Your Company's relentless effort to build world-class Indian brands, backed by cutting-edge Research & Development and innovation, will continue to drive performance in the years ahead.

WE MAKE IN INDIA: BUILDING WORLD-CLASS BRANDS FOR A DEVELOPED INDIA

The Honorable Prime Minister has articulated the Government's resolve to revive Brand India on the strength of 5 Ts – Tradition, Talent, Tourism, Trade and Technology. A successful global brand is a badge of honour for the country it belongs to, and a sustained source of wealth creation. When a country's institutions build world-class brands, they enrich their economies, enabling sustainable growth and higher-income livelihood opportunities.

Indian enterprises truly have the mettle to create world-class brands. Building winning brands is not an easy task. Successful global brands have been steadfast in nourishing their consumer franchise through ongoing innovation and remaining well ahead of the learning curve. Therefore, the challenge of building brands in competition with such established players is no mean task. The countries that have accomplished this seemingly impossible mission have done so through close collaboration between the governments and their companies over the long haul.

It is the certificate of recognition given by the Ministry of Commerce & Industry, Govt. of India. The certification, which acknowledges the performers and encourages exports from the country, is based on the track record of the company's exports. The company has achieved this status by accelerating growth in export and creating a unique 'We Make in India' brand.

Sahyadri's vision is to operate as a highly professional and futuristic company and act as an important instrument of export growth and contribute towards growth of the nation.

INNOVATION & SOCIO-ECONOMIC INITIATIVE:

SIL's commitment to socio-economic contribution is manifest in its nationally acknowledged initiatives that create impactful societal value. SIL has created sustainable business models to support livelihoods across the country.

Management Discussion & Analysis Report.

Industry Structure and Development :

Segment : Building Material

The Company is mainly engaged in manufacturer of Fibre Cement Corrugated and Flat Sheets and Non-Fibre Cement Flat Sheets. The Company is also into manufacturing of Fibre Cement Roofing Sheets under the Brand Swastik, Mezzanine application sheets under the Brand Cemply, Cellulose Fibre Cement Boards under the Brand ECOPRO, and Cemply Swachalay - an innovative Green Toilet Technology made for Swachh Bharat Abhiyan.

Fibre Cement sheets have proven to be non corrosive, Fire – retardant , survives extreme weather pressure, weather proof, and improves the Aesthetics of the home and other structures where they are used. These qualities make 'Swastik' sheets ideal for roofing and side cladding of Industrial sheds, godowns, poultry sheds, houses etc

There are 10 big players in the industry catering to the domestic market with about 68 roofing sheet and 12 flat sheet boards manufacturing plants throughout the country.

Segment: Windmill

The development of wind power in India began in the 1990s, and has significantly increased in the last few years. India is the fifth largest electricity generation capacity in the world but still faces power shortage and load-shedding issues. Government has been striving hard to tackle this problem and bring power sufficiency in country.

Installed capacity of wind power in India was 23447.50 MW as on 31.03.2015 mainly spread across Tamil Nadu Gujarat , Maharashtra , Karnataka , Rajasthan , Madhya Pradesh , Andhra Pradesh , Kerala , Orissa .Wind power accounts nearly 8.5% of India's total installed power generation capacity and generated 28,214 million Kwh (MU) in the fiscal year 2014-15 which is nearly 2.6% of total electricity generation.

There is huge scope for growth of wind energy in India due to rising energy demand in India and India's obligation to encourage clean environment.

Opportunities & Threats :

Segment: Building Material

The industry is estimated to grow on account of increased income in rural areas coupled with various initiatives by the Government for housing

such as tax breaks for affordable housing, increasing allocation to National Housing Bank and the vision of the Government to provide affordable housing to all by 2022. Other schemes such as the Mahatma Gandhi National Rural Employment Guarantee Act (MGNREGA) guarantee employment to low-income individuals, which also help generate demand for the roofing industry. Fibre Cement sheets are good insulators of heat and sound as compared to thatched, tiled or galvanized metal roofs. Additionally, Fibre Cement roofing sheets are water resistant and fire resistant. Fibre roofing sheets may also be relatively cheaper than galvanized metal roofs. Fibre Cement roofing sheets require minimal maintenance and infrequent replacement unlike thatched and tiled roofs. Hence, whenever disposable income increases, switching to Fibre Cement sheet roofs is the most obvious choice.

