i) Investment in mutual funds	1	163072.20	80285.16	73501.10
(ii) Investment in equity instruments in other companies	1	1.20	1.20	1.20

Fair value of the financial instruments is classified in various fair value hierarchies based on the following three levels:

Level 1: Quoted prices are (unadjusted) in active market for identical assets or liabilities.

Level 2: Inputs other than quoted prices are included within level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices). The fair value of financial instruments that are not traded in an active market is determined using valuation techniques which maximize the use of observable market data and rely as little as possible on entity-specific estimates. If significant inputs required to fair value an instrument are observable, the instrument is included in Level 2.

Level 3: Inputs for the assets or liabilities that are not based on observable market data (unobservable inputs). If one or more of the significant inputs are not based on observable market data, the instrument is included in level 3. This is the case with listed instruments where market is not liquid and for unlisted instruments.

Note 38: Financial Risk Management

The Company's activities expose it to market risk and credit risk. The Company emphasis on risk management and has an enterprise wide approach to risk management. The Company's risk management and control procedures involve prioritization and continuing assessment of these risks and devise appropriate controls, evaluating and reviewing the control mechanism.

(A) Credit Risk:

Credit risk is the risk of financial loss to the Company if a customer to a financial instrument fails to meet its contractual obligations and arises primarily from trade receivables, treasury operations etc. Credit risk of the Company is managed at the Company level. In the area of treasury operations, the Company is presently exposed to risk relating to investment in mutual funds. The Company regularly monitors such investments and all the investments in mutual funds are held with State Bank of India which is a nationalised bank, thereby minimises the risk.

The credit risk related to trade receivables is influenced mainly by the individual characteristics of each customer. The credit risk is managed by the company by establishing credit limits and continuously monitoring the credit worthiness of the customer. The Company also provides for expected credit losses based on the past experience where it believes that there is high probability of default. In general, all trade receivables greater than 180 days are reviewed and provided for by analyzing individual receivables.

Following are the Expected credit loss for trade receivables under simplified approach:

Particulars	31st March, 2017	31st March, 2016	1st April, 2015
Gross carrying amount	100164.76	96646.52	82348.24
Expected credit losses (Loss allowance provision)	122.75	34.24	45.19
Net carrying amount of trade receivables	100042.01	96612.28	82303.05

NOTES TO STANDALONE FINANCIAL STATEMENTS

as at 31st March, 2017

(All amounts in Indian ₹ Lakhs, unless otherwise stated)

Expected credit loss for trade receivables under simplified approach:

Ageing	Not due	Outstanding for < 90 days	Outstanding > 90 days & < 180 days	Outstanding for > 6 Months
Gross carrying amount of trade receivables	72340.03	23591.98	1212.08	3020.67
Expected credit losses (Loss allowance provision)	-	12.28	24.55	85.92
Net carrying amount of trade receivables	72340.03	23579.70	1187.53	2934.75

(B) Market Risk:

The Company has substantial exposure to foreign currency risk due to the significant exports made. Sales in other countries and purchases from overseas suppliers are exposed to risk associated with fluctuation in the currencies of those countries vis-a-vis the functional currency i.e. Indian rupee. The Company manages currency fluctuations by having a better geographic balance in revenue mix and ensures a foreign currency match between liabilities and earnings. The Company believes that the best hedge against foreign exchange risk is to have a good business mix. The Company is very cautious towards hedging as it has a cost as well as its own risks. The Company continually reassesses the cost structure impacts of the currency volatility and engages with customers addressing such risks.

(C) Price Risk:

(a) The company is exposed to risk from investments in mutual funds. The company has invested in quoted debt mutual funds with State Bank of India. The Company is very cautious in their investment decisions and takes a conservative approach of investing in nationalised banks with minimal risk. The table below summarises the impact of increase/(decrease) in the Net Asset Value (NAV) of these investments

(b) Sensitivity

The analysis is based on the assumption that the NAV has increased/(decreased) by 1% with all other variables held constant.

Particulars	Impact on profit after tax		
	31st March, 2017	31st March, 2016	1st April, 2015
SBI Mutual Fund-SBI-SHF-Ultra short term fund:			
Increase in NAV by 1%	1630.72	802.85	735.01
Decrease in NAV by 1%	(1630.72)	(802.85)	(735.01)

Note 39: Capital Management

The Company's financial strategy aims to provide adequate capital for its growth plans for sustained stakeholder value. The company's objective is to safeguard its ability to continue as a going concern, so that it can continue to provide returns for shareholders and benefits for other stakeholders. And depending on the financial market scenario, nature of the funding requirements and cost of such funding, the Company decides the optimum capital structure. Currently, there are no borrowings and operations are being funded through internal accruals. The Company aims at maintaining a strong capital base so as to maintain adequate supply of funds towards future growth plans as a going concern.

Note 40: Segment Information

(a) Description of segments and principal activities

The Chairman and Managing Director has been identified as being the Chief Operating Decision Maker (CODM). Operating segments are defined as components of an enterprise for which discrete financial information is available. This is evaluated regularly by the CODM, in deciding how to allocate resources and assessing the Company's performance. The Company is engaged in manufacturing and sale of Active Pharma Ingredients and Intermediates and operates in a single operating segment.

The reportable segments has been provided in the Consolidated Financial Statements of the Company and therefore no separate disclosure on segment information is given in these standalone financial statements.

Note 46: First-time adoption of Ind AS

Transition to Ind AS

These are the Company's first financial statements prepared in accordance with Ind AS.

The accounting policies set out in Note 2 have been applied in preparing the financial statements for the year ended March 31, 2017, the comparative information presented in these financial statements for the year ended March 31, 2016 and in the preparation of an opening Ind AS balance sheet at April 01, 2015 (company's date of transition). In preparing its opening Ind AS balance sheet, the Company has adjusted the amounts reported previously in financial statements prepared in accordance with the accounting standards notified under Companies (Accounting standards) Rules, 2006 (as amended) and other relevant provisions of the Act (previous GAAP or Indian GAAP). An explanation on how the transition from previous GAAP to Ind AS has effected the Company's financial position, financial performance and cash flows is set out in the following tables and notes.

A. Exemptions and exceptions availed

Set out below are the applicable Ind AS 101 optional exemptions and mandatory exceptions applied in the transition from previous GAAP to Ind AS.

A.1 Ind AS optional exemptions

A.1.1 Deemed Cost

Ind AS 101 permits a first-time adopter to elect to continue with the carrying value for all of its property, plant and equipment as recognised in the financial statements as at the date of transition to Ind AS, measured as per the previous GAAP and use that as its deemed cost as at the date of transition after making necessary adjustments for de-commissioning liabilities. This exemption can also be used for intangible assets covered by Ind AS 38 Intangible Assets. Accordingly, the Company has elected to measure all of its property, plant and equipment and intangible assets at their previous GAAP carrying value.

A.2 Ind AS mandatory exceptions

A.2.1 Estimates

An entity's estimates in accordance with Ind AS at the date of transition to Ind AS shall be consistent with the estimates made for the same date in accordance with previous GAAP (after adjustments to reflect any difference in accounting policies), unless there is objective evidence that those estimates were in error.

Ind AS estimates as at April 01, 2015 are consistent with the estimates as at the same date made in conformity with previous GAAP. The Company made estimates for following items in accordance with Ind AS at the date of transition as these were not required under previous GAAP:

- Investment in Equity instruments carried at FVPL
- Investments in debt instruments carried at FVPL and;
- Impairment of financial asset based on expected credit loss model.

