Surana Ventures Limited was incorporated as a Company Limited by shares on 08.11.2006 and obtained "Certificate of Commencement of Business" on 30.11.2006 from the Registrar of Companies, Andhra Pradesh.

During the year 2008, the Company entered into the business of manufacture of solar energy systems with focus on solar PV Modules. In the same year, the Company became Joint Venture Company of M/s. Surana Telecom And Power Limited and M/s. Bhagyanagar India Limited.

During the year 2009-2010, a Scheme of arrangement was entered by the Company with M/s Surana Telecom And Power Limited which was sanctioned by Hon'ble High Court of A.P. on 28.06.2010 and became effective on 28.07.2010, pursuant to which the "Solar Undertaking" was fused with the Company.

The financial year 2010-11 was year of consolidation and growth. The de-merger scheme was successfully implemented after obtaining requisite approvals. The shares of the Company were listed on Stock Exchanges w.e.f. 7th January, 2011. The company achieved a net turnover of ₹ 102.33 Crores during the year as against ₹ 29.33 Crores in previous year (6 month working).

1. SOLAR PV MODULES:

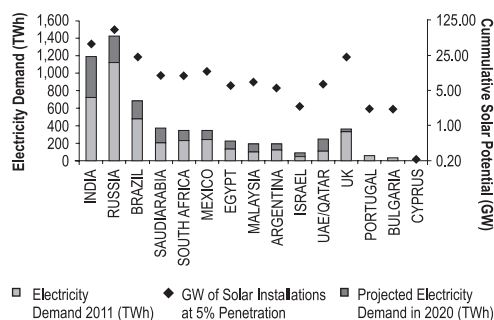

1.1 INTRODUCTION:

The Company has manufacturing units at Fabcity, SEZ, Hyderabad and Cherlapally, Hyderabad. The manufacturing unit at Cherlapally has installed capacity of 40 MW and the manufacturing unit at Fabcity has installed capacity of 20 MW for manufacture of 'Solar Photovoltaic Modules'. The Company's products are sold under the brand 'Surana Ventures' in the domestic market. It has system-driven processes for manufacturing products and operations, following quality process at every stage to ensure delivery of high quality products and services. The Company is manufacturing / assembling the following solar products:

- Solar Photovoltaic Modules
- Solar Street Light
- Solar Lantern
- Solar Emergency Light
- Solar Charge Controllers
- Solar Home Lighting

1.2 INDUSTRY ANALYSIS:

According to the latest Indian Solar Compass, India's solar industry has got off to a successful start this year, with a large number of power purchase agreements (PPAs) having been signed. The solar PV market of 2011 will also be more diverse than it has been before. Today, India finds itself on the path of becoming one of the leading nations in the solar energy sector. The government is taking steps towards implementing large MW scale solar power projects and is poised to position itself as one of the world's major solar producer. Effective utilization of India's solar potential lies in the successful implementation of the Jawaharlal Nehru National Solar Mission (JNNSM) by the government.

The average number of sunny days in India circulates around 300 days per year and due to the high sun radiation particularly in the south and the center of the country, the potential for solar power is extremely high and makes India a favorite destination for domestic and international Solar PV investments. As India plans to have installed 20GW of solar power by 2022 - equaling to 12 percent of the country's total energy share then and 200 GW by 2050 (project to be the biggest Solar PV market by then), there is still much to do since the currently installed capacity stood at about 12MW by the end of 2010. Majority of the states are deploying PV power plants and with the implementation of the National Solar Mission, it is expected that, the annual PV installed capacity will grow at a Compound Annual Growth Rate (CAGR) of around 44% during

2010-2013 to reach 900 MW by 2013 end. The recent (December 2010) PPA agreements with the state-run power distributor Gujarat Urja Vikas Nigram (GUVNL) about the construction of a 500 MW Solar Power Plant is clear sign that India's domestic Companies have recognized the governmental encouragement and promising business opportunities with regard to India's Solar PV market in 2011.

The government is eager to increase the solar share by concurrently improving infrastructural conditions in the country especially products like solar water heating systems and solar street lights. Another important business for 2011 will be solar home systems.

