Risk Management Policy

The Company has a Risk Management Policy in place which has been approved by the Board of Directors of the Company. The said Policy covers all elements of risks including those which may threaten existence of the Company. All risks mentioned in the Policy are reviewed periodically and a report of the same is submitted to the Board at regular intervals for its consideration and guidance.

Purpose

The purpose of this policy is to ensure that risks related to Company are identified, analyzed, and managed so that they are maintained at acceptable levels.

Overview

Risk management is the ongoing process of identifying risks and implementing plans to address them. Often, the number of assets potentially at risk outweighs the resources available to manage them. It is therefore important to know where to apply available resources to mitigate risk in a cost-effective and efficient manner.

This policy lays the framework for a formal risk management program by establishing responsibility for risk identification and analysis, security planning for risk mitigation, and program management and oversight. It is important to note that program management and oversight is a company-wide responsibility that calls for the active involvement of executive leadership, departmental management and others.

The Company implemented a Risk Management Policy which was to be reviewed on an annual basis.

Definitions

Risk: The potential of harm to the Company or its stakeholders.

Risk Assessment: A qualitative or quantitative evaluation of the nature and magnitude of risk to Company. The evaluation is based upon known or theoretical vulnerabilities and threats, as well as the likelihood of the threats being realized and the potential impact to the Company and its stakeholders.

Risk Management: The process of evaluating and responding to risks to Company for the purpose of reducing those risks to acceptable levels. Risk management is inclusive of the risk assessment process, and uses the results of risk assessments to make decisions on the acceptance of risks or on taking action to reduce those risks

Scope

This policy applies to all company departments and functions.

Policy Implementation

The Board is responsible for coordinating the implementation of this policy and for providing guidance on the interpretation of specific policy requirements.

This Policy has been approved by the Board.

MANAGEMENT DISCUSSION AND ANALYSIS

• INDUSTRY STRUCTURE AND DEVELOPMENTS

Superior Finlease Limited is a NBFC and is engaged mainly in the business of providing Loans & Advances and investing in shares, both quoted and unquoted. The industry structure relevant to the Company's operations is mainly concerned with the capital market.

The NBFCs sector is undergoing a significant transformation at present and has come to be recognized as an important element of the financial system. The recent issue in financial sector has highlighted the necessity, importance and significant role, the NBFCs play in development of nation's infrastructure.

In the financial system of India, importance of NBFCs has been much discussed. RBI has been setting right its regulatory and supervising policies from time to time to keep pace with the changes in the environment.

NBFCs have been actively fuelling the growth of the economy – especially the infrastructure part of the economy and have been supplementing the Banking system effectively and thus enhancing competition and diversification in the financial sector

The NBFCs have attracted substantial investments during the recent years both from the retail and from the wholesale side. The growth also has been significant during this year. The NBFCs have been catalysts in accelerating the growth in the semi urban and rural areas. The projections made by RBI and other financial forecasts give substantial growth opportunities for the industry in the coming years.

• ECONOMY OVERVIEW

Indian economy is adversely affected by persistent inflation over the last few years. The rising incomes dropped the purchasing power of the population, driving consumption demand in sectors, where supply lagged particularly, in food grain and non-food-grain commodities, Sharp increase in international prices of fuels also contributed to inflationary pressure. The Government has been going very slow on various reforms, expected by large investors and market. Market participants were particularly concerned about subsidies—fertilizer, food and fuel; falling rupee against dollar; unreported corruptions; widening current account and fiscal deficits. Net Buys by the Foreign Institutional investors have been declining during the year as compared to these of the earlier years. Economic situations in Euro Zone countries and other priced the Capital Market towards losses.

The NBFCs sector has undergone a significant transformation in the past few years and has come to be recognized as a systemically important element of the financial system. The recent global financial crisis has also highlighted the regulatory imperatives concerning the non-banking financial sector and the risks arising from regulatory gaps, arbitrage and systemic inter-connectedness.

In the multi-tier financial system of India, importance of NBFCs in the Indian financial system is much discussed by various committees appointed by RBI in the past and RBI has been modifying its regulatory and supervising policies from time to time to keep pace with the changes in the system. NBFCs have turned out to be engines of growth and are integral part of the Indian financial system, enhancing competition and diversification in the financial sector, spreading risks specifically at times of financial distress and have been increasingly recognized as complementary of banking system at competitive prices.

