Operations and Financial Overview

Club Mahindra, the Company's flagship brand in the vacation ownership business, continued to drive the Company's business during the year. The Company added around twelve thousand new members to its vacation ownership business, taking the total membership to around 1.70 lakh at the end of the year. The new member addition was lower during the year for two reasons. On the macroeconomic front, high interest and inflation rates resulted in deterioration in consumer sentiments, which in turn affected discretionary purchase decisions. Second, changes in TRAI guidelines on telemarketing, which is an important way your Company reaches out to prospective customers, warranted a significant change in processes.

While room inventory increased marginally during the year, your Company's focus is now on addition of units by greenfield developments and expansion of existing properties. The Company's strategy of combining inventory acquisition with building inventory is being successfully leveraged. In line with this strategy the Company is currently undertaking four projects: Assanora (Goa), Kanha (Madhya Pradesh), Naldhera (Shimla), and second phase at Virajpet (Coorg). In addition the Company is also expanding its inventory in Munnar (Kerala) by adding additional units. Further, the project work related to second phase at Tungi (Lonavala) has been completed. These projects will add over 500 units to the Company's inventory over the next couple of years.

During the year, the Company continued with its strategy for following a 'Member first' philosophy, in order to provide priority focus and service to its members. This has resulted substantial improvement in the member satisfaction. These are reflected in continued improvement in post-holiday feedback scores, higher occupancy, substantial increase in unique member holidays and increase in members getting their first choice of holiday. Further, substantial investment in the technology during the last 2-3 years is yielding benefit in the overall functioning of the Company. These investments have added the cutting edge

to our member engagement, helping your company to create member delight.

Your Company during the year, unveiled a fresh new brand identity for its flagship brand – Club Mahindra, which is inspired by the thought ‘make every moment magical’. The thought reflects the ethos of the organisation which strives to create magical experiences for the entire family during their holidays.

In spite of subdued macroeconomic environment, the Company performed creditably during the year. Your Company's total income (including other income) grew at 12 per cent from Rs. 71,594 lakh in 2012-13 to Rs. 79,893 lakh in 2013-14. Profit After Taxes (PAT) declined from Rs. 10,698 lakh in 2012-13 to Rs. 9,453 lakh in 2013-14 mainly due to higher operational expenses (due to investment in systems, process and branding and higher depreciation (due to completion of greenfield projects). Diluted Earnings Per Share (EPS) of the Company was Rs. 10.75 in 2013-14, down from Rs. 12.75 in the previous year.

Your Company continued to carry out initiatives aimed at contributing to the socio-economic well being and development of the communities and the ecosystem that it interacts with. These are discussed in the Management Discussion and Analysis Report forming part of this Annual Report.

MANAGEMENT DISCUSSION AND ANALYSIS

Mahindra Holidays & Resorts India Limited ('Mahindra Holidays' or 'the Company') is a leading player in the leisure hospitality industry. It has established vacation ownership in India, and is the market leader in the business. It offers complete holiday solutions to its customers that are designed for the discerning and differentiated needs of families.

This chapter presents an overview of the markets and opportunities as well as the operational and financial performance of the Company during 2013-14. It also highlights Mahindra Holidays' strategy, and discusses important initiatives taken by the Company during the year to achieve its growth and performance objectives.

Introduction and Key Achievements

During 2013-14, Mahindra Holidays continued to work towards its strategic objective of ensuring that its growing membership gets the best holiday experience. It has registered substantial success in upgrading the membership experience across all customer touch points — be it in membership related transactions, holiday planning or at the resorts. The investments in technology and focus on improving and standardising its business processes have contributed significantly to this progress.

Here are the key highlights :

- Mahindra Holidays added around twelve thousand members to its vacation ownership business in 2013-14 — after considering the net cancellation the total membership base stood at around 1.70 lakh at the close of 2013-14.** This is creditable for two reasons. First, the subdued macroeconomic environment over the last couple of years along with high inflation and interest rates have resulted in a deterioration of consumer sentiment and affected discretionary purchase decisions. Second, changes in TRAI guidelines on telemarketing impacted customer acquisition through the channel under the prevailing processes. Although the Company has successfully introduced processes that meet the new guidelines and implemented newer ways to reach out to potential customers, it did constrain growth in the intervening period. These have been discussed in greater detail in the sections on 'Markets and Opportunities' and 'Business Performance'.
- With significant addition to the room inventory in the previous two years, the Company's focus in 2013-14 was on taking a longer-term view and building its own properties which can provide a more complete experience to our members. *Mahindra Holiday's is working on four greenfield and expansion projects across the country that will add around 500 units to the inventory in the next couple of years. It is also aggressively pursuing opportunities for greenfield projects and long-term leases in new areas and destinations, including international destinations preferred by Indian travellers.* Key developments have been covered in greater detail in the section on 'Properties and New Projects'.
- There has been a consistent increase in member satisfaction as a result of the initiatives carried out across all customer facing processes. These are reflected in improved Customer as Promoter (CAP) scores, post-holiday feedback scores, higher occupancy, increase in unique member holidays and increase in members getting their first choice of holiday.* Online services continued to grow during the year with the launch of a more robust website which now provides a more complete set of services to our members. This is especially important as a large majority of our current and potential membership base is active online. A more exhaustive discussion on these initiatives and their impact can be found in the sections on 'Member Relations' and 'Operations'.
- The significantly upgraded information technology (IT) infrastructure continued to actively contribute to the Company's growth and performance objectives.* Today, all operating locations and offices of the Company are connected to its ERP — exchanging real-time information and benefitting from an integrated IT infrastructure. During the year, the Company implemented a more robust CRM solution which has added significant efficiencies to customer acquisition and member relations processes. In another development, the Company launched a 'SellSmart', a technology enabled software solution, to provide potential customers with a compelling all-round view of the product. More on other important technology initiatives can be found in the section on 'Information Technology'.

