It is measured at the minorities' share of the fair value of the subsidiaries identifiable assets and liabilities at the date of acquisition by the Group and the minorities' share of changes in equity since the date of acquisition, except when the losses applicable to the minority interests in a subsidiary exceed the minority interests in the equity of that subsidiary. In such cases, the excess and further losses applicable to the minority interests are attributed to the equity holders of the Company, unless the minority interests have a binding obligation to, and are able to, make good the losses. When that subsidiary subsequently reports profits, the profits applicable to the minority interests are attributed to the equity holders of the Company until the minority interests' share of losses previously absorbed by the equity holders of the company have been recovered.
- v) The group applies a policy of treating transactions with minority interest as transactions with parties external to the Group. Disposals to minority interests, which result in gains and losses for the Group, are recorded in the income statement. The difference between any consideration paid to minority interests for purchases of additional equity interest in a subsidiary and the incremental share of the carrying value of the net assets of the subsidiary is recognized as goodwill.
- vi) The Financial Statements of the Subsidiaries used in the Consolidation are drawn up to the same reporting date as that of the Company i.e. 31st March.
- vii) The loss attributable to the Minority Shareholders is restricted to their Equity and the excess loss has been provided in the books of accounts.
- e) **Fixed assets, Intangibles and Depreciation**
 - Goodwill acquired in a business combination is initially measured at cost being the excess of the cost of the business combination over the Group's interest in the net fair value of the identifiable assets, liabilities and contingent liabilities at date of acquisition.
 - Intangible Asset relating to Deferred Development expenditure of Subsidiary will be amortised over the estimated useful life upon completion of the individual projects.
 - Depreciation is provided under Straight Line method as per the amended Schedule XIV of the Companies Act, 1956 or based on the management's estimate of the useful lives of the assets. In the case of subsidiary companies depreciation is calculated on the straight-line method to write off the cost of the assets over their estimated useful lives.
- f) **Other Significant Accounting Policies**

These are set out in the Notes to the Accounts of the Financial Statements of the Company and its Subsidiary.

- i) **Provisions**

In the case of Subsidiary companies, provisions are measured at the present value of the expenditure expected to be required to settle the obligation using a pre-tax discount rate that reflects the current market assessment of the time value of the money and the risks specific to the obligation. The increase in provision due to passage of time is recognized in the income statement as interest expense.
