Your Company is going to adopt new technology of casting i.e. “Lost Foam Casting” which will provide the better finish and cost effective production. The following are the benefits of this technology:

- This will lower operating costs.
- High levels of sand reuse are possible.
- Fettling and machining is minimized due to high dimensional accuracy and the absence of parting lines or core fins.
- Consistent casting quality.
- Multiple castings can be combined in one mold to increase pouring efficiency and other benefits as well.

Production capacity expansion outpacing domestic consumption will drive export-oriented growth in the coming years and will be one of the major factors that will have a positive impact on the component market growth in the coming years. Cost-efficient operations and acceptable quality have increased export volumes for the auto components to global OEMs (original equipment manufacturer).

We expect auto component demand to grow by 13-15% in fiscal 20 on account of strong growth across asset classes. As the BS VI emission norms are expected to come into effect in Financial Year 2021, this would result in a price increase across all automobile segments and pre-buying of cheaper BS IV vehicles in Financial Year 2020 is likely to drive volumes up. A strong domestic demand and a pick up in exports is expected to aid overall auto components growth in Financial Year 2020.

MANAGEMENT DISCUSSION AND ANALYSIS

Industry structure and developments

As one of the major pillars of economic development and growth, with a huge bearing on GDP and employment generation, the Indian automobile industry, today, is on the cusp of a major disruption due to technological innovation, new business models and changing regulations. The Indian auto-components industry has experienced healthy growth over the last few years. The auto-component industry of India has expanded by 18.3 per cent to reach at a level of US\$ 51.2 billion in FY 2017-18. The auto-components industry accounts for 2.3 per cent of India's Gross Domestic Product (GDP) and employs as many as 1.5 million people directly and indirectly each. A stable government framework, increased purchasing power, large domestic market, and an ever increasing development in infrastructure have made India a favourable destination for investment.

The Foreign Direct Investment (FDI) inflows into the Indian automotive industry during the period April 2000 – March 2019 were recorded at US\$ 21.38 billion, as per data by the Department for Promotion of Industry and Internal Trade (DPIIT). The Indian auto-components industry is set to become the third largest in the world by 2025. Indian auto component makers are well positioned to benefit from the globalisation of the sector as exports potential could be increased by up to US\$ 30 billion by 2021.

The Government of India's Automotive Mission Plan (AMP) 2006–2026 has come a long way in ensuring growth for the sector. Indian Automobile industry is expected to achieve a turnover of \$300 billion by the year 2026 and will grow at a rate of CAGR 15 per cent from its current revenue of \$74 billion. Government has come out with Automotive Mission Plan (AMP) 2016-26 which will help the automotive industry to grow and will benefit Indian economy in the following ways:-

- Contribution of auto industry in the country's GDP will rise to over 12 per cent
- Around 65 million incremental number of direct and indirect jobs will be created
- End of life Policy will be implemented for old vehicles

The auto component demand is expected to grow by 13-15% in upcoming years on account of strong growth across asset classes. As the BS VI emission norms are expected to come into effect in upcoming years, this would result in a price increase across all automobile segments. A strong domestic demand and a pick-up in exports is expected to aid overall auto components growth in Financial Year 2019-20.

Company's Overview:

Porwal Auto Components Ltd is a diversified auto-components company with presence across many processes/ product lines and customers and involved in manufacturing and marketing of S.G. (Ductile) Iron, Grey Cast Iron and Steel Castings and Components for the Automobile, Engineering & Railway Applications for past 26 years. It should also be noted that your company is focused to be preferred supplier in the castings technology on the global front, while being accountable to all our stakeholders and shareholders. Your Company is constantly push the boundaries of possibilities to create products and technology led services, that enable our customers and stakeholders to Rise. By focusing on customer centricity, delivering accessible technology, innovation and enhancing people capabilities, we continue to drive growth in the domestic market while pursuing global expansion.

Opportunities and Threats

1. Opportunities :

The Indian auto-components industry has experienced healthy growth over the last few years. Some of the factors attributable to this include: a buoyant end-user market, improved consumer sentiment and return of adequate liquidity in the financial system.

Our industry is at the core of a huge transition and is looking forward to positive policy announcements and implementation that will set a good tone for the development agenda and contribute to a better economy.

Given the increase in electronic content, OEMs need to collaborate with suppliers and experts outside the traditional auto industry. Accomplishing this will require changes in the way OEMs function. OEMs will be looking to their top suppliers to co-invest in new global platforms & this will be the driving force in the future.