The Company's performance during the year should be looked at in the context of the following two sets of factors.

- First, the adverse macroeconomic and policy environment. Mahindra Holidays markets a high-value discretionary product and the marked deterioration in consumer confidence did impact immediate performance.
- Second, realignment of its strategic priorities. Several initiatives were carried out during the year to address higher costs as a result of a larger member base as well as change in business processes. Besides, the company is looking to add substantial inventory through greenfield projects and expansions over the next couple of years. This will yield results in the long run.

The key financial results for 2013-14 were:

- Total income of the Company (including other income) grew at 12 per cent from Rs.715.9 crore in 2012-13 to Rs. 798.9 crore in 2013-14.*

- *Profit after tax (PAT) declined from Rs. 106.9 crore in 2012-13 to Rs. 94.53 crore in 2013-14. Net margin (PAT/Total income) stood at 12 per cent during 2013-14.*
- *Diluted EPS was Rs. 10.75 in 2013-14, down from Rs. 12.75 in the previous year.*

In the rest of this chapter, we will discuss in greater detail markets and opportunities, the operational and financial performance of the Company, initiatives in the areas of quality, sustainable development, and key functional areas such as human resources and information technology (IT). We shall end the chapter with a discussion on risks and concerns, and the outlook of the Company for the future.

Markets and Opportunities

Mahindra Holidays is a leading player in the leisure hospitality industry in India. Built on the vacation ownership model, the Company's principal business is to offer vacation ownership products that provide holiday entitlements to its members over the life of the product.

The addressable market for its products is urban families with a capability to incur discretionary expenditure. India has seen a significant growth in the size of this market in the last 10-15 years. Besides, the changing socio-economic character and lifestyles of a large sections of the society has resulted in an increased willingness to holiday for leisure, which was traditionally restricted to visiting family members or religious tourism. And, this is not limited to the younger generations. In fact, extended family holidays is an emerging trend which is likely to become a huge market in the next few years.

As far as the vacation ownership industry in India is concerned, the market penetration levels are still very low. If one were to look at the 11.5 million households who own a car as a proxy for the addressable market, only one in over thirty car owners has a vacation ownership membership. Similarly, if one compares the Indian vacation ownership industry with the US in terms of its share of the total hospitality sector, the scope for growth in India is over 5 times its current size. Clearly, there is a significant headroom for growth.

Business Performance

Mahindra Holidays believes that there is a significant potential for growth of vacation ownership business in India. During the year, it has taken several measures to tap this opportunity.

First, as most of its addressable market is very active online, the Company has made a conscious effort to focus on 'digital', both as a channel for future membership growth and to build its brand. As a result, response times to customer leads, queries or online mentions are being cut drastically.

Second, the Company is actively looking at moving sales and marketing beyond the top metropolitan and Tier I cities. During the year, the distribution network for the business was expanded from around 100 locations to 120 locations. Most of this expansion was in Tier II cities through third party distribution agents. While this will continue, the Company is also looking at increasing its footprint in international markets with sizeable Indian population.

Third, the Company launched 'SellSmart', a technology enabled software solution, across its entire sales and distribution network. This solution provides the sales person an interactive presentation on a touchscreen device to deliver potential customer with a compelling all-round view of the product. This has been very successful and improved the conversion rate of potential leads to members.

Finally, with the increase in satisfaction levels, the Company is looking at innovative ways to reach out to its members and seek their participation in promoting the product. New referral programme is being introduced for our members and is also offering to them opportunity to upgrade their membership level.

These measures implemented during the year have been successful in countering immediate challenges faced by the Company due to subdued demand and restrictions placed by TRAI on tele-marketing. But, greater benefits will accrue in 2014-15 as these measures remain active for the full financial year and the market situation improves.

During the year, the Company unveiled a fresh new brand identity for its flagship brand – Club Mahindra, which is inspired by the thought 'make every moment magical'. The thought reflects the ethos of the organisation which strives to create magical experiences for the entire family during their holidays.

Vacation Ownership

'Club Mahindra' is the Company's flagship product in the business, which entitles a week's holiday every year for a period of 10 or 25 years. Mahindra Holidays has recorded significant growth in the membership of its vacation ownership business over the last five years. During 2013-14, the Company added around twelve thousand members and taking the total membership to around 1.70 lakh as on 31st March, 2014.

The Company also markets a corporate product called 'Club Mahindra Fundays', which allows enrolled organisations to offer holiday entitlements to its employees or group vacations either as a part of their reward and recognition programme or as an employment perquisite or compensation. During the year, there was a substantial increase in the number of room nights utilised under the product. The overall performance of the product in terms of new business was also satisfactory.

Travel Business

'Club Mahindra Travel' is the travel integration service for 'Club Mahindra' members to take care of their entire range of travel needs. The business also provides a complete range of travel services including Meetings, Incentives, Conferences, and Exhibitions (MICE) for corporate clients.

Properties and New Projects

Mahindra Holidays currently has a pan-India presence through its extensive network of resorts across a cross-section of destinations including hill stations, beaches, backwaters, wildlives, forts and heritages. It is also present in international destinations such as Bangkok, Innsbruck (Austria), Kuala Lumpur and Dubai.

Building inventory and adding new destinations has been a key strategic objective for the Company. With significant addition to room inventory during the last couple of years, the focus during 2013-14 was on greenfield developments, which allows the Company to offer the complete Club Mahindra experience to its members.

Development activity is currently in progress for greenfield projects in Goa, Kanha (Madhya Pradesh) and Naldhera (Shimla) and expansion in our project at Virajpet (Coorg) and Munnar (Kerala). These will add around 500 units to the inventory in the next couple of years.