Still more than 40% of households in India, mainly in rural areas, lack access to electricity and are bound to be benefiting from the Indian government's efforts to promote electrification and increasing the share of solar power. Apart from large investments in solar power plants and the mandatory modification of governmental buildings with solar technology, the demand for solar off-grid systems will be growing regarding the many remote and un-electrified rural areas and the government's willingness to achieve full electrification soon. However, only cost effective products that can compete with the domestic low-cost solar products in India will have a chance to get into the rural areas.

1.3 BUSINESS OUTLOOK:

The Company produces Solar Energy Systems with the focus on Solar Photovoltaic PV Modules with the best price performance ratio in the Indian market and has flexible manufacturing facility to produce according to the customer's need. The Company provides the world with Solar Products which enable green energy to be used wherever it is needed. Lighting Systems like - Home Lighting, Street Lighting, Solar Lanterns, etc. The use of high-quality Solar Cells and an ISO 9001 certified production line result in Solar PV Modules of outstanding quality which fulfill the requirements of IEC 61215, certified by EuroTest and TUV.

The solar business is opening up due to announcement of National Solar Mission and state wise solar policy announced by some of the State Governments. Applications have been finalized for allotment of 100 MW of Small and Rooftop power plants under National Solar Mission. Apart from

the same, Government of Gujarat has signed PPA for about 500 MW. Policy Guidelines has been announced by MNRE for inviting expression of interest for setting up 150 MW Grid-connected Solar PV Power Plants under National Solar Mission.

These policy announcements will see an additional demand for 500 MW of modules in 2011-12. With these developments the Company expects to achieve a turnover of about ₹ 220 crores in the year 2011-12.

The Company started setting up the following manufacturing processes to consolidate company's presence in export market, to obtain certain certifications for modules to be approved for power projects and towards backward integration of the manufacturing process:

1. Backward integration by way of installing 35 MW PV Cell line from Germany at a cost of ₹ 90 crores (appx)
2. Instalation of fully automated Solar Module Plant at a cost of ₹ 10 crores (appx).

The setting up of cell plant is also essential as under the guidelines announced under National Solar Mission, use of cells manufactured in India has been mandated under next phase of capacity addition.

The company has placed orders for 35 MW Cell line with M/s. Centrotherm Photovoltaics AG, Germany. The auxiliary facilities and utilities including building shall be created by M/s. MW High Tech Project (I) Pvt.Ltd. The expected date of commencement of trial run is October, 2011.

2. NON CONVENTIONAL ENERGY:

2.1 INTRODUCTION:

India's energy consumption is increasing at one of the fastest rates in the world due to population growth and economic development. As a part of its Corporate Social Responsibility and in view raising global concerns over Global warming, the Company in the year 2009-10 has forayed into the non conventional energy sector with a wind power project with an initial installed capacity of 1 MW at Tiruvaveli, Tamilnadu State. The Company is committed to its social responsibility and endeavours to consistently expand its generation capacity. In 2009-10 the Company has added another 1.65 MW Wind Turbine Generator at Satara, Maharashtra State, making the total installed capacity at 2.65MW/Annum.

In 2010-11, The Company has installed 0.75 MW Wind Turbine Generator at Tenkasi,

Tamilnadu state which was commissioned on 29.09.2010. This takes the overall installed capacity to 3.40 MW.

2.2 INDUSTRY ANALYSIS:

Today India is the fifth largest Wind energy producer in the world. Wind energy is the fastest growing renewable energy source with a cumulative deployment of over 13,000 MW capacity, it accounts for nearly 70% of the installed capacity in the renewable energy sector in the country. A cumulative capacity of 12,009 MW has been set up as on June 2010, with an estimated potential in India of 65-70 GW. The total potential for Wind Power in India was first estimated at around 45 GW. The sector is growing rapidly and we are likely to achieve a capacity addition of 2000 MW in this year.

Electricity demand has continuously outstripped production, and a peak energy shortage of around 12.7% prevailed in 2009-10. To meet this shortfall as well as the National Electricity Policy target of 'Electricity for All by 2012, the cleanest options available to India are Renewable Energy Technologies (RETs). The wind power development in the next five years (2010-2014) is expected to develop with a varying capacity addition between 2,500 MW and 4,000 MW annually. The Planning Commission projects the installed capacity to reach approximately 40,000 MW by the year 2022.

