CHAIRMANS LETTER

Dear Shareholders,

Last few years have been particularly challenging for our industry in India as well as globally. The pharmaceutical industry is witnessing a slow rate of growth due to factors like increasing regulatory & compliance issues and pricing pressures across markets. There were several changes in the pharmaceutical eco-system.

However, despite all these challenges and changes, we stand strong. During the year, we identified several improvement areas in our current processes and capacities which will give us encouraging outcomes in the near future.

We also laid emphasis on building our base by automating our processes as our markets got tougher in regulations. We are not only adhering to new tougher regulations but also expanding our capacities too as we have better demand. So we are directed in our efforts towards strengthening our core capabilities through a stronger focus on better technology with enhanced capacities.

In the future too, we shall continue to increase our current capacities, make our presence felt in the international markets, though international highly regulated markets take their own sweet time for approvals and registrations, we at Brooks are leaving no stone unturned to keep it going at best

possible pace with our serious efforts and continuous improvement through focus on global compliances with better quality and processes.

We remain optimistic and continue to act with resilience. With commencement of operations at Vadodara, 2017-18 is an important year for the organisation and we are excited to have you on board in this journey with us. As we move towards the new growth trajectory, we remain committed to build a strong organisation. We strive to create a culture that attracts and retains the best talent as we look to expand our global footprints.

At Brooks, we have always been committed for patients across the world and towards creating value to our stakeholders. Although the year under review has been challenging, your organisation remains well poised for continuous and sustained growth. Our aim is to transform the organisation to an innovative company and deliver our best.

Keeping the above in mind, we strive to maintain our excellence in quality, safety, and compliance at Baddi and Vadodara facilities. We will continue to deliver on your expectations with increased profitability and improved cash flows in the coming years. Your continuous support towards the Company's endeavours and the commitment of our outstanding employees gives me immense faith and confidence in the future of our Company.

MANAGING DIRECTOR'S SPEECH

Dear Shareholders,

It gives me great pleasure to share with you some insights about your Company and the pharma industry at large.

Our performance during the year was moderate and the reasons for the same can be attributed to the end of excise exemption at our Baddi facility which made it difficult to compete at price levels. We have invested in expansion and upgradation activities during the year. Global pharma industry at large is facing a slow growth which has impacted our business too.

We are working hard each day to grow our Company and achieve the targeted milestones.

New facility in Vadodara, Gujarat

We inaugurated our new manufacturing facility at Vadodara in March this year. Our Vadodara plant is a state-of-the-art and a fully compliant facility, which would help us serve our growing business by catering to domestic and global markets. We are confident of placing ourselves into the next higher orbit of growth and generate sustainable and profitable revenues.

I would like to share with you our focus areas for this year:

- **Optimum capacity utilization**
- **World class systems**

- **Catering to global customer base**

- **Create an impact**

We have elaborated the focus areas in following pages.

I would like to take this opportunity to thank all our valued colleagues, investors, and other stakeholders at Brooks Laboratories. I am optimistic about our Company's future and the growth that we can achieve.

Date: 02.09.2017

Rajesh Mahajan
Managing Director, Brooks Laboratories Ltd.

WORLD CLASS SYSTEMS

We have developed facilities that utilize cutting edge technology and automated processes to improve the quality of production.
With minimized human intervention, our quality of products has improved and are difficult to compete with.

Our strategy going forward is to optimize our operating capacity in our Baddi and Vadodara facilities. Keeping this in mind, we have upgraded our Baddi plant in line with cGMP and improved our injectable manufacturing line. With both our world class facilities operating at maximum capacity, our performance in the coming years will improve and we will see better revenues and profitability.

OPTIMUM CAPACITY UTILIZATION

CATERING TO GLOBAL CUSTOMER BASE

With world class systems and compliance with best manufacturing practices for the global life science industry our company is set for catering to global customers. With this intent, we have recruited an international team for developing business in global markets.

CREATE AN IMPACT

We are committed to use our technical expertise to reach out to large number of patients through greater affordability. We have laid emphasis on operational excellence, and have ensured that the way we develop, manufacture, and ship our products does not harm the environment. We see ourselves as an eco-friendly company striving for the greater and collective good.

EBITDA:

Earnings before Interest, Tax, Depreciation and Amortization at 9.98% for the year ended March 31, 2017, registered a decrease of 45% as compared to the previous year at 38.75%. The company has achieved improved performance due to the change in product mix, better negotiation of commission paid to liaison agents, replacing HSD boiler with wood fired boiler etc.

Finance Cost:

Finance expense was Rs. 10.09 million in FY2017 versus finance income of Rs. 7.94 million in FY2016. This movement is primarily due to the fact that previous year usage of cash credit limit was low as company had some surplus funds. However, the surplus funds were absorbed into the new facility at Vadodara, accordingly company had to avail major portion of cash credit limit in 2016-17 resulting in higher finance cost.

Depreciation:

There has not been any significant change in depreciation charge. During the year depreciation of our Vadodara Plant also included for certain period.