Apart from this, the Company has land bank at several destinations. Efforts are also on to expand this further. Other than this, some of our existing resorts also have additional land that can be utilised for further expansion of these properties like Ashtamudi and Munnar. This will provide the flexibility to build destinations and add customised inventory on an ongoing basis.

At the end of 2013-14, Mahindra Holidays had an inventory of around 2,400 units and offered its members a choice of 40 resorts – something that no other company in India currently offers to its customers.

Resort Operations

Efficient resort operations are central to delivering a holiday experience that meets the expectations of our members. This encompasses three key areas: infrastructure and facilities, holiday activities, and food and beverage (F&B).

Mahindra Holidays continued its initiative on institutionalising 'post-holiday feedback' as the chief mechanism to measure its success in delivering quality holiday experience to its customers and addressing their concerns. We are happy to report that the feedback scores have consistently improved during the year. Efforts are in progress to further improve the coverage of the feedback, both in terms of processes and resort locations.

As a Company marketing long duration products and services to its members, Mahindra Holidays ensures that quality of infrastructure and facilities are well maintained and upgraded regularly to meet customer expectations. Significant investments were made to upgrade around 300 rooms across multiple locations.

The Company has a unique distinction of having 15 RCI Gold Crown resorts in India, which bears testimony to the high standards of resort facilities, amenities and services that our resorts offer. Adding up to the RCI awards, we have achieved 15 Trip Advisor awards, 17 Holiday IQ awards during the year.

Holiday activities continues to be an important focus area. Depending on the terrain and type of holiday a destination offers, these activities are built around the themes of learning, adventure, relaxation and local experience. The resorts are being continuously upgraded with infrastructure as well as activities and experts who help members get the most out of the holiday.

Recently, we have inducted 30 young smart 'Fun Rovers' across the resorts after a 60 days intensive skill training in performing arts and other skills. Adventure activities such as Rock climbing, Zip line, Burma Bridge have been introduced in at least three of our resorts. A minimum of four pre-decided special events are conducted per month at our resorts on a regular basis. These efforts have resulted in a continuous growth in the PHF Scores and revenues from holiday activities.

In the area of food and beverage (F&B), efforts are continuously made to increase the variety and make the dining experience more exciting. This included introduction of a new concept called 'Outrageous Food' during the year. Activities are also regularly carried out to showcase local cuisine, celebrate festivals and events. Besides, new restaurants are being planned for larger resorts and the concept of 'Gourmet Express' is being rolled-out to all resorts. The Company has institutionalised internal training programmes to build the capabilities necessary to implement these changes.

Mahindra Holidays' resorts in Dharamsala, Kumbhalgarh, Puducherry, Munnar and Ooty received Branch Hygiene Code certification during the year. This certification is awarded upon meeting prescribed standards of hygiene in all activities related to F&B – from procurement of raw materials to preparation and serving it to the customers.

Member Relations

As a company that markets long-duration discretionary product, member satisfaction is the key to Mahindra Holidays' success. Responsive and effective member relations are critical to meet the Company's objectives in this regard. During 2013-14, the Company witnessed significant improvement in the overall member satisfaction levels. Deployment of technology and improvement in processes have played a defining role in this progress. Some of the key achievements are discussed below.

- **Online Services:** *The percentage of online bookings increased to 45 per cent in 2013-14, from 29 per cent in the previous year. During the year, the Company upgraded its website, which now offers all facilities available at the Company's call centre.* These have not only increased the transparency, but also increased the efficiency of booking process – contributing to a superior member experience.
- **Getting Members to Holiday:** This has been an important focus area for the Company, and was achieved through proactive campaigns and follow-up using voice calls, targeted email and SMS contact. During 2013-14, approximately 13,000 additional members availed a holiday through these campaigns and follow ups. Further, approximately 50 per cent of the active but the non-holidayed member base availed of their holidays due to these efforts. **Overall, there was a 17 per cent increase in the number of unique members availing a holiday over the previous year. As a**

result, while the effective inventory went up by 18 per cent, the total number of rooms occupied went up by 22 per cent. Occupancy rate increased by 2 percentage points to 83 per cent in 2013-14.

- **Choice of Holiday:** Another measure of success is the conversion rate of holidays once a member displays intent at any of the Company's contact points. *During the year, 90 per cent of members who demanded a holiday ended up holidaying with us at least once, up from 85 per cent in the previous year. Besides, regular sample checks reveal that 73 per cent of members got their first choice of holiday.* This is significant given the wide choice of resorts and dates that is available to the members and augurs well for the long-term satisfaction of our members.
- **New member on-boarding:** Another area where the Company achieved significant success was new member on-boarding. *Currently, over 94 per cent of membership kits are dispatched within 10 days of registration. Also, the Company reaches out proactively to help new members book their first holidays.*

As mentioned earlier, an increased focus of the Company to listen and understand member feedback and their concerns has been instrumental in realising these improvements. During 2013-14, there has been a sizeable increase in loyalty scores based on feedback received through both the Company's internal feedback generation mechanisms as well as external surveys. Overall member complaints, especially those related to reservations, have come down sharply over the year.

Human Resources (HR)

Mahindra Holidays is a pioneer in the vacation ownership industry in India. Given the highly specialised nature of the business and the large number of locations where we operate, attracting and nurturing the right people is at the core of the Company's strategy for success and growth. Accordingly, the HR function at Mahindra Holidays is organised into three key areas: customer acquisition, resort operations and corporate. During the year, the Company successfully inducted people to meet the needs of the growing business both from outside as well as through talent management and capability development initiatives aimed at development of existing employees. The key developments are discussed below.

Standardising the customer acquisition process is a key area of focus for the Company. In the previous year, it had established the 'Club Mahindra One Sales Process' which required all sales personnel to go through an intensive training and certification programme. During 2013-14, the Company build on it by extending it to all front line sales and tele-marketing executives. An intensive training programme was also implemented during the year to enable the launch of 'SellSmart' — which takes the

Company a step further in its journey of standardising the customer acquisition process. The coverage of these training programmes is 100 per cent of eligible executives.

