c. Members holding shares in Physical Form should enter Folio Number registered with the Company.

(5) Next enter the Image Verification as displayed and Click on Login.

(6) If you are holding shares in demat form and had logged on to www.evotingindia.com and voted on an earlier voting of any company, then your existing password is to be used.

(7) If you are a first time user, follow the steps given below:

For Members holding shares in Demat Form and Physical Form	
PAN	<p>Enter your 10 digit alpha-numeric PAN issued by Income Tax Department (Applicable for both demat shareholders as well as physical shareholders)</p> <ul style="list-style-type: none"> • Members who have not updated their PAN with the Company/Depository Participant are requested to use the first two letters of their name and the 8 digits of the sequence number in the PAN field. • In case the sequence number is less than 8 digits enter the applicable number of 0's before the number after the first two characters of the name in CAPITAL letters. Eg. If your name is Ramesh Kumar with sequence number 1 then enter RA00000001 in the PAN field.
Dividend Bank Details OR Date of Birth (DOB)	<p>Enter the Dividend Bank Details or Date of Birth (in dd/mm/yyyy format) as recorded in your demat account or in the company records in order to login.</p> <ul style="list-style-type: none"> • If both the details are not recorded with the depository or company please enter the member id / folio number in the Dividend Bank details field as mentioned in instruction (iv).

(8) After entering these details appropriately, click on "SUBMIT" tab.

(9) Members holding shares in physical form will then directly reach the Company selection screen. However, members holding shares in demat form will now reach 'Password Creation' menu wherein they are required to mandatorily enter their login password in the new password field. Kindly note that this password is to be also used by the demat holders for voting for resolutions of any other company on which they are eligible to vote, provided that company opts for e-voting through CDSL platform. It is strongly recommended not to share your password with any other person and take utmost care to keep your password confidential.

(10) For Members holding shares in physical form, the details can be used only for e-voting on the resolutions contained in this Notice.

(11) Click on the EVSN for the relevant <Company name> on which you choose to vote.

(12) On the voting page, you will see "RESOLUTION DESCRIPTION" and against the same the option "YES/NO" for voting. Select the option YES or NO as desired. The option YES implies that you assent to the Resolution and option NO implies that you dissent to the Resolution.

(13) Click on the "RESOLUTIONS FILE LINK" if you wish to view the entire Resolution details.

(14) After selecting the resolution you have decided to vote on, click on "SUBMIT". A confirmation box will be displayed. If you wish to confirm your vote, click on "OK", else to change your vote, click on "CANCEL" and accordingly modify your vote.

(15) Once you "CONFIRM" your vote on the resolution, you will not be allowed to modify your vote.

(16) You can also take a print of the votes cast by clicking on "Click here to print" option on the Voting page.

(17) If a demat account holder has forgotten the changed password then Enter the User ID and the image verification code and click on Forgot Password & enter the details as prompted by the system.

(18) Shareholders can also cast their vote using CDSL's mobile app m-Voting available for android based mobiles. The m-Voting app can be downloaded from Google Play Store. Apple and Windows phone users can download the app from the App Store and the Windows Phone Store respectively. Management Discussion and Analysis Report

Industry Structure and Developments:

Logistics is regarded as the backbone of the economy, providing efficient and cost effective flow of goods on which other commercial sectors depend. Logistic industry in India is evolving rapidly, it is the interplay of infrastructure, technology and new types of service providers, which defines whether the logistic industry is able to help its customers reduce their costs in logistic sector and provide effective services. Despite of the weak economic sentiments, the logistics industry continues to witness growth due to the growth in retail, e-commerce and manufacturing sectors. The Global Logistics sector was expected to grow 10-15% in the period 2013-14. Logistics industry is expected to reach over USD 2 billion by 2019. The recent Indian logistics sector comprises of inbound and outbound segments of the manufacturing and service supply chains. Of late, the logistics infrastructure has gained a lot of attention both from business industry as well as policy makers. The role of managing this infrastructure, to effectively compete has been slightly under-emphasized. Inadequate logistics infrastructure has an effect of creating bottlenecks in the growth of an economy. The logistics management regimen has the capability of overcoming the disadvantages of the infrastructure in the short run while providing cutting edge competitiveness in the long term.