Tax:

During the current year, the tax expense at Rs. 11.05 million as compared to the tax expense of Rs. 1.86 million in FY2016. This is mainly due to the provision made on account of MAT credit entitlement /utilized adjustment. During the year, the company credited Rs. 6.24 million to this account as against Rs. 24.53 million for the previous year. A schedule of the tax expenditure and utilization of MAT credit is provided in the notes to the accounts provided as part of the Auditor's report.

Profit for the year:

Net profit decreased by 81.60% to Rs. 19.56 million in FY2017. This represents a PAT margin of 3.39% of total revenues versus 13.04% in FY2016.

Debt and Equity Position			(Rs. Million)
Particulars	As on March 31, 2017	As on March 31, 2016	Change
Total Stockholders' equity	1240.06	1220.50	19.56
Long-term borrowings	108.05	3.42	96.83
Short-term borrowings	21.75	52.84	-242.94
Total Debt	129.80	56.26	43.34

Operations during the year

The company operated the Baddi plant at 92% capacity. Your company expects the capacity utilization at the Baddi plant to be more than 95% in FY 2016-17. Further, the Baddi plant is WHO cGMP certification approved. We have started commercial production at the Vadodara plant and we plan to conduct WHO certification for the Vadodara plant in October 2017.

Human Resources Policy**Mission Statement**

HR supports and upholds Brooks' goals by nurturing a Positive and Engaging work environment while identifying and responding to the changing needs of the Organization and our Society.

Vision Statement

Brooks Human Resources department will serve as a Guardian for Excellence and Leadership through:

- Improving Organizational Effectiveness
- Innovative HR solutions
- Attract, Retain and Develop the talent
- Extraordinary Quality of services
- Building collaborative partnerships (HR as Business Partner)
- Develop a Robust Employee engagement plan for the staff & wage workforce through multiple engagement initiatives across the year.

Core values of HR Department**✓ Focused Approach**

We advance Brooks mission by thinking and acting in the best interests of the organization and the workforce; in particular, when developing policies, processes, programs and delivering services.

✓ Innovative

HR at Brooks would be dedicated to Quality, Excellence and Continuous improvement. We work to ensure the Brooks remains competitive in its Human Resources policies and practices by actively seeking and developing best practices, methods and approaches.

✓ Being Professional

We adhere to high professional standards of quality, competency and conduct. We act with honesty and integrity. We anticipate and are proactive, collegial and collaborative in our work. We remain current in professional practice.

✓ Accountable

We are accessible and answer to stakeholders for results in accordance with policies, standards, commitments and principles. We document, measure and report performance and evaluate program effectiveness.

✓ Transparent

We balance requests to share information clearly and openly while respecting the security of confidential and personal information entrusted to the department.

✓ Employees

We have more than 300 peoples employed on the rolls of the Company.

Risk management

For its operations the Directors believe that, the company has laid down internal financial controls to be followed by the company; and that such internal financial controls are adequate and were operating effectively.

Risk & Concerns:

Risk is a potential event or non-event, the occurrence or non-occurrence of which can adversely affect the objectives of the Company. Impact of risks could either be monetary that is impact on business profits due to increase in costs, decreasing revenue amongst others or non-monetary which is delay in securing regulatory approvals, reputational damage etc. The Company is susceptible to risks arising out of our business strategy, succession planning and decision on innovation or product portfolio. If there is any significant unfavourable shift in industry trend or pattern of demand, our returns on investments might get affected. We have risks associated with clients' and prospective clients' dispositions.

Any delays due to changes in regulatory requirement, clearances or executional failures could materially affect the timing and implementation of our strategy. Further, due to higher profitability in the injectables space and price pressure in the orals because of the competition, we have seen more Companies are eyeing injectables segment as an area to grow, thus increasing some competition from India in various markets like USA. Emerging countries' currencies have become significantly devalued making our products expensive or reduced margins in the emerging countries market.

Regulators across the globe strictly monitor the pharmaceuticals manufacturing facilities. Governing laws across the globe are becoming increasingly stringent over time, with severe penalties or actions in the event of non-compliance or violations to regulatory standards. In the scenario where we or any of our suppliers fail to comply with such regulations, there could be a regulator-enforced shutdown of concerned production facilities, withdrawal of drug approvals previously granted, failure or delay in obtaining approvals for new products, prohibition on the sale or import of noncomplying products etc. Such impact would significantly affect the delivery of our objectives. Given the evolving nature and regulatory complexities relating to Injectables production, there is a continuous challenge in meeting the regulatory requirements. This might also lead to additional requirements from the regulators before granting commercialization approval. The additional requirements would not only increase our financial commitments but also shift the launch timelines, thereby impacting Company strategy.

In addition to the above, other key risks relating to our current operations include human capital risk such as loss of key personnel, timely replenishment of critical vacant roles, reliance on third party sole suppliers or service providers including reliance on regional suppliers, disruption of operations from natural disasters, risk arising out of strategic projects, foreign exchange fluctuations, changing landscape of statutory regime etc.

At **BROOKS**, Risk Management is a key strategic focus for the Members of Board. All key functions of the Company are independently responsible to monitor risks associated with in their respective areas of operations such as production, supply chain, marketing, finance, accounting, treasury, legal, human resource and others areas like health, safety and environment.