Production capacity expansion outpacing domestic consumption will drive export-oriented growth in the coming years and will be one of the major factors that will have a positive impact on the component market growth in the coming years. Factors such as the rising vendor consolidation, faster replacement market growth, increasing

localization, export-oriented growth, and growing electronic content per vehicle have induced the Indian auto component segment to continue to grow much faster than the OEM segment. This, in turn, will invite more exports to OEMs from auto component manufacturers.

Increasing need for advanced technologies in the vehicles, competitive intensity and ever spiraling customer expectations - calls for increased R&D, closer working with suppliers, shorter product life cycles and rigorous monitoring of costs.

2. **Threats :**

Due to entry of new players and expansion plans of existing ones the Automobile Industry results into extensive competition, every company eating into others share leaving little scope for new players. Due to the fact that mature markets are already over crowded, industry is shifting towards emerging markets by building facilities, R & D centres in these markets. But the ROI out of these decisions is yet to be capitalized.

The automotive industry is facing an unprecedented slowdown. Considering the facts that the auto component industry grows on the back of vehicle industry, a current 15-20 percent cut in vehicle production has led to a crisis-like situation. This will also result in significant job losses. Therefore, a stable technology-agnostic e mobility policy is the need of the hour to ensure a smooth transition and creation of a strong local supply base.

Moreover, in the automobile industry, vehicles cannot be kept in the store for long unlike consumer durables, as automobiles lose value with time. The model gets old and the customer would not be willing to pay for it.

Macro economic uncertainty, recession, unemployment, volatility in the fuel prices, labour productivity, high fixed cost and investments in research and development etc. are the economic factors which will daunt the automobile industry for a long period of time.

Technical up-gradation would be essential for the Company in meeting the expectations of the customers in future. In order to maintain its leadership position, your company is continuously focused on upgrading its products and manufacturing technology as well as acquiring new and advanced technology to meet the emerging expectations of the customers.

Segment - wise or product - wise performance

The company is engaged in automobile Components manufacturing only and there are no separate reportable segments.

Outlook

Indian auto component industry is expected to grow steadily at a moderate CAGR of around 19% by 2020. The mid to long term outlook for the Indian auto industry is positive. As per the Automotive Mission Plan 2026 (AMP 2026) the Indian auto industry is expected to grow at double digit CAGR between the period 2016-2026.

With an objective to sustain growth, your Company is pursuing several strategic initiatives in all key areas of business. The key elements of strategy include strengthening the product portfolio, refresh and update existing products and strengthen research & development (R&D) and technology capabilities.

Your Company is going to adopt new technology of casting i.e. "Lost Foam Casting" which will provide the better finish and cost effective production. The following are the benefits of this technology:

- This will lower operating costs.
- High levels of sand reuse are possible.
- Fettleing and machining is minimized due to high dimensional accuracy and the absence of parting lines or core fins.
- Consistent casting quality.
- Multiple castings can be combined in one mold to increase pouring efficiency and other benefits as well.

Production capacity expansion outpacing domestic consumption will drive export-oriented growth in the coming years and will be one of the major factors that will have a positive impact on the component market growth in the coming years. Cost-efficient operations and acceptable quality have increased export volumes for the auto components to global OEMs (original equipment manufacturer).

We expect auto component demand to grow by 13-15% in fiscal 20 on account of strong growth across asset classes. As the BS VI emission norms are expected to come into effect in Financial Year 2021, this would result in a price increase across all automobile segments and pre-buying of cheaper BS IV vehicles in Financial Year 2020 is likely to drive volumes up. A strong domestic demand and a pick up in exports is expected to aid overall auto components growth in Financial Year 2020.

Risks and concerns

Today auto industry is enjoying the benefits while the auto component sector is in its gloom despite of hard efforts of survival. The factors making the differences are unavailability of resources like skilled labour and technology, high cost of production due to inflation and Government policies of Indirect Tax.

Today the international markets are so saturated and the cut throat competition is spread all over the globe as the whole world has become a single market. The rule of 'survival of the fittest' is applied at every stage and in all the sectors. This enabled Indian auto industry to grow at certain extent. The threat of other competitive countries and the internal country policies affecting the sector directly or indirectly, the loop holes are stretching the limbs behind and withdrawing its roots of development. On one side the automobile industry is flourishing while on the other side the Indian auto component/parts which is a spine of Indian automobile industry is shrinking.

