26. Management Discussion and Analysis

The world economy is still grappling with the legacy of the global financial crisis. Global growth was lower than expected and picked up marginally in 2014 to 2.6%. The key features of the lack luster global recovery have been accommodative monetary policies, falling commodity prices, and weak international trade. The key policy challenge for developing countries is to adjust monetary and fiscal policies in the short-term while addressing headwinds to growth and implementing structural reforms in the long-term.

The Indian economy is in a recovery mode and grew at 7.3% in 2014-15 compared to the growth rate of 6.8% in 2013-14. We also saw an increase in per capita income at current prices during 2014-15 which rose by 9.2% to ₹ 87,748 as against ₹ 80,388 in the previous fiscal. According to a report of World Bank, India is on course to overtake China as the world's fastest growing economy in the next two years. The policy implementation has stepped up during the fourth quarter, supported by opening up of the coal industry to private investors, deregulation of diesel prices, liberalization of labor laws, and linking of cash transfers with efforts to increase financial inclusion.

The power sector in India has witnessed credible growth in FY 2014-15 meeting the targets for generation growth (8% growth vis-a-vis the targeted 5.77%), capacity addition (installation of 22,566 MW compared to the target of 17,830 MW) and successful auctioning and allocation of a number of coal blocks. However, lower asset utilization (PLF ~66%), peak power deficit, stranded generation capacity and transmission congestion continues to be matters of concern. As on 31st March, 2015, the all India installed capacity stood at 267.6 GW with Coal based capacity at 164.6 GW, Gas based at 23 GW, Nuclear at 5.78 GW, Hydro at 41.2 GW and Renewables at 31.7 GW. Addition of 22,101 ckt km of transmission lines till March 2015 has created better transmission availability and should boost the power market which is still evolving.

In the evolving legislative, policy and regulatory environment, power markets will continue to occupy a central position. Given the challenges of a buildup in suppression of demand and simultaneous capacity addition with stranded assets, the industry needs some quick wins and support of all stakeholders for establishing a path to confidence. There is a need to relook at the inefficient plants which in addition to their primary resource consumptions are also blocking other infrastructure (rail network, evacuation facility etc), which otherwise can be made available for other projects for bringing efficiency in the sector.

The Government of India is working on a mission to achieve electrification of remaining 20,000 villages by 2020 through measures like off-grid solar power generation. The aim is to extend 24 hour power supply to each household by 2022. Capacity addition for both thermal and renewable energy has been planned to achieve this target along with distribution reforms.

Presently, Long term power market is saddled with many problems such as demand supply mismatch in long term horizon, revision in Standard Bidding Documents for procurement of power, challenges in fuel supplies and disputes related to compensatory tariff etc. and resolution of same may

take substantial time. In this scenario, it becomes pertinent for stakeholders to explore the medium term window which may take care up to 3-7 years. The 3-7 years span shall be a good period for assessing revenue certainty, tariff reset, matching of demand supply and other key factors for power sector. The medium term market provides an opportunity to venture into new areas in the fast evolving Power Market.

On a regulatory and policy framework, The Amendments to the Electricity Act -2003 which is presently at Parliamentary Standing Committee on Energy, provides for newer opportunity for your company in scaling up energy business. The amendment shall encourage competition in supply of power to retail consumers through separation of carriage and content, we feel, it is imperative to progressively reduce and eliminate cross subsidy surcharge in a definitive timeline for success of this model. The regulatory and policy change shall bring in transparent business competitiveness in electricity market which shall have deep impact in broadening the market for your company.

Renewable Energy is expected to be a significant part of the future of our industry. However, grid connectivity and availability, ancillary services and creation of market for renewable energy are essential. There is also a need to strengthen Renewable Energy Certificate (REC) market. Enabling alternative markets such as bilateral trade of RECs through traders will help creating more liquidity.

The policy level developments in the power sector are opening up many opportunities for business and investment in particular the opportunities in coal mining, supply to retail consumers, energy efficiency services and development of renewable energy projects. Your company endeavors to create value for its business from such opportunities.

The power market in the year has been a summation of trends caused by the industry's transient state, leading to volatility in short term traded volumes. The overall Short Term Power Market in FY15 contracted by about 5% from 105 BUs in FY14 to 99 BUs in FY15. The Bilateral Trades (Traders +TAM) contracted by about 4%, Power Exchanges (PXs) by ~5% and UI by ~9%. Bilateral Trades constituted ~51.6%, Power Exchanges ~19% and UI ~19.6% of the Short Term Market.

In FY15, your company's trading volumes are higher by 6% to 37,137 MUs compared to 35,130 MUs in FY14. Due to grid constraints between WR-NR, NEW-SR and also in S1-S2, the power flow was restricted resulting in a traded volume loss of about 11 BUs.

In addition to the above, Power Sale Agreements had earlier been executed by PTC with various State Utilities/Procurers for sale of total 704 MW power from 1000 MW (4x250 MW) JP Karcham Wangtoo Project. During the year, your company has successfully operationalized 504 MW out of this to various Distribution Companies in the Northern Region.

We are also supplying 250 MW power to Bangladesh resulting in trading volume of 1624 MUs.

It is expanding its business area and clients, adding institutions like Airport Authority of India and Delhi Metro Rail Corporation in its portfolio. The retail business has traded 3.4 BUs in the financial year.

Further, your company has been granted funds from prosperity fund by the British High Commission on behalf of Government of United Kingdom for preparing the Indian power market for carriage and content separation through collaboration with the UK. PTC will be working in close association with key stakeholders in implementing business of supply licensee (introduced in draft Amendment to Electricity Act 2003) in India. Regulatory provisions envisaged for increasing competition in power supply business are expected to provide larger avenues in future.