Brooks Lab Operations:**Manufacturing:**

During the year under discussion, the Company has commenced production of injectables at its state-of-the-art manufacturing facility at Vadodara. In addition, capacity enhancement was done at the Baddi plant to focus on high profit product line. All facilities and production lines are upgraded regularly to meet current cGMP, Safety, Health and Environmental Standards. Various initiatives are taken towards energy and water conservation. The Company's journey towards achieving operational excellence across functions was driven through its efforts through automation of operations & upgrading the facility to qualify for higher regulatory approvals.

Environment, Health & Safety (EHS)

Brooks is committed to comply to high standards of environment, health and safety performance and is an integral to its working. Brooks ensures that each employee strives to achieve EHS excellence.

Quality

Brooks assures a culture of compliance and follows systematic interventions to consistently meet and exceed quality standards. Brooks is committed to enhance its quality management systems to meet and exceed the current expectations of regulatory authorities such as CDSCO, US FDA, EU GMP, TGA, MCC, WHO, etc. Its state-of-the-art manufacturing facilities at Vadodara and Baddi are cGMP compliant in conformity with national and international standards. Brooks looks forward for implementation of robust and effective quality management systems for continuously monitoring through quality metrics and internal audits.

THREATS, RISKS AND CONCERNS for Brooks Operations:**Drug Price Control:**

The Health Ministry revised the National List of Essential Medicines (NLEM) to include 376 drugs in the new NLEM list 2015. It is likely that the Government may bring more drugs and formulations under price control or change the mechanism of calculating the ceiling price of the drugs, which are under the ambit of the revised policy, which in turn will affect the net margins of the Company.

Generics:

The Government of India is continuously bringing in policies to shift the market towards generic products. The implementation of this process requires action by all stakeholders. This may have impact on future business strategies of the Company.

Future Acquisition proposals:

The Company looks for opportunities in order to expand its product line either through complimentary or strategic acquisitions of other companies, asset acquisition, licensing agreements or any other arrangement.

Manufacturing & Supplying Risk:

Although a major portion of the Company's finished formulations and injectables are being manufactured at in-house facilities, the Company also depends on its suppliers for sourcing of its raw materials. Any significant disruption at in-house facilities or any of its suppliers locations due to economic, political & social factors or any other event may impair the Company's ability to meet the markets demand on a timely basis. In addition, the Company's manufacturing capabilities could be impacted by quality deficiencies in the products, which its suppliers provide, leading to impact on its financial performance.

Goods and Services Tax (GST):

The Government of India has finalised on the framework for GST making it effective from 1st July, 2017. Thus merging all the significant taxes currently applicable to the Company's business operations (except taxes relating to profit/income) into a single tax. While GST implementation is expected to bring in greater transparency across all the economic activities and reduce multiple tax levies and administration, there is likely to be a significant short-term impact on the business operations of the Company.

New capital investments:

The Company has commenced production in August 2017 in new renovated building at Baddi plant with almost double the capacity of previous line. The capacities are built in anticipation of demand and the Company runs the risk of under-utilization of capacities. The risks are sought to be mitigated by forming appropriate marketing team and corporate management oversight.

Though Baroda plant is fully functional, this plant is in process of filing Dossiers in regulated markets and semi regulated markets to capture sales in these markets, these are procedural steps which have to be followed and these steps take its own time, but processes are being followed actively.

Currency fluctuation risks:

Foreign currency risks arise out of overseas operations and financing activities. Exchange rate volatility significantly impacts earnings and net equity because of invoicing in foreign currencies, expenditure in foreign currencies, foreign currency borrowings and translation of financial statements of overseas subsidiaries into Indian rupees. The Company has a defined foreign exchange risk management framework to manage these risks excluding translation risks.

International Taxation:

As the Company has potential tax exposure resulting from application of varying laws and interpretations, which include intercompany transactions with related parties in relation to various aspects of business. Although the Company believes its cross border transactions between affiliates are based on internationally accepted practices, tax authorities in various jurisdictions may have different views or interpretations and subsequently challenge the amount of profits taxed in their jurisdiction resulting into increase in tax liability including interest and penalties causing the tax expenses to increase.

GLOBAL PHARMACEUTICALS MARKET**Global Economy Overview:**

As per International Monetary Fund (IMF) World Economic Outlook, global economic growth in 2016 was estimated at 3.1% down from 3.4% in 2015 with advanced economies decline from 2.1% in 2015 to 1.7% in 2016 and emerging economies from 4.2% in 2015 to 4.1% in 2016. However, from second half of 2016, global economy gained some momentum especially in advanced economies due to recovery in investment, manufacturing and trade. These include resumption in global demand, strengthening of commodity prices lifting global inflation, reducing deflationary pressures and positive developments in financial markets. Stronger than expected pickup in growth in advanced economies in latter part of 2016 reflects projected cyclical recovery in global manufacturing and uptick in business confidence especially after the United States of America (USA) elections.

