MANAGEMENT DISCUSSION AND ANALYSIS REPORT

INDIAN AGROCHEMICAL INDUSTRY

Indian Economy has undergone a tremendous change over the past three decades. From being primarily agrarian it has continuously progressed towards secondary and tertiary sectors. Still agriculture continues to contribute extensively to the Indian GDP due to its significant implications on food security, employment and poverty.

The growth of agrochemical industry is directly proportional to the growth of the agriculture sector. Any improved situation like increased purchasing power with the farmers to buy more of agro-chemicals is a further to the industry. The scope of the agro-chemical industry in India is quite wide given the fact that there is still a considerable part of the country not touched by the modern technology and irrigation facilities.

The use of high-yielding variety seeds also has not been able to offset the decline in usage of irrigation and fertilizers. There is an urgent requirement of educating the farmers to understand the need of proper irrigation and use of agro-chemicals to enhance productivity. Since, the cultivable land cannot be further increased due to an aggressive industrial and residential demand due to urbanization, the only viable solution to bridge the demand-supply gap is through reduced crop losses through judicious and adequate use of agro-chemicals. Agrochemicals are manufactured as technical grades and converted into formulations for agricultural use. Technical grade Manufacturers, formulators producing the end products, distributors and end use customers constitute the Indian Agrochemical market. Technical grade manufacturers sell high purity chemicals in bulk to formulators. Formulators prepare the formulations by adding inert carriers, solvents, surface active agents etc. These formulations are then packed for retail sale, supplied to the distributors and finally sold to the end use customers (farmers).

India due to its inherent strength of low-cost manufacturing and qualified low-cost manpower is a net exporter of pesticides to countries such as USA & some European & African countries.

KEY CHALLENGES FOR THE INDUSTRY

Amidst the wide scope of the industry in India, there are some formidable challenges that stand in the way of the Indian agro-chemical industry. While many companies in India as well as the World are able to apply their risk strategies to a considerable extent, some factors still make it difficult to be curtailed.

- **Monsoon:** The most apparent challenge is the advent and degree of monsoon that the country receives in a year. For both Kharif and Rabi cultivation, rain is the most important factor and a good rain is always conducive to a good harvest and good business for the agro-chemicals market.
- **Use of Bio Products:** The growing awareness amongst the farmers about the usage of bio-products is eating away the share of agro-chemicals from the Indian market.
- **R&D Investments:** The industry being a volatile offshoot of the wider chemicals market, mostly sees an advent of manufacturers from Global arena participate and produce generic products itself, which contributes to almost 65% of the business, globally. There is however, a lesser investment into new products as there is a huge R&D cost involved, which is not feasible for every small or middle cap player of the industry. Indian companies usually spend approx. 1-2% of their turnover on R&D while corresponding spend by MNC's is 12-15%.
- **Distribution Systems:** The smaller your reach, the poorer your market. The outreach of these companies has to be larger in view of the end users who are widespread. To this effect, these companies need to operate with good network of sellers and effective network. Most manufacturers operate with 400-1000 distributors catering to 25,000-30,000 retailers if they have a Pan India presence. Companies keep their stocks in warehouses or depots from where it is supplied to distributors.

OUTLOOK

Regarding the Company's outlook, it can confidently claim that the Company will upgrade its manufacturing technology and add new molecules to its portfolio to further consolidate its position in the industry in future. Your Company has highly qualified and dedicated team of professionals in various work profile to focus on quality improvement in existing products, marketing the products to prevailing customers and exploring new domestic and overseas customers for the Company. Apart from loyal customer base that the Company is enjoying since last several years now, many more new domestic as well as overseas customers are added to the portfolio of the Company during the year & same is expecting to increase in near future due to Company's commitment of supplying high quality product in a time bound manner.

RISKS AND CONCERNS

- **Consumer Preference Risk:** Agriculture production has to be beneficial to the demand pattern in order to be useful. Due to which the Company may be under the risk of change in consumer preferences. However, the Company has been pioneering in adapting itself quickly to the observed and expected changes in the demand pattern through a drift in production.
- **Natural Risks:** The Company has diversified its operations to different and diverse varieties of Agrochemicals that could serve the farmer at different times as per the climatic conditions.
- **Raw Material Risks:** Rising raw material prices or input prices have therefore, been bit easier to be passed on to the farmers due to non-aggressive pricing mechanism.
- **Technology Risk:** This risk has always been on the top priority for the Company as it has been focusing on the R&D and Technology upgrading and adoption since its inception. The Company is trying to broaden the product basket in order to minimize this risk.
- **Foreign Exchange Risk:** Due to its International supply mechanisms, there is a foreign exchange risk to the Company; however it mitigates it through suitable hedging mechanisms.