The cut throat competition makes it difficult for companies to pass on increases in raw material prices to the customer. Due to high operating leverage, a small increase in input prices adversely affects margins by a significant percentage. Compliance to stringent fuel emission standards and fuel efficiency requirements resulted in significant structural costs for companies as well. The Company is aware of the increasing competition and is taking measures to remain competitive in the market place.

Internal control systems and their adequacy

The Company has a proper and adequate internal control system to ensure that all the assets of the Company are safeguarded and protected against any loss. It ensures that all transactions are authorised, recorded and reported correctly and all the transactions are properly authorized and recorded. It monitors compliance to internal processes and provide timely and reliable information to management.

Material development in human resources/industrial relations front, including number of people employed

During the year, the Company has taken several initiatives to further strengthen its human resource base to meet its current & future growth plans. There was unity of purpose among the employees to continuously strive for all round improvements in work practices & productivity Industrial relations were cordial throughout the year at all locations. As on 31st March, 2019, there were 351 employees on the roll of the Company.

Details of significant changes (i.e. change of 25% or more as compared to the immediately previous financial year) in key financial ratios, along with detailed explanations are as follows:

Ratio	Ratio in Year 2018	Ratio in Year 2019	% of Change	Reason for Change
Debtors Turnover	8.22	13.70	Increase by 66%	Debtors turnover ratio gone to 13.70 times in 2019 as compared to 8.22 in 2018. This shows that the company has better debtor's turnover in 2019 as compared to 2018.
Debt Equity Ratio	0.64	0.47	Decrease by 27%	Debt equity ratio was 0.47 in 2019 as compared to 0.64 in 2018. This is because of no new loan has been taken by the company and old loan payment has been made as per the payment schedule.
Net Profit Margin	4.58	2.83	Decrease by 38%	The Net profit margin 2.83 in 2019 as compared to 4.58 in 2018. This is because of the reduction in profit before tax and also the deferred tax has gone up by 68 lakhs. However, the company performance in 2019 in terms of manufacturing was better as compared to 2018, since in 2018 the other income was 121 lakhs as compared to 0.78 lakhs in 2019.
Return on networth and Compared to immediately previous financial year	8.92	5.83	Decrease by 34%	Return on net worth was 5.83% in 2019 as compared to 8.92% in 2018 these is because of the Low net profit in 2019. Net profit has gone down because in 2018 other income was 121 lakh while in 2019 it is 0.87 Lakhs and deferred tax liability which was 2.23 lakh in 2018 which is gone to 70.46 lakh in 2019.

Disclosure of Accounting Treatment

Your Company's financial statements for the year ended 31st March, 2019 are the financial statements prepared in accordance with Ind AS notified under the Companies (Indian Accounting Standards) Rules, 2015 and Companies (Indian Accounting Standards) Amendment Rules, 2016, as applicable. During the Financial Year, there was no change in the Accounting Treatment in preparation of Financial Statements.

Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Standalone Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India (ICAI) together with the independence requirements that are relevant to our audit of the standalone financial statements under the provisions of the Act and the Rules made thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the standalone financial statements.

Information Other than the Standalone Financial Statements and Auditor's Report Thereon

The Company's Board of Directors is responsible for the preparation of the other information. The other information comprises the information included in the Management Discussion and Analysis, Board's Report including Annexures to Board's Report, Business Responsibility Report, Corporate Governance and Shareholder's Information, but does not include the standalone financial statements and our auditor's report thereon.

Our opinion on the standalone financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the standalone financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the standalone financial statements or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Management's Responsibility for the Standalone Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these standalone financial statements that give a true and fair view of the financial position, financial performance, total comprehensive income, changes in equity and cash flows of the Company in accordance with the Ind AS and other accounting principles generally accepted in India. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the standalone financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the standalone financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Standalone Financial Statements

Our objectives are to obtain reasonable assurance about whether the standalone financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these standalone financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the standalone financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal financial controls relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the standalone financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the standalone financial statements, including the disclosures, and whether the standalone financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the standalone financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the financial statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the standalone financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

Annexure - B to the Auditors' Report
Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of PORWAL AUTO COMPONENTS LIMITED ("the Company") as of 31 March 2019 in conjunction with our audit of the Ind AS financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the Ind AS financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that:

- (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;
- (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and
- (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31 March 2019, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

Auditor's Report on Quarterly Financial Results and Year to Date Results of the Company Pursuant to the Regulation 33 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, as amended.