The overall impact of these provisions is likely to increase the sales in this segment in the future.

The existing manufacturers and new entrants are in process of setting of new Fibre Cement cement sheet plants, will increase the competition and may have effect on the margins.

The Company has launched a new business initiative namely "Cemply Toilet Blocks". Cemply Toilet Blocks are modular in design supplied in the form of a kit, and can be erected on site within hours for a comfortable and hygienic use by the residents. Made using Cemply fibre-cement sheets and doors and Swastik Roof, these safe, secure toilet units are ready for sanitary fittings to be installed before use. Cemply Toilet Blocks are ideal for use in residential school, tourist spots and inhabitants from the rural tribal or hilly terrains. Cemply Toilet Blocks bring hygiene, health, and convenience the affordable and durable way.

The Company is participating in Swachh Bharat Abhiyan by making available easy to assemble and install toilet blocks on a mass scale at affordable price

Segment : Wind Mill

Currently the Company is operating 31 number of machines situated in the states Maharashtra, Tamilnadu & Rajasthan with the total capacity of 23.2 MW. Their operations are satisfactory. The Company's initiative with renewable green power generation has been one of the most acclaimed in the field of energy technology.

Risk & Concerns :

The sales of roofing sheets are highly dependent on rural prosperity as the use of these sheets is highest

in rural and semi-urban areas. In rural areas, thatched roofs and tiled roofs are replaced by Fibre Cement roofing sheets when affordable, as Fibre Cement roofing sheets has several advantages. Rural prosperity is highly dependent on agricultural productivity, which in turn is dependent on the monsoon. A poor monsoon impacts the demand for roofing in rural India. Additionally, rural prosperity is also dependent on Government spending on schemes like MGNREGA, Indira Awas Yojna etc. Any decrease in spending on these schemes could reduce the purchasing power of customers in the roofing segment. Any government initiative to completely ban or restrict the use of Fibre Cement will force industry to look for alternative and may increase its overall cost. Further the cost of raw material, forex risks and seasonability are also major concern to the industry.

The Wind industry faces the challenges like insufficient grid infrastructure in many states, unattractive incentive policies and absence of an integrated policy framework.

Competition:

There are about 20 players in the Indian roofing industry. The presence of unorganised players also poses a major threat to organised players in the industry. Urban consumers are also shifting from conventional roofing system to high quality, more technically advanced system based on the purchasing power. There is also scope for expansion for metal roofing players due to the emerging concept of pre-engineered building. There are lots of new capacities entering into the market to take advantage of growing demand.

Financial performance

For the year under review, the sales volume as well as sales value have increased over the previous year. There has also been an increase in the profitability of the Company. The export sales are principal contributory to the improvement in financial performance.

Fibre Cement roofing sheet is a seasonal business and Company as also industry as whole depend upon seasonability of demand. However Company is taking new initiatives to insulate it from seasonability of demand for traditional product. The Company is focusing on furthering and strengthening exports. The reasonable productivity gains are expected to accrue from better balancing of existing plants and

commissioning of 180000 annual tonnes capacity new plant at Vijaywada. The Company has commenced commercial production at Vijaywada plant. The new plant at Vijaywada is expected to bring in cost savings. Business confidence has grown due to stable government at the Centre. Rupee has also stabilised against dollar. It will help to manage/optimise import costs.

Carbon Credit

Wind power projects are considered to be part of clean development mechanism under Kyoto Protocol and would be entitled to generate carbon credits. The Companies three wind power projects of a capacity of 16.8 megawatt has been successfully registered with UNFCCC under clean development mechanism. Wind power generation helps to mitigate the climate change; the wind power project activities significantly reduce the emissions of greenhouse gas to atmosphere and hence would contribute to global efforts towards combating global warming.
