MANAGEMENT DISCUSSION AND ANALYSIS

INDUSTRY STRUCTURE & DEVELOPMENTS, OPPORTUNITIES & THREATS, SEGMENTWISE PERFORMANCE, OUTLOOK, RISKS & CONCERNS

During the year under review, the Company has started its food division business & now it operates in two segments, as identified in accordance with AS-17, issued by ICAI.

FOODS BUSINESS DIVISION:

Almonds are not real nuts but rather drupes and their production around the world is competitive with respect to quality and quantity. The United States dominates the global production of almonds, followed by traditional almond growers, Spain and Italy. California, the largest almond producer in the world, is the only place in North America that grows almond for commercial purposes. The fruit is highly valued for the nutrition benefits it has and the ready market across the countries, especially in non-almond producing countries.

India has emerged as the largest importer of almonds from the US during August 2016 to February 2017. The Almond Board of California looks at India as a market of great potential and importance. This is a reason for the board to continue to invest in resources to run and support an active marketing, trade and market access programme in the country.

Your company started trading in almonds during the year under review by importing the same and selling it locally. Demand growth for almonds is mostly driven by India's expanding middle class, growing work force, and increased consumer awareness of products perceived as 'healthful'. Generally, Indian demand for nuts peaks during the festive season, which runs from September to January.

The main concerns during the year were continued higher international and local prices, and a weakening Indian rupee. Further, volatile prices and the exchange rate ultimately affect almond stocks. Also last year, the Indian Government introduced a campaign to reduce public spending for gifts during Diwali and other holidays during the Indian festive season. This initiative reduced institutional gifting by government officials and state-owned enterprises and to a limited degree, negatively affected almond sales during this period. Almonds are often given as a traditional seasonal gift in India during the festive season. On account of volatile domestic and international market conditions, average almond prices in India saw a steep decrease, which had a cascading effect on purchase decisions made by trade.

FINANCE BUSINESS DIVISION:

India has a diversified financial sector undergoing rapid expansion, both in terms of strong growth of existing financial services firms and new entities entering the market. The banking regulator has allowed new entities such as payments banks to be created recently thereby adding to the types of entities operating in the sector. With a combined push by both government and private sector, India is undoubtedly one of the world's most vibrant capital markets.

Your company has displayed strong financial discipline across macroeconomic cycles withstanding domestic and global adversaries, coming out safer and confident of its execution skills and competency. The management keeps a close view on churning the assets, wherever necessary, to improve overall yields, but preservation of capital has been focused priority for your company.

An ongoing challenge faced by the finance industry is increasing stress and asset quality concerns. The Company is exposed to specific risks that are particular to its business, including operational risk, market risk and credit risk. The management continuously assesses the risks and monitors the business and risk management policies to minimize the risk.

Significant accounting policies and notes on accounts

Company Overview

Fervent Synergies Limited (the company) is a public company domiciled in India and incorporated under the provisions of the Companies Act, 1956. Its shares are listed on the Bombay Stock Exchange in India. The company, during the year under review, started its food division business, and it also continued to lend short term funds as and when available with the company, for earning business income in line with continuation of business activities of its amalgamating companies.

1. Significant accounting policies

1.1 Basis of preparation of financial statements

These financial statements are prepared in accordance with Indian Generally Accepted Accounting Principles (GAAP) under the historical cost convention on the accrual basis.

The accounting policies adopted in the preparation of financial statements are consistent with those of previous year.

1.2 Use of Estimates

The preparation of the financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported balances of assets and liabilities and disclosures relating to contingent liabilities as at the date of the financial statements and reported amounts of income and expenses during the period. Although these estimates are based on the management's best knowledge of current events and actions, uncertainty about these estimates and assumptions could result in the outcomes requiring a material adjustment to the carrying amounts of assets or liabilities in future periods.

1.3 FIXED ASSETS

Fixed Assets are stated at cost of acquisition, manufacture and subsequent improvements thereto including taxes and duties (net of credits and draw backs), freight and other incidental expenses related to acquisition and installation.

1.4 DEPRECIATION

Depreciation in respect of all tangible assets is provided on straight line method over the useful lives of assets based on the evaluation, as specified in part C of schedule II of Companies Act, 2013.

1.5 IMPAIRMENT LOSS

An impairment loss, if any, is recognized wherever the carrying amount of the fixed assets exceeds the recoverable amount i.e. the higher of the assets' net selling price and value in use.

1.6 INVESTMENTS

Investments which are readily realizable and intended to be held for not more than one year are classified as current investments, carried in the financial statements at lower of cost and fair value. All other investments are classified as long term, non-current investments, carried at cost.

1.7 INVENTORIES

Inventories are are valued at cost or estimated net realisable value, whichever is lower.

1.8 FOREIGN CURRENCY TRANSACTIONS

Transactions in Foreign currencies are recorded at exchange rates prevailing on the date of the transaction. Monetary items denominated in foreign currency are restated at the exchange rate prevailing on the balance sheet date. Foreign currency nonmonetary items carried in terms of historical cost are reported using the exchange rate at the date of transactions. Exchange

differences, if any, arising on settlement of transactions and/or restatements are dealt with in the Profit and Loss Account.

1.9 REVENUE RECOGNITION

Income and Expenditure are recognised on accrual basis unless otherwise stated. Revenue is recognised on completion of sale of goods, rendering of services and use of the Company's resources by third parties. Sales are recorded net of trade discount, sales return, rebates and sales taxes but including excise duties and export incentives.

Dividend income on investments is accounted for when the right to receive the payment is established.

Interest income is recognised on a prudent basis where there is reasonable certainty as to realisation.

1.10 BORROWING COST

Borrowing Cost attributable to the acquisition and construction of qualifying assets are added to the cost up to the date when such assets are ready for their intended use. Other borrowing costs are recognised as expenses in the period in which these are incurred.

1.11 SEGMENT ACCOUNTING POLICIES

All Segment assets and liabilities, revenue and expenses are directly attributable to segment. Segment assets include all operating assets used by the segment and consist principally of fixed assets, inventories, sundry debtors, loans and advances and operating cash and bank balances. Segment assets and liabilities do not include share capital, reserves and surplus, and income tax (both current and deferred).

1.12 TAXATION

Current Tax in respect of taxable income is provided for the year based on applicable tax rates and laws. Deferred tax is recognized subject to the consideration of prudence in respect of deferred tax assets, on timing differences, being the difference between taxable income and accounting income that originate in one period and are capable of reversal in one or more subsequent periods and is measured using tax rates and laws that have been enacted or substantively enacted by the Balance Sheet date. Deferred tax assets are reviewed at each Balance Sheet date to re-assess realisation.

1.13 PROVISION AND CONTINGENT LIABILITIES
