Letter from the CEO

It was another year that was characterized by an environment not conducive to the capital market. Challenges of global economic turmoil, inflation, high interest rates all contributed to the volatility and softness in the market. It was also instrumental in keeping the retail investor at bay. A further shift towards the derivatives segment put additional pressures on the Company's margins.

The current outlook looks a mixed bag. Inflationary pressures seem to have eased a bit, which would have shown some reduction in the interest rates. However, the current announcement of the Federal Reserve to scale down its stimulus program has created a turmoil in the financial markets. The rupee has weakened significantly against the US dollar and markets also reacted on cue. Gold prices moved south which created an appetite for investment, but at the cost of capital market investment.

One of the significant events in the future is the General Elections, and historically these have had a significant impact on the Capital Market in India. The markets will wait with baited breath on the outcome of these elections, which will determine the policy initiatives that may spur a revival in the Capital Markets.

Your Company too will wait and watch for these developments to pan out. To combat the pressures on margins your Company has aggressively ventured into the Retail Non Discretionary Wealth Management segment, by leveraging on it's existing network of clients. This coupled with a judicial control on costs has enabled your Company to post handsome profits in the fiscal year 2012-13 as opposed to a loss in the previous year. Continuing it's maxim of rewarding shareholders, your Company has declared 3 interim dividends of ₹ 1/- each on a face value of ₹ 2/- each for the fiscal year 2012-13.

I take this opportunity to thank all the shareholders and employees for reposing their faith in the Company in these times of uncertainty.

Thank you

Mr. Divyesh B. Shah
CEO, Indiabulls Securities Limited

Management Discussion and Analysis

Economic Review

Growth indicators for the Indian economy are showing signs of stabilization but the macro economic environment still remain challenging, particularly with regards to inflation. Government projects under implementation and real estate activity indicators picked up in the third quarter of 2012 and there was sequential improvement in the region's exports but the macro environment still remains stretched. There is a dark mood in the advanced economies, especially in Europe. The slower growth in the US and in the EU will have an adverse impact on the expansion of these markets for India's exports, both of goods and services. Domestic and external environment remain "challenging" however an improving growth in the agriculture sector, a slight pick-up in export growth and more stable private capex could help improve economic growth. The Government's recent reforms include allowing FDI in multi-brand retail, aviation, hiking diesel price, capping the number of subsidized LPG cylinders, opening up pension sector to foreign investment and raising the FDI cap in insurance to 49 per cent are a positive sign and such moves will support investment sentiment. The reforms which have begun in earnest, and are likely to progress on a number of different fronts, should help in boosting trend growth. The government is serious about ending the policy paralysis and the commitment that will speedup infrastructure projects will help the economy.

Capital Markets Overview

Despite volatile moves, the year 2012 has finally proved to be fruitful for the stock market with about 25 per cent appreciation in benchmark indices, but investors are looking forward to more stable times in 2013. The wish-list includes favourable policy initiatives by the government and regulators like RBI and SEBI, in addition to implementation of already proposed reforms, as also a better corporate earnings performance in 2013 to keep up the momentum. RBI's monetary policy looks as the biggest trigger for the Indian stock market in 2013. Going ahead, implementation of the proposed Direct Cash Transfer, if happens on the desired lines, would lift investor sentiment. Also, the much awaited GST could be a game-changer for the markets. The government's reform agenda has lifted investor sentiments and business confidence, which in turn have driven overseas investment inflow. The Indian stock market is likely to perform well in 2013 as it remains the most attractive relative to other countries.