In the United Kingdom (UK) too, the growth remained strong where spending proved resilient in the aftermath of June-2016 referendum in favor of leaving the European Union (BREXIT). Activity surprised on the upside in Japan due to strong net exports, as well as in Euro market countries, such as Germany and Spain, because of strong domestic demand. Economic performance across emerging markets and developing economies has remained mixed. Whereas China's growth remained strong, reflecting continued policy support, economic activity has slowed in India because of the impact of demonetization as well as in Brazil, which has been mired in deep recession. With the rebound in activity in advanced economies, stabilization of commodity prices and sustainable pattern of growth in developing economies, the overall global economy is projected to grow at 3.5% in 2017.

Global Pharmaceutical Outlook

As per a recent IMS® report, the global medicine related spending is expected to reach nearly USD 1.5 trillion by 2021, this growth represents a 4-7% CAGR over the next five years from the current spending levels. The report also highlights an increased spending in Oncology, Autoimmune and Diabetology treatments is expected to drive a large part of the spending growth. The US will continue to remain the largest pharmaceutical market with spending growth driven by originator brands. Increased focus on developing Specialty medicines by both innovators and generic players is expected to drive increase in the Specialty share of global spending from 30% in 2016 to 35% in 2021. Life sciences sector is expected to have sales growth for the next several years due to favorable demographic trends and operates around the issues relating to cost and pricing, clinical and operational innovation, customer and consumer engagement and regulatory compliance.

Global Pharmaceutical Sales

As reported by Hardman & Co - Global Pharmaceuticals Report 2017, global pharmaceutical sales grew by around 6.9% in the year 2016 compared to the year 2015 and key growth drivers continued to shift towards use of generic medicines accompanied by patent expiries mainly in the regulated market and higher growth in Pharmerging markets. During 2016, share of United States, Europe and emerging markets in global pharmaceutical sales remained relatively static compared to 2015.

US market opportunity:

The US market was a key driver of growth, rising 5.6% to \$320bn in 2016, from \$303bn in 2015.

European market opportunity:

The European market is estimated to be approximately US\$ 152 Bn with a negligible growth of around 1% in 2016. Relatively weak economic growth in the region, budget concerns arising from adopting and paying for innovative medicines and mechanisms to control healthcare spending will lead to a slower CAGR of around 1 to 4% through 2021.

European Health Report 2015 issued by the World Health Organization (WHO), alcohol consumption, tobacco use and obesity are among the major public health problems in the European Region while cardiovascular diseases and cancer are the leading causes of premature mortality. In 1998, cancer accounted for 37% of premature mortality, and this rose consistently to 43% in 2012. Currently, many European countries face shortages of inexpensive, essential medicines that are crucial for the treatment of cancer patients. Considering that the second most commonly reported medicines shortages are in cancer, a disease with a growing prevalence, this challenge presents an increasing threat to patient care in Europe.

India's large pharmaceutical firms have been working towards having enough cancer-fighting drugs in their product pipeline, reflecting a global trend. Few Indian companies have expanded their existing oncology divisions, while others have made fresh strategic investments. Also Indian drug companies are facing strong headwinds due to prompt regulatory action of United States Food and Drug Administration (USFDA), likely imposition of Border Adjustment Tax (BAT) and delay in new drug approvals. Thus making a conducive time for Indian pharma companies to explore opportunities and business in the European market.

Emerging Markets:

The Pharmerging markets mainly led by BRIC nations - China, Brazil, India and Russia are estimated to be US\$ 243 Bn and expected to grow slow at a CAGR of 6% to 9% through 2021, as compared to CAGR of around 10% of last five years. Over 90% of the medicines used in Pharmerging markets are off patent generic products. Volume usage growth is projected to slow to 3% to 6% from 2017-2021 compared to 6.6% from 2012-2016.

Developed market spending growth will be driven by original brands and innovation in specialty medicines while Pharmerging markets will continue to be driven by off patent generic products. Innovation in specialty medicines will continue lifting the share of global spending from 30% in 2016 to 35% in 2021 driven by the adoption of new breakthrough medicines

India Pharma Opportunity:

Business Standard reported in February 2017 that Indian pharma companies' annual spending on research and development (R&D) might cross \$2 billion in 2017-18. While pharma companies spent \$1.4 billion in the previous financial on R&D and are expected to spend about \$1.7 billion in the current financial, according to industry estimates; The rising R&D spend trend in Indian companies' is to protect themselves from the price erosion that plain generic drugs are facing in the US due to increasing competition and regulatory pressure.

Regulatory Developments

The pharmaceutical markets in India and USA are experiencing regulatory interventions on several fronts. While this is not new, the pace and direction of these developments require companies to rethink their approach towards drug development, product portfolio, manufacturing and sales & marketing.