A.2.2 Classification and measurement of financial asset

Ind AS 101 requires an entity to assess classification and measurement of financial assets (investments in debt instruments) on the basis of the facts and circumstances that exist on the date of transition to Ind AS.

C: Notes to first-time adoption:

Note 1: Fair valuation of investments

Under the previous GAAP, investments in equity instruments and mutual funds were classified as long term investments or current investments based on the intended holding period and realizability. Long term investments were carried at cost less provision for other than temporary decline in the value of such investments. Current investments were carried at lower of cost and fair value. Under Ind AS, these investments are required to be measured at fair value. The resulting fair value changes of these investments has been recognised in retained earnings as at the date of transition and subsequently in the profit and loss for the year ended March 31, 2016. This increased the retained earnings by ₹32.71 lakhs as at March 31, 2016 (April 01, 2015- ₹200.74 lakhs).

Note 2: Proposed dividend

Under the previous GAAP, dividends proposed by the board of directors after the balance sheet date but before the approval of the financial statements were considered as adjusting events. Accordingly, provision for proposed dividend was recognised as a liability. Under Ind AS, such dividends are recognised when the same is approved by the shareholders in the general meeting. Accordingly, the liability for proposed dividend and tax thereon of ₹ Nil as at March 31, 2016 (April 01, 2015- ₹31951.17 lakhs) included under provisions have been reversed with corresponding adjustment to retained earnings. Consequently, the total equity increased by an equivalent amount.

Note 3: Excise duty

Under the previous GAAP, revenue from sale of products was presented exclusive of excise duty. Under Ind AS, revenue from sale of goods is presented inclusive of excise duty. The excise duty paid is presented inclusive of excise duty. The excise duty paid is presented on the face of the statement of profit and loss as part of expenses. This change has resulted in an increase in total revenue and total expenses for the year ended March 31, 2016 by ₹2851.81 lakhs. There is no impact on the total equity and profit

NOTES TO STANDALONE FINANCIAL STATEMENTS

for the year ended 31st March, 2017

(All amounts in Indian ₹ Lakhs, unless otherwise stated)

Note 46: First-time adoption of Ind AS (Contd..)

Note 4: Remeasurements of post-employment benefit obligations

Under Ind AS, remeasurements i.e. Actuarial gains and losses and the return on plan assets, excluding amounts included in the net interest expense on the net defined benefit liability are recognised in other comprehensive income instead of profit or loss. Under the previous GAAP, these remeasurements were forming part of the profit or loss for the year. As a result of this change, the profit for the year ended March 31, 2016 decreased by ₹372.71 lakhs. There is no impact on the total equity as at March 31, 2016.

Note 5: Reserves and Surplus

Retained earnings as at April 01, 2015 has been adjusted consequent to the above Ind AS transition adjustments.

The Company had received a Government grant towards State Investment Subsidy in the year 1998 with an outstanding amount of ₹32.58 lakhs. These amounts have been transferred to retained earnings since the assets related to the grant have been fully depreciated as at April 01, 2015.

Note 6: Loans considered as equity contribution:

The Company had given loan to its wholly owned subsidiaries, M/s Divi's Laboratories (USA) Inc. and M/s. Divi's Laboratories Europe AG having an outstanding amount of ₹1566.71 lakhs and ₹2791.37 lakhs respectively. Since they are interest free loans, the loan has been initially measured at fair value estimated by discounting the future repayments over the tenure of the loan using a rate based on the rate the borrower would pay to an unrelated lender for a loan with similar conditions i.e. market rate.

The difference between the fair value and the loan amount is considered as a deemed investment and taken to Non current investments amounting to ₹ 736.22 lakhs. Subsequently the loan is measured at amortised cost using effective interest method.

Note 7: Deferred tax

As per Ind AS-12, the Company has recognised deferred tax asset on the indexation benefit available on free hold land as it has no plans to sell the business on a slump sale thereby increasing the retained earnings by ₹558.34 lakhs as at March 31, 2016 (April 01, 2015: ₹495.39 lakhs).

Other Deferred tax adjustments amounting to (₹327.04 lakhs) as at March 31, 2016 (April 01, 2015: (₹305.59 lakhs)) include deferred tax impact on account of differences between previous GAAP and Ind AS. The profit for the year ended i.e. March 31, 2016 increased by ₹62.56 lakhs due to the deferred tax adjustments made.

Note 8 : Other comprehensive income

Under Ind AS, all items of income and expense recognized in a period should be included in the profit or loss for the period, unless a standard requires or permits otherwise. Items of income and expense that are not recognised in profit or loss but are shown in the statement of profit or loss as 'other comprehensive income' includes remeasurements of defined benefit plans. The concept of 'other comprehensive income' did not exist under previous GAAP.

Note 9: Rental Deposits:

Under the previous GAAP, rental deposits are recorded at their transaction value. Under Ind AS, all financial assets are required to be recognised at fair value. Accordingly the company has fair valued the rental deposits. Difference between the fair value and transaction value is recognised as prepaid rent. Consequent to this change, the amount of security deposit decreased by ₹209.07 lakhs as at March 31, 2016 (April 01, 2015: ₹ Nil). The prepaid rent increased by ₹204.73 lakhs as at March 31, 2016 (April 01, 2015: ₹ Nil).

CONSOLIDATED FINANCIAL STATEMENTS

INDEPENDENT AUDITORS' REPORT

To
the Members of
DIVI'S LABORATORIES LIMITED

Report on the Consolidated Ind AS Financial Statements

We have audited the accompanying consolidated Ind AS financial statements of DIVI'S LABORATORIES LIMITED ("hereinafter referred to as the Holding Company") and its subsidiaries (collectively referred to as "the Group"); (Refer Note No.40) to the attached consolidated financial statements), which comprise of the consolidated balance sheet as at March 31, 2017, the consolidated statement of profit and loss (including other comprehensive income), the consolidated statement of cash flows and consolidated statement of changes in the equity for the year then ended, and a summary of significant accounting policies and other explanatory information prepared based on the relevant records (hereinafter referred to as "the consolidated Ind AS financial statements").

Management's Responsibility for the Consolidated Financial Statements

The Holding Company's Board of Directors is responsible for the preparation of these consolidated Ind AS financial statements in terms of the requirements of the Companies Act, 2013 (hereinafter referred to as "the Act") that give a true and fair view of the consolidated financial position, consolidated financial performance including other comprehensive income, consolidated cash flows and consolidated changes in equity of the Group in accordance with the accounting principles generally accepted in India, including the Accounting Standards (Ind AS) prescribed under Section 133 of the Act read with relevant rules issued thereunder. The respective Board of Directors of the companies included in the Group are responsible for maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Group and for preventing and detecting frauds and other irregularities; the selection and application of appropriate accounting policies; making judgements and estimates that are reasonable and prudent; and the design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the consolidated Ind AS financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error, which have been used for the purpose of preparation of the consolidated Ind AS financial statements by the Directors of the Holding Company, as aforesaid.

Auditors' Responsibility

Our responsibility is to express an opinion on these consolidated Ind AS financial statements based on our audit. While conducting the audit, we have taken into account the provisions of the Act, the accounting and auditing standards and matters which are required to be included in the audit report under the provisions of the Act and the Rules made thereunder.

We conducted our audit in accordance with the Standards on Auditing specified under Section 143(10) of the Act. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated Ind AS financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated Ind AS financial statements. The procedures selected depend on the auditors' judgement, including the assessment of the risks of material misstatement of the consolidated Ind AS financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal financial control relevant to the Holding Company's preparation of the consolidated Ind AS financial statements that give a true and fair view, in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of the accounting estimates made by the Holding Company's Board of Directors, as well as evaluating the overall presentation of the consolidated Ind AS financial statements.