Auditors' Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We conducted our audit in accordance with the Standards on Auditing issued by the Institute of Chartered Accountants of India. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and the disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Company's preparation and presentation of the consolidated financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of the accounting

estimates made by the Management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Deferred tax assets and liabilities are offset if such items relate to taxes on income levied by the same governing tax laws and the Company has a legally enforceable right for such set off. Deferred tax assets are reviewed at each balance sheet date for their realisability.

t) Leases:

Assets leased by the Company in its capacity as a lessee, where substantially all the risks and rewards of ownership vest in the Company are classified as finance leases. Each lease rental paid is allocated between the liability and the interest cost so as to obtain a constant periodic rate of interest on the outstanding liability for each year.

u) Share Issue Expenses:

Share issue expenses are adjusted against the Securities Premium Account to the extent of the balance available and thereafter, the balance portion is charged to the Statement of Profit and Loss, as incurred.

v) Borrowing Costs:

w) Segment Reporting:

The Company identifies primary segments based on the dominant source, nature of risks and returns and the internal organisation and management structure. The operating segments are the segments for which separate financial information is available and for which operating profit/loss amounts are evaluated regularly by the executive Management in deciding how to allocate resources and in assessing performance.

The accounting policies adopted for segment reporting are in line with the accounting policies of the Company. Segment revenue, segment expenses, segment assets and segment liabilities have been identified to segment on the basis of their relationship to the operating activities of the segments.

Revenue, expenses, assets and liabilities which relate to the Company as a whole and are not allocable to segments on reasonable basis have been included under "unallocated revenue / expenses / assets / liabilities".

x) Provisions, Contingent Liabilities and Contingent Assets:

These are reviewed at each balance sheet date and adjusted to reflect the current best estimates. Contingent liabilities are disclosed in the Notes. Employee Benefits:

Provident Fund, Gratuity and Long-Term Compensated Absences - disclosures as per Accounting Standard - 15 (Revised) - 'Employee Benefits' as notified by the Companies (Accounting Standards) Rules, 2006, as amended:

Contributions are made to Government Provident Fund and Family Pension Fund and other statutory funds which cover all regular employees eligible under the respective acts. Both the employees and the Company make predetermined contributions to the Provident Fund. The contributions are normally based on a certain proportion of the employee's salary. The Company has recognised an amount of ₹ 1,416,703 (Previous year ₹ 1,470,806) towards Employer's Contribution for the above mentioned funds.

Provision for unfunded Gratuity and Compensated Absences for eligible employees is based on an actuarial valuation carried out at the end of every financial year. Major drivers in actuarial assumptions, typically, are years of service and employee compensation. Commitments are actuarially determined using the 'Projected Unit Credit' Method. Gains / losses on changes in actuarial assumptions are accounted for in the Statement of Profit and Loss.

Note - 28**Earnings per Equity Share (EPS) :**

Disclosure in respect of Accounting Standard – 20 'Earnings Per Share' as notified under the Companies (Accounting Standards) Rules, 2006, as amended:

The basic earnings per Equity Share is computed by dividing the net profit/(loss) attributable to Equity Shareholders for the year by the weighted average number of Equity Shares outstanding during the reporting year. Diluted earnings per Equity Share is computed by considering the weighted average number of Equity Shares and also the weighted average number of Equity Shares that could have been issued on the conversion of all dilutive potential Equity Shares. The dilutive potential Equity Shares are adjusted for the proceeds receivable, had the shares been actually issued at fair value.

Dilutive potential Equity Shares are deemed converted as of the beginning of the year, unless they have been issued at a later date. The number of Equity Shares and potential dilutive Equity Shares are adjusted for the potential dilutive effect of Employee Stock Option Plan as appropriate.

Employee Benefits:

Provident Fund, Gratuity and Compensated Absences - disclosures as per Accounting Standard 15 (Revised) - 'Employee Benefits' as notified by the Companies (Accounting Standards) Rules, 2006, as amended:

Contributions are made to Government Provident Fund and Family Pension Fund and other statutory funds which cover all regular employees eligible under the respective acts. Both the employees and the Company make predetermined contributions to the Provident Fund. The contributions are normally based on a certain proportion of the employee's salary. The Company has recognised an amount of ₹ 481,561 (Previous year ₹ 673,063) towards Employer's Contribution for the above mentioned funds.

Provision for unfunded Gratuity and Compensated Absences for eligible employees is based on an actuarial valuation carried out at the end of every financial year. Major drivers in actuarial assumptions, typically, are years of service and employee compensation. Commitments are actuarially determined using the 'Projected Unit Credit' Method. Gains / losses on changes in actuarial assumptions are accounted for in the Statement of Profit and Loss.