1. The US FDA has increased its focus to further accelerate approval cycle of generics after having seen a significant improvement in the approval timelines under the Generic Drug User Fee Act (GDUFA). Specifically, clearer guidelines and faster approvals on complex generics will be beneficial for the Indian Pharmaceutical players. Over the last few years, US FDA has considerably increased its focus on inspecting facilities outside the US. Considering the increasing presence of Indian Pharmaceutical players in US, the Indian Pharmaceutical industry is expected to witness heightened scrutiny from the regulatory authority in the coming years. The new administration in the US has also announced several healthcare related changes including Border Adjustment Tax, repeal of 'the Patient Protection and Affordable Care Act' and others which could potentially alter the US market opportunity for Indian pharmaceutical companies.
2. The Indian regulatory environment is rapidly evolving with several announced and expected changes as follows:
 - Expansion of the National List of Essential Medicines with more drugs coming under price control
 - Potential ban on fixed dose combination drugs
 - Expected regulation around mandatory generic prescription by doctors
 - Stringent regulatory compliance with Uniform Code of Pharmaceutical Marketing Practices (UCPMP)

Pharma companies are dealing with such regulatory and other macroeconomic challenges by investing in complex generics and products that are difficult to develop and manufacture. They are also expanding globally with a view to diversify the footprint and benefit from the scale as well as the opportunity to service patients. Enhancing access, improving affordability and driving innovation are some of the common themes reflected in the portfolio and pipeline of key pharmaceutical companies.

R&D trends:

As per IMS Health report in 'Global Medicines Use in 2020' Research and Development spending to be affected by increasing numbers of philanthropy-led developments that will improve treatment of neglected tropical diseases by 2020. Oral vaccines, use of mobile technology, and room-temperature injectables will be explored in the hopes to eventually transform complex disease treatments in Africa, but will likely take more time to overcome persistent economic development issues.

Growth Drivers:

- ***Ageing population and life expectancy:***
 Populations across large parts of the world are ageing. The number of older people representing aged 65 and older is projected to increase from 8.5% in 2015 to 12% in 2030 and 16.7% in 2050. Global life expectancy is expected to improve from 68.6 years in 2015 to 76.2 years in 2050 due to declining infant mortality, enhanced living conditions, improved sanitation, better prevention of communicable diseases and growing access to medicines. These scenarios are expected to bolster healthcare spending.
- ***Rising income and changes in lifestyle:***
 In emerging markets, long-term economic growth will lead to rising wealth and simultaneous changes in diets and lifestyles. This will create increased demand for healthcare products.
- ***Growing chronic diseases:***
 Obesity, cardiovascular diseases, hypertension, and diabetes are chronic diseases having serious repercussions in both developed and emerging countries. This has resulted in widespread health problems that's expected to challenge public health systems to meet increasing demand for drugs and treatments.
- ***Innovations in medicines:***
 Innovation is critical to addressing the current medical need. The new medicines will address significant discrepancies needs in cancer, autoimmune diseases of metabolism, nervous system and others. In addition to the continued research of mechanism in use in existing drugs, there will be an ongoing flow of new mechanisms that will see their first human uses in areas such as genome-editing, microbiome as well as regenerative cell technologies that include stem cells harvested from one part of the body to use against a disease in another.
- ***Improvement in medical infrastructure:***
 In Pharmerging economies, health/medical infrastructure enhancement is expected to give healthcare providers the tools and resources necessary to treat their patients. This includes renovating/setting up hospitals and health care centers, procurement of medical equipment and devices and improvement in medical education.
- ***Accessibility and affordability:***
 The trend towards the adoption of universal healthcare continues, with more countries expanding public or private health care system coverage. Expanding health care coverage, the US federal and state governments continue to implement health insurance exchanges under the Patient Protection and Affordable Act of 2010 (ACA).
- ***Faster regulatory approvals:***
 Regulatory agencies are defining approval process for faster availability of drugs for treating serious diseases for treatment and R&D for new breakthrough therapies, thus aiding rapid drug availability to the target segment.

Global Injectables Market overview

As per Data Bridge Global Injectable Drug Delivery Market - Industry Trends and Forecast to 2024 Report, market is expected to reach USD 789.7 billion by 2024 from USD 330.6 billion in 2016, growing at a CAGR of 11.5% in the forecast period 2017 to 2024.

The global injectable drug delivery market is segmented on the basis of type, product type, application, usage pattern, mode of administration, end user, distribution channel, and geography. The global injectable drug delivery market is segmented into 2 types, namely injectable drug delivery device and injectable drug delivery formulation. In 2017, the injectable drug delivery formulation segment is expected to dominate the market with a share of ~75% and is expected to continue this trend till 2024. Injectable drug delivery device market is segmented into conventional injection devices and self-injection devices. The injectable drug delivery formulation is segmented into conventional drug delivery formulation and novel drug delivery formulation.

Global Injectable Drug Delivery Market Key Drivers:

Some of the major factors driving the market for injectable drug delivery market are:

- increasing use of biologics,
- rising prevalence of chronic diseases,
- increasing occurrence of needle-stick injuries, and the
- benefits of injections (convenience, ease of use, and reduced pain).

These factors increase the demand for devices such as safety syringes, prefilled syringes, and auto-disabled syringes. Increasing prevalence of chronic diseases, rising demand for self-injection devices, growth of the biologics, and technological advancements are the major factors driving the growth of the injectable drug delivery market. Needlestick injuries and infections, regulatory hurdles, and preference for alternate modes of drug delivery are the factors which may hinder the growth of this market. Increasing demand for biosimilars and generic injectables will drive the market in future.