To

Board of Directors of

Porwal Auto Components Limited

1. We have audited the accompanying Statement of Standalone Audited Results of Porwal Auto Components Limited ("the Company"), for the quarter and year ended March 31, 2019 ("the Statement") attached herewith being submitted by the Company pursuant to the requirement of Regulation 33 of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, as amended by the Circular No. CIR/CFD/FCA/62/2016 dated July 5, 2016.

This Statement, which is the responsibility of the company's Management and approved by the Board of Directors, has been compiled from the related Standalone Ind AS Financial Statement which have been prepared in accordance with the Indian Accounting Standards prescribed under section 133 of the companies Act, 2013 read with relevant rules issued thereunder ('Ind-AS') and other accounting principles generally accepted in India. Our responsibility is to express an opinion on the statement based on our audit of such standalone financial statements.

2. We conducted our audit in accordance with the Standards on Auditing generally accepted in India. Those Standards requires that we comply with the ethical requirements and plan & perform the audit to obtain reasonable assurance about whether the statement is free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the Ind-AS Financial Statements. The procedures selected depend on the auditor's judgment, including the assessment of the risk of material misstatement of the Statement, whether due to fraud or error. In making those risk assessments, the auditor considers internal financial controls relevant to the company's preparation and fair presentation of the Statement in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control. An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of the accounting estimates made by the management, as well as evaluating the overall presentation of the statement.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide basis for our audit opinion.

3. In our opinion and to the best of our information and according to the explanations given to us, the statement:
 - i. is presented in accordance with the requirements of Regulation 33 of the SEBI (Listing Obligations and Disclosure Requirements) Regulation, 2015, as modified by the Circular No. CIR/CFD/FCA/62/2016 dated July 5, 2016; and
 - ii. gives a true and fair View in conformity with the aforesaid Indian Accounting Standards and other accounting principles generally accepted in India, of the net profit and total comprehensive Income and other financial information of the company for the year ended March 31, 2019.
4. The statement includes the results of the quarter ended 31st March 2019 being the balancing figure between audited figures in respect of the full financial year and the published year to date figures up to the third quarter of the current financial year which are subject to limited review by us.

The Group offsets tax assets and liabilities if and only if it has a legally enforceable right to set off current tax assets and current tax liabilities and the deferred tax assets and deferred tax liabilities relate to income taxes levied by the same tax authority.

During the year ended 31 March 2018 and 31 March 2017, the company has paid dividend to its shareholders. This has resulted in payment of DDT to the taxation authorities. The group believes that DDT represents additional payment to taxation authority on behalf of the shareholders. Hence DDT paid is charged to equity

borrowing cost and any other directly attributable costs of bringing an asset to working condition and location for its intended use. It also includes the present value of the expected cost for the decommissioning and removing of an asset and restoring the site after its use, if the recognition criteria for a provision are met.

Expenditure incurred after the property, plant and equipment have been put into operation, such as repairs and maintenance, are normally charged to the statements of profit and loss in the period in which the costs are incurred. Major inspection and overhaul expenditure is capitalized if the recognition criteria are met. When significant parts of plant and equipment are required to be replaced at intervals, the Company depreciates them separately based on their specific useful lives. Likewise, when a major inspection is performed, its cost is recognised in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognised in the statement of profit and loss as incurred.

Gains and losses on disposal of an item of property, plant and equipment are determined by comparing the proceeds from disposal with the carrying amount of property, plant and equipment, and are recognized net within other income/other expenses in statement of profit and loss.

An item of property, plant and equipment and any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the statement of profit and loss, when the asset is derecognised.

The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

(ii) Capital work in progress

Assets in the course of construction are capitalized in capital work in progress account. At the point when an asset is capable of operating in the manner intended by management, the cost of construction is transferred to the appropriate category of property, plant and equipment. Costs associated with the commissioning of an asset are capitalised when the asset is available for use but incapable of operating at normal levels until the period of commissioning has been completed. Revenue generated from production during the trial period is credited to capital work in progress.