We believe that the audit evidence obtained by us and the audit evidence obtained by the other auditors in terms of their reports referred to in the Other Matters paragraph below, is sufficient and appropriate to provide a basis for our audit opinion on the consolidated Ind AS financial statements.

Opinion

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid consolidated Ind AS financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India including Ind AS, of the consolidated

financial position of the Group as at March 31, 2017, and its consolidated financial performance including other comprehensive income, its consolidated cash flows and the consolidated changes in equity for the year then ended.

Other Matter

We did not audit the financial statements of two subsidiaries whose financial statements reflect total assets of ₹14670.66 lakhs and net assets of ₹3571.51 lakhs negative as at March 31, 2017, total revenue of ₹22129.63 lakhs, net profit before tax of ₹1431.35 lakhs and net cash out flows amounting to ₹182.32 lakhs for the year ended on that date, as considered in the consolidated Ind AS financial statements. These financial statements have been audited by other auditors whose reports have been furnished to us by the Management, and our opinion on the consolidated Ind AS financial statements insofar as it relates to the amounts and disclosures

included in respect of these subsidiaries and our report in terms of sub-sections (3) and (11) of Section 143 of the Act insofar as it relates to the aforesaid subsidiaries is based solely on the reports of the other auditors.

Our opinion on the consolidated Ind AS financial statements is not modified in respect of the above matter with respect to our reliance on the work done and the reports of the other auditors.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

for the year ended 31st March, 2017

1. Background:

- 1.1 Divi's Laboratories Limited (Divi's), is a company limited by shares, incorporated and domiciled in India. The group is engaged in the manufacture of Active Pharmaceutical ingredients (API's) and Intermediates. Divi's, through its Custom synthesis business, supports innovator pharma companies for their patented products business right from gram scale needs for clinical trials to launch as well as late life cycle management.
- 1.2 The Consolidated Financial statements are approved for issue by the Company's Board of Directors on May 26, 2017.

2. Significant Accounting Policies

This note provides a list of the significant accounting policies adopted in the preparation of these consolidated financial statements. These policies have been consistently applied to all the years presented, unless otherwise stated. The financial statements are for the group consisting of Divi's and its subsidiaries.

2.1 Basis of Preparation:

(i) Compliance with Ind AS

The consolidated financial statements comply in all material aspects with Indian Accounting Standards (Ind AS) notified under section 133 of the Companies Act, 2013 (the Act), Companies (Indian Accounting Standards) Rules, 2015 and other relevant provisions of the Act.

The financial statements up to year ended 31 March 2016 were prepared in accordance with the accounting standards notified under the Companies (Accounting Standards) Rules, 2006 (as amended) and other relevant provisions of the Act.

These financial statements are the first financial statements of the group under Ind AS. Refer note 45 for an explanation of how the transition from previous GAAP to Ind AS has affected the group's financial position, financial performance and cash flows. Financial statements are presented in Indian rupees rounded off to the nearest lakh.

(ii) Historical cost convention

The financial statements have been prepared on a historical cost basis, except for the following:

- o Certain financial assets and liabilities that are measured at fair value; (refer accounting policy regarding financial instruments)
- o Defined benefit plans – plan assets measured at fair value

(iii) Principles of Consolidation

o Subsidiaries

Subsidiaries are all entities over which the group has control. The group controls an entity when the group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power to direct the relevant activities of the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the group.

The group combines the financial statements of the parent and its subsidiaries line by line adding together like items of assets, liabilities, equity, income and expenses. Intercompany transactions, balances and unrealised losses are also eliminated unless the transaction provides evidence of an impairment of transferred asset. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the group.

(iii) Current and non-current classification

An asset is classified as current if:

- (i) It is expected to be realized or sold or consumed in the group's normal operating cycle;
- (ii) It is held primarily for the purpose of trading;
- (iii) It is expected to be realized within twelve months after the reporting period; or
- (iv) It is cash or a cash equivalent unless it is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

A liability is classified as current if:

- (i) It is expected to be settled in normal operating cycle;
- (ii) It is held primarily for the purpose of trading;
- (iii) It is expected to be settled within twelve months after the reporting period;
- (iv) It has no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

All other liabilities are classified as non-current.

The operating cycle is the time between acquisition of assets for processing and their realization in cash and cash equivalents. Based on the nature of products and time between acquisition of assets for processing and their realization in cash and cash equivalents, the group has ascertained its operating cycle as 12 months for the purpose of current/non-current classification of assets and liabilities.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

for the year ended 31st March, 2017

2.2 Segment Reporting:

Operating segments are reported in a manner consistent with the internal reporting provided to the Chief Operating Decision Maker. The Chairman and Managing Director has been identified as being the Chief Operating Decision Maker. Refer Note 39 for the segment information presented.

2.3 Foreign currency translation:

(i) Functional and presentation currency

Items included in the financial statements of each of the group's entities are measured using the currency of the primary economic environment in which the entity operates ('the functional currency'). The financial statements are presented in Indian rupee (₹), which is Divi's functional and presentation currency.

(ii) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies at year end exchange rates are generally recognised in statement of profit and loss.

Non-monetary items that are measured in terms of historical cost in a foreign currency, using the exchange rate at the date of the transaction. Non-monetary items that are measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. Translation differences on assets and liabilities carried at fair value are reported as part of the fair value gain or loss. For example, translation differences on non-monetary assets and liabilities such as equity instruments held at fair value through profit or loss are recognised in statement of profit and loss as part of the fair value gain or loss and translation differences on non-monetary assets such as equity investments classified as FVOCI are recognised in other comprehensive income.

The results and financial position of foreign operations that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

- o assets and liabilities are translated at the closing rate at the date of that balance sheet
- o income and expenses are translated at average exchange rates (unless this is not a reasonable approximation of the cumulative effect of the rates prevailing on the transaction dates, in which case income and expenses are translated at the dates of the transactions), and

- o All resulting exchange differences are recognised in other comprehensive income.

On consolidation, exchange differences arising from the translation of any net investment in foreign entities are recognised in other comprehensive income. When a foreign operation is sold, the associated exchange differences are reclassified to profit or loss, as part of the gain or loss on sale.

2.4 Revenue recognition:

Revenue is measured at the fair value of the consideration received or receivable. Amounts disclosed as revenue are inclusive of excise duty and net of returns, trade allowances, rebates, value added taxes and amounts collected on behalf of third parties.

(i) Revenue from Sale of Goods:

Revenue from sale of goods is recognised when the significant risks and rewards of ownership have been transferred to the buyer, revenue can be measured reliably, the costs incurred can be measured reliably, it is probable that the economic benefits associated to the transaction will flow to the entity and there is no continuing management involvement with the goods. Transfer of risks and rewards vary depending on the individual terms of contract of sale. Revenue from sale of goods is stated inclusive of excise duty and net of returns, trade allowances, rebates, sales tax and amounts collected on behalf of third parties.

(ii) Revenue from Sale of Services:

Revenue from Sale of services is recognised as per the terms of the contracts with customers when the related services are performed or the agreed milestones are achieved.

(iii) Dividend Income:

Dividend income on investments is accounted for when the right to receive the payment is established, which is generally when shareholders approve the dividend.