Novel drug delivery formulation is dominating the injectable drug delivery formulation market:

- self-injection device market is growing with the highest CAGR
- needle free injector is driving the market with highest market share
- wearable injector is growing with highest CAGR.

As reported in Coherent Market Insights published in April 2017, Global Sterile Injectables Market was valued at US\$ 299.7 billion in 2015 and is projected to expand at a CAGR of 6.9% during the forecast period (2016–2024). The global sterile injectables market is expected to expand in major unrealized market, especially in Asia Pacific, Middle East and Africa.

Complex regulations imposed by U.S. FDA on manufacturing facilities and equipment has become a hurdle for both the current pharma players and new emerging players globally. Currently, pharmaceutical companies are focused on developing generic injectables. The expansion and manufacturing of sterile injectable products is highly complex and requires major investment.

Applications of generic injectables:

According to IMARC Group's new report titled "US Generic Injectables Market: Industry Trends, Share, Size, Growth, Opportunity and Forecast 2017-2022", the US generic injectables market reached a value of US\$ 10 Billion in 2016, exhibiting a CAGR of more than 9% during 2009-2016. Currently, the market is projected to reach a value of more than US\$ 16 Billion by 2022, growing at a CAGR of around 8% during 2017-2022.

Generic injectables are widely used in the treatment of various chronic diseases such as cancer, diabetes, cardiovascular diseases, respiratory diseases, rheumatoid arthritis, osteoarthritis, osteoporosis, etc. The market growth can be attributed to the low cost of these drugs as compared to their branded counterparts. Moreover, as there is limited price erosion and low competition in the market, the profit margins are significantly higher than commoditised generics.

As reported in Bloomberg Intelligence in August 2016, market is poised for growth in generic injectables, which are valuable additions to a generic-drug maker's portfolio because they are relatively insulated from price pressure and less commoditized than their oral counterparts. Generic injectables market may grow at a 10% annual rate. The generic sterile injectable market is expected to grow at a 10% annual rate, driving the overall injectable market up 6% annually through 2020.

Global injectables growth has out-paced other generic categories in recent years:

- Global generic injectables market is estimated to exceed \$70 billion by 2020 – a CAGR of 10% from 2013
- \$15 billion of branded injectables sales are expected to lose patent protection in 2015-2018
- US market is currently around \$9 billion and is expected to grow at 6% per annum
- Ageing population and healthcare cost cutting are expected to drive greater generic penetration

¹ IMS Healthcare and equity research. Excludes biologics and other selected products (insulin, hormones, etc.)

India Injectables opportunity:

ICRA in July 2016 has reported that Indian generic players have better opportunity in US generic injectable market with upcoming patent expiries, drug shortages, quality manufacturing and development resources. Indian companies are increasingly focusing on complex generics and some of the leading Indian companies have carved a niche for themselves through the launch of differentiated and complex filings.

As per ICRA research, during the 2015-19 period injectables drugs worth US\$ 16 billion are expected to go off-patent in the US alone.

Among the various factors, the drug shortages for injectables in the US have been fuelled by:

- shifting of old molecules production to low cost countries such as India and China making high cost US facilities cost-inefficient,
- reduction in the number of players owing to M&A
- subsequent closure/consolidation among such facilities in addition to phasing out of low value low margin products.
- stringent action by US FDA regarding compliance to GMP led to several warning letters and supply disruptions for injectable drugs.

Issues with US FDA cGMP norms have led to demand for good quality facilities and called for contract manufacturers based out of low cost countries such as India, China to support large volumes at low cost. The complex development and manufacturing process of sterile injectables along with high capital and operational costs involved coupled with high compliance cost has led to a relatively consolidated market.

Directors' Report

The Board of Directors of your Company has pleasure in presenting the 15th Annual Report on the affairs of the Company together with the Audited Accounts of the Company for the year ended 31st March, 2017.

1. Financial Results

The Financial Results for the year are as under: -

PARTICULARS	(Rs in lacs)	
	2016-17	2015-16
Turnover	5753.98	8,000.93
Other Income	12.27	156.10
Total Income	5766.25	8,157.03
Expenditure	5191.98	6892.59
Profit before Depreciation, Interest & Tax (PBDIT)	574.27	1264.45
Financial Expenses (Interest)	100.94	79.43
Profit before Depreciation and Tax (PBDT)	473.33	1185.02
Depreciation and Amortization	167.20	116.00
Extraordinary items (Gain)	0	12.88
Profit before Tax (PBT)	306.13	1081.90
Income Tax (net of MAT Credit)	110.48	18.55
Profit after Tax	195.65	1063.35
Earnings per Share (in Rs.)	1.21	6.57

2. Performance of the Company

During the year under review, your Company has achieved a turnover of Rs.58 crores as compared to Rs. 80.09 crores in the previous year showing a decline in turnover as compare to previous year. The Company has earned a net profit after tax and depreciation of Rs. 1.96 Crores as compared to Rs. 10.63 Crores in the previous year. The decrease in profits is attributed to end of excise duty exemption on our unit after 10 years of exemption. The company had to compete with other manufacturing units who still enjoy excise tax holiday. Now with GST replacing excise the Brooks is at par with all units & expect to improve sales & profits significantly.