(iii) Depreciation

Assets in the course of development or construction and freehold land are not depreciated. Other property, plant and equipment are stated at cost less accumulated depreciation and any provision for impairment. Depreciation commences when the assets are ready for their intended use. Depreciation is calculated on the depreciable amount, which is the cost of an asset less its residual value. Depreciation is provided at rates calculated to write off the cost, less estimated residual value, of each asset on Straight Line Basis over its expected useful life as per the rates prescribed under schedule II to the Companies Act, 2013 or re-assessed useful life based on technical evaluation as follows:

Factory Building	-	30 Years
Plant and Machinery	-	15 Years
Material Handling Equipment	-	8 Years
Tools and Patterns	-	8 Years
Electrical Installation	-	10 Years
Testing Equipments	-	10 Years
Auxiliary Equipment	-	8 Years
Furniture and Fixture	-	15 Years
Office Equipment	-	5 Years
Computer	-	3 Years
Vehicle	-	5 Years
Air Pollution Equipment	-	15 Years
Plant and Machinery	-	15 Years
Solar Plant	-	15 Years
Intangible Asset		Over the estimated life

Major inspection and overhaul costs are depreciated over the estimated life of the economic benefit derived from such costs. The carrying amount of the remaining previous overhaul cost is charged to the statement of profit and loss if the next overhaul is undertaken earlier than the previously estimated life of the economic benefit. When significant spare parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Depreciation methods, useful lives and residual values are reviewed at each financial year end and changes in estimates, if any, are accounted for prospectively.

c) Intangible assets

Intangible assets acquired are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and accumulated impairment losses.

The useful lives of intangible assets are assessed as either finite or indefinite. The Company currently does not have any intangible assets with indefinite useful life. Intangible assets are amortised over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset are reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortisation period or method, as appropriate, and are treated as changes in accounting estimates. The amortisation expense on intangible assets is recognised in the statement of profit and loss unless such expenditure forms part of carrying value of another asset.

Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the statement of profit and loss when the asset is derecognised.

d) Cash and cash equivalents

Cash and cash equivalent in the balance sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value. For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above.

e) Borrowing Costs

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the asset. All other borrowing costs are expensed in the period in which they occur. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds. Borrowing cost also includes exchange differences to the extent regarded as an adjustment to the borrowing costs.

f) Impairment of Non-financial assets

The Company assesses, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) fair value less costs of disposal and its value in use. Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a post-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators. The Company bases its impairment calculation on detailed budgets and forecast calculations, which are prepared separately for each of the Company's CGUs to which the individual assets are allocated. Impairment losses of continuing operations, including impairment on inventories, are recognised in the statement of profit and loss.

An assessment is made at each reporting date to determine whether there is an indication that previously recognised impairment losses no longer exist or have decreased. If such indication exists, the Company estimates the asset's or CGU's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised.

The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the statement of profit and loss.

g) Government Grants

Government grants are recognised where there is reasonable assurance that the grant will be received and all attached conditions will be complied with. When the grant relates to an expense item, it is recognised as income on a systematic basis over the periods that the related costs, for which it is intended to compensate, are expensed. When the grant relates to an asset, it is treated as deferred income and released to the statement of profit and loss over the expected useful lives of the assets concerned. When the Company receives grants of non-monetary assets, the asset and the grant are recorded at fair value amounts and released to statement of profit and loss over the expected useful life in a pattern of consumption of the benefit of the underlying asset. When loans or similar assistance are provided by governments or related institutions, with an interest rate below the current applicable market rate, the effect of this favourable interest is regarded as a government grant. The loan or assistance is initially recognised and measured at fair value and the government grant is measured as the difference between the initial carrying value of the loan and the proceeds received. The loan is subsequently measured as per the accounting policy applicable to financial liabilities.

h) Inventories

Inventories are valued at the lower of cost and net realisable value except scrap and by products which are valued at net realisable value. Costs incurred in bringing the inventory to its present location and condition are accounted for as follows:

Raw materials: cost includes cost of purchase and other costs incurred in bringing the inventories to their present location and condition. Cost is determined on weighted average basis.

Finished goods and work in progress: cost includes cost of direct materials and labour and a proportion of manufacturing overheads based on the normal operating capacity, but excluding borrowing costs. Cost is determined on FIFO basis. Net realisable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated costs necessary to make the sale. Obsolete inventories are identified and written down to net realisable value. Slow moving and defective inventories are identified and provided to net realisable value.

i) Taxation

Current income tax

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date. Current income tax relating to items recognised outside profit or loss is (either in other comprehensive income or in equity). Current tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

Deferred tax

Deferred tax is provided using the liability method on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date. Deferred tax liabilities are recognised for all taxable temporary differences, except when it is probable that the temporary differences will not reverse in the foreseeable future. Deferred tax assets are recognised for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilized. The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered. Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date. Deferred tax relating to items recognised outside profit or loss is (either in other comprehensive income or in equity). Deferred

tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity. Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

Sales/ value added taxes/ GST paid on acquisition of assets or on incurring expenses. Expenses and assets are recognised net of the amount of sales/ value added taxes paid/GST, except:

When the tax incurred on a purchase of assets or services is not recoverable from the taxation authority, in which case, the tax paid is recognised as part of the cost of acquisition of the asset or as part of the expense item, as applicable.