Purpose of Logistics Industry

The purpose of logistics industry is to enable an effective transportation or timely movement of goods from one place to another. This could be for the purpose of industrial transportation or even private purposes.

Different mediums of Logistics services

There are three mediums of logistics services in India. These can be categorized in the following way:

Air freight – This is a modern and the safest mode to ensure a fast delivery of goods. A chosen one by many because of the swiftness of the system there are many Companies that are now even providing super fast deliveries by airways even on the same day.

Land transport – This is a means of logistics support that has withstood the test of time through the extensive network of roads in India. It has been the popularly used method and used especially in the shipments of heavy articles like machinery and vehicles. This is also a chosen method in case of household packers and movers. **Railways** – This is also an age old method of shipments and transport. Though most used in case of domestic services this is very effective in the availability of cost effective logistics support in India.

Waterways – An essential part of this industry this is also one of the oldest methods. Shipments and transportation of goods is done on an international basis through this way. It is apt in case of shipments of oil, highly sensitive or volatile articles like Uranium.

Future outlook:

The country's logistics industry which is worth around USD 160 billion is likely to touch USD 215 billion in the next two years with the implementation of GST, Economic Survey today said. "With the implementation of GST, the Indian logistics market is expected to reach about USD 215 billion in 2020, growing at a CAGR of 10.5 per cent," Economic Survey 2017-18 tabled in Parliament said. The Indian logistics industry which provides employment to more than 22 million people has grown at a compound annual growth rate (CAGR) of 7.8 per cent during the last five years, it said. The Global Ranking of the World Bank's 2016 Logistics Performance Index shows that India jumped to 35th rank in 2016 from 54th rank in 2014 in terms of overall logistics performance.

India has improved its rank in all the six components of logistics performance index, it added. Realising the importance of the sector and to address the inefficiencies, the government has included the sector in the Harmonised Master List of Infrastructure Subsector. "Inclusion of logistics sector in the Harmonised Master List of Infrastructure Subsector will benefit the sector in many ways," it said. It will be helpful in facilitating

the credit flow into the sector with longer tenures and reasonable interest rates, it said adding the infrastructure status will simplify the process of approval for construction of multi modal logistics (parks) facilities that includes both storage and transport infrastructure. "It will encourage market accountability through regulatory authority and will attract investments from debt and pension funds into recognised projects," it added. To a large extent, the logistics sector in India remains unorganised, it said adding the industry is facing challenges such as high cost of logistics impacting competitiveness in domestic and global market, underdeveloped material handling infrastructure, fragmented warehousing and lack of seamless movement of goods across modes, among others . "In order to develop this sector in an integrated way, it is important to focus on new technology, improved investment, skilling, removing bottlenecks, improving inter modal transportation, automation, single window system for giving clearances, and simplifying processes," it added. By recognising the importance of the sector, a new logistics division has been created in the Department of Commerce to develop and coordinate integrated development of the industry, improvement in existing procedures, identification of bottlenecks and gaps, and introduction of technology-based interventions in this sector, the survey said. Improving logistics sector has huge implication on exports and it is estimated that a 10 per cent decrease in indirect logistics cost can increase 5-8 per cent of exports. Apart from increasing trade, better performance in logistics will augment programmes like Make in India, and also enable India to become an important part of the global supply chain. Technological changes have led to the convergence of industries and the transformation of the business processes related to supply chain management. The need to improve logistics efficiency is being driven by the modernization of transportation infrastructure, changing consumer purchase patterns, and the emergence of new business models. With the declining cost of technologies related to Automatic Identification Data Capture, Autonomous Vehicles, Augmented Reality, Big Data, and Cloud Computing, the global logistics industry is being transformed in terms of the transportation, warehousing, customs brokerage, and e-logistics services offered by service providers. This study provides a detailed assessment of the impact of these technologies on the logistics industry.