We are glad to inform you that on 7th March, 2017 our world class dedicated carbapenem facility in Vadodara Plant started manufacturing activity.

Brooks Management decided to upgrade the facility in line with cGMP in Baddi plant, since it is a running unit we decided to upgrade facility in steps. As a first step we upgraded one injectable manufacturing line, which started commercial production in November 2016. Expansion and upgradation of other injectable manufacturing line was initiated in June 2017 and expected to resume production by September 2017. These activities also were also reason for drop in sales.

We are confident that in coming years new Baroda facility & revamped Baddi facility, our performance will be much better on account of sales and profit.

3. Utilization of Funds through IPO

The Company had raised money by way of Initial Public offer in the financial year 2011-12 and has fully utilized the money for the purpose as raised by way of Initial Public offer.

4. Dividends

In view of the ongoing expansion projects and future growth plans, the Directors have decided to plough back the profits of the Company for financial year 2016-17. Accordingly, the Board does not recommend any dividend payment for the year under reference.

5. Reserves

The Company has not transferred any amount to reserves and not withdrawn any amount from the reserves.

6. Deposits

During the financial year 2016-17, the Company has not accepted any deposits from the public within the provisions of Chapter V of the Companies Act, 2013 read with Companies (Acceptance of Deposits) Rules, 2014.

7. Share Capital

The paid up Equity Share Capital of the Company as on 31st March, 2017 was Rs. 1618.64 lacs. During the year under review, there is no change in the Share Capital of the Company.

8. Change in the nature of business, if any

During the period under review there was no change in the nature of business of the company.

9. Material changes and commitments, if any, affecting the financial position of the company which have occurred between the end of the financial year of the company to which the financial statements relate and the date of the report.

They have been no material changes and commitments, affecting the financial position of the Company which have occurred between the end of the financial year of the Company to which the financial statements relate and the date of the report.

10. Changes in Directors and Key Managerial Personnel

In accordance with the provisions of Section 152 of the Companies Act, 2013, Mr. Atul Ranchal, Whole Time Director of the Company retires by rotation at the ensuing Annual General Meeting and being eligible, offers himself for re-appointment.

During the year, there is no change in the Key Managerial Personnel of the Company.

11. Statement on declaration given by the Independent Directors

As required under Section 149 (7) of the Companies Act, 2013, all the Independent Directors have given their respective declarations that they meet the criteria of independence as specified in Section 149 (6) of the Companies Act, 2013.

12. Details of significant and material orders passed by the regulators or courts or tribunals impacting the going concern status and company's operations in future

There is no significant and material order passed by the regulators or courts or tribunals during the financial year 2016-17 that impacts the going concern status and company's operations in future.

13. Details of Subsidiary/Joint Ventures/Associate Companies

The Company does not have any Subsidiary or Joint Ventures or Associate Companies

14. Corporate Governance Report and Management Discussion & Analysis

Independent Auditor's Report

To the Members of Brooks Laboratories Limited

Report on the Financial Statements

We have audited the accompanying Financial Statements of **Brooks Laboratories Limited** ("the Company"), which comprise the Balance Sheet as at March 31, 2017, the Statement of Profit and Loss and Cash Flow Statement for the year then ended, and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Financial Statements

The Company's Board of Directors are responsible for the matters stated in Section 134(5) of the Companies Act, 2013 ('the Act') with respect to the preparation of these Financial Statements that give a true and fair view of the financial position, financial performance and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the Accounting Standards specified under Section 133 of the Act, read with Rule 7 of Companies (Accounts) Rules, 2014. This responsibility includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that are operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these Financial Statements based on our audit.

We have taken into account the provisions of the Act, the accounting and auditing standards and matters which are required to be included in the audit report under the provisions of the Act and the Rules made thereunder.

We conducted our audit in accordance with the Standards on Auditing specified under Section 143(10) of the Act. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the Financial Statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the Financial Statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal financial control relevant to the Company's preparation of the Financial Statements, that give a true and fair view, in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of the accounting estimates made by the Company's Directors, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Financial Statements.

Opinion

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid Financial Statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India of the state of affairs of the Company as at 31st March 2017, its profit and its cash flows for the year ended on that date.

Annexure “B” to the Independent Auditor’s Report of even date on the financial statements of Brooks Laboratories Limited for the year ended 31st March 2017.

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 (“the Act”)

We have audited the internal financial controls over financial reporting of Brooks Laboratories Limited (“the Company”) as of March 31, 2017 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

Management’s Responsibility for Internal Financial Controls

The Company’s management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company’s policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors’ Responsibility

Our responsibility is to express an opinion on the Company’s internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the “Guidance Note”) and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor’s judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company’s internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company’s internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2017, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

Its shares are listed on BSE & NSE in India. The Company has a manufacturing plant at Baddi, Himachal Pradesh and recently company has also set up a plant at Vadodara, Gujarat. The Company is a pharmaceutical manufacturing company working on contract basis.