(iii) Interest Income:

For all financial instruments measured at amortised cost, interest income is recognised using the effective interest rate (EIR), which is the rate that exactly discounts the estimated future cash payments or receipts through the expected life of the financial instrument or a shorter period, where appropriate, to the net carrying amount of the financial asset. Interest income is included in Other Income in the Statement of Profit and Loss.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

for the year ended 31st March, 2017

2.5 Income Taxes:

The income tax expense or credit for the period is the tax payable on the current period's taxable income based on the applicable income tax rate for each jurisdiction adjusted by changes in deferred tax assets and liabilities attributable to temporary differences and to unused tax losses.

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the end of the reporting period. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the end of the reporting period and are expected to apply when the related deferred income tax asset is realized or the deferred income tax liability is settled.

Deferred tax assets are recognised for all deductible temporary differences and unused tax losses only if it is probable that future taxable amounts will be available to utilize those temporary differences and losses.

Deferred tax liabilities are not recognised for temporary differences between the carrying amount and tax bases of investments in subsidiaries where the group is able to control the timing of the reversal of the temporary differences and it is probable that the differences will not reverse in the foreseeable future.

Deferred tax assets are not recognised for temporary differences between the carrying amount and tax bases of investments in subsidiaries where it is not probable that the differences will reverse in the foreseeable future and taxable profit will not be available against which the temporary difference can be utilized.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and liabilities and when the deferred tax balances relate to the same taxation authority. Current tax assets and tax liabilities are offset where the entity has a legally enforceable right to offset and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

Current and deferred tax is recognised in profit or loss, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case, the tax is also recognised in other comprehensive income or directly in equity, respectively.

For operations carried out in Special Economic Zones which are entitled to tax holiday under the Income tax Act, 1961 no deferred tax is recognised in respect of timing differences which reverse during the tax holiday period, to the extent company's gross total income is subject to the deduction during the tax holiday period. Deferred tax in respect of timing differences which reverse after the tax holiday period is recognised in the year in which timing differences originate.

Deferred Tax Assets include Minimum Alternative Tax (MAT) paid in accordance with the tax laws in India, which is likely to give future economic benefits in the form of availability of set off against future income tax liability. Accordingly, MAT is recognized as deferred tax asset in the Balance sheet when the asset can be measured reliably and it is probable that the future economic benefit associated with the asset will be realized.

2.6 Impairment:

Assets are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs of disposal and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash inflows which are largely independent of the cash inflows from other assets or groups of assets (cash-generating units). Non-financial assets other than goodwill that suffered an impairment are reviewed for possible reversal of the impairment at the end of each reporting period.

2.7 Cash and cash equivalents:

For the purpose of presentation in the statement of cash flows, cash and cash equivalents includes cash on hand, deposits held at call with financial institutions, other short-term, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value, and bank overdrafts. Bank overdrafts are shown within borrowings in current liabilities in the balance sheet.

2.8 Trade receivables:

Trade receivables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method, less provision for impairment.

2.9 Inventories:

Raw materials and stores, work-in-progress, traded and finished goods are stated at the lower of cost, calculated on weighted average basis, and net realizable value. Cost of raw materials and stores comprise of cost of purchase. Cost of work-in-progress and finished goods

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

for the year ended 31st March, 2017

comprises direct materials, direct labour and an appropriate proportion of variable and fixed overhead expenditure, the latter being allocated on the basis of normal operating capacity. Cost of inventories also include all other cost incurred in bringing the inventories to their present location and condition. Costs of purchased inventory are determined after deducting rebates and discounts. Net realizable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale. Items held for use in the production of inventory are not written below cost if the finished product in which these will be incorporated are expected to be sold at or above cost.

2.10 Investments and other financial assets:

(i) Classification:

The group classifies its financial assets in the following measurement categories:

- o Those to be measured subsequently at fair value (either through other comprehensive income, or through profit or loss), and
- o Those measured at amortised cost.

The classification depends on the entity's business model for managing the financial assets and the contractual terms of the cash flows.

For assets measured at fair value, gains and losses will either be recorded in profit or loss or other comprehensive income. For investments in debt instruments, this will depend on the business model in which the investment is held. For investments in equity instruments, this will depend on whether the group has made an irrevocable election at the time of initial recognition to account for the equity investment at fair value through other comprehensive income. The group reclassifies debt investments when and only when its business model for managing those assets changes.

(ii) Measurement

At initial recognition, the group measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at fair value through profit or loss are expensed in profit or loss.

Debt instruments

Subsequent measurement of debt instruments depends on the group's business model for managing the asset and the cash flow

characteristics of the asset. There are three measurement categories into which the group classifies its debt instruments:

Amortised cost: Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortised cost. A gain or loss on a debt investment that is subsequently measured at amortised cost and is not part of a hedging relationship is recognised in profit or loss when the asset is derecognised or impaired. Interest income from these financial assets is included in Other income using the effective interest rate method.

Fair value through other comprehensive income (FVOCI): Assets that are held for collection of contractual cash flows and for selling the financial assets, where the assets' cash flows represent solely payments of principal and interest, are measured at fair value through other comprehensive income (FVOCI). Movements in the carrying amount are taken through OCI, except for the recognition of impairment gains or losses, interest revenue and foreign exchange gains and losses which are recognised in profit and loss. When the financial asset is derecognised, the cumulative gain or loss previously recognised in OCI is reclassified from equity to profit or loss and recognised in other gains/(losses). Interest income from these financial assets is included in other income using the effective interest rate method.

Fair value through profit or loss: Assets that do not meet the criteria for amortised cost or FVOCI are measured at fair value through profit or loss. A gain or loss on a debt investment that is subsequently measured at fair value through profit or loss and is not part of a hedging relationship is recognised in profit or loss and presented net in the statement of profit and loss within other gains/(losses) in the period in which it arises. Interest income from these financial assets is included in other income.

Equity instruments

The group subsequently measures all equity investments at fair value. Where the group's management has elected to present fair value gains and losses on equity investments in other comprehensive income, there is no subsequent reclassification of fair value gains and losses to profit or loss. Dividends from such investments are recognised in profit or loss as other income when the group's right to receive payments is established.

Changes in the fair value of financial assets at fair value through profit or loss are recognised in other income in the statement of profit and loss. Impairment losses (and reversal of impairment losses) on equity investments measured at FVOCI are not reported separately from other changes in fair value.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

for the year ended 31st March, 2017

(iii) Impairment of financial assets

The group assesses on a forward looking basis the expected credit losses associated with its assets carried at amortised cost and FVOCI debt instruments. The impairment methodology applied depends on whether there has been a significant increase in credit risk. Note 37 details how the group determines whether there has been a significant increase in credit risk.

For trade receivables only, the group applies the simplified approach permitted by Ind AS 109 Financial Instruments, which requires expected lifetime losses to be recognised from initial recognition of the receivables.

(iv) Derecognition of financial assets

A financial asset is derecognized only when

- The group has transferred the rights to receive cash flow from the financial asset or
- retains the contractual rights to receive the cash flows of the financial assets, but assumes a contractual obligation to pay cash flows to one or more recipients

Where the entity has transferred an asset, the group evaluates whether it has transferred substantially all risks and rewards of ownership of the financial asset. In such cases, the financial asset is derecognized. Where the entity has not transferred substantially all risks and rewards of ownership of the financial asset is not derecognized.

Where the entity has neither transferred a financial asset nor retains substantially all risks and rewards of ownership of the financial asset, the financial asset is derecognised if the group has not retained control of the financial asset. Where the group retains control of the financial asset, the asset is continued to be recognised to the extent of continuing involvement in the financial asset.