Wind energy is continuing to grow steadily in India. In 2009, 1,271 MW of new wind generating capacity was installed, taking the cumulative figure up to more than 12 GW, representing an annual growth of 13%. In addition, a trend towards small customized windmills for households has been evident with a market growth of 30%.

Wind power in India has been concentrated in a few regions. Especially the southern state, Tamil Nadu maintains its position as the state with the largest wind power installation, with 4,906 MW installed as of March 2010. Although Tamil Nadu accounts for approximately 40% of total installed capacity in the country, other states have started to catch up. This is partly driven by new policy measures and partly driven by the fact that already 90% of gross potential in Tamil Nadu is explored. Interesting states to look at are Karnataka (capacity availability 10 GW), Gujarat (8.7 GW), Andhra Pradesh (8.8 GW), Rajasthan (3.8 GW) and Maharashtra (2.5 GW).

In order to meet the rising energy demand, power generation capacity must increase to nearly 800,000 MW by 2031-32, from the current capacity of around 160,000 MW. With India facing an acute energy scarcity, which is hampering its industrial growth and economic progress, it is essential to tackle the energy crisis through judicious utilization of the abundant renewable energy resources, such as wind. Favourable government policies and incentives are the crucial key drivers in the Wind Sector.

2.3 BUSINESS OUTLOOK:

The Company currently has an overall installed capacity of 3.40 MW comprising of 3 wind turbines of 1 MW, 1.65 MW and 0.75 MW capacity respectively. During the current financial year, the Company expects to generate the same level of revenue as of the previous year.

3. RISKS AND CONCERNS

The Company's businesses and operations are subject to a variety of risks and uncertainties which are no different from any other company in general and our competitors in particular. Such risks are the result of both the business environment within which the Company operates and other factors over which there is little or no control. These risks can be categorised as operational, financial, environmental, health and safety, political, market-related and strategic risks. The Company has sufficient risk management policies in place that act as an effective tool in minimising the various risks that the businesses are exposed to during the course of their day-to-day operations as well as in their strategic actions.

4. INTERNAL CONTROL SYSTEM AND ITS ADEQUACY

The Company has adequate Internal Control Systems and Procedures with regard to purchase of Stores, Raw Materials including Components, Plant and Machinery, equipment, sale of goods and other assets. The Company has clearly defined roles and responsibilities for all Managerial positions and all operating parameters are monitored and controlled.

21 . Significant Accounting Policies and Notes on Accounts Forming Part of Balance Sheet and Profit & Loss Account

21 A. Significant Accounting Policies

i. Basis of Preparation of Financial Statements.

The financial statements are prepared under the Historical cost convention with the generally accepted accounting principles in India and the provisions of the Companies Act, 1956.

ii. Use of Estimates.

The Preparation of Financial Statements requires estimates and assumptions to be made that effect the reported amount of assts and liabilities on the date of financial statements and reported amount of revenues and expenses during the reporting period. Difference between the actual results and estimates are recognized in the period in which the results are known / materialized.

iii. Own Fixed Assets.

Fixed Assets are stated at cost net of modvat / cenvat / value added tax , less accumulated depreciation and impairment loss, if any. Any costs, including financing costs till commencement of commercial production, net charges on foreign exchange contracts and adjustments arising from exchange rate variations to the fixed assets are capitalized.

iv. Leased Assets

Premium Paid on Leased Assets is amortised over the lease period and the annual lease rentals are charged to Profit and Loss Account in the year it accrues.

v. Depreciation

Depreciation is provided on written down value method, except for Wind Power Plant for which Straight Line Method is followed, at the rate and in the manner prescribed in Schedule XIV to the Companies Act, 1956.

vi. Impairment of Assets

An asset is treated as impaired when the carrying cost of assets exceeds its recoverable

value. An impairment loss is charged to the Profit and Loss account in the year in which an asset is identified as impaired. The impairment loss recognized in prior accounting period is reversed if there has been a change in the estimate of recoverable amount.

vii. Investments

Current investments are carried at the lower of cost and quoted / fair value, computed category wise. Long Term Investments are stated at cost. Provision for diminution in the value of long-term investments is made only if such decline is other than temporary in the opinion of the management.

viii. Inventories

Items of Inventories are measured at lower of cost or net realizable value, after providing for obsolescence, if any. Cost of inventories comprises of all cost of purchase including duties and taxes other than credits under CENVAT and is arrived on First in First out basis. Semi Finished goods are valued at cost or net realizable value whichever is lower. Finished goods are valued at cost including excise duty payable or net realizable value whichever is lower. Cost includes Direct Material, Labour cost and appropriate overheads.

ix. Foreign Currency Transactions.