In the area of resort operations, the Company introduced certification programmes of the prestigious American Hotel and Lodging Educational Institute (AHLEI) during the year. It already has institutionalised talent development programmes such as Club Mahindra Executive Trainee (CMET) programme for resort operations and Sous Chef Live for executive training in F&B. These programmes have been extremely successful and contributed significantly to the staffing of our new resorts in the last few years.

On the corporate and organisational development front, the Company regularly nominates executives to participate in development programmes and workshops to enhance their skills. Specific activities and programmes are undertaken to align the employees with the culture and business goals of the organisation. In line with this, the Company has institutionalised a strong employee engagement initiative which encourages them and recognises their achievements.

Overall employees received an average of 6 man days of training during the year. Going forward, focus will be on all increasing the coverage of executive training to cover all consumer facing roles within the Company. As on 31st March, 2014, there were 3,128 people on the rolls of the Company. Industrial and employee relations remained cordial throughout the year. Pursuant to the provisions of 'The Sexual Harrasment of Women at Workplace (Prvention, Prohibition and Redressal) Act, 2013' ["the Act"] and Rules framed thereunder, the Company has aligned its existing Policy to bring it in line with the provisions of the Act and has taken necessary steps to ensure compliance with the Act. During the year, one complaint was received by the Company and the same was disposed off in line with the Policy.

Quality

Mahindra Holidays has adopted the principles of Total Quality Management (TQM) under the banner of 'The Mahindra Way' — the Mahindra Group's integrated approach to promote excellence in all spheres of its operations. Through relentless focus on quality over the last few years, the Company has successfully institutionalised systems in the three critical business processes — resort operations, customer acquisition and member relations — and is in the process of extending it to other functions. Some of the key developments during the year are discussed below.

During the year, participation increased significantly with all businesses undertaking process improvement projects embracing principles of TQM, Kaizen and Daily Work Management (DWM). In an important development, DWM and Kaizen trainings are now being conducted by the in-house 'business excellence

team' which has resulted in better clarity and execution of the improvement projects. During 2013-14, the Company reached a significant milestone of completing 100 Mahindra Yellow Belt (MYB) projects.

Last year, the Company had established an audit system for its DWM and MYB projects to assess their implementation. Accordingly, audits were successfully carried out in 6 resorts during the year and follow-up actions were initiated where required. With the implementation of the audit and follow-up procedures, the Company has successfully established the plan-do-check-act (PDCA) cycle, which is a critical requirement for building a quality oriented organisations. Implementation of the audit systems will be extended to customer acquisition and member relations in 2014-15.

In a significant move, standardisation through implementation of Standard Operating Procedures (SOPs) was extended to Travel Business and Administration department during the year. Also, the SOPs for the resort operations were revised to reflect the current best practices and were made available on the Company's intranet. This was also followed-up with a round of audit. Similarly, the member relations department added 15 new SOPs in their processes by implementing change control system in line with the ISO 9000 standard.

Going forward, the focus for the organisation will be to move towards visual/video SOPs which will enable much more effective dissemination and training of employees in the business processes. This has already been initiated for resort operations. Given the importance of interactions between different functional areas, the Company is also actively looking to institutionalise concepts such as cross-functional teams, quality circles and Failure Mode and Effects Analysis (FMEA) to move forward on its journey of building a quality and systems driven organisation.

Information Technology (IT)

Mahindra Holidays' believes that technology today plays an active role in providing a competitive edge in the market and contributes directly to meeting business goals. Over the last few years, the Company has invested significant resources in large-scale upgrading of its IT architecture and is actively benefiting from these investments in all key spheres of its operations — be it customer acquisition, resort operations or member services.

The Company has a SAP based property management system and the finance module for its existing resorts. As a result, the inventory information flows in real-time, which has significantly improved the utilisation of assets. Today, all operating locations and offices of the Company are connected to its ERP — exchanging real-time information and benefitting from an integrated IT infrastructure. During the year, the Company implemented a more robust CRM solution called SIEBEL which has added significant efficiencies to customer acquisition and

member relations processes. It also carried out a data centre consolidation by moving to a Tier-3 data centre and established a disaster recovery site.

In the area of customer acquisition, we have already mentioned the launch of 'SellSmart'. As the solution is linked to the core IT infrastructure, all information provided by the customers is seamlessly exchanged through the solution for follow-up action. Besides, this also enables the Company to monitor the efficacy of its sales process and at the same time deliver a consistent experience to our customers. In another initiative, the Company has revamped its digital leads management systems, so that all leads generated on the internet are now responded in less than two working hours.

The Company also upgraded its website during the year, which now is not only faster, but also offers almost all facilities available at the Company's call centre. Travel Business of the Company is now integrated with the Club Mahindra website. These online features such as managing membership account, holiday bookings, payments, amendments and utilisation of vouchers have been very popular with the members. The impact of these changes on member satisfaction has already been presented in the section on 'Member Relations'.

Corporate Social Responsibility (CSR)

As a part of the Mahindra Group, your Company has been at the forefront of taking affirmative action as a responsible organisation that seeks to contribute to the socio-economic well-being and development of the communities and the ecosystem that it interacts with in carrying out its business.

In recognition of its efforts, Mahindra Holidays received the Rotary Binani Zinc CSR Excellence Award for the year 2013-14.

