***CHAIRMAN'S MESSAGE***

Dear Stake holders,

The Indian denim industry stands to benefit immensely from the ambitious "Make in India" initiative. The vision of the programme has the potential to overhaul the segment's perception and the country's contribution in the world denim scenario. However, to turn this vision in to reality, India's denim manufacturing segment needs to be equipped with facilitating mechanisms. Even more important is the effective implementation of these mechanisms. Once this is done, the strength of domestic Indian denim markets as well as its denim export capabilities will remain unparalleled.

Denim Manufacturing Association estimated that Denim manufacturing and consumption in India has grown at a compounded annual growth rate (CAGR) of up to 15% over the last decade and is expected to grow at similar levels over the next few years.

Denim is of the most promising category in India's apparel market. The global market for denim is forecast to reach USD 64.1 billion by 2020. The Indian denim industry has shown continual growth over the years and currently the country boasts of a denim manufacturing capacity of around 1.1 billion meters per annum. Its utilization levels are pegged at 80-85%. Despite the impressive statistics, the Indian denim manufacturing industry contributes 5% to the global scenario, reflecting the overall performance of the textiles industry. However, according to industry experts, denim is the only segment in the Indian textile industry that has the potential to grow manifold.

In fact, India has been ranked as a top destination for retail investments among 30 global emerging markets. However, despite the Indian denim manufacturing industry witnessing rapid growth in the last 4-5 years.

I am Pleased to report that in light of the above stated facts your company is confident to achieve new milestones in its journey towards sustainable growth through total excellence. R & B Denims Limited has pursued business excellence through passion, Perseverance and precision cum expansion projects successfully thereby improved its cost competitiveness and profitability.

Deferred tax assets are recognised and carried forward to the extent that there is a reasonable or virtual certainty, as may be applicable, that sufficient future taxable income will be available against which such deferred tax asset can be realised.

15. Impairment of assets (AS 28)

An impairment loss is charged to the Statement of profit and loss in the year in which an asset is identified as impaired. The impairment loss recognised in prior accounting period is reversed if there has been a change in the estimate of recoverable amount.

16. Provisions and contingent liabilities (AS 29)

A provision is recognised when the company has a present obligation as a result of past events and it is probable that an outflow of resources will be required to settle the obligation, in respect of which a reliable estimate can be made. Provisions are not discounted to their present value and are determined based on best estimates required to settle the obligation at the balance sheet date.

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the company or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognized because it cannot be measured reliably.

17. Preliminary Expenses (AS 26)

Preliminary Expenditure is written off fully during the year under its occurrence as per As 26.