B Basis of Accounting:

a) The Financial Statements have been prepared in compliance with the Accounting Standards specified under section 133 of the Companies Act, 2013 read with Rule 7 of the Companies (Accounts) Rules, 2014.

b) Financial Statements are based on historical cost convention and are prepared on accrual basis.

C Use of Estimates:

The preparation of financial statements in conformity with Generally Accepted Accounting Principles requires estimates and assumptions to be made that affect the reported amounts of assets and liabilities and disclosure of contingent liabilities on the financial statements and the reported amounts of revenues and expenses during the reporting period.

Difference between actual results and estimates are recognized in the periods in which the results are known / materialize.

D Revenue Recognition

- i) Revenue is recognised when it is earned and no significant uncertainty exists as to its realisation or collection.
- ii) Sales are recognised when all significant risks and rewards of ownership of the goods are passed on to the buyer i.e. on dispatch of goods to the buyer.
- iii) Interest is recognised on a time proportion basis taking in to account the amount outstanding and the rate applicable.
- iv) Dividend income is recognised when right to receive the same is established.

E Fixed Assets:

Fixed Assets are stated at actual cost less accumulated depreciation. Cost comprises the purchase price and any attributable cost of bringing the asset to its working condition for its intended use.

F Impairment of Fixed Assets

At the end of each year, the Company determines whether a provision should be made for impairment loss on fixed assets by considering the indication that an impairment loss may have occurred in accordance with Accounting Standard 28 on "Impairment of Assets". Where the recoverable amount of any fixed assets is lower than its carrying amount, a provision for impairment loss on fixed assets is made for the difference.

G Depreciation:

Depreciation on Fixed Assets has been provided on 'Straight Line Method' as per the useful life and in the manner prescribed in the Schedule II of the Companies Act, 2013.

H Inventories:

Inventories are valued as follows:

- i) Finished Goods are valued at lower of cost or net realisable value.

- ii) Raw Material are valued at lower of cost or net realisable value.
- iii) Packing Materials are valued at cost or net realisable value.
- iv) Work in process is valued at lower of cost or net realisable value.
Cost is arrived at on weighted average cost method.

I Investments

Investments that is intended to be held for more than a year from the date of acquisition are classified as long term investments and are carried at cost less any provision for other than temporary diminution in value. Investments other than long term investments being current investments are valued at cost or fair market value whichever is lower.

- ii) Retirement benefits in the form of Gratuity & Leave Encashment are considered as defined benefit obligations and are provided on the basis of the actuarial valuation, using the projected unit credit method as at the date of the Balance Sheet.

K Provisions and Contingent Liabilities

i) Provisions are recognized in terms of Accounting Standard 29- "Provisions, Contingent Liabilities and Contingent Assets in accordance with the Accounting Standard specified under section 133 of the Companies Act, 2013 read with Rule 7 of the Companies (Accounts) Rules, 2014 when there is a present legal or statutory obligation as a result of past events where it is probable that there will be outflow of resources to settle the obligation and when a reliable estimate of the amount of the obligation can be made.

ii) Contingent Liabilities are recognized only when there is a possible obligation arising from past events due to occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company or where reliable estimate of the obligation cannot be made. Obligations are assessed on an ongoing basis and only those having a largely probable outflow of resources are provided for.

iii) Contingent Liabilities are disclosed by way of notes.

L Foreign Currency Transactions

- i) The transactions in foreign currencies on revenue accounts are stated at the rate of exchange prevailing on the date of transactions.
- ii) The difference on account of fluctuation in the rate of exchange, prevailing on the date of transaction and the date of realisation are recognised as Income or Expenses.
- iii) Differences on translation of Current Assets and Current Liabilities remaining unsettled at the year-end are recognised as Income or Expenses.

M Borrowing Costs

Borrowing costs are recognized as an expense in the period in which they are incurred except the borrowing costs attributable to the acquisition/ construction of qualifying assets which are capitalized as a part of the cost of the fixed assets, up to the date, the assets are ready for its intended use.

N Accounting for Taxation of Income

Current Taxes

Provision for current income-tax is recognized in accordance with the provisions of Indian Income- tax Act, 1961 and is made annually based on the tax liability after taking credit for tax allowances and exemptions.

Deferred Taxes

Deferred tax assets and liabilities are recognized for the future tax consequences attributable to timing differences that result between the profits offered for income taxes and the profits as per the financial statements. Deferred tax assets and liabilities are measured using the tax rates and the tax laws that have been enacted or substantially enacted at the Balance Sheet date. Deferred tax assets are recognized only to the extent there is reasonable certainty that the assets can be realized in the future. Deferred tax assets are reviewed as at each Balance Sheet date.

Minimum Alternate Tax

Minimum Alternate Tax (MAT) paid in accordance with the tax laws, which gives future economic benefits in the form of adjustment to future income tax liability, is considered as an asset if there is convincing evidence that the Company will pay normal income tax. Accordingly, MAT is recognised as an asset in the Balance Sheet when it is probable that future economic benefit associated with it will flow to the Company.

O Miscellaneous Expenditure

Preliminary expenses are amortised in the year in which they are incurred.