Apart from working with local NGOs and contributing resources for socially relevant projects, the Company also encourages community service by its employees by involving them in the implementation of these CSR activities through its 'Employee Social Options Programme'. *During the year, employees volunteered 12,725 man hours on CSR initiatives.* Some of these were:

- **Education:** The Company sponsored the education of 1,119 girls through the "Nanhi Kali" project. In activities carried across its resort locations, educational material and amenities were provided to underprivileged students and schools, training and development programmes were carried out for self-help groups and youth, information sessions were carried out in the areas of career awareness and opportunities, personal grooming, hygiene, cleanliness and safety.
- **Environment:** Around 36,000 trees were planted during the year as a part of 'Mahindra Hariyali' — an initiative of Mahindra Group for tree plantation. Awareness

programmes are regularly carried out to sensitise the local communities on environmental issues and promoting green practices. Other regular initiatives included cleanliness drives on beaches and other ecologically sensitive areas, and 'Say No To Plastic' campaign — all of which were carried out at several locations.

- **Health:** The Company regularly carries out blood donation and medical check-up camps, awareness sessions in the areas of health, natural remedies, and HIV/AIDS to benefit the local communities in which it operates. Several such activities were carried out across most of the Company's resorts.

Sustainability

Sustainable development aims at achieving economic growth and improvements in well-being while preserving the natural resources and ecosystem for future generations. As a part of the Mahindra Group, the Company recognises the importance of sustainability, and is committed to conserve the ecological integrity of its locations through responsible business practices, and by greater accountability and transparency.

Mahindra Holidays' initiatives in this sphere are carried out in line with a five-year 'Sustainability Roadmap', which identifies the key areas of focus and parameters that will be tracked

to measure the progress of the Company in its sustainability journey. Some of the key areas that have been identified for implementing sustainable practices include conservation of biodiversity, environment, energy and water as well as sourcing and community development.

During the year, significant number of activities were carried out across resort locations in these areas. These include use of solar power; environment-friendly, energy and water saving equipment; timers and motion sensors for lighting of pathways and common areas; eco-friendly bio-block sewage treatment plants and organic waste pulveriser for wet garbage disposal. Awareness drives were conducted for the employees at resorts about climate change, environment and biodiversity. Training programmes for segregation of waste were successfully implemented at several resort locations.

The Company actively participates in the Mahindra Group's journey for Corporate Sustainability Reporting. The 'Sustainability Report' of the Group is prepared in accordance with the internationally accepted framework specified by the Global Reporting Initiative (GRI). This framework sets out the principles and indicators that should be used to measure and report economic, environmental and social performance. During 2013-14, several large resorts of the Company participated in sustainability reporting of the Group.

Table 1 presents the abridged profit and loss statement of the Company as a standalone entity. Here are the key highlights of the financial performance.

- Total income, which includes both operating and other income, grew at 12 per cent from Rs. 716 crore in 2012-13 to Rs. 799 crore in 2013-14. In spite of a decline in the number of net member addition during 2013-14 as compared to 2012-13, the growth is primarily on account of increase in annuity based income and increase in F&B revenue. The growth in income is partially compensated by decrease in securitisation income from Rs. 11.61 crore in 2012-13 to Rs. 3.77 crore in 2013-14.
- Operating and other expenses grew at 16 per cent from Rs. 534 crore in 2012-13 to Rs. 619 crore in 2013-14. The key elements of this increase are resorts operation cost which in line with increase in revenue from resorts, upgrading of current resorts and marketing expenses on account of launch of new brand identity.
- Depreciation grew by Rs. 17 crore from Rs. 21.19 crore in 2012-13 to Rs. 38.03 crore in 2013-14. The increase is in primarily on account of SAP implementation and completion of projects at various locations.
- Profit after tax (PAT) declined from Rs. 107 crore in 2012-13 to Rs. 95 crore in 2013-14. Diluted EPS was Rs. 10.75 in 2013-14, down from Rs. 12.75 in the previous year.

Mahindra Holidays continues to be a zero long-term debt company. The liquidity situation of the Company remained comfortable during the year.

Internal Controls

The Company has an adequate internal control system, commensurate with the size and nature of its business. The system is supported by documented policies, guidelines and procedures to monitor business and operational performance which are aimed at ensuring business integrity and promoting operational efficiency.

The Company has an internal audit function. However, given the size of its operations in terms of number of resort locations and nature of its business, it also uses independent audit firms to conduct periodic internal audits in line with an audit plan that is drawn at the beginning of the year. This audit plan is approved by the Audit Committee and the Board of Directors. The scope of the exercise includes ensuring adequacy of internal control systems, adherence to management policies and compliance with the laws and regulations of the country. Internal auditors also report on the implementation of their recommendations.

The Company has migrated to a new ERP and as the ERP system stabilises, appropriate controls are being embedded in processes and systems, to reduce the need and reliance for compensating manual controls. Concurrently, all existing controls (manual / system) are being comprehensively reviewed to further strengthen controls over financial reporting.

Reports of the internal auditors are placed every quarter before the Audit Committee of the Board of Directors, which reviews the adequacy and effectiveness of the internal control systems and suggests improvements for strengthening them.

Threats, Risks and Concerns

Mahindra Holidays has a risk management framework in place for identification of risks, assessment of their nature, severity and potential impact, and measures to mitigate them. This framework has established mechanisms for adequate and timely reporting and monitoring. Risks are reviewed periodically and updated to reflect the business environment and change in the size and scope of the Company's operations.

Macroeconomic Risks

The macroeconomic and policy environment in India continues to be subdued. The tight monetary policy followed by the RBI to check high inflation has kept interest rates high and affected India's growth prospects. These factor have created a negative consumer sentiment, especially when it comes to discretionary spend such as holidays.

The Company recognises these risks and has initiated measures to minimise their impact. This includes focusing on customer acquisition and experience and expanding the addressable market base. Other initiatives include renewed focus on vacation ownership product for corporate clients.