2.11 Offsetting financial instruments:

Financial assets and liabilities are offset and the net amount is reported in the balance sheet where there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis or realize the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the group or the counterparty.

2.12 Property, Plant & Equipment:

Freehold land is carried at historical cost. All other items of property, plant and equipment are stated at historical cost less depreciation.

Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the group and the cost of the item can be measured reliably. The carrying amount of any component accounted for as separate asset is derecognized when replaced. All other repairs and maintenance are charged to profit or loss during the reporting period in which they are incurred.

Capital work-in-progress includes cost of property, plant and equipment under installation / under development as at the balance sheet date.

(i) Transition to Ind AS

On transition to Ind AS, the group has elected to continue with the carrying value of all its property, plant and equipment recognized as at 1st April 2015 measured as per the previous GAAP and use that carrying value as the deemed cost of the property, plant and equipment.

(ii) Depreciation methods, estimated useful lives and residual value

Depreciation on fixed assets is provided on straight-line basis at the rates arrived at based on the useful lives prescribed in Schedule II of the Companies Act, 2013. The group follows the policy of charging depreciation on pro-rata basis on the assets acquired or disposed off during the year.

The residual values are not more than 5% of the original cost of the asset. The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at the end of each reporting period. An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount

Gains and losses on disposal are determined by comparing proceeds with carrying amount. These are included in profit or loss within other income

2.13 Intangible Assets:

(i) Computer software

Costs associated with maintaining software programmes are recognised as an expense as incurred. Development costs that are directly attributable to the design and testing of identifiable and unique software products controlled by the group are recognised as intangible assets when the following criteria are met:

- o it is technically feasible to complete the software so that it will be available for use

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

for the year ended 31st March, 2017

- o management intends to complete the software and use or sell it
- o there is an ability to use or sell the software
- o it can be demonstrated how the software will generate probable future economic benefits
- o adequate technical, financial and other resources to complete the development and to use or sell the software are available and;
- o the expenditure attributable to the software during its development can be reliably measured

(ii) Amortization methods and periods

The group amortizes intangible assets over a period of 3 years based on their estimated useful lives.

(iii) Transition to Ind AS

On transition to Ind AS, the group has elected to continue with the carrying value of all of intangible assets recognized as at 1st April 2015 measured as per the previous GAAP and use that carrying value as the deemed cost of intangible assets.

2.14 Trade and Other Payables:

These amounts represent liabilities for goods and services provided to the group prior to the end of financial year which are unpaid. Trade and other payables are presented as current liabilities unless payment is not due within 12 months after the reporting period. They are recognized initially at their fair value and subsequently measured at amortized cost using the effective interest method.

2.15 Borrowings:

Borrowings are initially recognized at fair value, net of transaction cost incurred. Borrowings are subsequently measured at amortized cost. Any difference between the proceeds (net of transaction costs) and the redemption amount is recognized in profit or loss over the period of the borrowings using the effective interest method. Fees paid on the establishment of loan facilities are recognized as transaction costs of the loan to the extent that it is probable that some or all of the facility will be drawn down. In this case, the fee is deferred until the draw down occurs. To the extent there is no evidence that it is probable that some or all the facility will be drawn down, the fee is capitalized as a prepayment for liquidity services and amortized over the period of the facility to which it relates.

Borrowings are classified as current liabilities unless the group has an unconditional right to defer settlement of the liability for at least 12 months after the reporting period. Where there is a breach of a material

provision of a long-term loan arrangement on or before the end of the reporting period with the effect that the liability becomes payable on demand on the reporting date, the entity does not classify the liability as current, if the lender agreed, after the reporting period and before the approval of financial statements for issue, not to demand payment as consequence of the breach.

2.16 Borrowing Cost:

General and specific borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalized during the period of time that is required to complete and prepare the asset for its intended use or sale. Qualifying assets are assets that necessarily take a substantial period of time to get ready for their intended use or sale.

Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing cost eligible for capitalization. Other borrowings costs are expensed in the period in which they are incurred.

2.17 Provisions:

Provisions are measured at the present value of management's best estimate of the expenditure required to settle the present obligation at the end of the reporting period. The discount rate used to determine the present value is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The increase in the provisions due to the passage of time is recognized as interest expense. Provision for litigation related obligation represents liabilities that are expected to materialize in respect of matters in appeal.

2.18 Employee benefits:

(i) Short-term obligations

Liabilities for wages and salaries, bonus, ex-gratia etc. that are expected to be settled wholly within 12 months after the end of the period in which the employees render the related service are recognized in respect of employees' services up to the end of the reporting period and are measured at the amounts expected to be paid when the liabilities are settled. The liabilities are presented as current employee benefit obligations in the balance sheet.

(ii) Other long-term employee benefit obligations

The liabilities for earned leave are not expected to be settled wholly within 12 months after the end of the period in which the employees render the related service. They are therefore measured as the present value of expected future payments to be made in respect of services provided by employees up to the end of the reporting period using the projected unit credit method. The benefit are discounted

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

for the year ended 31st March, 2017

using the market yields at the end of the reporting period that have terms approximating to the terms of the related obligations. Remeasurements as a result of the experience adjustments and changes in actuarial assumptions are recognized in profit or loss.

The obligations are presented as current liabilities in the balance sheet if the entity does not have an unconditional right to defer settlement for at least twelve months after the reporting period, regardless of when the actual settlement is expected to occur.

(iii) Post-employment obligations

The group operates the following post-employment schemes:

- (a) Defined benefit plans such as gratuity and;
- (b) Defined contribution plans such as provident fund.

(a) Defined benefit plans-Gratuity obligations

The liability or assets recognized in the balance sheet in respect of defined benefit gratuity plans is the present value of the defined benefit obligations at the end of the reporting period less the fair value of plan assets. The defined benefit obligation is calculated annually by actuaries using the projected unit credit method.

The present value of the defined benefit obligation denominated in INR is determined by discounting the estimated future cash outflows by reference to market yields at the end of the reporting period on government bonds that have terms approximating to the terms of the related obligation. The benefits which are denominated in currency other than INR, the cash flows are discounted using market yields determined by reference to high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms approximating to the terms of the related obligation.

The net interest cost is calculated by applying the discount rate to the net balance of the defined benefit obligation and the fair value of plan assets. This cost is included in employee benefit expense in the statement of profit and loss.

Remeasurement gains and losses arising from experience adjustments and change in actuarial assumptions are recognized in the period in which they occur, directly in other comprehensive income. They are included in retained earnings in the statement of changes in equity and in the balance sheet.

Changes in the present value of the defined benefit obligation resulting from plan amendments or curtailments are recognized immediately in profit or loss as past service cost.

(b) Defined contribution plans

The group pays provident fund contributions to publicly administered funds as per local regulations. The group has no further payment obligations once the contributions have been paid. The contributions are accounted for as defined contribution plans and the contributions are recognized as employee benefit expense when they are due.

2.19 Dividends:

Provision is made for the amount of any dividend declared, being appropriately authorized and no longer at the discretion of the entity, on or before the end of the reporting period but not distributed at the end of the reporting period. Proposed dividend is recognised as a liability in the period in which it is declared by the group, usually when approved by shareholders in a general meeting, or paid.

2.20 Contribution to equity:

Equity shares are classified as equity. Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction, net of tax, from the proceeds.

2.21 Earnings per share:

(i) Basic earnings per share

Basic earnings per share is calculated by dividing:

- o The profit attributable to owners of the group
- o By the weighted average number of equity shares outstanding during the financial year, adjusted for bonus elements in equity shares issued during the year.