Your company is also facilitating scheduling of solar power, a first of its kind transaction, for 750 MW solar projects to be set up under the VGF scheme issued by Solar Energy Corporation of India. Your company has also signed an MoU with MNRE & NIWE, along with NTPC, POWERGRID, PFC, IREDA and GPCL for undertaking development of offshore wind power project and its evacuation and integration into grid. We are aiming towards building a strong environmental stewardship in our business strategy in line with government's focus on renewable energy.

Your company has also taken a step towards increasing its presence in the energy efficiency sector. We are providing project management consultancy for street lightning projects in two identified circles in a Southern Region State. We are making efforts to execute various energy efficiency projects for delivering a range of products and services to consumers. Further, your company is providing advisory solutions to petroleum refineries and other bulk consumers for enhancing their grid transmission capacity. The solutions will enable them reap market benefits of the Open Access Market.

Going forward, your company's focus is on balanced development of trading business portfolio for sustained growth with a strategy to maintain and enhance presence in multiple business segments like for the utilities as well as to the non-utilities (retail). Long term volume is expected to move to more than 50% of total trading volume in 2-3 years from ~40% in 2014-15. We expect steady growth in business volumes backed by a robust business model, built on multiple segments. Your company is well positioned to benefit from improvements in policy & regulatory environment with its strong balance sheet, robust cash flows, and experience from a 16 years' operating history.

- f) i) In accordance with the accounting policy, the surcharge recoverable on late/ non-payment of dues by sundry debtors is accounted for on receipt basis. Correspondingly surcharge liabilities on late/ non-payments to the suppliers, in view of the matching concept, is not being recognized in the accounts. The estimated liability in this regard, however is lower than the Group's claims from its sundry debtors.
- ii) During the year, the Group has recognized surcharge of ₹ 60.75 crore (previous year, ₹ 206.43 crore) from customers on amounts overdue on sale of power which has been included in "Revenue from operations". Correspondingly surcharge expense of ₹ 3.32 crore (previous year, ₹ 68.02 crore) paid/payable to sundry creditors has been included in "other operating expenses".
- g) Some of the balances of trade payables, trade receivables and advances are subject to confirmation/ reconciliation. Adjustment, if any will be accounted for on confirmation/ reconciliation of the same, which in the opinion of the management will not have a material impact.
- h) In the opinion of the management, the value of current assets, loans and advances on realization in the ordinary course of business, will not be less than the value at which these are stated in the balance sheet.
- i) The Group is to divest part of its long term investment in Teesta Urja Limited (TUL) so as Government of Sikkim can acquire 51% against its present holding of 26%. On current fundamentals of the project, the share of TUL was valued below the face value and for sale / transfer of such shares, there will be a loss of ₹ 6.52 crore for which a provision has been made in the accounts. On conservative basis the Group has further made provision of ₹ 26.69 Crore on the balance of its holding.
- j) During the year Group has changed its accounting policy to recognize surcharge when no significant uncertainty as to measurability or collectability exists from receipt basis. Due to change in accounting profit, both the Surcharge on sale of power and Trade receivable are higher by ₹ 18.69 Crore and Profit for the year is higher by ₹ 12.34 Crore (net of tax of ₹ 6.35 crore).
- k) The Company has revised depreciation rates on certain fixed assets w.e.f. April 1, 2014 as per useful life specified in schedule II of Companies Act, 2013. Accordingly the company has accounted for additional depreciation charge of ₹ 0.39 crore for the year and ₹ 0.14 crore (net of deferred tax) in opening Retained earning in terms of the transitional provision of said schedule II. Thus, by charging depreciation at the revised depreciation rates, both the profit for the year and fixed assets are lower by ₹ 0.39 crore.
- l) (i) During the current year, based on an independent investigation into the affairs of an associate company (Associate), it has been concluded that in earlier years, the Associate and its promoters had misrepresented various facts to it and induced PFS to make investments aggregating ₹ 61.12 crore in the Associate. The Company has filed a criminal complaint against the Associate and its promoters and is taking suitable steps both under civil and criminal law to safeguard its investments and to recover the same. Pending outcome thereof, the Company has fully provided for the diminution in value of investment held in this Associate.
- l) (ii) RSIGEL and its promoters had made several misrepresentations and induced PEL to invest money of Rs. 23.40 Crore as equity in RSIGEL (even project has also not come up) and accordingly the company has lodged a complaint with Economic Offence Wing of the Delhi Police and the same is under investigation. The company is also contemplating other legal recourses to recover the investment.
- m) Due to the financial statements for the year ended March 31, 2015 of RS India Wind energy India Private Limited (RSIWEPL) and RS India Global Energy Limited (RSIGEL), (Associates of the group) not being available, the impact thereof on these financial statements as per the requirements of Accounting Standard - 23 "Accounting for Investments in Associate in Consolidated Financial Statements" could not be determined and accounted for. However for the purpose of consolidated financial statements, the group has accounted for a provision of ₹ 67.26 Crore for diminution in value of investments without considering underlying value of these investments. (l) (i) and (l) (ii) above).
- n) Pursuant to the notification dated December 29, 2011 issued by the Ministry of Corporate Affairs amending the Accounting Standard 11, the group has exercised the option as per Para 46A inserted in the Standard for all long-term monetary assets and liabilities. Consequently, an amount of ₹ 28.56 Crore (gross of tax) is remaining to be amortised in 'Foreign Exchange Monetary Item Translation Difference Account' as at March 31, 2015