Operational Risks

Operational risks mainly relate to meeting customer expectations in terms of quality of service and maintaining a balance between the inventory of resorts and growth of customers. These assume significance given the long service duration of the key products. As there are multiple choices, there could be occasion where the first choice of holiday requested by the customers may not be available. The Company may not be able to make available the choice of location / dates as desired by customers on every occasion, which could result in dissatisfaction. Another operational risk is in the ability to consistently attract, retain and motivate managerial talent and other skilled personnel, especially in a high growth industry with unique characteristics. Further, some of the Company's resorts are located in remote areas and during any natural calamities situations like earthquake, flood, etc may affect the accessibility of the resort to the members and also affect the online connectivity with the resorts.

The Company has invested significant resources in systems and processes to ensure quality of service and overall experience of the customers to mitigate these risks. As noted earlier, there has been a consistent improvement across all parameters that we track for customer satisfaction. Transparent and automated booking process helps in reducing the level of customer dissatisfaction. Regarding room inventory, the Company will

continue to be judicious in the use of different options — fresh developments, expansions and leases — to meet the expectation of our customers and at the same time maintain a balance between the demand and supply. As far as talent management and retention is concerned, the management believes that its human resource practices enhance employee engagement and satisfaction to mitigate these risks.

Financial Risks

The Company's business involves significant investments in building resorts for its operations. These expose it to risks in terms of timely and adequate availability of funds at competitive rates to finance its growth. Besides, the Company offers its customers schemes to finance the purchase of the vacation ownership and similar products, which exposes it to credit risks. Another financial risk that the Company is exposed to is potential non-payment or delayed payment of membership instalments / Annual Subscription Fee by members resulting in higher outstanding receivables.

Currently, Mahindra Holidays has a strong and stable capital structure to raise capital for further expansion, if necessary. The Company undertakes comprehensive assessment of the profile of its customers and carefully monitors its exposure to credit risk. The Company is currently carrying out a comprehensive review of the payment and overdue collection process to streamline for better efficiency. This will aid the management to form an early informed judgement regarding the reasonableness or otherwise of ultimate collection of its receivables and take suitable action.

Regulatory and Legal Risks

Mahindra Holidays is exposed to regulatory and legal risks. These include cumbersome processes and risks relating to land acquisition, conversion of land for commercial usage and development of properties, environmental clearances and activities related to development of new resorts. There are also other regulatory and legal risks pertaining to tax proceedings, legal proceedings on properties, customer complaints, non-compliance of regulations including environmental regulations and those pertaining to the hospitality sector.

The Company has systems and controls in place to mitigate these risks and minimise instances of non-compliance.

Outlook

Even as the global economic environment showed signs of revival during the year, the situation in India continued to be subdued. The tight monetary policy followed by the RBI has kept interest rates high and which has hurt both investment and demand.

As far as Mahindra Holidays is concerned, it has been directly affected by the decline in this macroeconomic situation which resulted in lower consumer spending. Policy decisions such as changes in TRAI guidelines warranted immediate changes to the customer acquisition processes, which also affected the performance in the interim. In this environment, the Company has performed creditably. Our inventory position is comfortable and the greenfield investments are on track. Our member satisfaction levels — both for transactions and holiday experience — have improved consistently over the last couple of years.

Even as the current market situation poses challenges, we believe that there is significant room for growth. The focus, going forward, will be to capitalise on the opportunity leveraging the scalability that the Company has achieved through its investments in technology and processes. In line with this, the Company has taken concrete steps to build alternate channels and tap newer markets. Therefore, the outlook for 2014-15 is optimistic.

Cautionary Statement

Certain statements in the Management Discussion and Analysis describing the Company's objectives, projections, estimates, expectations or predictions may be forward-looking statements within the meaning of applicable securities laws and regulations. Actual results could differ from those expressed or implied. Important factors that could make a difference to the Company's operations include poor macroeconomic growth and consumer confidence, inability to add resorts and increase the inventory of room, cyclical demand and pricing in the Company's principal markets, changes in tastes and preferences, government regulations, tax regimes, economic development within India and other incidental factors.

Corporate Governance Report

Corporate Governance Philosophy

Mahindra Holidays & Resorts India Limited ('Mahindra Holidays' or 'the Company') is committed to sound corporate governance practices. This has been integral to the way the Company conducts its business since its inception. Mahindra Holidays' corporate governance philosophy is built around the values of transparency, professionalism and accountability. him to avail such benefits are recognized on an undiscounted basis and charged to the statement of profit and loss.

(b) Long term employee benefit plans

The Company has defined contribution and defined benefit plans. The plans are financed by the Company and in the case of some defined contribution plans employees also contribute to the plan.

Defined Contribution Plan

The Company's contribution to provident fund, superannuation fund and employee state insurance scheme are considered as defined contribution plans and are charged as an expense based on the amount of contribution required to be made and when services are rendered by the employees.

Defined Benefit Plan

For defined benefit plans in the form of gratuity fund, the cost of providing benefits is determined using the Projected Unit Credit method, with actuarial valuations being carried out at each balance sheet date. Actuarial gains and losses are recognised in the Statement of Profit and Loss in the period in which they occur. Past service cost is recognised immediately to the extent that the benefits are already vested and otherwise is amortised on a straight-line basis over the average period until the benefits become vested. The retirement benefit obligation recognised in the Balance Sheet represents the present value of the defined benefit obligation as adjusted for unrecognised past service cost, as reduced by the fair value of scheme assets. Any asset resulting from this calculation is limited to past service cost, plus the present value of available refunds and reductions in future contributions to the schemes.

(ix) Taxes on income:

Current tax is the amount of tax payable on the taxable income for the year as determined in accordance with the provisions of the Income Tax Act, 1961.

Deferred tax is recognised on timing differences, being the differences between the taxable income and the accounting income that originate in one period and are capable of reversal in one or more subsequent periods. Deferred tax is measured using the tax rates and the tax laws enacted or substantively enacted as at the reporting date. The carrying amount of deferred tax assets and liabilities are reviewed at each Balance Sheet date.

(x) Share issue expenses:

Expenses incurred in connection with issue of share capital are adjusted against securities premium account.