(ii) Diluted earnings per share

Diluted earnings per share adjusts the figures used in the determination of basic earnings per share to take into account:

- o The after 'income-tax' effect of interest and other financing costs associated with dilutive potential equity shares, and
- o The weighted average number of additional equity shares that would have been outstanding assuming the conversion of all dilutive potential equity shares.

2.22 Excise duty:

Excise duty collected on sales is included in Gross Sales. Excise duty paid/payable on sales is shown as an item of expense. Value of closing stock of finished goods include excise duty paid/payable on such stocks wherever applicable.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

for the year ended 31st March, 2017

2.23 Leases:

At the inception of a lease, the lease arrangements is classified as either a finance lease or an operating lease, based on the substance of the lease arrangement.

As a Lessee:

Leases of property, plant and equipment where the group, as lessee, has substantially all the risks and rewards of ownership are classified as finance leases. Finance leases are capitalised at the lease's inception at the fair value of the leased property or, if lower, the present value of minimum lease payments. The corresponding rental obligations, net of finance charges, are included in borrowing or other financial liabilities as appropriate. Each lease payment is allocated between the liability and finance cost. The finance cost is charged to profit or loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period.

Leases in which a significant portion of the risks and rewards of ownership are not transferred to the group as lessee are classified as operating leases. Payments made under operating leases (net of any incentives received from lessor) are charged to profit or loss on straight-line basis over the period of the lease unless the payments are structured to increase in line with expected general inflation to compensate for the lessor's expected inflationary cost increases.

As a Lessor:

Lease income from operating leases where the group is a lessor is recognised in other income on straight-line basis over the lease term unless the receipts are structured to increase in line with expected general inflation to compensate for the expected inflationary cost increases. The respective leased assets are included in the balance sheet based on their nature.

Deposits provided to Lessor:

The group is generally required to pay refundable security deposits in order to obtain property leases from various lessors. Such security deposits are financial assets and are recorded at fair value on initial recognition. The difference between the initial fair value and the refundable amount of deposit is recognised as lease prepayments. The initial fair value is estimated as the present value of the refundable amount of security deposit, discounted using the market interest rates for similar instruments.

Subsequent to initial recognition, the security deposit is measured at amortised cost using the effective interest method with carrying amount increased over the lease period up to the refundable amount. The amount of increase in the carrying amount of deposit is recognised as interest income. The lease repayment is amortised on straight-line basis over the lease term as lease rentals expense.

2.24 Research and Development:

Revenue expenditure on research and development is expensed in the period in which it is incurred. Capital expenditure on research and development is shown as addition to fixed assets.

2.25 Contingent Liability & Commitments:

Contingent liability is disclosed in the case of:

- o a present obligation arising from past events, when it is not probable that an outflow of resources will be required to settle the obligation;
- o a present obligation arising from past events, when no reliable estimate possible;
- o a possible obligation arising from past events, unless the probability of outflow of resources is remote.

Commitments include the amount of purchase order (net of advances) issued to parties for completion of assets.

2.26 Critical estimates and Judgements:

The preparation of financial statements requires the use of accounting estimates which, by definition, will seldom equal the actual results. Management also needs to exercise judgement in applying the group's accounting policies.

This note provides an overview of the areas that involved a higher degree of judgement or complexity, and of items which are more likely to be materially adjusted due to estimates and assumptions turning out to be different than those originally assessed. Detailed information about each of these estimates and judgements is included in relevant notes together with information about the basis of calculation for each affected line item in the financial statements.

The areas involving critical estimates or judgements are:

- (i) Estimation of current tax expense and payable
- (ii) Estimation of defined benefit obligations
- (iii) Allowance for uncollected accounts receivable and advances-Trade receivables do not carry any interest and are stated at their nominal value as reduced by appropriate allowances for estimated irrevocable amounts. Individual trade receivables are written off when management deems them not to be collectible. Impairment is made on the expected credit losses, which are the present value of the cash shortfall over the expected life of the financial assets.

Estimates and judgements are continually evaluated. They are based on historical experience and other factors, including expectations of future events that may have a financial impact on the group and that are believed to be reasonable under the circumstances.

Note 18: Provisions - Employee Benefit Obligations (Contd..)

(i) Post-employment obligations- Gratuity

The company provides for gratuity for employees in India as per the payment of Gratuity Act, 1972. Employees who are in continuous service for a period of 5 years are eligible for gratuity. The amount of gratuity payable on retirement/termination is the employees last drawn basic salary per month computed proportionately for 15 day's salary multiplied for the number of years of service. The gratuity plan is a funded plan and the Company makes contributions to recognized funds in India. The company does not fully fund the liability and maintains a target level of funding to be maintained over a period of time based on estimations of expected gratuity payments.

Significant estimates: Actuarial assumptions and sensitivity

The significant actuarial assumptions were as follows:

	31st March, 2017	31st March, 2016	1st April, 2015
Discount rate	7%	8%	8%
Salary growth rate	6%	6%	4%
Attrition Rate	1% to 3% depending on age	1% to 3% depending on age	1% to 3% depending on age
Retirement Age	60years	60years	60years
Average Balance Future Services	30years	30years	31years
Mortality Table	IALM(2006-08)	IALM(2006-08)	IALM(2006-08)

Sensitivity analysis

The sensitivity of the defined benefit obligation to changes in the weighted principal assumptions is:

Particulars	As at 31st March, 2017
Defined Benefit Obligation	1714.40
Discount rate:(% change compared to base due to sensitivity)	
Increase : +1%	1527.89
Decrease: -1%	1939.43
Salary Growth rate:(% change compared to base due to sensitivity)	
Increase : +1%	1934.51
Decrease: -1%	1522.87
Attrition rate:(% change compared to base due to sensitivity)	
Increase : +50%	1826.72
Decrease: -50%	1588.76
Mortality rate:(% change compared to base due to sensitivity)	
Increase : +10%	1715.71
Decrease: -10%	1713.13

The above sensitivity analysis are based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions, the same method (present value of the defined benefit obligation calculated with the projected unit credit method at the end of the reporting period) has been applied as and when calculating the defined benefit liability recognised in the balance sheet.

The methods and types of assumptions used in preparing the sensitivity analysis did not change compared to the prior period.

The major categories of plans assets are as follows:

Particulars	31st March, 2017	31st March, 2016
Central Govt Securities	429.46	299.52
State Govt Securities	485.57	338.65

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(All amounts in Indian ₹ Lakhs, unless otherwise stated)

Note 18: Provisions - Employee Benefit Obligations (contd..)

Defined benefit liability and employer contributions

The Company has purchased insurance policy to provide for payment of gratuity to the employees. Every year, the insurance company carries out a funding valuation based on the latest employee data provided by the Company. Any deficit in the assets arising as a result of such valuation is funded by the Company. The company considers that the contribution rate set at the last valuation date is sufficient to eliminate the deficit over the agreed period and that regular contributions, which are based on service costs will not increase significantly.

The weighted average duration of the defined benefit obligation is 20.77 years. The expected cash flows over the next years is as follows:

Particulars	Less than a year	Between 2-5 years	Between 6-10 years	Over 10 years	Total
As at 31-Mar-17					
Defined benefit obligation-gratuity	92.53	63.78	300.11	5163.52	5619.95

Risk exposure

Through its defined benefit plans, the company is exposed to a number of risks, the most significant of which are detailed below:

Interest Rate Risk: The plan exposes the Company to the risk of fall in interest rates. A fall in interest rates will result in an increase in the ultimate cost of providing the above benefit and will thus result in an increase in the value of the liability.