Transactions in foreign currency are recorded at the exchange rate, prevailing on the date of transaction or at the exchange rates under the related forward exchange contracts. Profit/Loss on outstanding Foreign Currency contracts have been accounted for at the exchange rates, prevailing at the year end rates as per FEDAI/RBI.

x. Employee Retirement / Terminal Benefits

The employees of the company are covered under Group Gratuity Scheme of Life Insurance Corporation of India. The premium paid thereon is charged to Profit and Loss Account. Leave Encashment liability is provided on the basis of best management

estimates on actual entitlement of eligible employees at the end of the year.

xi. Provision, Contingent Liabilities and Contingent Assets :

Provisions involving substantial degree of estimation in measurement are recognized when there is a present obligation as a result of past event and it is probable that there will be an outflow of resources. Contingent Liabilities which are not recognized are disclosed in notes. Contingent Assets are neither recognized nor disclosed in Statements.

xii. Turnover

Turnover includes sale of goods, services, sales tax, service tax and adjusted for discounts (net), excise duty. Inter-Unit sales are excluded in the Main Profit and Loss account.

xiii. Revenue Recognition in Case of Real Estate Transactions

Revenue in case of real estate transactions is made on the basis of concluded on contracts for sales and purchases.

xiv. Segment Reporting

Company's operating Businesses, organized & Managed unit wise, according to the nature of the products and services provided, are recognized in segments representing one or more strategic business units, that offer products or services of different nature and to different Markets.

Company's Operations could not be analyzed under geographical segments in considering the guiding factors as per Accounting Standard-17 (AS-17) issued by the Institute of Chartered Accountants of India.

xv. Provision for Taxation

Provision is made for Income Tax, estimated to arise on the results for the year, at the

current rate of tax, in accordance with the Income Tax Act, 1961. Taxation deferred as a result of timing difference, between the accounting & taxable profits, is accounted for on the liability method, at the current rate of tax, to the extent that the timing differences are expected to crystallize. Deferred tax asset is recognized only to the extent there is reasonable certainty of realization in future. Deferred tax assets are reviewed, as at each Balance Sheet date to re-assess realization.

xvi. Excise and Customs Duty

Excise and Customs Duty are accounted on accrual basis. CENVAT credit is accounted by crediting the amount to cost of purchases on receipt of goods and is utilized on dispatch of material by debiting excise duty account.

xvii. Prior Period Expenses / Income :

Prior period items, if material are separately disclosed in Profit & Loss Account together with the nature and amount. Extraordinary items & changes in Accounting Policies having material impact on the financial affairs of the company are disclosed.

xviii. Sundry Debtors, Loans and Advances

Doubtful Debts/Advances are written off in the year in which those are considered to be irrecoverable.

xix. Earnings per Share

The Company reports basic and diluted earnings per share in accordance with Accounting Standard-20 (AS-20) issued by the Institute of Chartered Accountants of India. Basic earnings per share are computed by dividing the net Profit or Loss for the year by the Weighted Average number of equity share outstanding during the year. Diluted earnings per share is computed by dividing the net profit or loss for the year by weighted average number of equity shares outstanding during the year as adjusted for the effects of all dilutive potential equity shares, except where the results are anti-dilutive.

Green Initiative in Corporate Governance: Go Paper Less

The Ministry of Corporate Affairs has come up with a Green Initiative of permitting the service of documents including Annual Reports to the Shareholders through e-mail or other permissible electronic modes instead of physical mode vide its Circular No. 17/2011 dated 21 April 2011. This is certainly a welcome move for the society at large as this will reduce paper consumption to a great extent and allow all stakeholders to contribute towards a Greener Environment. To support this green initiative, members who have not registered their e-mail addresses, so far, are requested to register their e-mail addresses, in respect of electronic holdings with the Depository through their concerned Depository Participants. Members who hold shares in physical form are requested to fill the appropriate column in the members e-mail registration form and register the same with Karvy Computershare Private Limited.