(xi) Borrowing Cost:

Borrowing cost that are attributable to the acquisition, construction or production of

NOTES FORMING PART OF THE FINANCIAL STATEMENTS FOR THE YEAR ENDED MARCH 31, 2014

qualifying asset are capitalized as part of cost of such asset till such time as the asset is ready for its intended use or sale. A qualifying asset is an asset that necessarily requires a substantial period of time to get ready for its intended use or sale. All other borrowing costs are recognised as expenses in the period in which they are incurred.

(xii) Impairment of assets

The carrying values of assets/cash generating units at each balance sheet date are reviewed for impairment. If any indication of impairment exists the recoverable amount of such asset is estimated and impairment is recognised, if the carrying amount of these assets exceed their recoverable amount. The recoverable amount is the greater of the net selling price and their value in use. Value in use is arrived at by discounting the future cash flows to their present values based on an appropriate discount factor. When there is indication that an impairment loss recognised for an asset in earlier accounting period no longer exists or may have decreased, such reversal of impairment loss is recognised in the statement of profit and loss, except in the case of re-valued asset.

(xiii) Cash and cash equivalents:

Cash comprises cash on hand and demand deposits with banks. Cash equivalents are short-term balances (with an original maturity of three months or less from the date of acquisition), highly liquid investments that are readily convertible into known amounts of cash and which are subject to insignificant risk of changes in value.

(xiv) Cash flow statements:

Cash flows are reported using the indirect method, whereby profit/(loss) before extra-ordinary items and tax is adjusted for the effects of transactions of non cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flow from operating, investing and financing activities of the company are segregated based on the available information.

(xv) Provision & contingencies:

A provision is recognised when the Company has a present obligation as a result of past events and it is probable that an outflow of resources will be required to settle the obligation in respect of which reliable estimate can be made. Provisions (excluding retirement benefits) are not discounted to their present value and are determined based on the best estimate required to settle the obligation at the Balance sheet date. These are reviewed at each Balance Sheet date and adjusted to reflect the current best estimates. Contingent Liabilities are disclosed in the notes.

(xvi) Earnings per share:

Basic earnings per share is computed by dividing the profit / (loss) after tax (including the post tax effect of extraordinary items, if any) by the weighted average number of equity shares outstanding during the year. Diluted earnings per share is computed by dividing the profit / (loss) after tax

(including the post tax effect of extraordinary items, if any) as adjusted for dividend, interest and other charges to expense or income relating to the dilutive potential equity shares, by the weighted average number of equity shares considered for deriving basic earnings per share and the weighted average number of equity shares which could have been issued on the conversion of all dilutive potential equity shares. Potential equity shares are deemed to be dilutive only if their conversion to equity shares would decrease the net profit per share from continuing ordinary operations. Potential dilutive equity shares are deemed to be converted as at the beginning of the period, unless they have been issued at a later date. The dilutive potential equity shares are adjusted for the proceeds receivable had the shares been actually issued at fair value (i.e. average market value of the outstanding shares). Dilutive potential equity shares are determined independently for each period presented. The number of equity shares and potentially dilutive equity shares are adjusted for share splits / reverse share splits and bonus shares, as appropriate.

(xvii) Leases:

Assets leased by the Company in its capacity as a lessee, where substantially all the risks and rewards of ownership vest in the Company are classified as finance leases. Such leases are capitalised at the inception of the lease at the lower of the fair value and the present value of the minimum lease payments and a liability is created for an equivalent amount. Each lease rental paid is allocated between the liability and the interest cost so as to obtain a constant periodic rate of interest on the outstanding liability for each year.

Lease arrangements where the risks and rewards incidental to ownership of an asset substantially vest with the lessor are recognised as operating leases. Lease rentals under operating leases are recognised in the Statement of Profit and Loss on a straight-line basis.

(xviii) Insurance claims:

Insurance claims are accounted for on the basis of claims admitted / expected to be admitted and to the extent that the amount recoverable can be measured reliably and it is reasonable to expect ultimate collection.

(xix) Service tax input credit:

Service tax input credit is accounted for in the books in the period in which the underlying service received is accounted and when there is no reasonable certainty in availing / utilising the credits.

(xx) Operating cycle:

Based on the nature of services / activities of the Company and the normal time between acquisition of assets and their realisation in cash or cash equivalents, the Company has determined its operating cycle as 12 months for the purpose of classification of its assets and liabilities as current and non-current.

2 Significant Accounting Policies

(i) Basis for preparation of accounts:

The consolidated financial statements of Mahindra Holidays & Resorts India Limited ('the Company') and its subsidiaries have been prepared in accordance with the Generally Accepted Accounting Principles in India (Indian GAAP) to comply with the Accounting Standards notified under the Companies (Accounting Standards) Rules, 2006 (as amended) and the relevant provisions of the Companies Act, 1956. The financial statements have been prepared on accrual basis under the historical cost convention. The accounting policies adopted in the preparation of the financial statements are consistent with those followed in the previous year.

liabilities (including contingent liabilities) and the reported income and expenses during the year. The management believes that the estimates used in preparation of the financial statements are prudent and reasonable. Future results could differ due to these estimates and the differences between the actual results and the estimates are recognised in the periods in which the results are known / materialise.

During the year, Divine Heritage Hotels Private Limited and Holiday on Hills Resorts Private Limited changed the method of depreciation from written down value method to straight line method with retrospective effect, to be in line with the Company's depreciation policy. Consequently, profit for the year is higher by ₹ 750.76 lakhs.

(b) Long term employee benefit plans

The Company has defined contribution and defined benefit plans. The plans are financed by the Company and in the case of some defined contribution plans employees also contribute to the plan.

Defined Contribution Plan

The Company's contribution to provident fund, superannuation fund and employee state insurance scheme are considered as defined contribution plans and are charged as an expense based on the amount of contribution required to be made and when services are rendered by the employees.