Opportunities:

- ❖ Increased demand of 3PL. The improving infrastructure and rising focus on core business operations will lead the future growth of the Indian 3PL.
- ❖ Infrastructural Development Investment Policies of Central & State government shall result in higher growth opportunity for transportation business.
- ❖ Expected increase in freight during 2010-2020.
- ❖ Successful completion of National Highways Projects shall open up new avenues and improved service quality.
- ❖ The increased fleets shall ease the operations.
- ❖ Online system will increase the efficiency and effectiveness towards decision making and accountability toward the clients which develops healthy relations with clients.

Threat:

- ❖ Insufficient integration of transport networks information technology and warehousing & distribution facilities.
- ❖ Insufficient specialist equipment, i.e. proper refrigerated storage and containers.
- ❖ Competition from local and multinational players.
- ❖ Regulations exist at a number of different tiers.
- ❖ Paucity of Trained Manpower.
- ❖ Damages, accidents and theft are concern during voyage.
- ❖ Natural disturbances in form of floods, cyclones, landslides in major parts of India.
- ❖ Due to above two conditions, the claims from clients increases and inflow of revenue decreases and finally resulted into long legal litigation.

Segment Wise Performance:

The Company operates in single segment. For the financial and operational performance, please refer the Directors' Report.

Outlook

The recent Indian logistics sector comprises of inbound and outbound segments of the manufacturing and service supply chains. Of late, the logistics infrastructure has gained a lot of attention both from business industry as well as policy makers. The role of managing this infrastructure, to effectively compete has been slightly under-emphasized. Inadequate logistics infrastructure has an effect of creating bottlenecks in the growth of an economy. The logistics management regimen has the capability of overcoming the disadvantages of the infrastructure in the short run while providing cutting edge competitiveness in the long term. There exist several challenges and opportunities for logistics sector in the Indian economy.

Challenges faced by the recent logistics industry in India

The most essential challenge faced by the industry today is insufficient integration of transport networks, information technology and warehousing & distribution facilities. Regulations exist at a number of different tiers, is imposed by national, regional and local authorities. However, the regulations differ from city to city, hindering the creation of national networks.

Trained Manpower is essential both for the third party logistics sector as well as the manufacturing and retailing sectors, which is very weak at a practical level, i.e., IT, driving and warehouse as well as at a higher strategic level. The disorganized nature of the logistics sector in India, its perception as a manpower-heavy industry and lack of adequate training institutions has led to a shortfall in skilled management and client service personnel. There is a lack of IT standard, equipment and poor systems integration.

Solutions to some of the challenges

Infrastructure is the backbone of every country's growth and prosperity and for the logistics industry to flourish special emphasis has to be on building world-class road networks, integrated rail corridors, modern cargo facilities at airports and creation of logistics parks which need to be given a status equivalent to Special Economic Zones. It is necessary to realize that the benefits which can bestly be practiced in logistics industry can be brought about by the companies by establishing training intuitions, so that there is improvement in the overall service quality of the sector. Good storage and Warehousing facilities are important for the growth of the logistics industry. With the increase in the transportation of perishable products, the logistics agencies needs to give a lot of importance to enhancing the Warehousing facilities. Warehousing is required to go to the next level taking into account the changing dynamics of JIT manufacturing, global procurement and new models of sales and distribution. Emphasis on research and development is potent mainly because it encourages the use of indigenous technology which can make the industry cost competitive and can also bring about improvement in services thereby using better, effective and efficient services. Particular focus has to be on research in process excellence which can help to eliminate inefficiencies and bring Indian logistics on par with global practices.