- **OPPORTUNITIES AND THREATS**

Capital markets at present are going through turbulent times due to slow-down in domestic economy, slow-down in reforms, uncertain global economic environment, economic crisis faced by a few countries in Europe, fluctuations in currency rates, etc. Although the inflation has remained steady during the year but it is still under pressure due to hike in petrol prices, burden of diesel subsidies, high fiscal deficit, etc. However, we feel that the opportunities will soon arise in the markets upon the corrective policies by the government and better fiscal management which will strengthen the economy.

The NBFC industry holds immense potential and the Government of India's increased focus towards Financial Inclusion has created various opportunities for existing NBFCs to leverage on their established customer base in rural areas. The recent steps by the Government of India to create Infrastructure for NBFC and to provide banking license for NBFCs is a positive signal. The above opportunities have made the Industry highly competitive with the emergence of new category of systematically important NBFCs. Along with existing local and Multinational players leading to tough competition within the industry.

- **SEGMENT-WISE PERFORMANCE**

The Company is into single reportable segment only.

- **OUTLOOK**

Outlook for the Company is linked to Capital Market. The Board of Directors of the Company believes that Company's Investments in the equity shares of various companies would reasonably perform in the ensuing years.

The role of NBFCs has become increasingly important from both the macroeconomic perspective and the structure of the Indian financial system. Over a period of time, one has to accept; that it is only those which are big enough and serious about being in the finance business will and must grow. To survive and constantly grow, NBFCs have to focus on their core strengths while improving on weaknesses. They have to constantly search for new products and services in order to remain competitive. The coming years will be testing ground for the NBFCs and only those who will face the challenge and prove themselves will survive in the long run.

For several years, NBFCs have rapidly emerged as an important segment of the Indian Financial System. The sector is now being recognized as complementary to the banking sector due to the implementation of innovative marketing strategies, introduction of tailor made products, customer-oriented services, attractive rates of return on deposits and simplified procedures.

- **RISKS AND CONCERNS**

As an NBFC, the Company is subjected to both external risk and internal risk. External risk due to interest rate fluctuation, slowdown in economic growth rate, political instability, market volatility, decline in foreign exchange reserves, etc. Internal risk is associated with your Company's business which includes deployment of funds in specific projects, diversification into other business operations, retention of talented personnel, managing effective growth rate, volatility in interest rate, NPAs in portfolio, changes in compliance norms and regulations, contingent liabilities and other legal proceedings. Your Company recognizes the importance of risk management and has invested in people, process and technologies to effectively mitigate the above risks.

Company's performance is closely linked to the Indian Capital Market as the company has investments in both quoted as well as unquoted shares. These investments represent a substantial portion of the company's business and are vulnerable to fluctuations in the stock market. Any decline in the price of quoted investments may affect its financial position and results of operations. The value of the company's investments may be affected by factors affecting capital markets such as price and volume volatility, interest rates, currency exchange rates, foreign investment, government policy changes, political and economic developments, crude oil prices and economic performance abroad, etc.

The Company's success largely depends upon the quality and competence of its management team and key personnel. Attracting and retaining talented professionals is therefore a key element of the company's strategy. The resignation or loss of key management personnel may have an adverse impact on the Company's business, its future financial performance and the result of its operations.

As a non-deposit taking NBFC, the Company is subjected to regulations by Indian governmental Authorities, including the Reserve Bank of India. Their Laws and regulations impose numerous requirements on the Company including prescribed levels of capital adequacy, solvency requirements and liquid assets. There may be future changes in the regulatory system or in the enforcement of the Laws and regulations that may adversely affect the Company's performance.

Moreover, any slowdown in the economic growth in India could cause the business of the Company to suffer.

Recently, the growth of industrial production has been variable. Any slowdown in Indian economy could adversely affect the Company's business.

- **INTERNAL CONTROL SYSTEMS AND THEIR ADEQUACY**

The Company has an adequate internal controls system commensurate with its size and the nature of its business.