Salary Escalation Risk: The present value of the defined benefit plans calculated with the assumption of salary increase rate of plan participants in future. Deviation in the rate of increase of salary in future for plan participants from the rate of increase in salary used to determine the present value obligation will have a bearing on the plan's liability.

Demographic Risk: The Company has used certain mortality and attrition assumptions in valuation of the liability. The Company is exposed to the risk of actual experience turning out to be worse compared to the assumption.

Regulatory Risk: Gratuity benefits is paid in accordance with the requirements of the Payment of Gratuity Act, 1972 (as amended from time to time). There is a risk of change in regulations requiring higher gratuity payouts (eg. Increase in the maximum limit on gratuity).

Asset Liability Mismatching or Market Risk: The duration of the liability is longer compared to duration of assets, exposing the Company to market risk for volatilities/fall in interest rate.

Investment Risk: The probability and likelihood of occurrence of losses relative to the expected return on any particular investment.

Asset Volatility: The plan liabilities are calculated using a discount rate set with reference to bond yields; if plan assets under perform this yield, this will create a deficit. Most of the plan asset investment are in fixed income securities with high grades and in government securities. A portion of the fund is invested in equity securities and in alternative investments which have low correlation with equity securities. The equity securities are expected to earn a return in excess of the discount rate and contribute to the plan deficit. The company has a risk management strategy where the aggregate amount of risk exposure on a portfolio level is maintained at a fixed range. Any deviations from the range are corrected by rebalancing the portfolio. The company intends to maintain the investment mix in the continuing years.

Changes in bond yields: A decrease in bond yields will increase plan liabilities, although this will be partially off-set by an increase in the value of the plan's bond holdings.

The Company makes contribution to a scheme administered by the Life Insurance Corporation of India ('LIC') to discharge gratuity liabilities to the employees. The Company actively monitors the investment positions and ensures the same is adequately managed within an asset-liability matching (ALM) framework. The company actively monitors how the duration and the expected yield of the investments are matching the expected cash outflows arising from the employee benefit obligations. The company has not changed the processes used to manage its risks from previous periods. A large portion of assets in 2017 consists of government and corporate bonds, although the company also invests in equities, cash and mutual funds. The company believes that equities offer the best returns over the long term with an acceptable level of risk. The majority of equities are in a globally diversified portfolio of international blue chip entities, with a target of 60% equities held in India. The plan asset mix is in compliance with the requirements of the respective local regulations

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

As at 31st March, 2017

(All amounts in Indian ₹ Lakhs, unless otherwise stated)

Note 36: Fair Value Hierarchy

The following table presents the fair value hierarchy of assets and liabilities:

	Level	As at 31st March, 2017	As at 31st March, 2016	As at 1st April, 2015
Financial Assets:				
a) Measured at fair value through profit or loss				
(i) Investment in mutual funds	1	163072.20	80285.16	73501.10
(ii) Investment in equity instruments in other companies	1	1.20	1.20	1.20

Fair value of the financial instruments is classified in various fair value hierarchies based on the following three levels:

Level 1: Quoted prices are (unadjusted) in active market for identical assets or liabilities.

Level 2: Inputs other than quoted prices are included within level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices). The fair value of financial instruments that are not traded in an active market is determined using valuation techniques which maximize the use of observable market data and rely as little as possible on entity-specific estimates. If significant inputs required to fair value an instrument are observable, the instrument is included in Level 2.

Level 3: Inputs for the assets or liabilities that are not based on observable market data (unobservable inputs). If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3. This is the case with listed instruments where market is not liquid and for unlisted instruments.

Note 37: Financial Risk Management

The Company's activities expose it to market risk and credit risk. The Company emphasis on risk management and has an enterprise wide approach to risk management. The Company's risk management and control procedures involve prioritization and continuing assessment of these risks and devise appropriate controls, evaluating and reviewing the control mechanism.

(A) Credit Risk:

Credit risk is the risk of financial loss to the Company if a customer to a financial instrument fails to meet its contractual obligations and arises primarily from trade receivables, treasury operations etc. Credit risk of the Company is managed at the Company level. In the area of treasury operations, the Company is presently exposed to risk relating to investment in mutual funds. The Company regularly monitors such investments and all the investments in mutual funds are held with State Bank of India which is a nationalised bank, thereby minimises the risk.

The credit risk related to trade receivables is influenced mainly by the individual characteristics of each customer. The credit risk is managed by the company by establishing credit limits and continuously monitoring the credit worthiness of the customer. The Company also provides for expected credit losses based on the past experience where it believes that there is high probability of default. In general, all trade receivables greater than 180 days are reviewed and provided for by analyzing individual receivables.

Following are the Expected credit loss for trade receivables under simplified approach:

Particulars	31st March, 2017	31st March, 2016	1st April, 2015
Gross carrying amount	89967.68	88126.54	74209.45
Expected credit losses (Loss allowance provision)	122.75	34.24	45.19
Net carrying amount of trade receivables	89844.93	88092.30	74164.26

(B) Market Risk:

The Company has substantial exposure to foreign currency risk due to the significant exports made. Sales in other countries and purchases from overseas suppliers are exposed to risk associated with fluctuation in the currencies of those countries vis-a-vis the functional currency i.e. Indian rupee. The Company manages currency fluctuations by having a better geographic balance in revenue mix and ensures a foreign currency match between liabilities and earnings. The Company believes that the best hedge against foreign exchange risk is to have a good business mix. The Company is very cautious towards hedging as it has a cost as well as its own risks. The Company continually reassesses the cost structure impacts of the currency volatility and engages with customers addressing such risks.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(All amounts in Indian ₹ Lakhs, unless otherwise stated)

Note 37: Financial Risk Management (Contd..)

(C) Price Risk:

(a) The company is exposed to risk from investments in mutual funds. The company has invested in quoted debt mutual funds with State Bank of India. The Company is very cautious in their investment decisions and takes a conservative approach of investing in nationalised banks with minimal risk. The table below summarises the impact of increase/(decrease) in the Net Asset Value (NAV) of these investments

(b) Sensitivity

The analysis is based on the assumption that the NAV has increased/(decreased) by 1% with all other variables held constant.

Particulars	Impact on profit after tax		
	31st March, 2017	31st March, 2016	1st April, 2015

Decrease in NAV by 1%	(1630.72)	(802.85)	(735.01)

Note 38: Capital Management

The Company's financial strategy aims to provide adequate capital for its growth plans for sustained stakeholder value. The company's objective is to safeguard its ability to continue as a going concern, so that it can continue to provide returns for shareholders and benefits for other stakeholders. And depending on the financial market scenario, nature of the funding requirements and cost of such funding, the Company decides the optimum capital structure. Currently, there are no borrowings and operations are being funded through internal accruals. The Company aims at maintaining a strong capital base so as to maintain adequate supply of funds towards future growth plans as a going concern.

Note 39: Segment Information

(a) Description of segments and principal activities

The Chairman & Managing Director has been identified as being the Chief Operating Decision Maker (CODM). Operating segments are defined as components of an enterprise for which discrete financial information is available. This is evaluated regularly by the CODM, in deciding how to allocate resources and assessing the Company's performance. The Company is engaged in manufacturing and sale of Active Pharma Ingredients and Intermediates and operates in a single operating segment.

Note 45: First-time adoption of Ind AS

Transition to Ind AS

These are the Group's first financial statements prepared in accordance with Ind AS.