Future prospects

The logistics firms are moving from a traditional setup to the integration of IT and technology to their operations to reduce the costs incurred as well as to meet the service demands. The growth of the Indian logistics sector depends upon its soft infrastructure like education, training and policy framework as much as the hard infrastructure. To support India's fast paced economy growth of logistics industry is very essential. It is estimated that the Indian logistics industry will continue to show robust growth of 10-15% annually, leading the pace of growth of the economy at large. The global economic outlook, indeed that of India is expected to significantly improve as India Inc begins to tackle the economic downturn. With a new government many policies are expected to be implemented which will give a fresh impetus to India's growth engine particularly in the corporate and SME sector which in turn will expand demand for the logistics

sector. With the implementation of GST, the logistics companies, which are currently forced to set up many small warehouses across multiple cities can set up just a few, big warehouses region wise and can follow the hub-and-spoke model for freight movement from the warehouses to the different manufacturing plants, wholesale outlets, retail outlets and the various POS. This growth is backed by the boom in the e-commerce sector and expansionary policies of the FMCG firms. This has increased the service geography of the logistics firms but they also have to meet the demands of quick delivery and tight service level agreements. The industry has moved from being just a service provider to the position which provides end to end supply chain solutions to their customers. Thus, all this has paved the way for further growth of Logistics and Warehousing industry in the coming years.

Risk and concerns

The Indian Transport industry is a growing avenue and widely opens for new entrepreneurs. The Company takes the extensive view of business risk. The Company always keep itself changing with the changed environment of operation, technology and innovative ideas. The Company however faces the following risk:

- ❖ **Competition Risk:** This risk from more players wanting a share in the same pie. Like in most industries, opportunities bring itself with more competition. We face different levels of competition in each segment, from domestic as well as multi-national players.
- ❖ **Regulatory Risk:** If we are unable to obtain required approvals and licenses in a timely manner, our business operations may be adversely affected.

Internal Control System:

The Company has in place adequate internal control system commensurate with size and nature of its business. These systems provide reasonable assurance in respect of providing financial and operational information, compliance with applicable statutes and safeguarding the assets of the Company.

“Annexure II” to the Independent Auditor’s Report of even date on the Standalone Financial Statements of Containerway International Limited

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 (“the Act”)

We have audited the internal financial controls over financial reporting of Containerway International Limited (“the Company”) as of 31 March 2018 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

Management’s Responsibility for Internal Financial Controls

The Company’s management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India (‘ICAI’). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company’s policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors’ Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the “Guidance Note”) and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor’s judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company’s internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31st March 2018, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

Containerway International Limited ("CIL" or "the Company"), is a 'Company limited by shares and listed on 'BSE limited' and Kolkata Stock Exchanges' in india .

The registered office of the Company is situated in 2A, Ganesh Chandra Avenue, Commerce House, 9th Floor, Room No.8A Kolkata WB 700013 IN .

SIGNIFICANT ACCOUNTING POLICIES

1. BASIS OF PREPARATION AND PRESENTATION

The financial statements have been prepared on the historical cost basis .

The financial statements of the Company have been prepared to comply with the Indian Accounting standards ('Ind AS'), including the rules notified under the relevant provisions of the Companies Act, 2013.

Upto the year ended March 31, 2017, the Company has prepared its financial statements in accordance with the requirement of Indian Generally Accepted Accounting Principles (GAAP), which includes Standards notified under the Companies (Accounting Standards) Rules, 2006 and considered as "Previous GAAP".

These financial statements are the Company`s first Ind AS standalone financial statements.

Company`s financial statements are presented in Indian Rupees, which is also its functional currency.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

a.) Revenue Recognition :

Transportation/logistics services/Brokerage income is recognized on completed service contract method. Prior Period and Extra Ordinary Items:

Prior Period and Extra Ordinary items having material impact on the financial affairs of the Company are disclosed separately.

b.) Tax Expenses

The tax expense for the period comprises current and deferred tax. Tax is recognised in Statement of Profit and Loss, except to the extent that it relates to items recognised in the comprehensive income or in equity. In which case, the tax is also recognised in other comprehensive income or equity.

