9. Management Discussion and Analysis Report :

9.1 Industry Structure and Development :

The past year has been a challenging year for the Textile Industry with lots of ups and downs. In spite of the above, the industry has been able to maintain its steady performance during the year under review. The recoveries in US, European and Asian economies is good for the Industry and will boost the exports to these economies. Textile Industry has played a key role in the country's progress over the years and the situation is likely to gain momentum in the times ahead. The Industry continues to hold a dominant position in country's economic structure because of its huge contribution towards employment generation.

No industry is free from normal business risk and concerns. Indian Textile Industry continues to face stiff competition from China, Bangladesh, Sri Lanka and other emerging economies. The relative competitiveness of Industry is dependent upon the raw cotton prices, exchange rates and prevalent interest rates regime. The primary raw material for the manufacturing of yarn is cotton with share of around 60% of total cost. Cotton being an agriculture produce, its supply and quality are subject to forces of nature i.e. Monsoon. Any increase in the prices of raw cotton will make the things difficult for the Textile Industry resulting weak demand and thin margins. Thus availability of raw cotton at the reasonable prices is crucial for the spinning industry.

Raw material costs have fairly stabilized during the year under review and are expected to remain stable. The recovery of the textile industry seems to be round the corner as domestic demand is expected to pick up this year on account of improved economic sentiments. In spite of the adverse market conditions prevailing in various businesses in which the Company operates, the overall performance of the Company during the year has improved compared to that of the previous year.

9.2 Opportunities and Treats :

There is confidence of a revival in global the economic outlook in the coming years though this view is not presently supported by economic fundamentals driven by higher economic growth in the advance economies and constrained by moderate growth in emerging markets.

A 'Make in India' campaign has been unveiled by the Prime Minister. The 'Make in India' scheme also puts in place the systems to address in a timely manner queries of potential investors. At present, the Government of India allows 100% Foreign Direct Investment (FDI) under the automatic route in the textile sector, subject to all applicable regulations and laws, which effectively backs the Make in India program for the textile and garment industry. Under the 'Make in India' initiative, investment opportunities for foreign companies and entrepreneurs are available across the entire value chain of synthetics, value-added and specialty fabrics, fabric processing set-ups for all kinds of natural and synthetic textiles, technical textiles, garments, and retail brands.

Changes in China's Textile Policy severely affected the country's export to that country. In spite of the above, we are of the firm opinion that the future of the Textile Industry is quite promising. We hope that with the recoveries in economies of U.S.A and European Union will propel the growth of the Textile Industry. Ever growing retailing sector and increased purchasing power of both urban and rural people, are still present in the economy and will lead to the growth of the Industry. The shifting of orders from China to India, due to various favourable factors will also help the Industry to increase its global share.

9.3 Segment-wise product-wise performance :

Company has successfully introduced wider product range. In particular, fine counts for Home textile and Shirting segments were successfully introduced and performing good. Specialty yarns like fluorescent yarns, flame retardant yarns were introduced and are doing well. Dyed yarn sale is maintaining consistent position.

Export to Middle east, Europe, South Africa is been initiated and is been going consistently.

Melange yarns for Undergarment and Night ware manufacturing industry were introduced successfully and are consistently doing well.

9.4 Business outlook :

The Company is taking all efforts to improve the quality of production and new products which yields better returns.

Broadening the Product and Customer base is the Theme followed for Business growth. Through exports, Company is also increasing its presence in International market. Company is also seriously looking out for Joint Ventures for Business growth in the areas of home

The Company wide awareness of risk management policies and practices is being inculcated to minimize the adverse effect of risks on the operating results and the subject of management of risks are being approached in a planned and co-ordinated manner. The acceptability of cotton as premium product can only enhance value perception of the yarn and knitwear we produce. The Company is accelerating this process by moving up the value chain by well researched and designed products. Company has taken several steps to introduce high performance fibres to move up in the value chain and in-house research in developing these products commercially has been a success.

9.6. Internal Control Systems and their adequacy :