Defined Benefit Plan

For defined benefit plans in the form of gratuity fund, the cost of providing benefits is determined using the Projected Unit Credit method, with actuarial valuations being carried out at each balance sheet date. Actuarial gains and losses are recognised in the Statement of Profit and Loss in the period in which they occur. Past service cost is recognised immediately to the extent that the benefits are already vested and otherwise is amortised on a straight-line basis over the average period until the benefits become vested. The retirement benefit obligation recognised in the Balance Sheet represents the present value of the defined benefit obligation as adjusted for unrecognised past service cost, as reduced by the fair value of scheme assets. Any asset resulting from this calculation is limited to past service cost, plus the present value of available refunds

and reductions in future contributions to the schemes.

(ix) Taxes on income:

Income taxes are accounted for in accordance with Accounting Standard 22 on Accounting for Taxes on Income. Tax expense comprises both current and deferred tax. Current tax is determined as the amount of tax payable in respect of taxable income for the period using the applicable tax rates and tax laws. Deferred tax assets and liabilities are recognised, subject to consideration of prudence, on timing differences, being the difference between taxable income and accounting income, that originate in one period and are capable of reversal in one or more subsequent periods and are measured using tax rates enacted or substantively enacted as at the Balance Sheet date. The carrying amount of deferred tax assets and liabilities are reviewed at each Balance Sheet date.

(x) Share issue expenses:

Expenses incurred in connection with issue of share capital are adjusted against securities premium account.

(xi) Borrowing Costs:

Borrowing costs that are attributable to the acquisition, construction or production of qualifying asset are capitalized as part of cost of such asset till such time the asset is ready for its intended use or sale. A qualifying asset is an asset that necessarily requires a substantial period of time to get ready for its intended use or sale. All other borrowing costs are recognized as expenses in the period in which they are incurred.

(xii) Impairment of assets:

The carrying values of assets/cash generating units at each balance sheet date are reviewed for impairment. If any indication of impairment exists the recoverable amount of such asset is estimated and impairment is recognised, if the carrying amount of these assets exceed their recoverable amount. The recoverable amount is the greater of the net selling price and their value in use. Value in use is arrived at by discounting the future cash flows to their present values based on an appropriate discount factor. When there is indication that an impairment loss recognised for an asset in earlier accounting period no longer exists or may have decreased, such reversal of impairment loss is recognised in the statement of profit and loss, except in the case of re-valued asset.

NOTES FORMING PART OF THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED MARCH 31, 2014

(xiii) Cash and cash equivalents:

Cash comprises cash on hand and demand deposits with banks. Cash equivalents are short-term balances (with an original maturity of three months or less from the date of acquisition), highly liquid investments that are readily convertible into known amounts of cash and which are subject to insignificant risk of changes in value.

(xiv) Cash flow statements:

Cash flows are reported using the indirect method, whereby profit/(loss) before extra-ordinary items and tax is adjusted for the effects of transactions of non cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flow from operating, investing and financing activities of the Company are segregated based on the available information.

(xv) Provision & contingencies:

A provision is recognised when the Company has a present obligation as a result of past events and it is probable that an outflow of resources will be required to settle the obligation in respect of which reliable estimate can be made. Provisions (excluding retirement benefits) are not discounted to their present value and are determined based on the best estimate required to settle the obligation at the Balance sheet date. These are reviewed at each Balance Sheet date and adjusted to reflect the current best estimates. Contingent Liabilities are disclosed in the notes.

(xvi) Earnings per share:

Basic earnings per share is computed by dividing the profit / (loss) after tax (including the post tax effect of extraordinary items, if any) by the weighted average number of equity shares outstanding during the year. Diluted earnings per share is computed by dividing the profit / (loss) after tax (including the post tax effect of extraordinary items, if any) as adjusted for dividend, interest and other charges to expense or income relating to the dilutive potential equity shares, by the weighted average number of equity shares considered for deriving basic earnings per share and the weighted average number of equity shares which could have been issued on the conversion of all dilutive potential equity shares. Potential equity shares are deemed to be dilutive only if their conversion to equity shares would decrease the net profit per share from continuing ordinary operations.

Potential dilutive equity shares are deemed to be converted as at the beginning of the period, unless they have been issued at a later date. The dilutive potential equity shares are adjusted for the proceeds receivable had the shares been actually issued at fair value (i.e. average market value of the outstanding shares). Dilutive potential equity shares are determined independently for each period presented. The number of equity shares and potentially dilutive equity shares are adjusted for share splits / reverse share splits and bonus shares, as appropriate.

(xvii) Leases:

Assets leased by the Company in its capacity as a lessee, where substantially all the risks and rewards of ownership vest in the Company are classified as finance leases. Such leases are capitalised at the inception of the lease at the lower of the fair value and the present value of the minimum lease payments and a liability is created for an equivalent amount. Each lease rental paid is allocated between the liability and the interest cost so as to obtain a constant periodic rate of interest on the outstanding liability for each year.

Lease arrangements where the risks and rewards incidental to ownership of an asset substantially vest with the lessor are recognised as operating leases. Lease rentals under operating leases are recognised in the Statement of Profit and Loss on a straight-line basis.

(xviii) Insurance claims:

Insurance claims are accounted for on the basis of claims admitted / expected to be admitted and to the extent that there is no uncertainty in receiving the claims.

(xix) Service tax input credit:

Service tax input credit is accounted for in the books in the period in which the underlying service received is accounted and when there is no reasonable certainty in availing / utilising the credits.

(xx) Operating cycle:

Based on the nature of services / activities of the Company and the normal time between acquisition of assets and their realisation in cash or cash equivalents, the Company has determined its operating cycle as 12 months for the purpose of classification of its assets and liabilities as current and non-current.