- Current tax

Current tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities, based on tax rates and laws that are enacted or substantively enacted at the Balance sheet date.

- Deferred tax

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. The carrying amount of Deferred tax liabilities and assets are reviewed at the end of each reporting period.

c.) Financial instruments

i) Financial Assets

A. Initial recognition and measurement

All financial assets and liabilities are initially recognized at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities, which are not at fair value through profit or loss, are adjusted to the fair value on initial recognition. Purchase and sale of financial assets are recognised using trade date accounting.

B. Subsequent measurement

a) Financial assets carried at amortised cost (AC)

A financial asset is measured at amortised cost if it is held within a business model whose objective is to hold the asset in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

b) Financial assets at fair value through other comprehensive income (FVTOCI)

A financial asset is measured at FVTOCI if it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

c) Financial assets at fair value through profit or loss (FVTPL)

A financial asset which is not classified in any of the above categories are measured at FVTPL.

D. Other Equity Investments

All other equity investments are measured at fair value, with value changes recognised in Statement of Profit and Loss, except for those equity investments for which the Company has elected to present the value changes in 'Other Comprehensive Income'.

E. Impairment of financial assets

In accordance with Ind AS 109, the Company uses 'Expected Credit Loss' (ECL) model, for evaluating impairment of financial assets other than those measured at fair value through profit and loss (FVTPL).

Expected credit losses are measured through a loss allowance at an amount equal to:

The 12-months expected credit losses (expected credit losses that result from those default events on the financial instrument that are possible within 12 months after the reporting date); or

Full lifetime expected credit losses (expected credit losses that result from all possible default events over the life of the financial instrument)

For trade receivables Company applies 'simplified approach' which requires expected lifetime losses to be recognised from initial recognition of the receivables. The Company uses historical default rates to determine impairment loss on the portfolio of trade receivables. At every reporting date these historical default rates are reviewed and changes in the forward looking estimates are analysed.

For other assets, the Company uses 12 month ECL to provide for impairment loss where there is no significant increase in credit risk. If there is significant increase in credit risk full lifetime ECL is used.

Financial liabilities

A. Initial recognition and measurement

All financial liabilities are recognized at fair value and in case of loans, net of directly attributable cost. Fees of recurring nature are directly recognised in the Statement of Profit and Loss as finance cost.

B. Subsequent measurement

Financial liabilities are carried at amortized cost using the effective interest method. For trade and other payables maturing within one year from the balance sheet date, the carrying amounts approximate fair value due to the short maturity of these instruments.

CRITICAL ACCOUNTING JUDGMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY

The preparation of the Company's financial statements requires management to make judgement, estimates and assumptions that affect the reported amount of revenue, expenses, assets and liabilities and the accompanying disclosures. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods. Management believes that the estimates used in the preparation of the financial statements are prudent and reasonable. Future results could differ from these estimates.

A. Provisions

Provisions involving substantial degree of estimation in measurement are recognised when there is a present obligation as a result of past events; it is probable that there will be an outflow of resources and a reliable estimate can be made of the amount of the obligation. Contingent Liabilities are not recognised but are disclosed in the notes. Contingent Assets are neither recognised nor disclosed in the financial statements.

B. Recoverability of trade receivable

Judgments are required in assessing the recoverability of overdue trade receivables and determining whether a provision against those receivables is required. Factors considered include the credit rating of the counterparty, the amount and timing of anticipated future payments and any possible actions that can be taken to mitigate the risk of non-payment.

d.) FIRST TIME ADOPTION OF IND AS

The Company has adopted Ind AS with effect from 1st April 2017 with comparatives being restated. Accordingly the impact of transition has been provided in the Opening Reserves as at 1st April 2016. The figures for the previous period have been restated, regrouped and reclassified wherever required to comply with the requirement of Ind AS and Schedule III.