The accounting policies set out in Note 2 have been applied in preparing the financial statements for the year ended March 31, 2017, the comparative information presented in these financial statements for the year ended March 31, 2016 and in the preparation of an opening Ind AS balance sheet at April 01, 2015 (Group's date of transition). In preparing its opening Ind AS balance sheet, the Group has adjusted the amounts reported previously in financial statements prepared in accordance with the accounting standards notified under Companies (Accounting standards) Rules, 2006 (as amended) and other relevant provisions of the Act (previous GAAP or Indian GAAP). An explanation on how the transition from previous GAAP to Ind AS has effected the Group's financial position, financial performance and cash flows is set out in the following tables and notes.

A. Exemptions and exceptions availed

Set out below are the applicable Ind AS 101 optional exemptions and mandatory exceptions applied in the transition from previous GAAP to Ind AS.

A.1 Ind AS optional exemptions

A.1.1 Deemed Cost

Ind AS 101 permits a first-time adopter to elect to continue with the carrying value for all of its property, plant and equipment as recognised in the financial statements as at the date of transition to Ind AS, measured as per the previous GAAP and use that as its deemed cost as at the date of transition after making necessary adjustments for de-commissioning liabilities. This exemption can also be used for intangible assets covered by Ind AS 38 Intangible Assets. Accordingly, the Group has elected to measure all of its property, plant and equipment and intangible assets at their previous GAAP carrying value.

A.1.2 Cumulative Translation Differences

Ind AS 101 permits cumulative translation gains and losses to be reset to zero at the transition date. This provides relief from determining cumulative currency translation differences in accordance with Ind AS 21 from the date a subsidiary was formed. The group elects to reset all cumulative translation gains and losses to zero by transferring it to opening retained earnings at its transition date.

Note 45: First-time adoption of Ind AS (Contd..)

A.2 Ind AS mandatory exceptions

A.2.1 Estimates

An entity's estimates in accordance with Ind AS at the date of transition to Ind AS shall be consistent with the estimates made for the same date in accordance with previous GAAP (after adjustments to reflect any difference in accounting policies), unless there is objective evidence that those estimates were in error.

Ind AS estimates as at April 01, 2015 are consistent with the estimates as at the same date made in conformity with previous GAAP. The Group made estimates for following items in accordance with Ind AS at the date of transition as these were not required under previous GAAP:

- Investment in Equity instruments carried at FVPL
- Investments in debt instruments carried at FVPL and;
- Impairment of financial asset based on expected credit loss model."

A.2.2 Classification and measurement of financial asset

Ind AS 101 requires an entity to assess classification and measurement of financial assets (investments in debt instruments) on the basis of the facts and circumstances that exist on the date of transition to Ind AS.

B. Reconciliations between previous GAAP and Ind AS (as at March 31, 2016 and April 01, 2015)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

for the year ended 31st March, 2017

(All amounts in Indian ₹ Lakhs, unless otherwise stated)

Note 45: First-time adoption of Ind AS (Contd..)

C: Notes to first-time adoption:

Note 1: Fair valuation of investments

Under the previous GAAP, investments in equity instruments and mutual funds were classified as long term investments or current investments based on the intended holding period and realizability. Long term investments were carried at cost less provision for other than temporary decline in the value of such investments. Current investments were carried at lower of cost and fair value. Under Ind AS, these investments are required to be measured at fair value. The resulting fair value changes of these investments has been recognised in retained earnings as at the date of transition and subsequently in the profit and loss for the year ended March 31, 2016. This increased the retained earnings by ₹32.71 lakhs as at March 31, 2016 (April 01, 2015- ₹200.74 lakhs).

Note 2: Proposed dividend

Under the previous GAAP, dividends proposed by the board of directors after the balance sheet date but before the approval of the financial statements were considered as adjusting events. Accordingly, provision for proposed dividend was recognised as a liability. Under Ind AS, such dividends are recognised when the same is approved by the shareholders in the general meeting. Accordingly, the liability for proposed dividend and tax thereon of ₹ Nil as at March 31, 2016 (April 01, 2015- ₹31951.17 lakhs) included under provisions have been reversed with corresponding adjustment to retained earnings. Consequently, the total equity increased by an equivalent amount.

Note 3: Excise duty

Under the previous GAAP, revenue from sale of products was presented exclusive of excise duty. Under Ind AS, revenue from sale of goods is presented inclusive of excise duty. The excise duty paid is presented inclusive of excise duty. The excise duty paid is presented on the face of the statement of profit and loss as part of expenses. This change has resulted in an increase in total revenue and total expenses for the year ended March 31, 2016 by ₹2851.81 lakhs. There is no impact on the total equity and profit.

Note 4: Remeasurements of post-employment benefit obligations

Under Ind AS, remeasurements i.e., Actuarial gains and losses and the return on plan assets, excluding amounts included in the net interest expense on the net defined benefit liability are recognised in other comprehensive income instead of profit or loss. Under the previous GAAP, these remeasurements were forming part of the profit or loss for the year. As a result of this change, the profit for the year ended March 31, 2016 decreased by ₹372.71 lakhs. There is no impact on the total equity as at March 31, 2016.

Note 5: Reserves and Surplus

Retained earnings as at April 01, 2015 has been adjusted consequent to the above Ind AS transition adjustments.

The Group had received a Government grant towards State Investment Subsidy in the year 1998 with an outstanding amount of ₹32.58 lakhs. These amounts have been transferred to retained earnings since the assets related to the grant have been fully depreciated as at April 01, 2015.

Note 6: Deferred tax

As per Ind AS-12, the Group has recognised deferred tax asset on the indexation benefit available on free hold land as it has no plans to sell the business on a slump sale thereby increasing the retained earnings by ₹558.34 lakhs as at March 31, 2016 (April 01, 2015: ₹495.39 lakhs).

The Group has recognised deferred tax asset on the unrealised profit earned through sales made to subsidiaries amounting to ₹302.15 lakhs (April 01, 2015: ₹353.43 lakhs). The sale of inventory between the parent and the subsidiary Group is a taxable event that changes the inventory's tax basis. Accordingly as per Ind AS-12, a deferred tax asset has been created on the unrealised profit at the tax rate of the subsidiaries.

Other Deferred tax adjustments amounting to (₹327.04 lakhs) as at March 31, 2016 (April 01, 2015: ₹305.59 lakhs) include deferred tax impact on account of differences between previous GAAP and Ind AS. The profit for the year ended i.e. March 31, 2016 increased by ₹62.56 lakhs due to the deferred tax adjustments made.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

for the year ended 31st March, 2017

(All amounts in Indian ₹ Lakhs, unless otherwise stated)

Note 45: First-time adoption of Ind AS (Contd..)

Note 7 : Other comprehensive income

Under Ind AS, all items of income and expense recognized in a period should be included in the profit or loss for the period, unless a standard requires or permits otherwise. Items of income and expense that are not recognised in profit or loss but are shown in the statement of profit or loss as 'other comprehensive income' includes remeasurements of defined benefit plans. The concept of 'other comprehensive income' did not exist under previous GAAP.

Note 8: Rental Deposits:

Under the previous GAAP, rental deposits are recorded at their transaction value. Under Ind AS, all financial assets are required to be recognised at fair value. Accordingly the Group has fair valued the rental deposits. Difference between the fair value and transaction value is recognised as prepaid rent. Consequent to this change, the amount of security deposit decreased by ₹210.04 lakhs as at March 31, 2016 (April 01, 2015: ₹ Nil). The prepaid rent increased by ₹205.68 lakhs as at March 31, 2016 (April 01, 2015: ₹ Nil).