When receivables and payables are stated with the amount of tax included, the net amount of tax recoverable from, or payable to, the taxation authority is included as part of receivables or payables in the balance sheet.

j) Employee benefit schemes

(i) Short-term employee benefits

Employee benefits payable wholly within twelve months of receiving employee services are classified as short-term employee benefits. These benefits include salaries and wages, performance incentives and compensated absences which are expected to occur in next twelve months. The undiscounted amount of short-term employee benefits to be paid in exchange for employee services is recognised as an expense as the related service is rendered by employees.

Compensated absences:

Compensated absences accruing to employees and which can be carried to future periods but where there are restrictions on availment or encashment or where the availment or encashment is not expected to occur wholly in the next twelve months, the liability on account of the benefit is determined actuarially using the projected unit credit method.

(ii) Post-employment benefits

Gratuity

The company has obtained Group Gratuity Insurance policy from LIC of India to cover its Gratuity liability and is making annual payment of the liability calculated by them.

Provident Fund

Eligible employees of the Company receive benefits from a provident fund, which is a defined benefit plan. Both the eligible employee and the Company make monthly contributions to the provident fund plan equal to a specified percentage of the covered employee's salary.

k) Provision for liabilities and charges, Contingent liabilities and contingent assets

The assessments undertaken in recognising provisions and contingencies have been made in accordance with the applicable Ind AS. Provisions represent liabilities to the Company for which the amount or timing is uncertain. Provisions are recognized when the Company has a present obligation (legal or constructive), as a result of past events, and it is probable that an outflow of resources, that can be reliably estimated, will be required to settle such an obligation. If the effect of the time value of money is material, provisions are determined by discounting the expected future cash flows to net present value using an appropriate pre-tax discount rate that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability. Unwinding of the discount is recognized in the statement of profit and loss as a finance cost. Provisions are reviewed at each reporting date and are adjusted to reflect the current best estimate.

The Company has significant capital commitments in relation to various capital projects which are not recognized on the balance sheet. In the normal course of business, contingent liabilities may arise from litigation and other claims against the Company. Guarantees are also provided in the normal course of business. There are certain obligations which management has concluded, based on all available facts and circumstances, are not probable of payment or are very difficult to quantify reliably, and such obligations are treated as contingent liabilities and disclosed in the notes but are not reflected as liabilities in the financial statements. Although there can be no assurance regarding the final outcome of the legal proceedings in which the Company involved, it is not expected that such contingencies will have a material effect on its financial position or profitability. Contingent assets are not recognised but disclosed in the financial statements when an inflow of economic benefits is probable.

l) Foreign currency transactions

In the financial statements of the Company, transactions in currencies other than the functional currency are translated into the functional currency at the exchange rates ruling at the date of the transaction. Monetary assets and liabilities denominated in other currencies are translated into the functional currency at exchange rates prevailing on the reporting date. Non-monetary assets and liabilities denominated in other currencies and measured at historical cost or fair value are translated at the exchange rates prevailing on the dates on which such values were determined. All exchange differences are included in the statement of profit and loss except any exchange differences on monetary items designated as an effective hedging instrument of the currency risk of designated forecasted sales or purchases, which are recognized in the other comprehensive income.

m) Earnings per share

The Company presents basic and diluted earnings per share ("EPS") data for its equity shares. Basic EPS is calculated by dividing the profit and loss attributable to equity shareholders of the Company by the weighted average number of equity shares outstanding during the period. Diluted EPS is determined by adjusting the profit and loss attributable to equity shareholders and the weighted average number of equity shares outstanding for the effects of all dilutive potential equity shares.

n) Cash Flow Statement

Cash flows are reported using indirect method as set out in Ind AS - 7 "Statement of Cash Flows", whereby profit / (loss) before tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from operating, investing and financing activities of the Company are segregated based on the available information.

o) Research and development

Revenue expenditure towards research and development is charged to the statement of profit and loss in the year it is incurred. Capital expenditure on research and development related to property, plant and equipments is included in the cost of related property, plant and equipments.