In order to minimize the risk, a comprehensive and integrated risk management framework is followed by the Company.

NOTE NO. 1. SIGNIFICANT ACCOUNTING POLICIES

The Management has followed appropriate accounting policies consistently. Judgments and estimates are prudently and reasonably used so as to give a true and fair view of the state of affairs of the Company as at 31.03.2015 and of the profit of the Company for the year ended on that date.

1.1 Basis of Preparation of Financial Statements

The financial statements are prepared on accrual basis and under the historical cost convention in accordance with the generally accepted accounting principles in India (Indian GAAP), including the Accounting Standards notified under the relevant provisions of the Companies Act, 2013. The previous year figures have been reworked, regrouped, rearranged and reclassified wherever necessary and also to comply with the requirements of Schedule III under Section 129 of the Companies Act, 2013.

1.2 Use of Estimates

The preparation of financial statements requires estimates and assumptions to be made that affect the reported amount of assets and liabilities on the date of the financial statements, disclosure of contingent liabilities as on date of financial statements and the reported amount of revenues and expenses during the reporting period. Difference between the actual results and estimates are recognized in the period in which the results are known/ materialized.

1.3 Own Fixed Assets (Both Tangible and Intangible)

Fixed Assets are stated at cost net of recoverable taxes, less accumulated depreciation and impairment loss, if any. Net charges on foreign exchange contracts and adjustments arising from exchange rate variations attributable to the fixed assets are capitalized. Assets which are not ready for their intended use are disclosed under capital working progress.

1.4 Depreciation and Amortization

Depreciation on fixed assets is provided to the extent of depreciable amount on Written Down Value (WDV) method. Depreciation is provided based on useful life of the assets as prescribed in Schedule II to the Companies Act, 2013.

1.5 Impairment of Assets

An asset is treated as impaired when the carrying cost of assets exceeds its recoverable value and the Management periodically assesses using, external and internal sources, whether there is an indication of impairment of any assets. The Company foresees no such impairment indication as on the balance sheet date.

1.6 Foreign Currency Transactions

Export/Import Invoices in foreign currencies are recorded at the rate of exchange in force at the time of transactions. Provisions have been made as per Accounting Standard AS-11 issued by the Institute of Chartered Accountants of India for overseas debtors/creditors and other foreign currency commitments / foreign currency in hand for exchange rate difference at the end of the year.

1.7 Investments

All Investments are stated at cost and the same is consistently being followed. Investments in gratuity funds held with Life Insurance Corporation of India and Reliance Life Insurance Co. Ltd. are shown at net fund value as on date after netting off from provisions made as per actuarial valuation against its estimated liability. Excess of fund value ₹29,40,273/- as on 31.03.2015 over its total liability towards Gratuity Provision as per actuarial valuation is shown as long term Investment.

1.8 Inventories

As per practice consistently followed, the consumption of raw materials is net of Cenvat Credit availed.

Items of inventories are measured after providing for obsolescence, if any. Inventory has been valued at lower of cost or net realizable value. All Materials are valued on the basis of FIFO. In the case of finished goods cost comprises material, labour and factory overheads. Goods in process have been valued at raw material cost incurred up to the stage of production plus conversion cost apportioned. All stocks have been certified by the management.

The Company's manufacturing units are continuous processing units and are located at a remote areas i.e far away from local markets. It needs uninterrupted 24 hours operations of its plants and hence all major spare parts, accessories, components for its huge plants has to be kept in reserve/stock to ensure the uninterrupted 24 hours operation of the plant. With the passage of time and due to fast changing technology, some very old/obsolete Engineering stores and other spares out of it has rare possibility of its use and has a market price at almost scrap value. Keeping in view the above, Engineering stores and other spares are valued at cost or market price whichever is less. This practice is consistently being followed from year after year.
